

ARIZONA STATE UNIVERSITY  
COMMENCEMENT  
AND  
CONVOCATION  
PROGRAM

Fall 2016

December 12-14, 2016

**THE NATIONAL ANTHEM  
THE STAR SPANGLED BANNER**

O say can you see, by the dawn's early light,  
What so proudly we hailed at the twilight's last gleaming?  
Whose broad stripes and bright stars through the perilous fight  
O'er the ramparts we watched, were so gallantly streaming?  
And the rockets' red glare, the bombs bursting in air  
Gave proof through the night that our flag was still there.  
O say does that Star-Spangled Banner yet wave  
O'er the land of the free and the home of the brave?

**ALMA MATER  
ARIZONA STATE UNIVERSITY**

Where the bold saguaros  
Raise their arms on high,  
Praying strength for brave tomorrows  
From the western sky;  
Where eternal mountains  
Kneel at sunset's gate,  
Here we hail thee, Alma Mater,  
Arizona State.  
*—Hopkins-Dresskell*

**MAROON AND GOLD**

Fight, Devils down the field  
Fight with your might and don't ever yield  
Long may our colors outshine all others  
Echo from the buttes, Give em' hell Devils!  
Cheer, cheer for A-S-U!  
Fight for the old Maroon  
For it's Hail! Hail! The gang's all here  
And it's onward to victory!

Students whose names appear in this program  
have completed degree requirements.

# **MISSION STATEMENT**

## **UNIVERSITY COMMENCEMENT**

**University Commencement** represents the culmination of a student's academic achievement.

**It is a time of celebration and reflection for students, families, friends, faculty and staff.**

**It brings together a diverse community to share in the joy of accomplished goals.**

Arizona State University continually demonstrates its dedication to efficiency, technology and sustainability. The full University Commencement program is available to graduates on a reusable external flash drive. This change aligns with our growing institutional efforts to enhance sustainability practices, and our broader endeavors to employ technology in heightened service to our students.

The reusable external flash drive, combined with the abridged program distributed at fall ceremonies, yielded a 4.5 million page reduction in the amount of printed materials distributed at ceremonies over the week of graduation activities.

To order copies of the final book with all graduates names listed, email your request to [ASUCommencement@rrd.com](mailto:ASUCommencement@rrd.com) and someone will respond with payment instructions and order details.

## HISTORY OF HONORARY DEGREES

Harvard was the first university to confer honorary degrees in 1692. Since then it has become a recognized function of degree granting institutions. Honorary degrees are an opportunity for universities to single out people who have made contributions to society. At ASU, honorary degree recipients are nominated by faculty members. The six-member Academic Affairs Honorary Degrees Committee reviews faculty nominations for the Honorary Degree. It then recommends candidates to the president. The committee is appointed by and responsible to the president.

**\*RECESSION OF FACULTY AND CANDIDATES**

\*Audience should stand for these portions of the program.

At its founding, the College of Law at Arizona State University committed itself to innovation. While retaining important aspects of traditional legal education, Dean Willard H. Pedrick and the six well-respected faculty members whom Pedrick recruited to the desert from around the country, embraced a vision of the future of legal education, befitting a young school in a growing city.

Nearly from its inception, the College has provided extensive training in practical legal skills, offering students a firm foundation in lawyering before they become practicing attorneys. Today, the College of Law has one of the strongest legal writing programs in the country, offers a myriad of field placement opportunities, and has a variety of clinics that provide indigent members of the community with valuable legal assistance while offering hands-on experience in both litigation and transactional settings. Each year, approximately 90 percent of students participate in clinics, externships, or pro bono activities.

In the four decades since its founding, the College of Law, now renamed the Sandra Day O'Connor College of Law, has grown in size and national prominence, assembling an acclaimed faculty in the traditionally core areas of legal study while continuing to offer innovative approaches to legal education. The Center for Law, Science & Innovation is the nation's first and largest academic center focused on the intersection of law and science, and through it the College offers the country's only LL.M. in Biotechnology and Genomics, as well as innovative new programs in the Governance of Emerging Technologies; Personalized Medicine, Law & Policy; Public Health Law and Policy; Law and Sustainability; and Information and Communications Technology. The Indian Legal Program is arguably the leading program on Indian law in the country. It offers a strong curriculum, including the LL.M. in Tribal Policy, Law, and Government, the Certificate in Indian Law, and the Indian Legal Clinic, and trains students to be leaders in Indian Country. The College of Law's Center for Law and Global Affairs supports and inspires research, education, and practice regarding emerging forms of transnational governance that extend beyond the traditional paradigms of international law. The College of Law continues to reach further to provide opportunities for its students and graduates with innovative endeavors such as the creation of a nonprofit law firm, an employer outreach initiative, new international licensure programs, and a faculty and staff committed to student success.

The College of Law bridges the gap between theory and practice, and our faculty and students address the pressing public policy challenges of our time. In short, the Sandra Day O'Connor College of Law remains an innovator, building new models for 21st century public legal education in a dynamic, increasingly diverse, local, national, and global environment.

**The Barrett Story**

Barrett, The Honors College at Arizona State University, is a selective, residential college for academically outstanding undergraduates. Named “the gold standard” for honors colleges in the nation, Barrett often has more nationally-recognized merit scholars than Princeton, Yale or Stanford.

The college is supported by a \$15 million endowment that is used exclusively to benefit honors students and fund their projects. Barrett students major in any field offered at ASU’s campuses - Tempe, Polytechnic, Downtown or West. Barrett students are members of a small community of scholars who have direct access to our deans and receive personalized attention from approximately 45 honors faculty fellows and 55 staff members who care about them as individuals. In addition to these full-time honors college personnel there are more than 1900 university faculty members who teach and mentor Barrett students across all four campuses each year.

The \$140 million Barrett campus in Tempe was designed by students, faculty and staff working with nationally-renowned architects. The Barrett facilities at all four ASU campuses function as their own small honors communities on the ASU campuses where students enjoy the amenities and resources of a large university. This unique arrangement is a model for higher education and has often been referred to as “the best of both worlds” by students who thrive in a small college atmosphere but appreciate access to large university programs like Division I athletics and high profile lecturers.

## **Student Opportunities**

Barrett students take advantage of an array of opportunities that enrich the honors experience. They participate in study abroad programs that enable them to travel to foreign countries, immerse themselves in small classes taught by honors faculty, and experience different cultures and societies while earning honors credits. Barrett students receive record numbers of national and international graduate scholarships such as Rhodes, Fulbright, Truman and Marshall Scholarships. Top students from multiple majors live in a four-year residential community and secure leadership positions or participate in a full range of academic, cultural, service, professional development, travel, wellness, arts, social, entrepreneurial, and sustainability programming. Barrett students engage in cutting edge research with distinguished ASU faculty or through special partnerships with the Mayo Clinic, the Biodesign Institute and Intel. Students are developing iPhone applications, building robots, designing games, or developing tools to improve healthcare, meet global energy needs, provide clean water, or secure data and information privacy. There are over six hundred internship opportunities developed exclusively for Barrett students. We have students working with Goldman Sachs, Microsoft, Google, and The American Heart Institute. Barrett students secure internships in the governor's office, local congressional districts, and the United States Senate.

## **Signature Events**

Barrett hosts two signature events annually, the Centennial Lecture and the Rhodes Lecture. In 1985, the Flinn Foundation established an endowment to commemorate ASU's 100th year. The gift created the ASU Centennial Lecture, and in 1989 it provided the Barrett Honors College the resources to bring some of the world's most influential intellects to campus. The Centennial Lecture has become one of ASU's premier intellectual events featuring noted diplomats, scientists, playwrights, and authors. Each Centennial Lecturer has helped to strengthen the university and has provided students and community members with a memorable experience. Former Centennial lecturers include Edward James Olmos, dedicated actor, and community activist in 2010; Dr. Oscar Arias, Nobel Peace Laureate and two-time president of Costa Rica in 2011; and most recently, Henry Cisneros, the former Secretary of Housing and Urban Development and Mayor of San Antonio.

The Rhodes Lecture is given by the John J. Rhodes Chair in Public Policy and American Institutions at Barrett. The Chair was created to celebrate the career in public service of one of Arizona's and the nation's most distinguished leaders. The Rhodes Chair is dedicated to deepening theoretical and practical understanding of the many voices and forces that influence public policy. The Chair honors the values of personal integrity, fiscal responsibility, respect for persons, and international farsightedness exemplified in the Hon. John J. Rhodes' career. The 2016 Rhodes Chair was Mara Liasson, NPR national political correspondent, discussed the uniqueness of the 2016 presidential primary season during her lecture.

## **Barrett on all four campuses**

In fall 2009, Barrett, The Honors College at Arizona State University, opened the nation's first comprehensive four-year residential honors college within a top-tier Research I university that underscores its standing as the premier honors college in the nation. On the Tempe campus, the nine-acre college includes resident halls for 1700 students, several classrooms, a community center with student lounges, activity rooms, computer labs, a fitness center, a multi-room dining facility with a refectory, café, and administrative, faculty and staff offices.

The Barrett Honors College facilities on Downtown, Polytechnic and West campuses feature honors student lounges, libraries, kitchens, computer labs, student activity and study rooms, faculty and administrative offices, and honors residential communities.

Barrett at the Downtown Campus is home to about 650 honors students. The Barrett residential community, called “B-Town D-Town,” is located at Taylor Place at the heart of the campus and offers a living environment where students have easy access to ASU's downtown colleges and programs, as well as Phoenix's increasingly vibrant lifestyle.

Barrett at the Polytechnic campus gives students the feeling of studying at a small private college with the advantages of a large university. The honors residential community is unique among the ASU campuses – freshman honors students reside together on a floor of Century Hall, which opened in the summer of 2012 while upper-division honors students live in 2- and 3-bedroom houses in a special Barrett neighborhood on campus. Honors students also have access to a new dining hall and fitness facility.

Barrett at the West Campus provides the entire range of honors activities in a small liberal arts college setting. Barrett West students live and learn on the ASU West Campus with approximately 500 other residents. Honors students live in the new Casa de Oro, a residence hall that opened in fall 2012. The 5,000-square-foot Barrett Suite includes a computer lab, study rooms, a meeting area, a library, and staff and faculty offices.

With its outstanding programs, dedicated faculty and staff, and comprehensive facilities, Barrett is a national model for organizing resources to support the honors experience at all four campuses at ASU.

## ABOUT THE COLLEGE OF HEALTH SOLUTIONS

Arizona State University established the College of Health Solutions in May of 2012 as part of its strategic initiative to build a new model for health education. The college is a dynamic, growing, inter-professional enterprise that brings together the social and natural sciences, and humanities in the name of health. The college has experienced rapid enrollment growth and developed a number of new degree programs to satisfy the global demand for qualified health and health care professionals.

The multidisciplinary college includes the **School of Nutrition and Health Promotion, School for the Science of Health Care Delivery, International School of Biomedical Diagnostics, Department of Biomedical Informatics, Department of Speech and Hearing Science**, and programs in **Integrated Behavioral Health** and **Executive Education**.

The College of Health Solutions collaborates with academic units across the university as well as industry and community partners to drive change in health education, research and policy. Throughout each unit within the college, students have access to top-tier faculty, research facilities, and connectivity with allied programs committed to improvements in health outcomes and expanding patient access to care and resources that cannot be found at other universities.

COLLEGE OF INTEGRATIVE SCIENCES AND ARTS

The College of Integrative Sciences and Arts provides students across ASU with the knowledge and skills to comprehend and effectively engage the changing world of the 21st century at local, national and global levels.

We offer graduate and undergraduate degree programs that prepare students for a rapidly changing marketplace, as well as foundational instruction in humanities, social and natural sciences, mathematics, and professional fields. Our exploratory and major and career exploration programs empower students to find a major anywhere at ASU based on their interests, career goals and personality traits. Faculty support knowledge enterprise development by advancing research, clinical and creative activities that promote discovery, innovation and human understanding. The school is guided by the principles of student success, strategic partnerships within the university and the community, and interdisciplinary inquiry.

Theory, creativity and applied learning are integrated as students build entrepreneurial opportunities both inside the university and in their communities. In addition, the school serves the citizens of Arizona by offering a variety of outreach programs that engage people in cultural events and lifelong learning. The school is home to the Center for the Study of Race and Democracy, which serves as a leading interdisciplinary, problem-solving venture committed to engaged scholarship, and information dialogue involving the topics of race and democracy.

**COLLEGE OF LIBERAL ARTS AND SCIENCES**

Serving as the intellectual heart of this vibrant university, the College of Liberal Arts and Sciences is engaged in redefining what is expected of the well-educated person of the 21st century. Creatively synthesizing teaching, research and scholarship that span the humanities, social sciences and natural sciences, CLAS offers a challenging environment of learning and discovery in which students and faculty aspire to personal achievement and collaborative problem-solving.

The College of Liberal Arts and Sciences, the largest at ASU, is structured to help students identify and focus their dreams and aspirations. The college is in actuality many communities within communities where students meet peers and faculty who share their interests and passions through a rich diversity of schools, departments, majors, programs, institutes, centers, laboratories, clubs and organizations.

Faculty members in the college are committed to providing each of our students with the best education that we can, recognizing that the pace and complexity of the modern world will ask successful citizens and leaders to reinvent themselves time and again. Any institution of higher learning can train a student for a first job. Our goal is to equip our students with knowledge and skills for a lifetime of success. Although we are continually innovating and adapting as a college, the liberal arts remain the best foundation for successful careers and deeply rewarding personal and professional lives.

The College of Liberal Arts and Sciences—*Transforming learning, discovery and lives*

**COLLEGE OF NURSING & HEALTH INNOVATION**

The growth of ASU's College of Nursing & Health Innovation reflects our desire to do more, serve more and sustain innovation. Our mission drives us to offer the highest quality academic, research and clinical practice programs so that we can produce the next generation of evidence-based health professionals who will excel as clinicians, teachers, health advocates and researchers.

The challenges that permeate our health care system require innovative solutions that will positively impact patients and entire systems, locally and globally. Our curriculum and clinical experiences expose students to different types of delivery systems, equipping them with the tools and knowledge that will unleash their innovative thinking from day one. Interprofessionalism guides us as we build programs and curriculum to meet the needs of future health professionals. Our graduate and undergraduate programs continue to expand with a focus on program design and delivery that prepares graduates to work collaboratively within complex and dynamic patient care and health delivery systems.

Our online programs continue to expand access to the highest quality education as we focus on adopting new and better instructional tools while ensuring the rigor and quality that characterize the reputation of our programs.

**ABOUT THE PhD PROGRAM**

Program Director: **Bronwynne Evans, PhD, RN, FNGNA, ANEF, FAAN**

The PhD Program in Nursing and Health Innovation, one of only four interdisciplinary programs in nursing in the country, provides an academic environment that fosters scholarship, critical thinking, and creativity. Scholars who wish to develop advanced leadership skills in innovation, research, education, health care delivery, and policy issues can learn to generate and apply knowledge across practice settings.

**ABOUT THE DOCTOR OF NURSING PRACTICE PROGRAM**

Program Director: **Donna Velasquez, PhD, RN, FNP-BC, FAANP**

The Doctor of Nursing Practice (DNP) degree was established at Arizona State University in 2008. The Doctor of Nursing Practice degree is a practice-focused degree that prepares graduates to practice at the most advanced level of nursing. This program prepares nurse practitioners and nurse leaders to positively impact health outcomes at the individual and organizational level.

**ABOUT THE MASTER OF SCIENCE IN NURSING PROGRAMS**

Program Director: **Pauline Komnenich, PhD, RN**

ASU remains on the cutting edge in preparing nurse educators for 21st century nursing education through its innovative program. The MS, Nurse Educator (NED) concentration at the College of Nursing and Health Innovation is a pathway designed to prepare the new and experienced nurse to meet demands of the changing health care environment.

**ABOUT THE MASTER OF SCIENCE, CLINICAL RESEARCH MANAGEMENT PROGRAM**

Program Director: **JoAnn Pfeiffer, DrSC**

The Master of Science in Clinical Research Management (CRM) degree program prepares students to take the next step in their clinical research career by focusing their studies in the elements of leadership within the research industry. The CRM program is focused on management and leadership development in the pharmaceutical, medical device, research site, research institute, academic medical center, hospital, medical office, or other clinical research or drug development industry.

**ABOUT THE HEALTHCARE INNOVATION PROGRAM**

Program Director: **Rick Hall, PhD, RDN, FAND**

The Master of Healthcare Innovation degree program (MHI) is an interdisciplinary degree designed to prepare students to design, implement and lead transformation in health care. Students in this fully online program come from a wide variety of professions including health sciences, architecture, nutrition, exercise, engineering, business administration, journalism, the humanities, all with an interest in leading innovation in health and health care. Students search for and implement sustainable solutions for today's health care issues with an eye to the future within an interdisciplinary environment.

## ABOUT THE BACHELOR OF SCIENCE IN NURSING PROGRAM

Program Director: **Kimberly Vana, DNP, RN, FNP-BC, FNP-C**

The Bachelor of Science in Nursing (BSN) degree prepares beginning professional nurses who possess the theoretical foundation and the clinical competence to function in various health care settings. Graduates of ASU's nursing degree programs are prepared to respond to the vast and changing health care needs of individuals and communities. The Traditional and Year-Round Pre-licensure Nursing Programs are 8-semester programs, in which students advance to the upper-division clinical nursing program for their final four semesters. The Post-Baccalaureate Clinical Nursing Program (PBCNP) is available to students who have earned a Bachelor's degree in another discipline but desire to have a BSN degree.

## ABOUT THE RN-BSN PROGRAM

Program Director: **Diann Muzyka, PhD, RN**

The online RN-BSN program builds on the knowledge and skills the student learned in their associate degree or diploma program, especially in the areas of evidence based practice, leadership and management, and community/public health. The interactive course assignments enhance the student's written and verbal communication skills, clinical reasoning skills, teamwork, and information technology skills. Students will integrate new knowledge into their nursing practice.

## ABOUT THE CONCURRENT ENROLLMENT PROGRAM

Program Director: **Diann Muzyka, PhD, RN**

The Concurrent Enrollment Program (CEP) is designed for qualified nursing students who are interested in earning their BSN degree from ASU while simultaneously pursuing their Associate of Applied Science (AAS) in Nursing degree through a participating community college. The CEP is a rigorous program with a plan of study that enables students to build on the knowledge and skills learned in the AAS in nursing program.

### **COLLEGE OF PUBLIC SERVICE AND COMMUNITY SOLUTIONS**

The College of Public Service and Community Solutions is made up of four schools and multiple research centers—all with a shared goal of advancing research and discovery of public value, and furthering the economic, social, cultural and overall health of the communities that we serve.

Our degree programs cover the spectrum of public service, including public policy, social work, criminology and criminal justice, nonprofit leadership, emergency management, community development and more. We are preparing a workforce to take on complex issues. At the same time, our students are making a difference today. Through service-based learning, they put ideas into action.

Our research addresses challenges that affect us both locally and globally. We are developing solutions to issues ranging from child welfare to neighborhood safety, city management to human trafficking, water scarcity to tourism development. Together, we bring creativity, systems-level thinking and entrepreneurial spirit to our mission of creating, sustaining and promoting dynamic, prosperous communities.

## THE SCHOOLS IN THE COLLEGE OF PUBLIC SERVICE AND COMMUNITY SOLUTIONS

*The School of Community Resources & Development* advances the social, economic, environmental and cultural well-being of our local and global communities through instruction, discovery and service. We provide nationally recognized interdisciplinary research expertise and innovative academic programs with community development as our foundation. Our focus areas include community sports management, nonprofit leadership and management, parks and recreation management, and tourism development and management. Together, we make communities better places to live, work, play and visit.

*The School of Criminology & Criminal Justice* is one of the most respected in the field. Our program is rooted in the study of the causes of crime and systemic response to it. The core of the program focuses on the theories of criminality and evidence-based practices for responding to crime through the lenses of the three inter-related structures—policing, courts and corrections—that collectively comprise the criminal justice system. We prepare graduates for leadership and policy positions at the local, state and federal level.

*The School of Public Affairs* develops outstanding public leaders; people who are committed to making a difference in our world and who are well prepared to meet the rigorous demands and substantial challenges of the future. We maximize our impact through transdisciplinary research, project-based education, collaborative community engagement and innovative solutions. The only public administration program in the Phoenix area to be accredited by the National Association of Schools of Public Affairs and Administration (NASPAA), we are consistently ranked among the top 20 public affairs schools in the country.

*The School of Social Work* is one of the largest and most diverse social work programs in the world. We are committed to promoting social, political and economic justice with special emphasis on populations of the Southwest. We prepare social work practitioners and scholars who are committed to enhancing individual, family and group problem-solving capacities, maximizing human potential, and creating a more just and humane society.

**ABOUT THE HERBERGER INSTITUTE FOR DESIGN AND THE ARTS**

The Herberger Institute for Design and the Arts is the largest comprehensive design and arts school in the nation, located within a dynamic 21st-century research university.

With 5,000+ students, more than 675 faculty and faculty associates, nearly 160 staff members, 125 degrees and a tradition of top-ranked programs, the Herberger Institute is committed to redefining design and arts education in the 21st-century. Our college is built on a combination of disciplines unlike any other program in the nation, comprising schools of art; arts, media and engineering; design; film, dance and theatre; and music; as well as the ASU Art Museum. The ASU Art Museum supports research initiatives in addition to diverse community engagement projects that enable students and faculty to interact with the public through meaningful partnerships. This unique array of disciplines allows for distinctive opportunities for collaboration.

Our faculty lead students in an exploration of the issues affecting society today and in the future — the contemporary human condition — through design thinking, creative practice and research. We are continually striving to enable design and arts students to succeed beyond graduation.

**The Institute is dedicated to the following design principles:**

**Creativity is a core 21st-century competency.** Our graduates develop the ability to be generative and enterprising, to work collaboratively within and across artistic fields and to generate non-routine solutions to complex problems. With this broad exposure to creative thinking and problem-solving, our graduates are well prepared to lead in every arena of our economy, society and culture.

**Design and the arts are critical resources for transforming our society.** Artists must be embedded in their communities and dedicate their creative energy and talent to building, reimagining and sustaining our world. Design and the arts must be socially relevant and never viewed as extras or as grace notes. The Herberger Institute is committed to placing artists and arts-trained graduates at the center of public life.

**The Herberger Institute is committed to enterprise and entrepreneurship.** For most college graduates today, the future of work is unpredictable, nonlinear and constantly evolving. A recent study found that 47 percent of current occupations will likely not exist in the next few decades. At the Herberger Institute, our faculty, students and graduates are inventing the jobs and the businesses of the future; reimagining how art and culture get made and distributed; and coming up with new platforms and technology for the exchange of culture and the enrichment of the human experience. The legendary author and expert on city life Jane Jacobs talks about the abundance of "squelchers" — parents, educators, managers and leaders who tend to say no to new ideas. At the Herberger Institute, there are no squelchers. We embrace the cardinal rule of improvisation — always say: "Yes, and..."

**Every person, regardless of social background, deserves an equal chance to help tell our nation's and our world's stories.** Our creative expression defines who we are, what we aspire to and how we hope to live together. At the Herberger Institute, we are committed to projecting all voices – to providing an affordable education to every student who has the talent and the desire to boldly add their creative voice to the world's evolving story.

**Effectiveness requires excellence.** We know that our ability to solve problems, build enterprises and create compelling and socially relevant design and art requires high levels of mastery. By being the best in our chosen fields, we can stretch ourselves and our talents to make a difference in the world.

We encourage all of our alumni to continue to share their stories with us and to take an active role in the Herberger Institute Alumni Chapter. For more information on our alumni activities, please visit [herbergerinstitute.asu.edu/alumni](http://herbergerinstitute.asu.edu/alumni). ## ENGINEERING AT ARIZONA STATE UNIVERSITY

The Ira. A Fulton Schools of Engineering, ranked in the top 50 U.S. engineering schools, are home to more than 330 faculty and more than 20,300 students. The Fulton Schools were awarded over \$98 million in externally funded research awards in fiscal year 2016.

In 2015-2016, the Fulton Schools granted 3,536 undergraduate and graduate degrees. Today, more than 50,000 Fulton Schools alumni are advancing the fields of engineering and technology in Arizona and around the world.

To produce the engineers and innovations needed to address society's changing needs, we have crafted a visionary blueprint for an engineering school that transcends traditional organization around degrees and disciplines, and fosters a transdisciplinary approach to teaching and research. Through our six schools, we offer 24 undergraduate and 39 graduate degree programs that encourage innovative collaboration across disciplines, with faculty and students alike developing solutions that will have significant, lasting impact on our local and global communities. In addition to online options for degree programs including electrical engineering, software engineering and more, we offer professional development programs like Six Sigma.

**The School of Biological and Health Systems Engineering** provides a rich, interdisciplinary curriculum that prepares students to use engineering and scientific principles and methods to develop instrumentation, materials, diagnostic and therapeutic devices, artificial organs or other equipment and technologies needed in medicine and biology. Our biomedical engineering degree program strives to produce graduates with a broad-based education in both engineering and the life and natural sciences, with a focus on improving the overall quality of global healthcare. Graduates from the biological design doctoral program are creative thinkers prepared to work at the intersection of biology, engineering and computing to advance human health and quality of life.

**The School of Computing, Informatics, and Decision Systems Engineering** is home to computer engineering, computer science, computer systems engineering, engineering management, industrial engineering and informatics degree programs. From data to decisions, we cover the spectrum for designing the modern, information-driven society, engaging in the fundamental activities of sensing, optimizing, controlling and communicating. Computing serves as the engine that drives this transformation, linking together our school's fundamental activities. We are dedicated to creating new knowledge and technology that contributes to solving the major problems facing modern society.

**The School of Electrical, Computer and Energy Engineering** brings together university faculty, students and companies to develop collaborative relationships and solutions. Our computer engineering and electrical engineering degree programs

and research efforts are aligned with national and international efforts to address worldwide challenges in energy production and distribution, healthcare technology and delivery, sustainable development and economic growth, communications technology and information management and global security.

**The School for Engineering of Matter, Transport and Energy** leverages the synergy of engineering and science to develop new knowledge and technologies, and create innovative solutions to society's most pressing problems in energy, human health, public safety, exploration, environmental infrastructure and sustainability. Degree programs in aerospace engineering, chemical engineering, materials science and engineering, mechanical engineering, and solar energy engineering and commercialization are offered. We have gathered together a broad range of disciplines and world-class faculty members who are engaged in cutting-edge research, all of which contributes to a unique educational experience.

**The School of Sustainable Engineering and the Built Environment** provides a nexus for education and research that address the critical infrastructure needs of our society in an environmentally sound manner. The holistic approach in our degree programs covers the engineering expertise of civil, environmental and sustainable engineering, the design and construction principles of construction engineering and the project management and leadership skills of construction management.

**The Polytechnic School** is organized into seven academic programs that offer a breadth of engineering and technology-related degrees. The programs thrive under the guidance of more than 100 faculty members with deep expertise and industry experience in the important technological challenges that society faces. Located in the dynamic, growing Gateway region on the southeast edge of the Greater Phoenix metropolitan area, the school is home to some of the most advanced learning laboratories available to students on any university campus.

### **Ira A. Fulton**

#### ***Chairman of the Board and CEO, Fulton Homes***

Ira A. Fulton, founder and CEO of Arizona-based Fulton Homes, established an endowment of \$50 million in support of ASU's College of Engineering and Applied Sciences in 2003. The college was renamed the Ira A. Fulton Schools of Engineering in his honor. The gift has enabled the Fulton Schools to provide funding for scholarships, fellowships, research programs and investments in faculty, all integral to the school's goal to move from its position as a highly ranked U.S. program into the ranks of world-class institutions.

*“With this endowment, we are building an engine of educational and economic growth that will endure for generations. It is a gift of opportunity, prosperity, social equality and hope.”* – Ira A. Fulton

**ABOUT MARY LOU FULTON TEACHERS COLLEGE****WHY WE EXIST**

ASU’s Mary Lou Fulton Teachers College creates knowledge, mobilizes people and takes action to improve education.

**WHAT WE DO**

Drawing from a wide range of academic disciplines, we inspire creative thinkers to integrate ideas and practices into new and effective combinations that help us solve problems in education. In communities, we nurture a vibrant ecosystem of relationships that provides environments for us to test, refine and scale next practices for improving education. In individuals, we develop the skills of creative

intrapreneurship so they can bring people and ideas together to ignite meaningful change.

### **HOW WE DO IT**

Consistent with the charter and goals of ASU, and in line with the design principles of the New American University, we hold to four core values in pursuit of our mission. We:

- Pursue excellence at scale to achieve impact.
- Exercise leadership through innovation.
- Champion diversity of people and ideas.
- Share responsibility for the strength of communities.

### **MARY LOU FULTON (1933 – 2015)**

Anyone fortunate enough to have known Mary Lou Fulton — to celebrate with her and take pride in students’ accomplishments — is grateful to have had that privilege. So much of what we do at our college is an expression of her commitment to education and to providing the best possible opportunities for the greatest number of people.

Mary Lou said that, ever since she was very young, she was “in love with life.” That’s a perspective we hope all our graduates take with them into the next chapter of their lives and, especially, into their work with children.

Entrusted to manage an institution that bears the name of Mary Lou Fulton, all of us at the college strive to be worthy of her legacy. She will always be our inspiration to be the best that we can be.

**MESSAGE TO THE NEW COLLEGE GRADUATES**

Congratulations on your extraordinary achievement! The faculty and staff of New College offer our sincere best wishes for your continued personal and professional success. We all look forward to seeing your work in the world; we know you will make your mark as an ASU New College graduate. Today, you join a prestigious body of New College and ASU alumni, who have shared in some of the same remarkable experiences. Please stay in touch with us by joining the ASU Alumni Association, so we can continue to celebrate your triumphs and share the journey of our new students with you. You can take advantage of special new graduate membership rates (\$25 annual or \$300 lifetime dues) and become an active member of the ASU Alumni Association at [www.asu.edu/alumni](http://www.asu.edu/alumni).

**ABOUT THE NEW COLLEGE**

The New College of Interdisciplinary Arts and Sciences offers a nationally unique environment: a small college experience with the power of ASU's major research university resources. Working one-on-one with our cutting-edge faculty—often through our New College Undergraduate Inquiry and Research Experience program (NCUIRE), our students reshape the boundaries of knowledge in their fields of study. This prepares them for a future of reshaping the world outside of ASU.

New College was founded on a “new” way of thinking about the academy. Instead of reproducing the intellectual silos that separate fields of study in other institutions, our programs have been structured on the notion that if we break down the barriers between fields, we can think in more innovative ways, do more path-breaking work, offer more effective solutions to real-world problems. From our Interdisciplinary Arts and Performance degree that teaches students many forms of artistic expression and then asks into what mode a concept should be born; to our Forensics degree that brings together fields like chemistry, psychology, and legal studies; to our

Social Justice and Human Rights degree that explores sociological, historical, and contemporary cultural analyses of the issues, New College offers educational experiences that transcend more limited ways of thinking about the world.

The mission of New College is to prepare students to succeed in a globalized, diverse economy by providing them with solid disciplinary foundations that are coupled with an ability to think and act constructively across disciplines to discover answers to the complex problems that face society today and to create civic and economic well-being, within contexts ranging from the local to the global.

New College's programs build on the philosophy that inter-, multi-, and transdisciplinary education enhances our graduates' ability both to address the needs of business, industry, schools, and communities of this region and to meet the challenges of the twenty-first century. New College's Bachelor of Art and Bachelor of Science degrees include: American Studies; Applied Computing; Applied Mathematics; Applied Science; Biology; Biology—Environmental Science; Biology—Forensics; Biology—Pharmacology/Toxicology Communication; English; English—Secondary Education; Environmental Science; Ethnicity, Race & First Nations Studies; Forensic Science; History; History—Secondary Education; Interdisciplinary Arts & Performance; Interdisciplinary Arts & Sciences; Latin American Studies; Philosophy, Religion & Society; Political Science; Psychology; Psychology (Forensic Psychology); Psychology (Online); Social & Behavioral Sciences; Social & Cultural Analysis; Social and Cultural Analysis—American Studies; Social and Cultural Analysis—Ethnicity, Race, and Indigenous Studies; Social and Cultural Analysis—Latin American Studies; Social and Cultural Analysis—Peace Studies; Social and Cultural Analysis—Queer and Sexuality Studies; Social and Cultural Analysis—Women and Gender Studies; Sociology; Spanish; Statistics; and Women & Gender Studies. New College offers Master of Art degrees in Communication Studies, English, Interdisciplinary Studies, Social Justice & Human Rights, and Social Technologies and a Master of Science in Psychology.

**ABOUT THE SCHOOL FOR THE FUTURE OF INNOVATION IN SOCIETY**

Established in 2015, the School for the Future of Innovation in Society educates new generations of students to make innovation the object of systematic study. With our interdisciplinary faculty, students study the promises and challenges of new technologies and the big ideas that change our lives each day, and they explore how decisions we make today about innovations will transform the world around us.

We see our efforts and those of our students as part of a larger social fabric – local, regional, national, global – that informs our wants and needs about innovation. We are planning now for the kinds of futures that we want to inhabit. More information can be found at [sfis.asu.edu](http://sfis.asu.edu).

## ABOUT THE SCHOOL OF SUSTAINABILITY

2016 marks the 10th Anniversary of the nation's first School of Sustainability. Established by the Arizona Board of Regents in 2006, the school educates a new generation of scholars and practitioners. It creates innovative modes of scholarship by bringing together leaders, stakeholders and people from multiple disciplines to develop practical solutions to the most pressing sustainability challenges.

The school offers graduate programs leading to Master of Science, Master of Arts, Master of Sustainability Solutions, Master of Sustainability Leadership, Executive Master of Sustainability Leadership and Doctor of Philosophy degrees in sustainability, as well as undergraduate programs leading to Bachelor of Science and Bachelor of Arts degrees in sustainability. Degree programs focus on collaborative learning, transdisciplinary approaches and solution-oriented training to address sustainability challenges relating to areas such as energy and materials, water, ecosystems, urbanization, international development, social transformations, climate and food systems.

The School of Sustainability is a unit of the Julie Ann Wrigley Global Institute of Sustainability — the hub of Arizona State University's sustainability initiatives and the world's most innovative sustainability laboratory. The institute advances solutions, engagement, education and research for a better world. Both the school and the institute initiate and nurture work on issues of sustainability across the university and collaborate with other academic institutions, governments, businesses and industries, as well as community groups locally, nationally and globally. To learn more, please visit [sustainability.asu.edu](http://sustainability.asu.edu) and [schoolofsustainability.asu.edu](http://schoolofsustainability.asu.edu).

### WALTER CRONKITE SCHOOL OF JOURNALISM AND MASS COMMUNICATION

#### **About the School**

The Cronkite School is widely recognized as one of the nation's premier professional journalism programs. Rooted in the time-honored values — accuracy, responsibility, objectivity, integrity — that characterize its namesake, the school fosters journalistic excellence and ethics among students as they master the practical professional skills they need to succeed in the digital journalism world of today and tomorrow.

The Cronkite School's 1,700 students consistently lead the country in national competitions. Over the past decade, Cronkite has been No. 1 in the nation in the Society of Professional Journalists' Mark of Excellence competition and the Broadcast Education Association's Festival of Media Arts awards and has finished in the top 10 in the Hearst Journalism Awards each year. Cronkite students annually win more than 100 journalism and public relations awards.

Students are guided by a faculty that is made up of both award-winning professional journalists and world-class media scholars. Cronkite professors include Pulitzer Prize-winning journalists, digital media thought leaders, top TV producers and correspondents, major metropolitan newspaper editors and strategic communications experts. They are master teachers, writers and scholars who often speak around the globe on the most important topics facing journalism today.

The Cronkite School continues to lead the field of journalism education with its innovative use of the "teaching hospital" method, providing both unparalleled learning opportunities for students and important news content to the community, state, region and nation. Arizona PBS, one of the nation's largest public television stations, is now part of Cronkite, making it the largest media outlet operated by a journalism school in the world. Arizona PBS serves as a hub for the Cronkite School's full-immersion professional programs and a testing ground for new approaches in journalism.

Cronkite students participate in a dozen professional immersion programs, applying what they have learned in the classroom in real-world learning environments. Students cover the most important issues of the day from public affairs news bureaus in Phoenix and Washington. For Arizona PBS, they produce a nightly newscast that reaches 1.9 million households as well as a robust multimedia news website featuring in-depth regional stories. Students also report on sports from bureaus in Los Angeles and Phoenix. Recently, they covered the Summer Olympic Games in Rio de Janeiro.

Students in the Public Relations Lab develop campaigns for client companies, while Carnegie-Knight News21 multimedia journalists conduct national data-driven investigations into issues critical to Americans. In the Public Insight Network Bureau, students work with professional news organizations to deepen their connections to audiences, and in the New Media Innovation and Entrepreneurship Lab, they use digital technologies to forge the future of journalism.

More than 70 students in many of these professional immersion programs collaborated to create a statewide TV special on the deadly problem of heroin use that reached over 1 million viewers in January 2015. “Hooked: Tracking Heroin’s Hold on Arizona,” produced by the Cronkite School in partnership with the Arizona Broadcasters Association, received an Alfred I. duPont-Columbia Award, which has recognized the very best in broadcast journalism for more than 70 years. The win marked just the third time in the history of the contest that a Phoenix-based news operation received the honor.

Elsewhere at the school, the Donald W. Reynolds National Center for Business Journalism provides education and training to professional journalists and Cronkite Global Initiatives brings international journalists to the school for study and training.

All of these initiatives take place in a state-of-the-art building that is unparalleled in journalism education. ASU’s investment in the school has generated national and international attention from educators and media professionals who place the school in the top tier of all U.S. journalism schools. The Times of London, The New York Times and USA Today have pointed to the Cronkite School as a leading example of changes taking place at journalism schools across the country. These prestigious publications called the Cronkite School a pioneer, kindling a notion of new media that will shape how news is delivered and how people will stay informed in the future.

### **About Walter Cronkite**

ASU’s journalism program was named in honor of former CBS News anchor Walter Cronkite in 1984.

The relationship started when Tom Chauncey, longtime owner of the CBS affiliate in Phoenix and a leading supporter of journalism education at ASU, contacted his old friend in an effort to advance the program. An endowment on behalf of the program was soon established and the school was named after “the most trusted man in America.”

Over the next quarter of a century, Cronkite lent much more than his name to the school. He was closely involved — advising leadership, guiding students and faculty and traveling to Arizona each year to personally give the Walter Cronkite Award for Excellence in Journalism to one of the nation’s top journalists. The most special relationship, though, was with “our students,” as Cronkite would always call them. Young women and men, some with parents barely old enough to remember Cronkite behind the anchor desk, lit up when he walked into a classroom. They hung on his every word as he thoughtfully answered their questions about the profession

he so loved. They lined up just to shake his hand, and he loved every minute of it.

In what turned out to be Cronkite's last visit to ASU in 2007 before declining health prevented him from traveling, a group of 100 students gathered with just a few minutes of notice that Cronkite was in the building. He held them spellbound as he spoke about covering World War II, Vietnam, Apollo, Watergate and presidents from Truman to Reagan — and of how important “our school” was to him.

Although Cronkite died on July 17, 2009, before he was able to visit the new building, he remains an ever-present part of the school's heartbeat and direction.

Earlier this semester, the Cronkite School, CBS News and the Newseum celebrated the 100th anniversary of the birth of Cronkite with a large-scale celebration, featuring Cronkite School alumni and some of the nation's top journalists, including Gwen Ifill, Scott Pelley, Bob Schieffer and Lesley Stahl.

Cronkite's legacy lives on in the spirit and passion with which the school teaches both the skills to do journalism in today's media environment and the time-honored ethics and news values necessary to do it in the manner that would make him proud.

The Cronkite School has established a special memorial fund in Cronkite's name. For more information on the fund and to learn more about Cronkite's legacy and career, visit [cronkite.asu.edu/rememberingcronkite](http://cronkite.asu.edu/rememberingcronkite).

## **THE ARIZONA STATE UNIVERSITY MACE AND PRESIDENT'S CHAIN OF OFFICE**

In Medieval times, a mace was a hand-to-hand combat weapon. In about the year 1400 A.D., a mace evolved from a weapon to a ceremonial instrument used by academicians in rituals such as commencement and inaugurations. The oldest known ceremonial mace was that of the Faculty of Common Law of St. Andrew University in Scotland, used in 1438.

The Mace and Chain of Office are presented only at ceremonies in which faculty members are in full academic regalia, such as the Inauguration of the ASU President, University Commencement, Faculty Assemblies, Regents' and President's Professor Induction Ceremonies and Convocation.

The Mace is carried at the head of the procession and laid in a cradle, thus signifying the formal onset of the ceremony.

ASU's ceremonial mace and chain of office was created in observance of ASU's Centennial in 1985. Handcrafted by ASU Professor of Art, David Pimentel (1943-2004), the mace and chain was created with "austere elegance and traditional southwestern motifs." In keeping with these directions, Professor Pimentel constructed both items out of materials native to Arizona. The ASU Mace is a wood staff, approximately three and a half feet long, weighing eight pounds and made of hollowed and polished Mesquite.

The head of the ASU Mace has four sterling silver blades and is banded with copper, Morenci turquoise, and a silver ring on which the words Arizona State University are embossed. The turquoise inlay was cut and polished by Navajo jeweler Richard Charlie of Mesa. The ASU seal is embossed in silver on the heel of the mace.

The President's Chain of Office includes a silver rope woven from strands of hand-turned links, which holds a medallion six inches in diameter that reverses to reveal the ASU seal in gold on one side and the same in silver and turquoise on the other.

## HISTORY OF THE ACADEMIC COSTUME

The present-day academic costume seemingly originated at Oxford and Cambridge Universities in the 1300s. As the universities passed from ecclesiastical control, brighter colors distinguished the academic robe from the drab clerical gown. Colonial American universities based their academic regalia on the British system.

In the 1880s, a student movement centering in New England investigated the establishment of a "senior badge," to improve commencement week exercises and revive the traditions of university life. In 1893, an intercollegiate commission established a uniform code for caps, gowns and hoods for the various degrees.

Of the costume's three components, the hood is the most interesting. Originally it had three uses: as a head covering, as a shoulder cape, and as a bag in which alms could be collected. It is mentioned as early as 1480 in clerical literature. When large wigs were in vogue in Britain, the cape part of the hood was split in front and a narrow neckband inserted. The entire cape and hood was allowed to fall back as it is today, and it was never restored to the original style.

*Following is a list of the hood and tassel colors established by the Intercollegiate Code to represent departments of learning:*
