

ARIZONA STATE UNIVERSITY  
COMMENCEMENT  
AND  
CONVOCATION  
PROGRAM

Spring 2023

May 8-12, 2023

**THE NATIONAL ANTHEM  
THE STAR-SPANGLED BANNER**

O say can you see, by the dawn's early light,  
What so proudly we hailed at the twilight's last gleaming?  
Whose broad stripes and bright stars through the perilous fight  
O'er the ramparts we watched, were so gallantly streaming?  
And the rockets' red glare, the bombs bursting in air  
Gave proof through the night that our flag was still there.  
O say does that Star-Spangled Banner yet wave  
O'er the land of the free and the home of the brave?

**ALMA MATER  
ARIZONA STATE UNIVERSITY**

Where the bold saguaros  
Raise their arms on high,  
Praying strength for brave tomorrows  
From the western sky;  
Where eternal mountains  
Kneel at sunset's gate,  
Here we hail thee, Alma Mater,  
Arizona State.  
*—Hopkins-Dresskell*

**MAROON AND GOLD**

Fight, Devils down the field  
Fight with your might and don't ever yield  
Long may our colors outshine all others  
Echo from the buttes, Give em' hell Devils!  
Cheer, cheer for A-S-U!  
Fight for the old Maroon  
For it's Hail! Hail! The gang's all here  
And it's onward to victory!

Students whose names appear in this program are candidates for the degrees listed,  
which will be conferred subject to completion of requirements.

University commencement and convocation ceremonies are special events for all involved.  
Please show respect for everyone who has come to share in the experience. Individuals  
who engage in inappropriate or disruptive behavior may be removed from the event.

As a courtesy to those around you and to our graduating students,  
please turn off all electronics devices and phones during the ceremony.

Only working staff, graduating students and authorized guests are allowed in the graduate and  
staff entry points, or on the floor or field near graduate seating and the stage. This restriction applies  
to Gammage Auditorium, Desert Financial Arena, Sun Devil Stadium or other ceremony venues.

# **MISSION STATEMENT**

## **UNIVERSITY COMMENCEMENT**

**University Commencement** represents the culmination of a student's academic achievement.

**It is a time of celebration and reflection for students, families, friends, faculty and staff.**

**It brings together a diverse community to share in the joy of accomplished goals.**

Arizona State University continually demonstrates its dedication to efficiency, technology and sustainability. The full University Commencement program is made available online at [graduation.asu.edu/commencement\\_programs](https://graduation.asu.edu/commencement_programs).

This change aligns with our growing institutional efforts to enhance sustainability practices, and our broader endeavors to employ technology in heightened service to our students.

To order copies of the final book with all graduates names listed, email your request to [ASUCommencement@rrd.com](mailto:ASUCommencement@rrd.com) and someone will respond with payment instructions and order details. Note that final books will not be available until late Fall 2023 as the University must verify all graduates before their names are published.

Once the final program is complete, it will be posted at [https://graduation.asu.edu/commencement\\_programs](https://graduation.asu.edu/commencement_programs).

**MESSAGE FROM THE  
ARIZONA BOARD OF REGENTS**

Dear Graduate,

Congratulations on your graduation from Arizona State University! You've worked hard for this moment and we commend you for reaching this milestone.

Earning your college degree is one of the smartest decisions an individual can make in their lifetime. Through perseverance, persistence and resilience, you've reached this moment and are now positioned to make your mark on the world.

As you begin your new adventure, keep lifelong learning a priority! It will broaden your horizons and ensure your skills remain in demand in our always evolving world. Share your ideas with the world and remember to listen to others. Discuss ideas that are different than your own in a civil manner.

Recognizing an individual's point of view and treating differing opinions as an opportunity to learn is crucial to making progress in our society.

Be proud of your degree and the determination and hard work that brought you to this day. The board and universities are proud of you!

As an ASU graduate, you now represent our university and its ideals. Remember your alma mater – your friends, mentors, professors and all who supported you along the way. You are forever part of the Sun Devil community.

We wish you the best for a future that is full of promise and possibilities.  
Go Devils!

Sincerely,

Lyndel Manson  
Chair, Arizona Board of Regents

John Arnold  
Executive Director, Arizona Board of Regents

## HISTORY OF HONORARY DEGREES

Harvard was the first university to confer honorary degrees in 1692. Since then it has become a recognized function of degree granting institutions. Honorary degrees are an opportunity for universities to single out people who have made contributions to society. At ASU, honorary degree recipients are nominated by faculty members. The six-member Academic Affairs Honorary Degrees Committee reviews faculty nominations for the Honorary Degree. It then recommends candidates to the president. The committee is appointed by and responsible to the president.

## HONORARY DEGREE CITATIONS

### DR. VIVEK H. MURTHY

Dr. Vivek H. Murthy was confirmed by the U.S. Senate in March 2021 to serve as the 21st Surgeon General of the United States. As the Nation's Doctor, the Surgeon General's mission is to help lay the foundation for a healthier country, relying on the best scientific information available to provide clear, consistent, and equitable guidance and resources for the public. And as the Vice Admiral of the U.S. Public Health Service Commissioned Corps, Dr. Murthy commands a uniformed service of over 6,000 dedicated public health officers, serving the most underserved and vulnerable populations domestically and abroad.

While serving as 21st Surgeon General, Dr. Murthy is focused on drawing attention to and working across government to address a number of critical public health issues, including the growing proliferation of health misinformation, the ongoing youth mental health crisis, well-being and burnout in the health worker community, and social isolation and loneliness. Additionally, he serves as a key advisor to President Biden's COVID-19 pandemic response operation.

Occupying a prominent location next to the Washington Monument, the nearly 400,000-square-foot National Museum of African American History and Culture is the nation's largest and most comprehensive cultural destination devoted exclusively to exploring, documenting and showcasing the African American story and its impact on American and world history.

During his previous tenure as 19th Surgeon General, under President Obama, Dr. Murthy created initiatives to tackle our country's most pressing public health challenges. The first Surgeon General of Indian descent and the youngest active-duty flag officer in federal uniformed service, he helped lead the national response to a range of health challenges, including the Ebola and Zika viruses, the opioid crisis, and the growing threat of stress and loneliness to Americans' physical and mental wellbeing. Dr. Murthy also continued the office's legacy on preventing tobacco-related disease, releasing a historic Surgeon General's report on e-cigarettes and youth. And in 2016, he issued the first Surgeons General's Report on Alcohol, Drugs and Health, in which he challenged the nation to expand access to prevention and treatment, and to recognize addiction as a chronic illness, not a character flaw.

Prior to his second confirmation, Dr. Murthy co-chaired President-elect Joe Biden's COVID-19 Advisory Board from November 2020 to January 2021. Before entering government service, Dr. Murthy co-founded VISIONS, a global HIV/AIDS education organization; the Swasthya Project, a rural health partnership that trained women in South India to become community health workers and educators; TrialNetworks, a technology company dedicated to improving collaboration and efficiency in clinical trials; and Doctors for America, a nonprofit mobilizing physicians and medical students to improve access to affordable care. His scientific research has focused on vaccine development and the participation of women and minorities in clinical

trials. And as an internal medicine doctor at Brigham and Women's Hospital and at Harvard Medical School, Dr. Murthy cared for thousands of patients and trained undergraduates, medical students, and medical residents.

Raised in Miami, Dr. Murthy received his Bachelor of Arts degree from Harvard, his MD from the Yale School of Medicine, and his Masters in Business Administration from the Yale School of Management. A renowned physician, research scientist, entrepreneur, mango aficionado, and author of the bestselling book *Together: The Healing Power of Human Connection in a Sometimes Lonely World*, Dr. Murthy is today among the most trusted voices in America on matters of public health. He lives in Washington, DC with his wife, Dr. Alice Chen, and their two children

Arizona State University is honored to confer upon the Dr. Vivek H. Murthy the degree of Doctor of Science *honoris causa* in recognition of his leadership in public health, service to three Presidents of the United States, and contributions to addressing youth mental health.

## JUDY WOODRUFF

Broadcast journalist Judy Woodruff is the Senior Correspondent for the *PBS NewsHour*, after serving for 11 years as its Anchor and Managing Editor. During 2023 and 2024, she is undertaking a reporting project, “America at a Crossroads,” to better understand the country’s political divide. She has covered politics and other news for more than four decades at CNN, NBC, and PBS.

The recipient of numerous awards, including the Peabody Journalistic Integrity Award, the Poynter Medal, an Emmy for Lifetime Achievement, and the Radcliffe Medal, she and the late Gwen Ifill were together awarded Arizona State University’s Walter Cronkite Award for Excellence in Journalism after Woodruff and Ifill were named co-anchors of the *PBS NewsHour* in 2013, marking the first time an American national news broadcast would be co-anchored by two women

For 12 years, Woodruff served as anchor and senior correspondent for CNN, where her duties included anchoring the weekday program, *Inside Politics*. At PBS from 1983 to 1993, she was the chief Washington correspondent for *The MacNeill/Lehrer NewsHour*. From 1984-1990, she also anchored PBS’ award-winning weekly documentary series, *Frontline with Judy Woodruff*. In 2011, Woodruff was the principal reporter for the PBS documentary *Nancy Reagan: The Role of a Lifetime*. And in 2007, she completed an extensive project for PBS and other news outlets on the views of young Americans called *Generation Next: Speak Up. Be Heard*.

In 2006, Woodruff was a visiting professor at Duke University’s Terry Sanford Institute of Public Policy. In 2005, she was a visiting fellow at Harvard University’s Joan Shorenstein Center on the Press, Politics and Public Policy. From 2006-2013, she anchored a monthly program for Bloomberg Television, *Conversations with Judy Woodruff*.

At NBC News, Woodruff was White House correspondent from 1977 to 1982. For one year after that she served as NBC’s Today show chief Washington correspondent. She wrote the book, *This is Judy Woodruff at the White House*, published in 1982 by Addison-Wesley.

Woodruff is a founding co-chair of the International Women’s Media Foundation, an organization dedicated to promoting and encouraging women in communication industries worldwide. She serves on the boards of trustees of the Freedom Forum and The Duke Endowment. Formerly she was a trustee of the Carnegie Corporation of New York and the Urban Institute, and a member of The Knight Foundation Commission on Intercollegiate Athletics.

Woodruff is a graduate of Duke University, where she is a trustee emerita. She lives in Washington, DC, with her husband, journalist Al Hunt, and they are the parents of three children.

Arizona State University is honored to confer upon Judy Woodruff the degree of Doctor of Humane Letters *honoris causa* in recognition of her contributions to American democracy and journalistic integrity.

**SANDRA DAY O’CONNOR COLLEGE OF LAW**

In 1965, President G. Homer Durham hired Willard H. Pedrick to become Arizona State University’s first law school dean and tasked him with the responsibility of building, literally from the ground up, its very first law school. Located on ASU’s Tempe campus, Armstrong Hall housed the law school until its move to the downtown Phoenix campus in 2016.

Over 50 years ago, 83 students graduated with their Juris Doctor from the ASU College of Law. Today, over 650 students graduate annually from ASU Law, receiving one of our five degrees: Juris Doctor (JD), Master of Laws (LLM), Master of Legal Studies (MLS), Master of Human Resources and Employment Law (MHREL), or Master of Sports Law and Business (MSLB).

The law school has accomplished many significant milestones in its 50+ years. In 2006, the law school was renamed to honor Justice Sandra Day O’Connor, the first woman appointed to the Supreme Court of the United States. It is a privilege—and a great responsibility—to be entrusted with Justice O’Connor’s (ret.) name and legacy. Students continue to personify Justice O’Connor’s legacy and lifetime work to advance civics education and civic engagement and discourse, by donating more than 100,000 hours of public service each year.

ASU Law has risen in national and world rankings, continues to attract highly credentialed students and offers more personalized programs than any other law school in the country.

---

In 2016, ASU Law moved to the Beus Center for Law and Society in the ASU downtown Phoenix campus, further enhancing the law school's service to the community and providing students access to the best legal opportunities. Students can also study beyond Phoenix at ASU campuses in Washington, D.C. and Los Angeles, as well as participate in global study abroad and externship or internship opportunities.

ASU Law's world-class faculty and administrators provide students with unparalleled opportunities to gain insights and practical skills needed to address legal challenges locally, nationally, and globally. ASU Law also prides itself on its network of engaged alumni and its relationship to the broader legal community, which has fully embraced the law school and is dedicated to the success of its graduates.

ASU Law has ranked as a top 30 best law school in the nation for eight consecutive years and is the youngest law school in the top 30 as ranked by U.S. News & World Report. ASU Law also has five programs ranked in the top 30 and consistently ranks high in job placement. The law school is also No. 1 in the state for student outcomes and No. 1 in the state for bar passage, often exceeding the national average.

**The Barrett Story**

Barrett, The Honors College at Arizona State University, is a selective, residential college for academically outstanding undergraduates. Named “the gold standard” for honors colleges in the nation, Barrett is widely considered the model for honors education in the US and abroad.

Barrett stands alone in dedicated resources, size and complexity with a presence on four ASU campuses, a multi-million dollar endowment used to support honors students and their projects, and dedicated Deans, faculty and staff that include seven administrators, 45 Faculty Fellows, 64 staff within the college and more than 1,900 university faculty members who teach and mentor Barrett students who major in any field across all four campuses.

Barrett represents a powerful and unique combination of the special care and attention an honors student should expect from an excellent residential liberal arts college, with the vast program choices and research mentoring resources of a vibrant Research I University. Barrett students are members of a small community of scholars known nationally for its number of National Merit, National Hispanic, and Flinn scholars, and nationally ranked numbers of recipients of Fulbright, Truman, Goldwater, Udall, and Marshall Fellowships.

**Student Opportunities**

ASU’s size, number of majors, student organizations, and student support services is an advantage and provides important opportunities for Barrett students to engage in meaningful ways. With the largest college residential profile across all four campuses, Barrett significantly contributes to the student life of the University. Barrett students demonstrate leadership in the classroom, in research labs, in mentoring and tutoring other students, and in securing leadership roles in student government, Changemaker Central, Greek Life and over 800 student organizations. Barrett offers a full range of student-driven academic, service, wellness, arts, cultural, social, entrepreneurial, and sustainability programming. Barrett students positively impact ASU and our local, national, and global communities through internships, service, travel, and other professional development opportunities within Barrett and across ASU. Barrett students participate in study abroad programs that enable them to travel to foreign countries, immerse themselves in small classes taught by honors faculty, and experience different cultures and societies while earning honors credits. Barrett students engage in cutting edge research with distinguished ASU faculty or through special partnerships with the Mayo Clinic, the Biodesign Institute and Intel. Students are developing iPhone applications, building robots,

designing games, or developing tools to improve healthcare, meet global energy needs, and provide clean water, or secure data and information privacy. Many students also take advantage of internship opportunities developed exclusively for Barrett students with organizations like Mayo Clinic, Goldman Sachs, Microsoft, Google, The American Heart Institute and local congressional districts, the governor's office, and the United States Senate.

### **Signature Events**

Barrett hosts annual signature events, the Centennial Lecture, the Rhodes Lecture, and the Distinguished Global Leader Series. In 1985, the Flinn Foundation established an endowment to commemorate ASU's 100th year, creating the ASU Centennial Lecture. Barrett Honors College has brought some of the world's most influential intellectuals to campus: noted diplomats, scientists, playwrights, and authors. Former Centennial lecturers include Edward James Olmos, dedicated actor, and community activist in 2010; Dr. Oscar Arias, Nobel Peace Laureate and two-time president of Costa Rica in 2011; and most recently, Maria Teresa Kumar founding CEO of Voto Latino (c4) and Voto Latino Foundation (c3) and an Emmy-nominated on-air analyst for MSNBC. María Teresa Kumar deeply understands and is personally part of the fastest growing demographic group in America. This has given her a unique platform to shape some of the most pressing issues of our time, including police reform, gender pay equity, immigration, diversity and inclusion in tech, protecting the vote, and climate justice. She has dedicated her career to engaging the public to build democracy and protect human rights.

The Rhodes Family created the John J. Rhodes Chair in Public Policy and American Institutions at Barrett to celebrate the career in public service of one of Arizona's and the nation's most distinguished leaders. The Rhodes Chair is dedicated to deepening theoretical and practical understanding of the many voices and forces that influence public policy. The Chair honors the values of personal integrity, fiscal responsibility, respect for persons, and international farsightedness exemplified in the Hon. John J. Rhodes' career. The 2023 Rhodes Chair featured Colombian American actress and author, Diane Guerrero.

The Distinguished Global Leader Series was established by Barrett Honors College as a new cornerstone global engagement program in 2017. The program invited noted leaders in government and industry to spend time on campus sharing their knowledge and expertise with honors students and faculty. During the program's first years, Barrett has hosted short stay visits with Former Finnish Defense Minister Elizabeth Rehn, Former US Secretary of State Condoleezza Rice, Former Chief Secretary of Hong Kong Anson Chan, Uruguayan Ambassador to the United States Carlos Gianelli, and former Ecuadorean Foreign Minister Guillaume Long. In addition, the Former President of the Republic of Latvia, Dr. Vaira Vike-Freiberga, was the first Leader-In-Residence and the Fall 2019 was Louise Fréchette, Former United Nations Deputy Secretary-General. During their stays at the Honors College, these distinguished leaders deliver keynote speeches, meet with small groups of students to discuss current events and participate in honors-level courses.

### **Barrett on All Four Campuses**

In fall 2009, Barrett, The Honors College at Arizona State University, opened the nation's first comprehensive four-year residential honors college within a top-tier Research I university that underscores its standing as the premier honors college in the nation. The \$140 million Barrett campus in Tempe was designed by students, faculty and staff working with nationally-renowned architects. On the Tempe campus, the nine-acre college includes residence halls for 1,700 students, several classrooms, a community center with student lounges, activity rooms, computer labs, a fitness center, a multi-room dining facility with a refectory, café, and administrative, faculty and staff offices. In fall 2014, Barrett expanded the residential college experience to another 1,600 upper division honors students living in the 18 acre Vista Del Sol Community, across the street.

The Barrett Honors College residential communities on the Downtown, Polytechnic, and West campuses feature honors student lounges, libraries, kitchens, computer labs, student activity and study rooms, faculty and administrative offices. Barrett at the Downtown Campus is home to about 750 honors students. The Barrett residential community, called "B-Town D-Town," is located at Taylor Place at the heart of the campus and offers a living environment where students have easy access to ASU's downtown colleges and programs, as well as Phoenix's increasingly vibrant lifestyle. Barrett at the Polytechnic campus gives students the feeling of studying at a small private college with the advantages of a large university. The honors residential community is unique among the ASU campuses – freshman honors students reside together on a floor of Century Hall, which opened in the summer of 2012 while upper-division honors students will enjoy a brand new residence hall to open next fall. Barrett at the West Campus provides the entire range of honors activities in a small liberal arts college setting. Barrett West students live and learn on the ASU West Campus with approximately 500 other residents. Honors students live in the Casa de Oro residence hall. The 5,000-square-foot Barrett Suite includes a computer lab, study rooms, a meeting area, a library, and staff and faculty offices.

With its outstanding programs, dedicated faculty and staff, and comprehensive facilities, Barrett is a national model for organizing resources to support the honors experience at all four campuses at ASU. This unique arrangement is a model for higher education and has often been referred to as "the best of both worlds" by students who thrive in a small college atmosphere but appreciate access to large university programs like Division I athletics and high profile lecturers.

The Moeur Award is Arizona State University's oldest, continuing honor. It was established in 1901 by Dr. Benjamin B. Moeur and Honor Anderson Moeur, and is now sponsored annually by the Arizona State University Alumni Association. The award is presented at each Commencement ceremony to those individuals who have attained the highest academic standing in any four-year curriculum during their undergraduate years at ASU. All courses of the curriculum must be completed at ASU.

## **ABOUT THE COLLEGE OF GLOBAL FUTURES**

We all share a stake in the future. The College of Global Futures is dedicated to creating a sustainable, equitable, and vibrant future for everyone.

The College of Global Futures, based within the Julie Ann Wrigley Global Futures Laboratory, prepares next-generation leaders with the knowledge, skills and mindsets they need to tackle complex global challenges. Home to the School for the Future of Innovation in Society, the School of Sustainability, the School of Complex Adaptive Systems and the School of Ocean Futures, the college fosters new interactions between students, staff, faculty and partners. These interactions elevate our ability to understand complex, integrated social, environmental and technical systems, drive responsible innovation, and lead to ethical interventions that ensure a just, healthy and fulfilling future for everyone. Global Futures students learn how to develop enduring solutions that benefit all people everywhere on a thriving, healthy planet.

## **ABOUT THE SCHOOL FOR THE FUTURE OF INNOVATION IN SOCIETY**

When we innovate, are we thinking critically about social and technical systems in a way that anticipates potential concerns so that we can be confident that what we are creating is both useful and good for our global future?

The School for the Future of Innovation in Society envisions responsible innovation at scale. Our students anticipate societal challenges and work across disciplines to examine areas such as global technology and development, biomedical and health ethics, public interest technology and policies for emerging technologies. We are grounded in the belief that by considering the ways in which we translate imagination into innovation, engaging the public and exploring the social impacts of technological and scientific advancements, we collectively build more just and equitable futures for all.

## **ABOUT THE SCHOOL OF SUSTAINABILITY**

School of Sustainability students, diverse in their backgrounds and interests, work with faculty and researchers toward a common goal: to foster innovative research, impactful education and engaged communities to achieve environmental integrity, social equity and well-being. Sustainability integrates social, economic and environmental dimensions to develop enduring and equitable solutions to global challenges.

Learning tracks within the school include energy and technology, international development, ecosystems management, urban dynamics, food systems, policy and governance, and sustainability leadership. Our curriculum is grounded in experiential learning and practical faculty-led research, equipping graduates of the School of Sustainability with the skills and tools to make positive impacts in a rapidly changing world.

---

## ABOUT THE SCHOOL OF COMPLEX ADAPTIVE SYSTEMS

Uncertainty, scalability, thresholds, tipping points, path dependence...these are conditions that influence the most pressing issues facing societies across the globe. The School of Complex Adaptive Systems explores these challenges, develops solutions and suggests interventions that enhance the resilience and well-being of our planet and our shared global futures.

Our planet is the ultimate complex system with many intertwined subsystems that envelop natural, social and technological systems and transcend traditional disciplinary boundaries. This visionary school engages wide-ranging national and international collaborations to advance the exploration of these systems and disseminate fundamental transdisciplinary knowledge through a unique set of academic graduate offerings.

## ABOUT THE SCHOOL OF OCEAN FUTURES

The School of Ocean Futures addresses the current and future states of the planet's largest biome – our oceans – by exploring and investigating the challenges they experience due to increasing pressure from human activities. The School of Ocean Futures links research and teaching facilities in the Pacific and Atlantic oceans with the cutting-edge research facilities on ASU's Tempe campus to provide students with a wide array of experiential learning opportunities that will prepare them to conduct work of significant impact.

**ABOUT THE COLLEGE OF HEALTH SOLUTIONS**

The College of Health Solutions translates health research and discovery into practice and prepares students to address the challenges facing people to stay healthy, improve their health and manage chronic disease.

Since its founding in 2012, the college has experienced rapid growth. Its degree programs are designed to meet the global demand for health and health care professionals who are prepared to improve health outcomes for people and communities. Programs are offered in biomedical informatics and biomedical diagnostics; health care systems; health sciences and medical studies; movement sciences; nutrition; population health; and speech and hearing science.

Students learn from renowned research and clinical faculty, engage in experiential activities and are encouraged to contribute to innovative health research. They participate in solving health challenges through internships, interdisciplinary research teams and global study abroad experiences.

Students, faculty and staff at the College of Health Solutions, along with community partners, work together toward a common goal of optimizing the health of the diverse populations we serve. Graduates of the college are uniquely prepared to make an impact in the health workforce and shift the focus of health from sickness to wellness.

**COLLEGE OF INTEGRATIVE SCIENCES AND ARTS**

The College of Integrative Sciences and Arts (CISA) is an exciting hub for applied and experiential learning. In other words, we encourage learning through doing.

We offer graduate and undergraduate degree programs that prepare students to be workforce-ready and excel in a rapidly changing marketplace. Theory, creativity and career-connected learning are integrated as students build entrepreneurial opportunities both inside the university and in their communities. We strive to be as diverse as possible to ensure that our diverse populations throughout the state of Arizona and the Phoenix metropolitan area can find their academic home and success in CISA.

As one of three liberal arts colleges at ASU, the College of Integrative Sciences and Arts offers foundational instruction in humanities, social and natural sciences, mathematics and professional fields to provide students across ASU with the knowledge and skills to comprehend and effectively engage the changing world of the 21st century locally, nationally and globally.

---

The college is guided by the principles of student success, strategic partnerships within the university and the community, and interdisciplinary inquiry. Faculty members support knowledge enterprise development by advancing research, clinical and creative activities that promote discovery, principled innovation and human understanding. In addition, the college serves the people of Arizona by offering a variety of cultural events and opportunities for lifelong learning.

#### THE COLLEGE OF LIBERAL ARTS AND SCIENCES

As the academic heart of Arizona State University, The College of Liberal Arts and Sciences fosters unmatched access, educational excellence, and interdisciplinary inquiry to generate solutions for the changing world. Our diversity and dynamism ignite continued growth and development in any field of study, from space exploration and chemistry to history and justice studies, to create global citizens for the 21st century.

We unite our academic disciplines — the analytical ability of natural scientists, the creativity of humanities scholars and the curiosity of social scientists — to harness the power of our interdisciplinary nature. We encourage our students to follow their dreams, pursue their passions and accomplish their goals in order to create a better future for the next generation and beyond.

Our faculty personify a broad vision of legendary academic scholarship at the forefront of global innovation. They teach our scholars how to adapt to new challenges and a changing landscape so they're capable of tackling tomorrow's challenges with ease. Any institution of higher learning can train a student for a first job, but we'd rather create master learners who are equipped with the right knowledge and skills for a lifetime of success. The liberal arts and sciences remain the best foundation for successful careers and deeply rewarding personal and professional lives.

We transform learning, accelerate discoveries and change lives.

#### HONOR CORDS

Some of our undergraduate degree candidates wear maroon and/or gold honor cords. These cords designate students who have completed at least 56 resident credit hours at ASU and who have attained the following grade point averages:

Summa Cum Laude = Maroon and Gold cords, 3.80 to 4.0 GPA  
Magna Cum Laude = Gold cord, 3.60 to 3.79 GPA  
Cum Laude = Maroon cord, 3.40 to 3.59 GPA

## **EDSON COLLEGE OF NURSING AND HEALTH INNOVATION**

The growth of the Edson College of Nursing and Health Innovation reflects our desire to do more, serve more and sustain innovation. Our mission drives us to offer the highest quality academic, research and clinical practice programs so that we can produce the next generation of evidence-based health professionals who will excel as clinicians, teachers, health advocates and researchers.

The challenges that permeate our health care system require innovative solutions that will positively impact patients and entire systems, locally and globally. Our curriculum and clinical experiences expose students to different types of delivery systems, equipping them with the tools and knowledge that will unleash their innovative thinking from day one. Interprofessionalism guides us as we build programs and curriculum to meet the needs of future health professionals. Our graduate and undergraduate programs continue

to expand with a focus on program design and delivery that prepares graduates to work collaboratively within complex and dynamic patient care and health delivery systems. Our online programs continue to expand access to the highest quality education as we focus on adopting new and better instructional tools while ensuring the rigor and quality that characterize the reputation of our programs.

### **ABOUT THE PhD PROGRAM**

The PhD in Nursing and Healthcare Innovation is one of the few interdisciplinary programs in nursing in the country, providing an enriching academic environment that fosters scholarship, critical thinking, and interprofessional collaboration. The PhD degree creates leaders in health science, health education and policy, and health innovation through preparation in the research skills necessary to generate, apply, and disseminate scientific knowledge.

### **ABOUT THE DOCTOR OF NURSING PRACTICE PROGRAM**

The Doctor of Nursing Practice Program (DNP) is a practice-focused doctorate that prepares graduates to practice at the most advanced level of nursing. Graduates of this program apply and integrate research to practice using innovative approaches to improve health care outcomes of populations and individuals across diverse settings.

### **ABOUT THE MASTER OF SCIENCE IN NURSING PROGRAMS**

ASU remains on the cutting edge in preparing nurse leaders and nurse educators for the 21st century. The MS in Nursing and MS in Nursing, Nurse Educator (NED) concentration prepares new and experienced nurses to meet the demands of the complex and changing healthcare environment. The Masters Entry to Nursing Practice (MEPN) prepares entry-level RN students at the graduate level to meet workforce demands in complex health systems.

### **ABOUT THE MASTER OF SCIENCE, CLINICAL RESEARCH MANAGEMENT PROGRAM**

The Master of Science in Clinical Research Management (CRM) prepares graduates to lead clinical research. Courses focus on the elements of leadership, operations of clinical research, data management, ethics, and quality. The Master of Science in Clinical Research Management (Regulatory Science) concentration prepares students for careers in regulatory aspects of clinical research to address the safety and efficacy of new medical products, diagnostics and treatments.

### **ABOUT THE HEALTHCARE INNOVATION PROGRAM**

The Master of Healthcare Innovation (MHI) program is an interdisciplinary degree that prepares graduates to design, implement and lead transformation in health care. Participants in this program come from a wide variety of professions, from all over the world, all with an interest in leading innovation in health and health care. Graduates search for and implement sustainable solutions for today's health care issues with an eye to the future within an interdisciplinary environment.

**ABOUT THE BACHELOR OF SCIENCE IN NURSING PROGRAM**

The Bachelor of Science in Nursing (BSN) degree prepares professional nurses who possess the theoretical foundation and the clinical competence to function in various health care settings. Graduates of ASU's nursing degree programs are prepared to respond to the vast and changing health care needs of individuals and communities.

**ABOUT THE RN-BSN PROGRAM**

The online RN-BSN program builds on the knowledge and skills the student learned in their associate degree or diploma program, especially in the areas of evidence based practice, leadership and management, and community/public health. The interactive course assignments enhance the student's written and verbal communication skills, clinical reasoning skills, teamwork, and information technology skills. Graduates will integrate new knowledge into their nursing practice.

**ABOUT THE CONCURRENT ENROLLMENT PROGRAM**

The Concurrent Enrollment Program (CEP) is designed for qualified nursing students who are interested in earning their BSN degree from ASU while simultaneously pursuing their Associate of Applied Science (AAS) in Nursing degree through a participating community college. The CEP is a rigorous program with a plan of study that enables students to build on the knowledge and skills learned in the AAS in nursing program.

**ABOUT THE BACCALAUREATE HEALTH PROGRAMS**

The Baccalaureate Health Programs consist of the Bachelor of Science degrees in Integrative Health, Community Health, Health Care Coordination, Health Entrepreneurship & Innovation, and Health Care Compliance and Regulations. Each of these degrees prepare graduates to be integral members of the health care team. Graduates are prepared to collaborate with individuals, families and communities regarding changes to the health care system. This includes health education, health promotion, care coordination, disease management, health care navigation, health innovation, health care compliance, and advocacy services as well as assisting patients in obtaining services, understanding policies, and making health care decisions.

**ABOUT THE GRACE CENTER FOR INNOVATION  
IN NURSING EDUCATION**

The Grace Center facilitates over 90,000 student hours annually in experiential learning and community outreach across programs at Edson College. The Center's vision "Knowledge & Action Join as One" is enacted in person and through online resources. State-of-the-art technology and resources provide an effective learning environment for students to practice/master nursing skills and clinical decision making in a dynamic encounter using fully integrated informatics in a variety of healthcare settings while using learning management systems to empower reflective practice. Simulation is an evidenced-based innovation in healthcare education based on objectives guided preparation, and reflection to reinforce student self-discovery that translates to practice competencies.

**ABOUT THE HERBERGER INSTITUTE FOR DESIGN AND THE ARTS**

ASU’s Herberger Institute for Design and the Arts is the largest comprehensive design and arts school in the country, built on a combination of disciplines unlike any other program nationally and located within a dynamic research university focused on transformative change.

The Herberger Institute comprises the Schools of Art; Arts, Media and Engineering; Music, Dance and Theatre; The Design School; The Sidney Poitier New American Film School; and the ASU Art Museum. With almost 8,000 students, more than 750 faculty and faculty associates, over 200 staff members, more than 125 degrees and a tradition of top-ranked programs, the Herberger Institute is redefining the 21st century design and arts school.

The Institute develops and scales innovative ideas to help strengthen the role of designers and artists across all areas of society and culture, and to increase the capacity of artists to make a difference in their communities.

**The Institute is dedicated to the following design principles:**

- Creativity is a core 21st-century competency.
- Design and the arts are critical resources for transforming our society.
- The power of creative expression is transformational when it's derived from the full diversity of our communities.
- The power of creative expression is amplified exponentially when it's activated across disciplines.
- Effectiveness requires excellence.

We are all of us being shaped and influenced today by some of the most powerful technologies of human expression. At the Herberger Institute, we are committed to ensuring that those technologies are inclusive, that they build equitable futures and that they are directed toward human thriving. We believe in creativity at social scale, meaning creativity that is accessible to all, connected to public purposes, and powered by ethical and human-centered technology.

The Institute operates across four cities—Tempe, Phoenix, Mesa and Los Angeles—with some of the best facilities for advancing in critical areas of the rapidly evolving creative economy. These areas include design, film, fashion, popular music, and, more broadly, XRts, which is the study and creation of emerging media and immersive experiences.

We encourage all our alumni to continue to share their stories with us and to take an active role in the Herberger Institute Alumni Chapter. For more information on our alumni activities, please visit [herbergerinstitute.asu.edu/alumni](http://herbergerinstitute.asu.edu/alumni). Connect with fellow design and arts alumni on LinkedIn, Facebook and Twitter.

## ENGINEERING AT ARIZONA STATE UNIVERSITY

The Ira A. Fulton Schools of Engineering, ranked among the top 50 U.S. engineering schools, is home to 390 tenured/tenure-track faculty members more than 30,000 students, making it the largest engineering school in the United States. The Fulton Schools received \$145 million in externally funded research awards in fiscal year 2022. Today, more than 71,500 Fulton Schools alumni are advancing engineering and technology fields in Arizona and around the world.

To produce the engineers and innovations needed to address society's changing demands, we have crafted a visionary blueprint for engineering education that transcends traditional organization around degrees and disciplines and fosters a transdisciplinary approach to teaching and research. The Fulton Schools offers 25 undergraduate and 48 graduate degree programs that encourage interdisciplinary collaboration to develop solutions that will have a lasting impact locally and globally. In addition to online options for degree programs like electrical engineering and software engineering, the Fulton Schools also offers professional development trainings like Six Sigma.

**The School of Biological and Health Systems Engineering** prepares students to use biomedical and engineering principles and methods to develop instrumentation, materials, diagnostic and therapeutic devices, artificial organs and various other technologies. Our biomedical engineering degree program produces graduates with broad-based training in engineering and the life and natural sciences that focuses on improving the overall quality of global health care. These creative thinkers are excelling at the intersection of biology, engineering and computing to advance human health and quality of life.

**The School of Computing and Augmented Intelligence** is home to computer engineering, computer science, computer systems engineering, engineering management, industrial engineering, informatics, robotics and autonomous systems, and software engineering degree programs. Our faculty members and students are exploring ways to bring computing, data analytics, cybersecurity, visualization, machine learning and augmented intelligence to bear on decision making, creativity and responsible innovation. We are dedicated to creating new knowledge and technology that contribute to solving the major challenges facing modern society.

**The School of Electrical, Computer and Energy Engineering** brings together university faculty, students and companies to develop collaborative relationships and solutions. Our computer engineering, electrical engineering, and robotics and autonomous systems degree programs and research efforts are aligned with national and international priorities to address worldwide challenges in energy production and distribution, health care technology and delivery, sustainable development and economic growth, communications technology, information management and global security.

**The School for Engineering of Matter, Transport and Energy** leverages the synergy of engineering and science to create innovative solutions to society's most pressing problems in energy, human health, public safety, environmental infrastructure

and sustainability. We offer degree programs in aerospace engineering, biological design, chemical engineering, materials science and engineering, mechanical engineering, robotics and autonomous systems, and solar energy engineering and commercialization. We have created a unique educational experience with our broad range of disciplines and a world-class faculty engaged in cutting-edge research.

**The School of Sustainable Engineering and the Built Environment** provides a nexus for education and research that addresses the critical infrastructure needs of our society in an environmentally sound manner. The holistic approach in our degree programs covers the engineering expertise of civil, environmental and sustainable engineering; the design and construction principles of construction engineering; and the project management and leadership skills of construction management.

**The Polytechnic School** offers a breadth of engineering and technology-related degrees. Students in The Polytechnic School can choose from a wide array of degree programs, including aeronautical engineering, environmental and resource management, graphic information technology, human systems engineering, information technology, and engineering, which includes programs in systems engineering and engineering education systems and design. The Polytechnic School is home to advanced learning laboratories led by faculty members with deep expertise and industry experience.

**The School of Manufacturing Systems and Networks** is the newest school in the Fulton Schools of Engineering. Located on the Polytechnic campus, one of ASU's central hubs for innovation and design, the School of Manufacturing Systems and Networks is addressing next-generation engineering challenges that will transform manufacturing systems. With a research portfolio that is inherently multidisciplinary, collaborative and inclusive, students in the School of Manufacturing Systems and Networks will gain knowledge in manufacturing processes, computing technologies, data analytics and managing distributed, digitally-networked manufacturing resource locations.

### **Ira A. Fulton**

#### ***Chairman of the Board and CEO, Fulton Homes***

Ira A. Fulton, founder and CEO of Arizona-based Fulton Homes, established an endowment of \$50 million in support of ASU's College of Engineering and Applied Sciences in 2003. The college was renamed the Ira A. Fulton Schools of Engineering in his honor. The gift has enabled the Fulton Schools to provide funding for scholarships, fellowships, research programs and investments in faculty — all integral to elevating the position of the Fulton Schools as a highly ranked U.S. program into the ranks of world-class institutions.

*“With this endowment, we are building an engine of educational and economic growth that will endure for generations. It is a gift of opportunity, prosperity, social equality and hope.”* – Ira A. Fulton

**ABOUT MARY LOU FULTON TEACHERS COLLEGE****Mission**

ASU's Mary Lou Fulton Teachers College creates knowledge, mobilizes people and takes action to improve education.

MLFTC faculty create knowledge by drawing from a wide range of academic disciplines to gain insight into important questions about the process of learning, the practice of teaching and the effects of education policy.

MLFTC mobilizes people through bachelor's, master's and doctoral degree programs, through non-degree professional learning programs and through socially embedded, multilateral community engagement.

MLFTC takes action by bringing people and ideas together to increase the capabilities of individual educators and the performance of education systems.

**Core Value: Principled Innovation**

Children born today will be shaped by accelerating change in technology, demography and our physical and social environments. The speed and convergence of change across so many dimensions of human experience will shape life in ways that are as profound as they are unpredictable.

For educators and education systems, these facts demand principled innovation that delivers positive social value and prepares children to thrive as individuals and as citizens at local, national and global levels.

Principled innovation is the core value that inspires all our activities: our academic programs; our strategic initiatives; how we teach and learn; and how we engage with one another and with the communities we serve.

### **Purpose of Principled Innovation**

Through our core value of principled innovation, we believe that education should answer to three imperatives:

#### **An Equity Imperative**

We need to deliver excellence in education to all learners.

#### **An Economic Imperative**

We need to prepare learners for the next economy and equip them for success in the workforce of the future.

#### **A Democratic Imperative**

We need to prepare learners to be caring, responsible citizens capable of balancing individual ambition and the public good.

### **Practice of Principled Innovation**

MLFTC has developed an ethical framework for innovation and decision-making that is guided by four character assets:

#### **Moral Character**

Empathy, compassion and fairness help us keep sight of the irreducible dignity of all people, especially the youngest, and of the realness of their experience.

#### **Civic Character**

The desire to serve and understand others reminds us that we are social beings and that, ultimately, we thrive not by ourselves but in community.

#### **Intellectual Character**

Critical thinking and problem-solving keep us honest with ourselves and with one another. They help us acknowledge and resist bias, pursue truth and distinguish fact from opinion.

#### **Performance Character**

Initiative, creativity, perseverance, resilience, risk-taking and collaboration help us marry the quality of our actions to the strength of our convictions. They help us navigate uncertainty and transform good intentions into good outcomes.

## MARY LOU FULTON (1933 – 2015)

Anyone fortunate enough to have known Mary Lou Fulton — to celebrate with her and take pride in students' accomplishments — is grateful to have had that privilege. So much of what we do at our college is an expression of her commitment to education and to providing the best possible opportunities for the greatest number of people.

## ABOUT THE NEW COLLEGE

The New College of Interdisciplinary Arts and Sciences offers a nationally unique environment: a small college experience with the power of ASU’s major research university resources. Working one-on-one with our cutting-edge faculty—often through our New College Undergraduate Inquiry and Research Experience program (NCUIRE), our students reshape the boundaries of knowledge in their fields of study. This prepares them for a future of reshaping the world outside of ASU.

New College was founded on a “new” way of thinking about the academy. Instead of reproducing the intellectual silos that separate fields of study in other institutions, our programs have been structured on the notion that if we break down the barriers between fields, we can think in more innovative ways, do more path-breaking work, offer more effective solutions to real-world problems. From our Interdisciplinary Arts and Performance degree that teaches students many forms of artistic expression and then asks into what mode a concept should be born; to our Forensics degree that brings together fields including chemistry, psychology, and legal studies; to our Social Justice and Human Rights degree that explores sociological, historical, and contemporary cultural analyses of global issues, New College offers educational experiences that transcend more limited ways of thinking about the world.

**ABOUT THUNDERBIRD SCHOOL OF GLOBAL MANAGEMENT**

Thunderbird School of Global Management is the world's premier institution for global leadership, management, and business education for the Fourth Industrial Revolution, but we are much more than a school. Thunderbird is also a global network of leaders, managers, entrepreneurs, and intrapreneurs across the private and public sectors who advance the School's vision of inclusive and sustainable prosperity worldwide.

Thunderbird has trained global leaders and managers for over 75 years. Originally known as the American Institute for Foreign Trade, Thunderbird was chartered on April 8, 1946, at a World War II airbase in Glendale, Arizona called Thunderbird Field, where pilots from around the world came for training during wartime. General Barton Kyle Yount obtained the airfield with the express purpose of developing a school for professionals focused exclusively on international trade and global affairs. The guiding principle established at Thunderbird's founding is best summarized in a phrase coined by original faculty member Dr. William Lytle Schurz, "Borders frequented by trade seldom need soldiers."

Thunderbird became the world's first-ever higher education institution to focus exclusively on international leadership by concentrating its curriculum on global management and business skills, international political economy and regional business environments, languages and cross-cultural communications. The School has often been called a "mini-United Nations" because of its diverse and inclusive global student body. Thunderbird is now known worldwide for its vast and engaged alumni network of more than 50,000 graduates in nearly 150 nations around the globe. Thunderbird has more than 170 alumni chapters that meet regularly in 70 countries.

In 2015, Thunderbird became a unit of the Arizona State University public enterprise, combining Thunderbird's multi-decade heritage of developing global leaders with ASU's expansive resources. The School relocated to ASU's vibrant Downtown Phoenix campus in 2018. The move brought the world's No. 1 ranked Master's in Management (WSJ/THE) under the umbrella of the nation's No. 1 ranked school for innovation (U.S. News & World Report).

In the first-ever rankings of their kind, Thunderbird was recently named No. 1 in the world in international trade by Quacquarelli Symonds (QS), the premier global higher education analyst organization. Scoring 100 out of 100 points, this top ranking places Thunderbird ahead of Harvard, MIT and Stanford, domestically, and Victoria

University of Wellington in New Zealand, Nanyang Technological University in Singapore and University of Cambridge in the United Kingdom, internationally. In partnership with the Hinrich Foundation, QS selected Thunderbird's Master of Global Management degree program as the "world's best international trade programme," in its 2023 QS International Trade Rankings.

Ushering in the Thunderbird 4.0 era, is the newly opened F. Francis & Dionne Najafi Thunderbird Global Headquarters building, spanning 110,000 square feet over five floors on ASU's Downtown Phoenix campus. The building is designed to bring the world's leading technology directly to the hands of Thunderbird students and faculty. The facility enables students to connect with the world and experience what they seek to learn and study in real time.

Thunderbird's global footprint has also grown over the years as well, with operations now in Geneva, Dubai, Tokyo, Seoul, Nairobi, Jakarta and nearly 15 others, Thunderbird's Center of Excellence regional offices ensure that the School is now the world's first truly "global multinational business school," committed to training the next generation of global leaders.

As the world continues innovating, and technology changes the way we live and work, Thunderbird is developing nimble, ethical, global leaders who can seize the opportunities offered by the Fourth Industrial Revolution to create sustainable prosperity worldwide. **WALTER CRONKITE SCHOOL OF  
JOURNALISM AND MASS COMMUNICATION****About the School**

The Cronkite School is widely recognized as one of the nation's premier professional journalism and mass communication programs. Rooted in the time-honored values of accuracy, responsibility, fairness and integrity that characterize its namesake, the school fosters excellence and ethics among students as they master the practical skills they need to succeed in the world of today and tomorrow.

The Cronkite School's 2,500 students, including in-person and online, consistently lead the country in national competitions. Over the past decade, Cronkite has been first in the nation in the Society of Professional Journalists' Mark of Excellence competition and the Broadcast Education Association's Festival of Media Arts awards and has finished in the top 10 in the Hearst Journalism Awards each year.

Students are guided by a faculty made up of award-winning professional journalists, strategic communications executives and world-class media scholars. Cronkite professors include five Pulitzer Prize-winning journalists, digital media thought leaders, top TV producers and correspondents, major metropolitan newspaper editors and strategic communications experts. They are master teachers, writers and scholars who often speak around the globe on the most important topics facing our industries.

The Cronkite School leads the field of mass communication education with its innovative use of the "teaching hospital" method, providing both unparalleled learning opportunities for students and important news content to the community, state, region, nation and around the world.

Students cover public affairs from news bureaus in Phoenix, Los Angeles and Washington D.C., and they report on sports from bureaus in Phoenix and Los Angeles. They conduct national investigations as part of the Howard Center for Investigative Journalism, and they produce multimedia projects on issues of national importance in the Carnegie-Knight News21 program.

Other immersion programs include Cronkite Noticias, in which bilingual students produce Spanish-language broadcast and digital stories; the Public Relations Lab, where they develop campaigns for clients; the Digital Audiences Lab, where they harness social media, SEO and analytics to grow and engage audiences; and the New Media Innovation and Entrepreneurship Lab, where they use emerging media technologies to forge the future of journalism.

---

Arizona PBS, one of the nation's largest public television stations, serves as a hub for these full-immersion programs, with students producing a nightly newscast that reaches 1.9 million households across the state.

Elsewhere at the school, the Donald W. Reynolds National Center for Business Journalism provides education and training to professional journalists, and Cronkite Global Initiatives fosters partnerships throughout the globe and brings international journalists to the school for study and training. Cronkite also is home to PBS NewsHour West and Indian Country Today, creating enhanced coverage and added student opportunities. ASU's investment in the school has generated national and international attention from educators and media professionals who place the school in the top tier of all U.S. journalism schools, calling it a pioneer in shaping how news is delivered and how people will stay informed in the future.

The Cronkite School is supported by generous individuals, corporations and foundations seeking to help train the next generation of journalists and communication professionals at a pivotal moment of industry transformation and growth. ### **About Walter Cronkite**

ASU's journalism program was named in honor of former CBS News anchor Walter Cronkite in 1984.

The relationship started when Tom Chauncey, longtime owner of the CBS affiliate in Phoenix and a leading supporter of journalism education at ASU, contacted his old friend in an effort to advance the program. An endowment on behalf of the program was soon established and the school was named after "the most trusted man in America."

Over the next quarter of a century, Cronkite lent much more than his name to the school. He was closely involved — advising leadership, guiding students and faculty, and traveling to Arizona each year to personally give the Walter Cronkite Award for Excellence in Journalism to one of the nation's top journalists. The most important relationship, though, was with "our students," as Cronkite would always call them. Young students, some with parents barely old enough to remember Cronkite behind the anchor desk, lit up when he walked into a classroom. They hung on his every word as he thoughtfully answered their questions about the profession he so loved. They lined up just to shake his hand, and he loved every minute of it.

In what turned out to be Cronkite's last visit to ASU in 2007 before declining health prevented him from traveling, a group of 100 students gathered with just a few minutes of notice that Cronkite was in the building. He held them spellbound as he spoke about covering World War II, Vietnam, Apollo, Watergate and presidents from Truman to Reagan — and of how important "our school" was to him. Although Cronkite died on July 17, 2009, before he was able to visit the new building, he remains an ever-present part of the school's spirit and mission.

## About Our Graduates

The Cronkite School has about 16,000 alumni throughout the Valley, across the country and around the world. Many are leaders in television, digital media, newspapers, radio, magazines, public relations and digital marketing.

In 1993, the Cronkite School inducted its first class into the Cronkite Alumni Hall of Fame. The charter inductees were Al Michaels ('66), an Emmy Award-winning sports broadcaster best known for anchoring "Monday Night Football," and Bill Redeker ('71), an ABC News correspondent who covered the Middle East and the Far East during his 30 years with the network.

Other notable Cronkite Alumni Hall of Fame inductees include Matt Barrie ('01), anchor of SportsCenter and studio host of ESPN College Football; Nicole Carroll ('91), editor-in-chief of USA Today; Becky Anderson ('94), CNN International anchor; Julie Cart ('98), Pulitzer Prize-winning Los Angeles Times reporter; Derrick Hall ('91), president and CEO of the Arizona Diamondbacks; Christine Devine ('87), news anchor at FOX 11 in Los Angeles; Mary Kim Titla ('85), founder of Native Youth Magazine; Ray Artigue ('76), president of The Artigue Agency; and Chip Dean ('77), legendary director of ESPN's "Monday Night Football."

Stay connected to fellow #CronkiteNation alumni on TikTok, LinkedIn, Facebook, Instagram and Twitter.

**THE NATION’S LEADING  
COMPREHENSIVE PUBLIC SERVICE COLLEGE**

The Watts College of Public Service and Community Solutions is a unique, comprehensive public service college dedicated to fully integrating teaching, research and service to address social problems.

---

## **PREPARING PUBLIC SERVICE LEADERS FOR LIFELONG LEARNING, EQUIPPED WITH TOOLS TO AFFECT CHANGE**

Our degree programs cover the spectrum of public service, including public policy, social work, criminology and criminal justice, nonprofit leadership, emergency management, community development, parks and recreation, and more.

A particular point of pride is that the college is home to ASU's most diverse student body, with the highest percentages of under-represented, college transfer and military veteran students—and one of the largest communities of first-generation college students. Many chose public service because of their own life experiences and firsthand understanding of systems that need improvement. Of equal importance is how this commitment translates into real impact for the communities to which students return.

## **INTEGRATING TEACHING, RESEARCH AND SERVICE ROOTED IN SOLUTIONS-BASED LEARNING**

From day one of their college experience, our students are immersed in hands-on learning through a signature solutions-based pedagogy. They are paired with community partners to tackle real-world problems—both an educational, and service-based experience—delivering more than 600,000 hours of community service each year.

## **LEADING ASU SERVICE AND POLICY INITIATIVES TO CREATE A MODEL OF A SERVICE-COMMITTED UNIVERSITY**

The college serves as a model for ASU's commitment to service—leading university-wide initiatives such as spearheading the first-of-its-kind Public Service Academy, partnering with the Harvard Institute of Politics to increase civic participation through our Pastor Center for Politics and Public Service and leading AmeriCorps programs like Public Allies Arizona, Legacy Corps for Veterans, Safety Planning for Survivors of Domestic Violence and Corporation for National and Community Service Employment Outcomes.

## **SOLVING PROBLEMS THROUGH COLLABORATION WITH COMMUNITY PARTNERS ACROSS SECTORS**

The college brings collaborative ideas into action, working closely with hundreds of government, private and nonprofit partners locally and globally. Through our research and academic expertise, our research centers and offices, individual faculty members and cross-disciplinary teams all have an impact beyond dollars. They also produce training, policy guidance, best practices and direct service.

## OUR SCHOOLS AND CROSS-COLLEGE PROGRAMS

*The School of Community Resources and Development* advances the social, economic, environmental and cultural well-being of our local and global communities through instruction, research and service. We provide nationally recognized interdisciplinary research expertise and innovative academic programs in nonprofit leadership and management, parks and recreation management, therapeutic recreation and tourism development and management.

*The School of Criminology and Criminal Justice* merges theory and practice. The core of our highly-ranked program—#2 overall by U.S. News & World Report—focuses on the theories of criminality and evidence-based best practices for responding to crime through the lenses of three interrelated structures—policing, courts and corrections—that collectively comprise the criminal justice system.

*The School of Public Affairs'* mission is to understand and address society's grandest challenges in public management, policy and governance. We seek to maximize our impact through rigorous transdisciplinary research, project-based education, collaborative and inclusive community engagement, experiential learning and innovative solutions. We are ranked consistently among the top 15 public affairs schools in the country with highly rated programs in urban management, environmental policy, nonprofit management and public finance.

One of the largest and most diverse social work programs in the U.S., the *School of Social Work* is motivated by its steadfast commitment to promote social, political and economic justice with a special emphasis on populations of the Southwest. Ranked among the top 10% of social work schools nationwide by U.S. News & World Report, the school prepares professional social work practitioners and scholars who are committed to enhancing individual, family and group problem-solving capacities, maximizing human potential, and creating a more just and humane society.

*Our cross-college interdisciplinary programs* blend the expertise of our disciplines to create innovative, well-informed approaches to emerging social problems. The emergency management and homeland security program promotes healthier and more vibrant communities through the effective management of hazards and crises. The program evaluation program develops expertise in response to increasing demands for accountability in the public, private and nonprofit sectors. The public safety leadership and administration program prepares graduates for management in the public safety sector with a particular emphasis on emergency medical services, fire and police administration.

## RESEARCH AND IMPACT

The College leads the university in the production of research that has system-wide and large-scale impact on myriad social, behavioral, economic and political challenges. Through rigorous applied research, we are developing solutions with the potential to better our response to pressing issues and positively impact our communities locally, nationally and globally.

## ABOUT THE W. P. CAREY SCHOOL OF BUSINESS

The W. P. Carey School of Business at Arizona State University is one of the highest-ranked and largest business schools in the United States. The school is internationally recognized for its leadership in business education and for positively impacting the practice, science, and art of management on a national and international scale. The school works to rethink the nature of business, engage the world, and create a better future.

More than 19,000 students attend the W. P. Carey School of Business, including over 2,500 online learners and more than 100 doctoral candidates. The student body is especially diverse, including representatives from over 100 countries.

Each member of the W. P. Carey community, whether on campus or around the globe, aspires to do great things — for themselves and each other. This promise is enshrined in the Carey Code, to contribute to our legacy and live our values of excellence, integrity, impact, and community; to demonstrate that business is personal by treating others with respect and kindness; to advocate for diversity, equity, and inclusion to create stronger organizations and societies; to embrace and exhibit ethical business practices; and to champion fellow Sun Devils and volunteer when and what we can to promote their success.

The W. P. Carey School boasts an acclaimed faculty of more than 200 esteemed tenure and tenure-track faculty. Many faculty members are also on the editorial boards of academic journals and publications. Housed within the school are more than 20 respected research centers, labs, and a research institute, which generate research, knowledge, and information that support academics and business professionals and are internationally recognized for research productivity.

Both the school's graduate and undergraduate programs are ranked among the best in the nation by U.S. News & World Report. This year, 31 W. P. Carey programs or disciplines were ranked Top 25, with 14 ranked Top 10 in the nation.

Undergraduate Bachelor of Science degrees are offered in accountancy, business data analytics, business entrepreneurship, computer information systems, economics, finance, management, marketing, and supply chain management.

Undergraduate students also have the option of earning a Bachelor of Arts degree in business with concentrations in business administration, communication, corporate accounting, financial planning, food industry management, global agribusiness, global leadership, global logistics management, global politics, health care, human resources, information security, language and culture, law, public service and public policy, retail management, sports business, statistics, sustainability, technology, and tourism.

The school offers its renowned MBA program in four distinct platforms: Full-time, Evening, Online, and Executive. Master's degrees are available in accountancy and data analytics, business analytics, finance, global logistics, information systems management, innovation and venture development, real estate development, supply chain management, and taxation and data analytics. Doctoral degrees are offered in accountancy, agribusiness, economics, finance, information management, management, marketing, and supply chain management.

The W. P. Carey alumni network spans the globe. Our alumni represent highly regarded companies from diverse industries, including manufacturing, technology, retail, banking, accounting, entertainment, and food, as well as entrepreneurial firms and respected nonprofit organizations.

## THE ARIZONA STATE UNIVERSITY MACE AND PRESIDENT'S CHAIN OF OFFICE

In Medieval times, a mace was a hand-to-hand combat weapon. In about the year 1400 A.D., a mace evolved from a weapon to a ceremonial instrument used by academicians in rituals such as commencement and inaugurations. The oldest known ceremonial mace was that of the Faculty of Common Law of St. Andrew University in Scotland, used in 1438.

The Mace and Chain of Office are presented only at ceremonies in which faculty members are in full academic regalia, such as the Inauguration of the ASU President, University Commencement, Faculty Assemblies, Regents' and President's Professor Induction Ceremonies and Convocation.

The Mace is carried at the head of the procession and laid in a cradle, thus signifying the formal onset of the ceremony.

ASU's ceremonial mace and chain of office was created in observance of ASU's Centennial in 1985. Handcrafted by ASU Professor of Art, David Pimentel (1943-2004), the mace and chain was created with "austere elegance and traditional southwestern motifs." In keeping with these directions, Professor Pimentel constructed both items out of materials native to Arizona. The ASU Mace is a wood staff, approximately three and a half feet long, weighing eight pounds and made of hollowed and polished Mesquite.

The head of the ASU Mace has four sterling silver blades and is banded with copper, Morenci turquoise, and a silver ring on which the words Arizona State University are embossed. The turquoise inlay was cut and polished by Navajo jeweler Richard Charlie of Mesa. The ASU seal is embossed in silver on the heel of the mace.

The President's Chain of Office includes a silver rope woven from strands of hand-turned links, which holds a medallion six inches in diameter that reverses to reveal the ASU seal in gold on one side and the same in silver and turquoise on the other.

## COLLEGE MARSHALS SPRING 2023

College Marshals consist of selected faculty members from each college at all ASU campuses. Selection criteria is left to the individual colleges, but faculty who have recently won awards or have received special recognition are given primary consideration.

**Barrett, The Honors College** — Dr. Young is a fierce advocate for public honors education and our Indigenous student population, and a valuable member of the Barrett community. Alex Young serves as the Barrett Faculty Senator and the faculty representative on the BHC Communications Committee. He led an exciting and impactful new communications initiative this year, working closely with BHC staff and faculty, to highlight the importance of the Barrett mission in outward-facing messaging through short videos shared on the Barrett website and social media. Dr. Young works closely with the Barrett Indigenous Culture Association and the Indigenous Students Inclusion Initiative, and this year organized “Indigenous Honors,” a poetry reading event. His 2022 publications included “Indigenous Cosmopolitanism and its Discontents,” and “‘The Vigorous New Vernacular’: Settler Colonialism and the Politics of Irony in Roughing It.”

**College of Global Futures** — Jiwei Li, Assistant Professor in the School of Ocean Futures in the College of Global Futures, is a biological oceanographer and remote sensing scientist, combining global-scale remote sensing and machine learning to understand the influences of human activities on aquatic systems. He works with multiple organizations such as The Nature Conservancy and Coral Reef Alliance to protect marine resources. He leads scientific products development of the world-renowned Allen Coral Atlas project, co-leads NOAA GeoXO satellite mission pathfinder project, received awards from the UNESCO Chair in Hydroinformatics and Ecohydrology, and is a member of NASA SBG satellite mission algorithm working group.

**College of Health Solutions** — Allison Poulos is an Assistant Professor in the College of Health Solutions. She is a behavioral scientist who conducts community-engaged health promotion research, with an emphasis on physical activity in schools as a source of children’s health and well-being. She works closely with community partners to promote access and opportunities for quality physical activity opportunities throughout the comprehensive school day, including before, during, and after school. Her funded research includes advancing the implementation of programming focused on safe and active travel to school and examining the impact of a playground curriculum on children’s physical, social, and emotional health.

---

**College of Integrative Sciences and Arts** — Jada Ach is an Assistant Teaching Professor for the Faculty of Leadership and Integrative Studies where she teaches in the Interdisciplinary Studies and Master of Liberal Studies programs. In 2019, she earned her PhD in American Literature from the University of South Carolina. She is the author of *Sand, Water, Salt: Managing the Elements in Literature of the American West, 1880-1925* and co-editor of *Reading Aridity in Western American Literature*. This year Ach was awarded the ASU Outstanding Instructional Faculty Mentor Award from the Graduate College.

**The College of Liberal Arts and Sciences** — Megan Jehn is an Associate Professor in the School of Evolution and Social Change at Arizona State University. Her community-based fieldwork brings together large transdisciplinary teams to respond to infectious disease outbreaks and strengthen public health preparedness. Jehn leads the ASU Student Outbreak Response Team, a service-learning program where students gain real-world experience in epidemiology while providing critical public health surge capacity for state, local, and tribal public health partners. Her mentoring, teaching, and community service have been recently recognized with awards such as the Zebulon Pearce Distinguished Teaching Award, the Centennial Professorship, and the Gary Krahenbuhl Difference Maker Award.

**Edson College of Nursing and Health Innovation** — Lisa Jaurigue is a Clinical Assistant Professor in the Edson College of Nursing and Health Innovation. She teaches full-time in the undergraduate Prelicensure Nursing Program and the Baccalaureate Health Programs. She is a Certified Nurse Educator through the National League for Nursing. She is a past fellow in the Integrative Nurse Faculty Fellowship from the University of Arizona and a current fellow in the Alliance of Nurses for Healthy Environments. She has authored various articles and chapters related to community health, integrative health, school health, evidence-based practice, and health policy.

**Herberger Institute for Design and the Arts** — Dr. Lisa Peña is an Assistant Teaching Professor for the Visual Communication Design program at The Design School. She recently obtained her PhD in Design, Environment and the Arts for her work regarding 18th and 19th century historic information design. Her research has revealed lesser-known contributors and highlighted the methods that connect practitioners across centuries. In addition to her research, Dr. Peña is also passionate about inclusive design. She was selected as Keynote Speaker at Phoenix Design Week's 2022 conference where she discussed ableism.

**Ira A. Fulton School of Engineering** — Professor Sydney Schaefer was recognized as a Fulbright Scholar for her research in the area of Alzheimer's Disease and Dementia. Being selected as a Fulbright Scholar is a tremendous distinction and demonstrates the impact of Professor Schaefer's work both nationally and internationally. She will live and work in Sweden for the time of the Fellowship, to team with the researchers and unique capabilities available at Jönköping University.

**Mary Lou Fulton Teachers College** — Dr. Meseret F. Hailu is an assistant professor of higher and postsecondary education at Arizona State University. Her research focuses on the retention of minoritized women in STEM higher education pathways and professions. Prior to coming to ASU, Dr. Hailu was a Postdoctoral Research Associate at The Ohio State University. Her research has been published in top-tiered journals, including *Comparative Education Review*, *Journal of Diversity in Higher Education*, and *Research in Higher Education*. Additionally, her work has been funded by the Fulbright Program, the National Science Foundation, and the United States Agency for International Development.

**New College of Interdisciplinary Arts and Sciences** — Annika Mann is Associate Professor of English and affiliate faculty in Disability Studies in the School of Humanities, Arts, and Cultural Studies at ASU's New College. She is a literary historian whose scholarship explores the intersection of print culture and beliefs about health and disease in the eighteenth and early nineteenth centuries. She was recently awarded an Institute for Humanities Research Fellowship at ASU for her current book project, which explores how women writers who experienced chronic illness and physical disability at the turn of the nineteenth century use that experience to disrupt established literary genres.

**Thunderbird School of Global Management** — Jonas Gamso is an associate professor in the Thunderbird School of Global Management, as well as a Senior Global Futures scholar in the Julie Ann Wrigley Global Futures Laboratory. Professor Gamso has published studies on international trade, foreign aid, and foreign investment in journals such as *International Studies Quarterly*, the *Journal of World Business*, and *World Development*. His classes include *States and Markets in the Global Economy*, *International Trade and Regional Economic Agreements*, and *Global Affairs Methods*. He is also the academic director of the UN Global Compact's Young Sustainable Development Goal (SDG) Innovation Accelerator program at Thunderbird.

**Walter Cronkite School of Journalism and Mass Communication** — Nikki McClaran (she/her) is an assistant professor of strategic communication at the Walter Cronkite School of Journalism and Mass Communication. Her research explores the cognitive, social and motivational determinants of health behaviors and how mass media messages can be constructed to facilitate successful persuasion and engagement. She is particularly interested in the use of popular media and social norm appeals. McClaran earned her doctorate from Michigan State University, where she was a University Enrichment Fellow and received numerous teaching and service awards. She currently serves as the Student and Early Career Representative for the International Communication Association Health Communication Division

**Watts College of Public Service and Community Solutions** — Eric Legg is an associate professor in the School of Community Resources and Development at Arizona State University. His research uses a socio-ecological approach to explore the question of how we construct community sport experiences to maximum positive development outcomes, with a specific focus on positive youth development. Recognizing that youth sports exist within an ecological framework that includes coaches, parents, participants, volunteers, and management structures, Legg approaches this question through a variety of lenses including social-psychology, and management theories. He holds a Doctor of Philosophy in Parks, Recreation and Tourism from the University of Utah

**W. P. Carey School of Business** — Dr. Srimathy Mohan is an associate professor in the department of Supply Chain Management at W. P. Carey School of Business. She has been a Hal Fearon Fellow with CAPS Research since August 2019. She has led several CAPS Research projects dealing with the role of technology in improving procurement. Dr. Mohan joined ASU in 1999 and has spearheaded several applied research projects with local industries and non-profit organizations, leading to many theses and dissertations. She is a recipient of multiple teaching awards for excellence in teaching at the undergraduate and master's levels.

## HISTORY OF THE ACADEMIC COSTUME

The present-day academic costume seemingly originated at Oxford and Cambridge Universities in the 1300s. As the universities passed from ecclesiastical control, brighter colors distinguished the academic robe from the drab clerical gown. Colonial American universities based their academic regalia on the British system.

In the 1880s, a student movement centering in New England investigated the establishment of a "senior badge," to improve commencement week exercises and revive the traditions of university life. In 1893, an intercollegiate commission established a uniform code for caps, gowns and hoods for the various degrees.

Of the costume's three components, the hood is the most interesting. Originally it had three uses: as a head covering, as a shoulder cape, and as a bag in which alms could be collected. It is mentioned as early as 1480 in clerical literature. When large wigs were in vogue in Britain, the cape part of the hood was split in front and a narrow neckband inserted. The entire cape and hood was allowed to fall back as it is today, and it was never restored to the original style.

*Following is a list of the hood and tassel colors established by the Intercollegiate Code to represent departments of learning:*

Architecture— Blue-Violet  
 Agriculture— Maize  
 Arts, Letters, Humanities— White  
 Business Administration,
