THE NATIONAL ANTHEM
THE STAR-SPANGLED BANNER

O say can you see, by the dawn's early light,
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars through the perilous fight
O'er the ramparts we watched, were so gallantly streaming?
And the rockets' red glare, the bombs bursting in air
Gave proof through the night that our flag was still there.
O say does that Star-Spangled Banner yet wave
O'er the land of the free and the home of the brave?

ALMA MATER
ARIZONA STATE UNIVERSITY

Where the bold saguaros
Raise their arms on high,
Praying strength for brave tomorrows
From the western sky;
Where eternal mountains
Kneel at sunset's gate,
Here we hail thee, Alma Mater,
Arizona State.
—Hopkins-Dresskell

MAROON AND GOLD

Fight, Devils down the field
Fight with your might and don't ever yield
Long may our colors outshine all others
Echo from the buttes, Give em' hell Devils!
Cheer, cheer for A-S-U!
Fight for the old Maroon
For it's Hail! Hail! The gang's all here
And it's onward to victory!

Students whose names appear in this program are candidates for the degrees listed,
which will be conferred subject to completion of requirements.

University commencement, convocations and celebrations are special events for all involved.
Please show respect for everyone who has come to share in the experience. Individuals who
engage in inappropriate or disruptive behavior will be removed from the event.

As a courtesy to those around you and to our graduating students,
please turn off all electronics devices and phones during the ceremony.

Only working staff, graduating students and authorized guests are allowed in the graduate and
staff entry points, or on the floor or field near graduate seating and the stage. This restriction applies
to Gammage Auditorium, Desert Financial Arena, Sun Devil Stadium or other ceremony venues.

MISSION STATEMENT

UNIVERSITY COMMENCEMENT

University Commencement represents the culmination of a student's academic achievement.

It is a time of celebration and reflection for students, families, friends, faculty and staff.

It brings together a diverse community to share in the joy of accomplished goals.

**MESSAGE FROM THE
ARIZONA BOARD OF REGENTS**

Dear Graduate,

Congratulations on your graduation from Arizona State University. Today marks a significant milestone in your life, one which unlocks a world of possibilities and opportunities.

Through your hard work, dedication and persistence, you've achieved this remarkable feat and are now poised to make your mark on the world. Earning a degree from ASU — a pioneering institution that's redefining the American university experience — has equipped you with the cutting-edge tools, advanced knowledge and an innovative spirit to thrive in an ever-changing landscape.

As you embark on this new stage of life, remember that innovation and creativity are at the heart of everything we do at ASU, and these values are now woven into you. You are forever a part of a Sun Devil community that's pushing boundaries, exploring new frontiers and shaping the future. Our university's commitment to action, research and technology has prepared you to tackle the challenges of a rapidly evolving world.

You are part of a new generation of leaders, innovators, entrepreneurs and changemakers who will shape the future of our state, our nation and the world. Our communities need your passion and innovative spirit to make a lasting impact. Like ASU, you are ready to take action!

As an ASU graduate, you now represent this proud university. Remember your alma mater — your friends, mentors, professors and everyone who supported you through your college years. Stay connected to the university and remember you are forever part of the Sun Devil community. We wish you the best for a future that is full of promise. Go Devils!

Sincerely,

Cecilia Mata

HISTORY OF HONORARY DEGREES

Harvard was the first university to confer honorary degrees in 1692. Since then it has become a recognized function of degree granting institutions. Honorary degrees are an opportunity for universities to single out people who have made contributions to society. At ASU, honorary degree recipients are nominated by faculty members. The six-member Academic Affairs Honorary Degrees Committee reviews faculty nominations for the Honorary Degree. It then recommends candidates to the president. The committee is appointed by and responsible to the president.

HONORARY DEGREE CITATION

DR. ELIZABETH ALEXANDER

An acclaimed poet, scholar, and cultural advocate, Elizabeth Alexander is a nationally recognized thought leader on race, justice, the arts, and American society. As president of the Mellon Foundation, she leads a multi-billion-dollar philanthropy and the nation's largest funder of the arts and humanities, supporting educational institutions and cultural organizations while envisioning and guiding new initiatives to build just communities across the United States.

Prior to joining the Foundation, Dr. Alexander served as the director of Creativity and Free Expression at the Ford Foundation, shaping Ford's grantmaking vision in arts and culture, journalism, and documentary film. In this role, she guided the organization in examining how the arts and visual storytelling can empower communities and serve as vital tools for collective expression and enlightenment. While at Ford, she co-designed the Art for Justice Fund, an initiative that uses art and advocacy to address the crisis of mass incarceration.

Across her esteemed career as a scholar and educator, beginning with an English professorship at University of Chicago, where she was honored with the Quantrell Award for Excellence in Undergraduate Teaching, Dr. Alexander has taught and inspired generations of students. She held distinguished professorships at Smith College, Yale University—where she taught for over 15 years and helped rebuild and chaired the African American Studies Department—and Columbia University. In 1997, Dr. Alexander was appointed inaugural director of The Boutelle-Day Poetry Center at Smith College and in 2015, she was appointed Yale University's inaugural Frederick Iseman Professor of Poetry.

An author or co-author of fifteen books, Dr. Alexander was twice a finalist for the Pulitzer Prize: for poetry with *American Sublime* and for biography with her 2015 memoir, the *New York Times* best-seller *The Light of the World*. In 2009, she composed and delivered the poem "Praise Song for the Day" for President Barack Obama's inauguration. Her latest book, released in 2022, is *The Trayvon Generation*.

Dr. Alexander is a widely sought after speaker and has contributed to countless selection committees and juries. Currently, she serves on the boards of Lincoln Center for the Performing Arts, New York-Presbyterian Hospital, the Pulitzer Prize, and is Chancellor Emeritus of the Academy of American Poets. She has been awarded ten honorary doctorates and is internationally recognized for her poetry, scholarship, and thought leadership. *Time* named Dr. Alexander one of the 100 Most Influential People of 2022, and in 2019 she was awarded Harvard University's W.E.B. Du Bois Medal. In 2021, Dr. Alexander was recognized as Officier de l'Ordre des Arts et des Lettres by the French Ministry of Culture, one of the country's highest cultural honors.

Dr. Alexander holds a bachelor's degree from Yale University, a master's degree from Boston University, and a doctorate degree in English from the University of Pennsylvania. She lives and works in New York City.

Arizona State University is honored to confer upon Dr. Elizabeth Alexander the degree of Doctor of Humane Letters *Honoris causa* in recognition of her achievements as a distinguished poet, author and educator. Her thought-provoking work explores history while exemplifying hope and resilience.

HONORARY DEGREE CITATION

KATE FORBES

The President of the International Federation of Red Cross and Red Crescent Societies (IFRC) is Kate Forbes, a humanitarian leader with more than 40 years of experience with the Red Cross and Red Crescent. She has traveled down the street, across the country and around the world to support philanthropic actions. As a full-time volunteer herself, she is one of 16 million IFRC volunteers who work to ease suffering and save lives, build community resilience, strengthen localization, and promote dignity around the world through 191 national societies.

At the IFRC, Forbes most recently served as chairman of the organization's Audit and Risk Commission. Under her leadership, the commission has increased transparency and accountability to deliver life-saving assistance more efficiently around the world.

Forbes' Red Cross journey began in 1981 at her local American Red Cross Chapter in Phoenix, Ariz. She worked to combat a surge of home fires impacting Indigenous communities, prevent drownings across the region and provide access to health services through special transportation programs.

At local and regional levels, she improved safety and well-being through effective community engagement. Forbes then served as the chairman of the local board of directors, regional chapter services board chair and then national chair of chapter services. In 2000, Forbes assumed the role of Vice-Chairman of the American Red Cross Board of Governors and then the National Chairman of Volunteers. In these roles, she mobilized more than a million volunteers to deliver assistance, connect with local communities and provide training in their local communities.

In her professional life, she was most recently the Chief Financial Officer of Electric Applications Incorporated. With more than four decades of experience as a CFO, auditor and controller, she has held executive positions providing vision and inspiration to diverse groups. She specializes in managing complex, rapidly changing financial, utility and green technology businesses with geographically diverse multimillion-dollar operations, under strict financial compliance regulations.

In a volunteer capacity, she has served as Chairman of the American Lung Association, a member of the Arizona State University Foundation Board of Directors, Chairman of the PSI Audit Committee, and on a variety of local and national boards.

Forbes is the recipient of numerous awards, including the following: the Harriman Award, the American Red Cross premier award for outstanding volunteer service; Deborah Karr King Award Central Arizona Chapter, Red Cross Award for Outstanding Humanitarian Service; the Athena Award, the Phoenix Chamber of Commerce Award for Outstanding Business Woman; Public Service Award American Institute of Certified Public Accountants Award for Public Service; and the Arizona State Society of Certified Public Accountants Award for Service to the Society.

Forbes, who received her bachelor's degree in finance from the W. P. Carey School of Business, is a member of the W. P. Carey Alumni Hall of Fame. Her husband, Donald Karner, is also a Sun Devil and received his bachelor's degree in engineering from the Ira A. Fulton Schools of Engineering in 1973.

Arizona State University is honored to confer upon Kate Forbes the degree of Doctor of Humane Letters *Honoris causa* in recognition of her leadership of a global humanitarian aid organization that responds to disasters and crises all around the globe while addressing issues related to climate, health and migration.

ABOUT THE SANDRA DAY O'CONNOR COLLEGE OF LAW

In 1965, Arizona State University's visionary President G. Homer Durham hired Willard H. Pedrick to serve as the first dean of ASU's law school. Tasked with building the school from the ground up, Dean Pedrick set the foundation for what has become one of the nation's most innovative legal education institutions. Originally housed in Armstrong Hall on ASU's Tempe campus, the Sandra Day O'Connor College of Law moved to the Beus Center for Law and Society in downtown Phoenix in 2016, anchoring itself in the heart of Arizona's legal community.

Throughout its history, ASU Law has achieved milestones that speak to its excellence. In 2006, it was renamed to honor Justice Sandra Day O'Connor, a trailblazer and the first woman appointed to the U.S. Supreme Court. The privilege of carrying her name inspires the college to uphold her legacy of integrity, justice and public service.

ASU Law has come a long way since its first graduating class of 83 students. Today, more than 650 graduates annually earn degrees that prepare them for impactful careers. Offering five degree programs — Juris Doctor (JD), Master of Laws (LLM), Master of Legal Studies (MLS), Master of Human Resources and Employment Law (MHREL) and Master of Sports Law and Business (MSLB) — ASU Law equips its students with the knowledge and skills to lead in the evolving legal landscape. In addition, ASU Law now offers the nation's first mission-driven, part-time and fully online modality to its JD program, designed to expand access to legal education to address critical legal deserts in underserved and rural communities and advance legal careers in public service.

The college is also proud to be recognized as the nation's leader in producing the highest number of graduates from master's-level legal programs, empowering professionals across industries with legal knowledge and skills to advance their careers and create meaningful change.

Beyond Phoenix, ASU Law offers students opportunities to study at its Los Angeles and Washington, D.C., locations and participate in global externships and internships. With a renowned faculty, extensive alumni network and partnerships within the legal community, ASU Law remains committed to shaping leaders who can address challenges at every level, from local communities to the global stage.

ABOUT OUR GRADUATES

Graduates of the Sandra Day O'Connor College of Law represent the future of justice and innovation. With more than 11,000 alumni, our graduates exemplify the core values of excellence, leadership and service. They advance the law and contribute to society as attorneys, judges, business leaders, policymakers and change-makers.

Their achievements span industries and continents, shaping the legal landscape, driving innovation and advocating for positive change in their communities. From courtrooms to boardrooms, ASU Law alumni are united by a shared commitment to creating a more just world.

Stay connected and continue the journey of excellence with the ASU Law Alumni LinkedIn group and at law.asu.edu/alumni.

THE BARRETT STORY

The Gold Standard in Honors

Established in 1988, Barrett, The Honors College at Arizona State University, is a highly regarded residential college providing an exceptional undergraduate experience for academically outstanding students from Arizona, the United States, and around the world. Backed by the vast resources of the nation's largest Research 1 (R1) public university, ranked No. 1 in innovation by *U.S. News & World Report*, Barrett offers a highly personalized honors education that values not only academic excellence but also leadership, initiative, and a commitment to making an impact. Our students are scholars, leaders, and changemakers actively shaping their communities through their passions, interests, and experiences.

With a presence on four ASU campuses and Barrett Online, the college serves 7,500 students and is supported by nearly 50 full-time honors faculty members, more than 80 full-time staff members, and a dedicated leadership team. Named the Gold Standard for honors colleges, Barrett is widely regarded as a model for honors education.

Opportunities That Inspire

Barrett creates a transformative educational experience that fosters leadership, independent scholarship, civic engagement, and global exploration. Students enrich their academic journey through faculty mentorship, research fellowships, community internships, and immersive domestic and international travel programs.

While completing their ASU degree, Barrett students earn honors credits through specialized courses, internships, research, and global study. All Barrett students complete an honors thesis, an in-depth, faculty-mentored project in their field of study. More than 1,900 ASU faculty members teach and mentor Barrett students across all disciplines.

Honors Beyond the Classroom

As the largest residential honors college in the United States, Barrett enhances student life at ASU with vibrant academic and social communities at each campus. Barrett students assume leadership roles in student government, Greek life, and various organizations across ASU. Barrett Online students also engage in virtual honors programming and events.

From Campus to Career

With an emphasis on career preparation, Barrett offers Life Prep programming covering essential topics such as medical and law school navigation, financial literacy, and homeownership. Exclusive internships with organizations such as Mayo Clinic, Goldman Sachs, Microsoft, and the U.S. Senate provide real-world experience. Students conduct cutting-edge research with ASU faculty in areas such as health care innovation, global energy solutions, and data security.

The Lorraine W. Frank Office of National Scholarship Advisement, housed within the Barrett Complex at ASU Tempe, supports students applying for competitive national and international fellowships. ASU is a top producer of Fulbright U.S. Student Award winners, ranking second among public universities over the past decade. Barrett students regularly earn prestigious awards such as the Rhodes, Marshall, and Truman scholarships, as well as the Goldwater and Gates Cambridge scholarships.

A Global Perspective

Barrett students earn honors credit while engaging with diverse cultures through more than 300 study abroad programs in more than 65 countries. Globally focused initiatives take place both on campus and around the world. The Distinguished Global Leader Series invites world leaders to ASU for lectures and discussions, while GlobalResolve connects students with hands-on service-learning projects in countries such as Trinidad and Mexico. Global Honors Flex allows first-year Barrett students to earn 15 honors credits while studying in a community in an international city.

Honoring Thought Leaders

Barrett hosts prestigious annual events, including the Centennial Lecture, Rhodes Lecture, and Distinguished Global Leader Series. Established through a Flinn Foundation endowment, the Centennial Lecture has brought renowned speakers to ASU, including Nobel Laureate Dr. Oscar Arias and actor-activist Edward James Olmos. In 2024, Dr. Bernice King headlined the event, marking the 60th anniversary of Dr. Martin Luther King Jr.'s visit to Arizona.

Conversations That Matter

The Rhodes Lecture, created to honor John J. Rhodes' distinguished career in public service, fosters discussion on public policy and leadership. Rhodes speakers include former U.S. Secretary of Defense James Mattis, former U.S. Senator Jeff Flake, actress and author Diane Guerrero, Bill Nye the Science Guy and Vincent Stanley, director of Patagonia philosophy.

Through academic excellence, leadership development, and global engagement, Barrett empowers students to stand out as scholars and professionals, preparing them for success at ASU and beyond.

The Moeur Award is Arizona State University's oldest, continuing honor. It was established in 1901 by Dr. Benjamin B. Moeur and Honor Anderson Moeur, and is now sponsored annually by the Arizona State University Alumni Association. The award is presented at each Commencement ceremony to those individuals who have attained the highest academic standing in any four-year curriculum during their undergraduate years at ASU. All courses of the curriculum must be completed at ASU.

ABOUT THE COLLEGE OF GLOBAL FUTURES

We all share a stake in the future. The College of Global Futures is dedicated to creating a sustainable, equitable, and vibrant future for everyone.

The College of Global Futures, based within the Julie Ann Wrigley Global Futures Laboratory, prepares next-generation leaders with the knowledge, skills and mindsets they need to tackle complex global challenges. Home to the School for the Future of Innovation in Society, the School of Sustainability, the School of Complex Adaptive Systems and the School of Ocean Futures, the college fosters new interactions between students, staff, faculty and partners. These interactions elevate our ability to understand complex, integrated social, environmental and technical systems, drive responsible innovation, and lead to ethical interventions that ensure a just, healthy and fulfilling future for everyone. Global Futures students learn how to develop enduring solutions that benefit all people everywhere on a thriving, healthy planet.

ABOUT THE SCHOOL FOR THE FUTURE OF INNOVATION IN SOCIETY

When we innovate, are we thinking critically about social and technical systems in a way that anticipates potential concerns so that we can be confident that what we are creating is both useful and good for our global future?

The School for the Future of Innovation in Society envisions responsible innovation at scale. Our students anticipate societal challenges and work across disciplines to examine areas such as global technology and development, biomedical and health ethics, public interest technology and policies for emerging technologies. We are grounded in the belief that by considering the ways in which we translate imagination into innovation, engaging the public and exploring the social impacts of technological and scientific advancements, we collectively build more just and equitable futures for all.

ABOUT THE SCHOOL OF SUSTAINABILITY

School of Sustainability students, diverse in their backgrounds and interests, work with faculty and researchers toward a common goal: to foster innovative research, impactful education and engaged communities to achieve environmental integrity, social equity and well-being. Sustainability integrates social, economic and environmental dimensions to develop enduring and equitable solutions to global challenges.

Learning tracks within the school include energy and technology, international development, ecosystems management, urban dynamics, food systems, policy and governance, and sustainability leadership. Our curriculum is grounded in experiential learning and practical faculty-led research, equipping graduates of the School of Sustainability with the skills and tools to make positive impacts in a rapidly changing world.

ABOUT THE SCHOOL OF COMPLEX ADAPTIVE SYSTEMS

Uncertainty, scalability, thresholds, tipping points, path dependence...these are conditions that influence the most pressing issues facing societies across the globe. The School of Complex Adaptive Systems explores these challenges, develops solutions and suggests interventions that enhance the resilience and well-being of our planet and our shared global futures.

Our planet is the ultimate complex system with many intertwined subsystems that envelop natural, social and technological systems and transcend traditional disciplinary boundaries. This visionary school engages wide-ranging national and international collaborations to advance the exploration of these systems and disseminate fundamental transdisciplinary knowledge through a unique set of academic graduate offerings.

ABOUT THE SCHOOL OF OCEAN FUTURES

The School of Ocean Futures addresses the current and future states of the planet's largest biome – our oceans – by exploring and investigating the challenges they experience due to increasing pressure from human activities. The School of Ocean Futures links research and teaching facilities in the Pacific and Atlantic oceans with the cutting-edge research facilities on ASU's Tempe campus to provide students with a wide array of experiential learning opportunities that will prepare them to conduct work of significant impact.

ABOUT THE COLLEGE OF HEALTH SOLUTIONS

The College of Health Solutions translates health research and discovery into practice and prepares students to address the challenges facing people to stay healthy, improve their health and manage chronic disease.

Since its founding in 2012, the college has experienced rapid growth. Its degree programs are designed to meet the global demand for health and health care professionals who are prepared to improve health outcomes for people and communities. Programs are offered in biomedical informatics and biomedical diagnostics; health care systems; health sciences and medical studies; movement sciences; nutrition; population health; and speech and hearing science.

Students learn from renowned research and clinical faculty, engage in experiential activities and are encouraged to contribute to innovative health research. They participate in solving health challenges through internships, interdisciplinary research teams and global study abroad experiences.

Students, faculty and staff at the College of Health Solutions, along with community partners, work together toward a common goal of optimizing the health of the diverse populations we serve. Graduates of the college are uniquely prepared to make an impact in the health workforce and shift the focus of health from sickness to wellness.

COLLEGE OF INTEGRATIVE SCIENCES AND ARTS

The College of Integrative Sciences and Arts (CISA) is a leader in integrative, applied and career-connected learning. Our deep commitment to student success, inclusive excellence and the ASU Charter creates an environment that prepares all of our graduates for careers across the sciences, humanities, social sciences and veteran initiatives.

Providing opportunities for students to integrate learning and doing through applied curriculum helps them discover their passion, leads to employment success and helps graduates develop transferable skills they can draw from throughout their lives.

Three schools comprise the College of Integrative Sciences and Arts:

The School of Applied Professional Studies prepares students to be socially and environmentally mindful in tech-forward careers via hands-on and career-connected learning. The school offers applied degrees in organizational leadership, technical communication, user experience and project management, enabling students to be competitive in high-demand fields. Aligning with ASU's top-ranked sustainability practices, our project management degrees are some of the few in the nation to be infused with sustainability curriculum. Graduates of the School of Applied Professional Studies are prepared to begin their careers on day one.

The School of Applied Sciences and Arts offers a growing number of forward-thinking options that demonstrate a signature commitment to career-connected, applied and integrative learning, with a focus on applied sciences, the environment and interdisciplinary humanities. Programs include the pre-veterinary medicine, pre-dental and sustainable horticulture concentrations in applied biological sciences; integrative social science; and science, technology and society, among others; certificates in wildlife management and indoor farming; and the nation's first bachelor's degree in applied military and veterans studies. Distinctive community engagement and public education efforts, such as research projects in Latinx oral history in the East Valley and Young Authors' Studio, reflect our commitment to the communities we serve, the students we educate and the planet we inhabit.

The School of Counseling and Counseling Psychology holds a distinguished national reputation for its research-driven counseling psychology doctoral program and its science-based master's programs. Additionally, it is home to the country's premier undergraduate major in counseling and applied psychological science — the only program of its kind at a major research university. The school continues to grow to better prepare graduates to serve the mental health needs of a multicultural society. The counseling and applied psychological science undergraduate program recently added bachelor's concentrations in sports and performance counseling; substance abuse and addictions; and counseling military members and veterans; and the Master of Counseling now has a concentration in K-12 school counseling.

Moreover, several degree programs provide a direct route to licensure in Arizona. School of Counseling and Counseling Psychology graduates are well-prepared to make significant contributions in advancing mental health and well-being.

The college is also home to ASU's **Office for Veteran and Military Academic Engagement**, a national leader in the emerging field of veteran studies. The Office for Veteran and Military Academic Engagement fosters a supportive and inclusive community for veterans and military-affiliated students through academics, research, events, networking opportunities and collaboration with academic, military and civilian communities. The office also joins forces with other like-minded agencies across ASU and in the greater community to address veteran issues such as physical and mental health, social connectedness, employment, education and homelessness.

RECESSIONAL

THE COLLEGE OF LIBERAL ARTS AND SCIENCES

As the academic heart of Arizona State University, The College of Liberal Arts and Sciences fosters unmatched access, educational excellence, and interdisciplinary inquiry to generate solutions for the changing world. Our diversity and dynamism ignite continued growth and development in any field of study, from space exploration and chemistry to history and justice studies, to create global citizens for the 21st century.

We unite our academic disciplines — the analytical ability of natural scientists, the creativity of humanities scholars and the curiosity of social scientists — to harness the power of our interdisciplinary nature. We encourage our students to follow their dreams, pursue their passions and accomplish their goals in order to create a better future for the next generation and beyond.

Our faculty personify a broad vision of legendary academic scholarship at the forefront of global innovation. They teach our scholars how to adapt to new challenges and a changing landscape so they're capable of tackling tomorrow's challenges with ease. Any institution of higher learning can train a student for a first job, but we'd rather create master learners who are equipped with the right knowledge and skills for a lifetime of success. The liberal arts and sciences remain the best foundation for successful careers and deeply rewarding personal and professional lives.

We transform learning, accelerate discoveries and change lives.

HONOR CORDS

Some of our undergraduate degree candidates wear maroon and/or gold honor cords. These cords designate students who have completed at least 56 resident credit hours at ASU and who have attained the following grade point averages:

Summa Cum Laude = Maroon and Gold cords, 3.80 to 4.0 GPA

Magna Cum Laude = Gold cord, 3.60 to 3.79 GPA

Cum Laude = Maroon cord, 3.40 to 3.59 GPA

EDSON COLLEGE OF NURSING AND HEALTH INNOVATION

The growth of the Edson College of Nursing and Health Innovation reflects our desire to do more, serve more and sustain innovation. Our mission drives us to offer the highest quality academic, research and clinical practice programs so that we prepare the next generation of evidence-based health professionals who will excel as clinicians, teachers, health advocates and researchers.

The challenges that permeate our health care system require innovative solutions that will positively impact patients and entire systems, locally and globally. Our curriculum and clinical experiences expose students to health delivery and research settings, equipping them with the tools and knowledge that unleashes their innovative thinking from day one. Interprofessionalism guides us as we build programs and curricula to meet the needs of future health professionals. Our graduate and undergraduate programs continue to expand with a focus on program design and delivery that prepares graduates to work collaboratively within complex and dynamic patient care and health delivery systems.

Our online programs continue to expand access to the highest quality education to deliver degree programs that ensure the rigor and quality that characterize the reputation of our programs.

ABOUT THE PhD PROGRAM

The PhD in Nursing and Healthcare Innovation is one of the few interdisciplinary programs in nursing and healthcare in the country, providing an enriching academic environment that fosters scholarship, critical thinking, and interprofessional collaboration. The PhD degree creates leaders in health science, health education and policy, and health innovation through preparation in the research skills necessary to generate, apply, and disseminate scientific knowledge.

ABOUT THE DOCTOR OF NURSING PRACTICE PROGRAM

The Doctor of Nursing Practice Program (DNP) is a practice-focused doctorate that prepares graduates to practice at the most advanced level of nursing. Graduates of this program apply and integrate research to practice and leadership using innovative approaches to improve health care outcomes of populations, individuals, and organizations across various health care settings.

ABOUT THE MASTER OF SCIENCE IN NURSING PROGRAMS

ASU remains on the cutting edge in preparing nurse leaders and nurse educators for the 21st century. The MS in Nursing and MS in Nursing, Nurse Educator (NED) concentration prepares new and experienced nurses to meet the demands of the complex and changing healthcare environment. The Masters Entry to Nursing Practice (MEPN) prepares entry-level RN students at the graduate level to meet workforce demands in complex health systems.

ABOUT THE MASTER OF SCIENCE, CLINICAL RESEARCH MANAGEMENT AND THE MASTER OF SCIENCE, REGULATORY SCIENCE PROGRAMS

The Master of Science in Clinical Research Management (CRM) prepares graduates to lead clinical research. Courses focus on the elements of leadership, operations of clinical research, data management, ethics, and quality. The Master of Science in Clinical Research Management (Regulatory Science) concentration and the Master of Science Regulatory Science prepares graduates for careers in regulatory aspects of development, approval and marketing of medical products and pharmaceuticals to ensure the safety and efficacy of new medical products, diagnostics and treatments.

ABOUT THE HEALTHCARE INNOVATION PROGRAM

The Master of Healthcare Innovation (MHI) program, the first in the country, is an interdisciplinary degree that prepares graduates to design, implement and lead transformation in health care. Participants in this program come from a wide variety of professions, from all over the world, all with an interest in leading innovation in health and health care. Graduates search for and implement sustainable solutions for today's health care issues with an eye to the future within an interdisciplinary environment.

ABOUT THE BACHELOR OF SCIENCE IN NURSING PROGRAM

The Bachelor of Science in Nursing (BSN) degree prepares professional nurses who possess the theoretical foundation and the clinical competence to provide nursing care across all health care settings. Graduates of ASU's nursing degree programs are prepared to respond to the vast and changing health care needs of individuals and communities.

ABOUT THE RN-BSN PROGRAM

The online RN-BSN program builds on the knowledge and skills the student attained in their associate degree or diploma program, especially in the areas of evidence based practice, leadership and management, and community/public health. The interactive course assignments enhance the student's written and verbal communication skills, clinical reasoning skills, teamwork, and information technology skills. Graduates will integrate new knowledge into their nursing practice.

ABOUT THE CONCURRENT ENROLLMENT PROGRAM

The Concurrent Enrollment Program (CEP) is designed for qualified nursing students who are interested in earning their BSN degree from ASU while simultaneously pursuing their Associate of Applied Science (AAS) in Nursing degree through a participating community college. The CEP is a rigorous program with a plan of study that enables students to build on the knowledge and skills learned in the AAS in nursing program.

ABOUT THE BACCALAUREATE HEALTH PROGRAMS

The Baccalaureate Health Programs consist of the Bachelor of Science degrees in Integrative Health, Community Health, Health Care Coordination, Health Entrepreneurship & Innovation, and Health Care Compliance and Regulations. Each of these degrees prepare graduates to be integral members of the health care team. Graduates are prepared to collaborate with individuals, families and communities regarding changes to the health care system. This includes health education, health promotion, care coordination, disease management, health care navigation, health innovation, health care compliance, and advocacy services as well as assisting patients in obtaining services, understanding policies, and making health care decisions.

ABOUT THE GRACE CENTER FOR INNOVATION IN NURSING EDUCATION

The Grace Center facilitates over 150,000 student hours annually in experiential learning and community outreach across programs at Edson College. The Center's vision "Knowledge & Action Join as One" is enacted in person and through online resources. State-of-the-art technology and resources provide an effective learning environment for students to practice/master nursing skills and clinical decision making in a dynamic encounter using fully integrated informatics in a variety of healthcare settings while using learning management systems to empower reflective practice. Simulation is an evidenced-based innovation in healthcare education based on objectives guided preparation, and reflection to reinforce student self-discovery that translates to practice competencies.

ABOUT THE HERBERGER INSTITUTE FOR DESIGN AND THE ARTS

ASU’s Herberger Institute for Design and the Arts is one of the largest comprehensive design and arts colleges in the country, built on a combination of disciplines unlike any other program nationally and located within a dynamic research university focused on transformative change. The Institute includes ASU FIDM and ASU FIDM Museum; the School of Art; the School of Arts, Media and Engineering; The Design School; The Sidney Poitier New American Film School; the School of Music, Dance and Theatre; and the ASU Museum.

With almost 9,000 students, around 600 faculty members, over 250 staff members, more than 130+ program options and a tradition of top-ranked programs, we are committed to redefining the 21st-century design and arts school.

The Institute develops and scales innovative ideas to help strengthen the role of designers and artists across all areas of society and culture, and to increase the capacity of designers and artists to make a difference in their communities and in the world.

The Institute is dedicated to the following design principles:

- Creativity is a core 21st-century competency.
- Design and the arts are life-centered practices.
- The power of creative expression is transformational when it's derived from the full spectrum of our communities.
- The power of design and the arts is amplified exponentially in partnership with others.
- Complexity demands a synthesis of art, science, and technology – at scale

We are all of us being shaped and influenced today by some of the most powerful technologies of human expression. At the Herberger Institute, we are committed to ensuring that those technologies are directed toward human thriving and planetary resilience. We believe in creativity at social scale, meaning creativity that is accessible to all, connected to public purposes, and powered by ethical and life-centered technology.

The Institute operates online and across four cities—Tempe, Phoenix, Mesa and Los Angeles—with some of the best facilities for advancing in critical areas of the rapidly evolving creative economy. These areas include design, film, fashion, popular music, and, more broadly, AI and “extended reality,” which includes the study and creation of emerging media and immersive experiences.

We encourage all our alumni to continue to share their stories with us and to take an active role in the Herberger Institute Alumni Chapter. For more information on our alumni activities, please visit herbergerinstitute.asu.edu/alumni. Connect with fellow design and arts alumni on LinkedIn, Facebook and Twitter.

CLOSING

ENGINEERING AT ARIZONA STATE UNIVERSITY

The Ira A. Fulton Schools of Engineering is home to more than 400 tenured/tenure-track faculty members and about 33,000 students, making it the largest engineering school in the country. Today, more than 85,000 Fulton Schools alumni are advancing engineering and technology fields in Arizona and around the world.

At the Fulton Schools, we crafted a visionary blueprint for engineering education that fosters a transdisciplinary approach to teaching and research. The Fulton Schools offers 27 undergraduate and more than 50 graduate degree programs. In addition to online options for degree programs, the Fulton Schools also offers professional development trainings like Six Sigma.

The School of Biological and Health Systems Engineering prepares students to use biomedical and engineering principles to develop instrumentation, materials, diagnostic and therapeutic devices, artificial organs, and various other technologies. Our program produces graduates who excel at the intersection of biology, engineering and computing to advance human health and improve the overall quality of global health care.

The School of Computing and Augmented Intelligence is home to a broad range of computer- and data-related degree programs that offer a distinct perspective on the vast engineering and technology domains. We are exploring how computing, data analytics, cybersecurity, visualization, machine learning and augmented intelligence impact decision-making, creativity and responsible innovation in a modern, information-driven society.

The School of Electrical, Computer and Energy Engineering fosters collaboration among faculty, students and industry to address global challenges. Our research strengths and degree programs in computer engineering; data science, analytics and engineering; electrical engineering; and robotics and autonomous systems align with national and international priorities. We are also growing our expertise and collaborations to become a global hub for microelectronics engineering expertise.

The School for Engineering of Matter, Transport and Energy leverages the synergy of engineering and science to create innovative solutions to society's most pressing problems in energy, human health, environmental infrastructure and sustainability. Through our unique, interdisciplinary degree programs taught by world-class faculty, we have created a one-of-a-kind educational experience that prepares our graduates for myriad careers across a range of disciplines.

The School of Integrated Engineering is the newest school in the Fulton Schools and represents the first engineering presence on the ASU West Valley campus. Students will explore combinations of engineering, technology and science with other in-demand disciplines to create tailored degree pathways in business and microelectronics. Graduates will be able to conceptualize, build and deploy solutions by integrating diverse perspectives.

The School of Manufacturing Systems and Networks is at the leading edge of researching and developing solutions for next-generation manufacturing systems. With a research portfolio that is inherently transdisciplinary, collaborative and inclusive, students in the school are gaining knowledge and experience in manufacturing processes, computing technologies, data analytics and the management of distributed, digitally networked manufacturing resource locations.

The School of Sustainable Engineering and the Built Environment provides a nexus for education and research that addresses the critical infrastructure needs of our society in an environmentally sound manner. Our holistic approach covers the engineering expertise of civil, environmental and sustainable engineering; the design and construction principles of construction engineering; and the project management and leadership skills of construction management.

The Polytechnic School offers a wide range of engineering and technology-related degrees. It is home to advanced learning laboratories led by faculty members with deep expertise and industry experience. With an emphasis on hands-on, project-based learning, our programs are designed to equip students with the skills and experience they need to succeed in the workforce and respond to evolving technological advancements, industry needs and societal trends.

Ira A. Fulton***Chairman of the Board and CEO, Fulton Homes***

In 2003, Ira A. Fulton, founder and CEO of Fulton Homes, established an endowment of \$50 million, resulting in the school being renamed in his honor. Dr. Fulton's gift has supported scholarships, fellowships, research programs and investments in faculty that have driven our mission and contributed to our success.

"With this endowment, we are building an engine of educational and economic growth that will endure for generations. It is a gift of opportunity, prosperity, social equality and hope." — Ira A. Fulton

ABOUT MARY LOU FULTON COLLEGE FOR TEACHING AND LEARNING INNOVATION

Mission

ASU's Mary Lou Fulton College for Teaching and Learning Innovation creates knowledge, mobilizes people and takes action to improve education.

MLFC faculty create knowledge by drawing from a wide range of academic disciplines to gain insight into important questions about the process of learning, the practice of teaching and the effects of education policy.

MLFC mobilizes people through bachelor's, master's and doctoral degree programs, through non-degree professional learning programs and through socially embedded, multilateral community engagement.

MLFC takes action by bringing people and ideas together to increase the capabilities of individual educators and the performance of education systems.

Core Value: Principled Innovation

Children born today will be shaped by accelerating change in technology, demography and our physical and social environments. The speed and convergence of change across so many dimensions of human experience will shape life in ways that are as profound as they are unpredictable.

For educators and education systems, these facts demand principled innovation that delivers positive social value and prepares children to thrive as individuals and as citizens at local, national and global levels.

Principled innovation is the core value that inspires all our activities: our academic programs; our strategic initiatives; how we teach and learn; and how we engage with one another and with the communities we serve.

MARY LOU FULTON (1933 – 2015)

Anyone fortunate enough to have known Mary Lou Fulton — to celebrate with her and take pride in students' accomplishments — is grateful to have had that privilege. So much of what we do at our college is an expression of her commitment to education and to providing the best possible opportunities for the greatest number of people.

RECESSIONAL

MESSAGE TO THE NEW COLLEGE GRADUATES

Congratulations on your extraordinary achievement! The faculty and staff of New College offer our sincere best wishes for your continued personal and professional success. We all look forward to seeing your work in the world; we know you will make your mark as an ASU New College graduate.

ABOUT THE NEW COLLEGE

The New College of Interdisciplinary Arts and Sciences offers a nationally unique environment: a small college experience with the power of ASU's major research university resources. Working one-on-one with our cutting-edge faculty—often through our New College Undergraduate Inquiry and Research Experience program (NCUIRE), our students reshape the boundaries of knowledge in their fields of study. This prepares them for a future of reshaping the world outside of ASU.

New College was founded on a “new” way of thinking about the academy. Instead of reproducing the intellectual silos that separate fields of study in other institutions, our programs have been structured on the notion that if we break down the barriers between fields, we can think in more innovative ways, do more path-breaking work, offer more effective solutions to real-world problems. From our Interdisciplinary Arts and Performance degree that teaches students many forms of artistic expression and then asks into what mode a concept should be born; to our Forensics degree that brings together fields including chemistry, psychology, and legal studies; to our Social Justice and Human Rights degree that explores sociological, historical, and contemporary cultural analyses of global issues, New College offers educational experiences that transcend more limited ways of thinking about the world.

ABOUT THUNDERBIRD SCHOOL OF GLOBAL MANAGEMENT

Thunderbird School of Global Management at Arizona State University cultivates visionary leaders who harness innovation and a global digital mindset to shape the organizations of the future. Committed to transforming leadership and management education, Thunderbird empowers professionals to drive sustainable prosperity in an increasingly interconnected world. As the premier institution for global leadership and management education, Thunderbird is more than just a school—it is a dynamic global network of leaders, managers, entrepreneurs, and intrapreneurs spanning both the private and public sectors.

For nearly 80 years, Thunderbird has been at the forefront of developing global leaders. Founded as the American Institute for Foreign Trade, Thunderbird was chartered on April 8, 1946, on the historic Thunderbird Field, a World War II airbase in Glendale, Arizona, where pilots from around the world once trained. General Barton Kyle Yount, recognizing the need for a school dedicated to international trade and global affairs, secured the airfield to fulfill this vision. Since its inception, Thunderbird has upheld a powerful guiding principle, best captured in the words of founding faculty member Dr. William Lytle Schurz: “Borders frequented by trade seldom need soldiers.”

As the world’s first higher education institution dedicated exclusively to international leadership, Thunderbird pioneered a curriculum integrating global management, international political economy, regional business environments, languages, and cross-cultural communication. Often described as a “mini-United Nations,” the school fosters a diverse and inclusive student body. Today, Thunderbird’s vast and influential alumni network includes nearly 50,000 graduates across 150 countries, with over 170 active alumni chapters in 70 nations.

In December 2014, Thunderbird became a part of the Arizona State University enterprise, blending its decades-long legacy of cultivating global leaders with ASU’s vast resources and commitment to innovation. In 2018, Thunderbird relocated to ASU’s vibrant Downtown Phoenix campus, uniting the world’s No. 1 ranked Master’s in Management (WSJ/THE) with the No. 1 university for innovation (U.S. News & World Report).

For the third consecutive year, Thunderbird has been recognized as the world’s top institution for international trade by Quacquarelli Symonds (QS), the global authority on higher education rankings. In its 2025 International Trade Rankings, Thunderbird secured the No. 1 spot ahead of esteemed institutions such as Columbia University, the University of Michigan–Ann Arbor (Ross), the University of North Carolina at Chapel Hill (Kenan-Flagler), the University of Oxford (UK), IMD (Switzerland), and Tsinghua University (China). This prestigious recognition underscores Thunderbird’s unparalleled leadership in shaping the future of global commerce and diplomacy.

At the heart of Thunderbird's transformation is the F. Francis & Dionne Najafi Thunderbird Global Headquarters, an ultramodern 110,000-square-foot facility on ASU's Downtown Phoenix campus. Designed to integrate cutting-edge technology with immersive global learning, this state-of-the-art building serves as a launchpad for the next generation of global leaders.

Further extending its global reach, Thunderbird's network of regional centers embodies its mission to advance global leadership and education. With over 15 dedicated regional representatives, Thunderbird maintains a strong presence through physical hubs in Phoenix, AZ (Global Headquarters); Geneva, Switzerland; Dubai, UAE; Seoul, South Korea; and Jakarta, Indonesia. Complementing these locations are virtual centers in Tokyo, Japan; Shanghai, China; Mumbai, India; Nairobi, Kenya; Amsterdam, Netherlands; London, United Kingdom; Mexico City, Mexico; Taipei, Taiwan; and Cairo, Egypt.

Additionally, Thunderbird's partnership with Arizona State University extends its influence to the ASU California Center in Los Angeles and the Barrett & O'Connor Washington Center in Washington, D.C., reinforcing its commitment to shaping the future of global business leadership.

**WALTER CRONKITE SCHOOL OF
JOURNALISM AND MASS COMMUNICATION****About the School**

The Cronkite School is widely recognized as one of the nation's premier professional journalism and mass communication programs. Rooted in the time-honored values of accuracy, responsibility, fairness and integrity that characterize its namesake, the school fosters excellence and ethics among students as they master the practical skills they need to succeed in the world of today and tomorrow.

The Cronkite School's more than 2,500 students, consistently lead the country in national competitions. Over the past decade, Cronkite has been first in the nation in the Society of Professional Journalists' Mark of Excellence competition and the Broadcast Education Association's Festival of Media Arts awards, and has finished in the top 10 in the Hearst Journalism Awards each year.

Students are guided by a faculty made up of award-winning professional journalists, strategic communications executives and world-class media scholars. Cronkite professors include five Pulitzer Prize-winning journalists, digital media thought leaders, top TV producers and correspondents, major metropolitan newspaper editors and strategic communications experts. They are master teachers, writers and scholars at the forefront of society's most pressing communications challenges.

The Cronkite School leads mass communication education with its "teaching hospital" learning method, in which students prepare for meaningful careers in media through hands-on learning immersive experiences. Students cover public affairs and sports from news bureaus in Phoenix, Los Angeles and Washington, D.C., producing impactful digital coverage and a nightly newscast on Arizona PBS that reaches 1.9 million households across the state. They conduct national investigations in the Howard Center for Investigative Journalism, and produce multimedia projects on issues of national importance in the Carnegie-Knight News21 program. They create multilingual digital marketing and public relations campaigns in the Cronkite Agency; grow media brands in the Los Angeles Content Studio; create video content and motion graphics in the Video Production Lab; and use emerging media technologies to forge the future of journalism in the New Media Innovation and Entrepreneurship Lab. Each year, Cronkite students complete hundreds of internships across the media fields, engage in dozens of student media organizations and clubs, and travel the world to connect with communities and tell their stories.

Elsewhere at the school, the News Co/Lab advances media literacy through journalism, education and technology; the Donald W. Reynolds National Center for Business Journalism provides resources and training to professional journalists; and the National Center on Disability and Journalism provides support and guidance for journalists as they cover people with disabilities. And connecting communicators around the world is Cronkite Global Initiatives, which fosters international partnerships, travel, training and sharing among students, scholars and professionals.

ASU's investment in the school has garnered national and international attention from educators and media professionals who place the school in the top tier of all U.S. journalism schools, calling it a pioneer in shaping how news is delivered and how people will stay informed in the future.

The Cronkite School is supported by generous individuals, corporations and foundations seeking to help train the next generation of journalists and communication professionals at a pivotal moment of industry transformation and growth. To make a gift today, visit asufoundation.org/cronkite.

About Walter Cronkite

ASU's journalism program was named in honor of former CBS News anchor Walter Cronkite in 1984.

The relationship started when Tom Chauncey, longtime owner of the CBS affiliate in Phoenix and a leading supporter of journalism education at ASU, contacted his old friend in an effort to advance the program. An endowment on behalf of the program was soon established and the school was named after "the most trusted man in America."

Over the next quarter of a century, Cronkite lent much more than his name to the school. He was closely involved — advising leadership, guiding students and faculty, and traveling to Arizona each year to personally give the Walter Cronkite Award for Excellence in Journalism to one of the nation's top journalists. The most important relationship, though, was with "our students," as Cronkite would always call them. Young students, some with parents barely old enough to remember Cronkite behind the anchor desk, lit up when he walked into a classroom. They hung on his every word as he thoughtfully answered their questions about the profession he so loved. They lined up just to shake his hand, and he loved every minute of it.

In what turned out to be Cronkite's last visit to ASU in 2007 before declining health prevented him from traveling, a group of 100 students gathered with just a few minutes of notice that Cronkite was in the building. He held them spellbound as he spoke about covering World War II, Vietnam, Apollo, Watergate and presidents from Truman to Reagan — and of how important "our school" was to him. Although Cronkite died on July 17, 2009, before he was able to visit the new building, he remains an ever-present part of the school's spirit and mission.

About Our Graduates

The Cronkite School has about 16,000 alumni throughout the Valley, across the country and around the world. Many are leaders in television, digital media, newspapers, radio, magazines, public relations and digital marketing.

In 1993, the Cronkite School inducted its first class into the Cronkite Alumni Hall of Fame. The charter inductees were Al Michaels ('66), an Emmy Award-winning sports broadcaster best known for anchoring "Monday Night Football," and Bill Redeker ('71), an ABC News correspondent who covered the Middle East and the Far East during his 30 years with the network.

Other notable Cronkite Alumni Hall of Fame inductees include Matt Barrie ('01), anchor of SportsCenter and studio host of ESPN College Football; Nicole Carroll ('91), editor-in-chief of USA Today; Becky Anderson ('94), CNN International anchor; Julie Cart ('98), Pulitzer Prize-winning Los Angeles Times reporter; Derrick Hall ('91), president and CEO of the Arizona Diamondbacks; Christine Devine ('87), news anchor at FOX 11 in Los Angeles; Mary Kim Titla ('85), founder of Native Youth Magazine; Ray Artigue ('76), president of The Artigue Agency; and Chip Dean ('77), legendary director of ESPN's "Monday Night Football."

THE NATION'S LEADING COMPREHENSIVE PUBLIC SERVICE COLLEGE

The Watts College of Public Service and Community Solutions is a unique, comprehensive public service college dedicated to fully integrating teaching, research and service to address social problems.

PREPARING PUBLIC SERVICE LEADERS FOR LIFELONG LEARNING, EQUIPPED WITH TOOLS TO AFFECT CHANGE

Our degree programs cover the spectrum of public service, including public policy, social work, criminology and criminal justice, nonprofit leadership, emergency management, community development, parks and recreation, and more.

A particular point of pride is that the Watts College student body is among the most inclusive at ASU, with high percentages of under-represented, college transfer and military veteran students—and one of the largest communities of first-generation college students. Many chose public service because of their own life experiences and firsthand understanding of systems that need improvement. Of equal importance is how this commitment translates into real impact for the communities to which students return.

INTEGRATING TEACHING, RESEARCH AND SERVICE ROOTED IN SOLUTIONS-BASED LEARNING

From day one of their college experience, our students are immersed in hands-on learning through a signature solutions-based pedagogy. They are paired with community partners to tackle real-world problems—both an educational, and service-based experience—delivering more than 600,000 hours of community service each year.

LEADING ASU SERVICE AND POLICY INITIATIVES TO CREATE A MODEL OF A SERVICE-COMMITTED UNIVERSITY

The college serves as a model for ASU's commitment to service—leading university-wide initiatives such as spearheading the first-of-its-kind Public Service Academy, partnering with the Harvard Institute of Politics to increase civic participation through our Pastor Center for Politics and Public Service and leading AmeriCorps programs like Public Allies Arizona, Legacy Corps for Veterans, Safety Planning for Survivors of Domestic Violence and Corporation for National and Community Service Employment Outcomes.

SOLVING PROBLEMS THROUGH COLLABORATION WITH COMMUNITY PARTNERS ACROSS SECTORS

The college brings collaborative ideas into action, working closely with hundreds of government, private and nonprofit partners locally and globally. Through our research and academic expertise, our research centers and offices, individual faculty members and cross-disciplinary teams all have an impact beyond dollars. They also produce training, policy guidance, best practices and direct service.

OUR SCHOOLS

The School of Community Resources and Development advances the social, economic, environmental and cultural well-being of our local and global communities through instruction, research and service. We provide nationally recognized interdisciplinary research expertise and innovative academic programs in nonprofit leadership and management, parks and recreation management, therapeutic recreation and tourism development and management.

The School of Criminology and Criminal Justice merges theory and practice. The core of our highly-ranked program—#2 overall by U.S. News & World Report—focuses on research, instruction and interdisciplinary approaches to major social issues that maximize community well-being and public safety.

The School of Public Affairs aims to understand society's grandest challenges in public management, policy and governance. We live the ASU Charter by preparing students and professionals for ethical, inclusive and effective public service; conducting cutting-edge research of public value; and engaging locally, nationally and internationally with the communities we serve. We are ranked consistently among the top 15 public affairs schools in the country with highly rated programs in local government management, emergency management and homeland security, nonprofit management, and public management and leadership.

The School of Social Work is one of the largest and most diverse social work programs in the U.S. We provide broad access to high-quality social work education, promote an inclusive learning community, conduct community-engaged and action-oriented research, and serve communities to advance social justice. Ranked among the top 20 social work schools nationwide by U.S. News & World Report, the school prepares social work practitioners, researchers and advocates to lead positive change in the Southwest, nationally and globally.

RESEARCH AND IMPACT

The College leads the university in the production of research that has system-wide and large-scale impact on myriad social, behavioral, economic and political challenges. Through rigorous applied research, we are developing solutions with the potential to better our response to pressing issues and positively impact our communities locally, nationally and globally.

RECESSIONAL

ABOUT THE W. P. CAREY SCHOOL OF BUSINESS

The W. P. Carey School of Business at Arizona State University is one of the highest-ranked and largest business schools in the United States. Recognized for excellence in business education, the school drives innovation and positively impacts management globally. Through access, excellence, and innovation in business knowledge, W. P. Carey is committed to transforming the world.

More than 23,000 students attend the W. P. Carey School of Business, including about 7,000 online learners and more than 100 doctoral candidates. The student body is especially diverse, including representatives from over 100 countries.

At W. P. Carey, every member of the community — on campus or worldwide — aspires to do great things for themselves and others. This promise is enshrined in the Carey Code, to contribute to our legacy and live our values of excellence, integrity, impact, and community; to demonstrate that business is personal by treating others with respect and kindness; to advocate for access and equal opportunity to create stronger organizations and inclusive societies; to embrace and exhibit ethical business practices; and to champion fellow Sun Devils and volunteer when and what we can to promote their success.

The W. P. Carey School boasts an acclaimed faculty of more than 300 esteemed tenure and tenure-track professors. Many faculty members are also on the editorial boards of academic journals and publications. The school is home to more than 20 research centers and a research institute, producing impactful research that supports academia and industry worldwide.

Both graduate and undergraduate programs are consistently ranked among the nation's best by U.S. News & World Report, with several in the Top 10.

Undergraduate students can pursue a Bachelor of Science degree in high-demand fields such as applied business and technology solutions, artificial intelligence in business, corporate accounting, entrepreneurial leadership, financial technology, and supply chain management. Additionally, Bachelor of Arts degrees are available in applied business and technology solutions and entrepreneurial leadership.

At the graduate level, the school offers its renowned MBA in Full-time, Evening, Online, and Executive formats. Specialized Master of Science programs include the first-in-the-nation Artificial Intelligence in Business, the innovative Supply Chain Management, and Real Estate Development.

Doctoral degrees are also available across multiple disciplines, including a Doctor of Business Administration (DBA) with a concentration in supply chain management.

The W. P. Carey alumni network spans the globe. Our alumni represent highly regarded companies from diverse industries, including manufacturing, technology, retail, banking, accounting, real estate, entertainment, and food, as well as entrepreneurial firms and respected nonprofit organizations.

THE ARIZONA STATE UNIVERSITY MACE AND PRESIDENT'S CHAIN OF OFFICE

In Medieval times, a mace was a hand-to-hand combat weapon. In about the year 1400 A.D., a mace evolved from a weapon to a ceremonial instrument used by academicians in rituals such as commencement and inaugurations. The oldest known ceremonial mace was that of the Faculty of Common Law of St. Andrew University in Scotland, used in 1438.

The Mace and Chain of Office are presented only at ceremonies in which faculty members are in full academic regalia, such as the Inauguration of the ASU President, University Commencement, Faculty Assemblies, Regents' and President's Professor Induction Ceremonies and Convocation.

The Mace is carried at the head of the procession and laid in a cradle, thus signifying the formal onset of the ceremony.

ASU's ceremonial mace and chain of office was created in observance of ASU's Centennial in 1985. Handcrafted by ASU Professor of Art, David Pimentel (1943-2004), the mace and chain was created with "austere elegance and traditional southwestern motifs." In keeping with these directions, Professor Pimentel constructed both items out of materials native to Arizona. The ASU Mace is a wood staff, approximately three and a half feet long, weighing eight pounds and made of hollowed and polished Mesquite.

The head of the ASU Mace has four sterling silver blades and is banded with copper, Morenci turquoise, and a silver ring on which the words Arizona State University are embossed. The turquoise inlay was cut and polished by Navajo jeweler Richard Charlie of Mesa. The ASU seal is embossed in silver on the heel of the mace.

The President's Chain of Office includes a silver rope woven from strands of hand-turned links, which holds a medallion six inches in diameter that reverses to reveal the ASU seal in gold on one side and the same in silver and turquoise on the other.

COLLEGE MARSHALS SPRING 2025

College Marshals consist of selected faculty members from each college at all ASU campuses. Selection criteria is left to the individual colleges, but faculty who have recently won awards or have received special recognition are given primary consideration.

Barrett, The Honors College — Dr. Christiane Alcantara is finishing successful terms as both the Chair of Barrett's innovative Faculty Mentoring Program and as Director of Barrett Summer Scholars. She is also currently co-teaching the first bilingual core honors class. The class offers an opportunity for students to develop their Spanish skills in an academic context, which aligns with the commitment Barrett has to preparing students to be leaders and problem-solvers in a global context. It also, importantly, supports ASU's new designation as a Hispanic Serving Institution (HSI). Dr. Alcantara consistently demonstrates care and commitment to building strong community within and beyond the classroom.

College of Global Futures — Milan Shrestha is a Teaching Professor in the School of Sustainability. Milan exemplifies the ASU Charter through his commitment to excellence and access in pedagogy, student mentoring, and school service. He led the complete redesign across in-person and online modalities of SOS 110 Sustainable World, creating an appealing and engaging Sustainability General Studies course that exposes hundreds of students each semester to foundational knowledge in sustainability. He is also an empathetic and highly effective instructor that is beloved by his students. Finally, he has shown significant leadership and initiative in revising the learning objectives for the Sustainability undergraduate programs.

College of Health Solutions — Min-Hyun Kim is an Assistant Professor of Nutrition in the College of Health Solutions. He investigates the molecular mechanisms of obesity and diabetes using animal models. Particularly, his laboratory studies how diet regulates gene expression, and the effect of these diet-gene interactions on metabolic hormones such as leptin, insulin and GLP-1. Before joining the faculty at ASU in 2022, he was a postdoctoral fellow at the University of Michigan Medical School, where he studied the epigenetic regulation of leptin signaling pathways. Kim earned his PhD in nutritional sciences from the University of Florida.

College of Integrative Sciences and Arts — Dr. Heather Bateman is a Full Professor in the School of Applied Sciences and Arts whose research focuses on ecology and conservation of reptiles, amphibians, and birds in wildland and urban ecosystems. Dr. Bateman teaches herpetology and ornithology where she enjoys leading students on field trips with wildlife professionals. She mentors undergraduate and graduate students in applied wildlife research and has been recognized with mentoring and teaching awards from the AZ Wildlife Society, Partners in Amphibian and Reptile Conservation, and is the 2024-2025 Provost Teacher awardee. Dr. Bateman has authored over 70 articles and continues to advance student opportunities in research.

The College of Liberal Arts and Sciences — Ana Hedberg Olenina is an Associate Professor of Comparative Literature and Media Studies at the School of International Letters and Cultures. Her research focuses on Russian and Ukrainian cinema and media theory with an emphasis on spectators' psychology and immersive technologies. Her book *Psychomotor Aesthetics: Movement and Affect in Modern Literature and Film* (Oxford University Press, 2020) was awarded two major national prizes by the Association for Slavic, East European, and Eurasian Studies and the American Association of Teachers of Slavic and East European Languages. She is a recipient of the 2024-2025 Zebulon Pearce Distinguished Teaching Award in Humanities.

Edson College of Nursing and Health Innovation — Ana Orrantia Murphy, MS, RN, CNE, is a Clinical Assistant Professor at ASU's Edson College of Nursing and Health Innovation. She served for seven years in the United States Air Force Nurse Corps. An RN for 43 years, including 32 years in nursing education, she is dedicated to building a foundation of excellence for prelicensure nursing students and inspiring lifelong careers in nursing. In addition to educating student nurses, she leads study abroad programs and mentors interdisciplinary students in global health initiatives through the Barrett Global Resolve program. As an NCLEX Review educator, she travels nationwide to educate future nurses. She is co-faculty advisor for the Student Nurses Association and currently serves on the Board of the National Association of Hispanic Nurses, Phoenix Chapter.

Herberger Institute for Design and the Arts — Dr. Danielle Sponder Testa, ASU FIDM, is a thought leader in fashion business innovation. Her expertise spans innovation in sustainable product management, advanced retail technologies, and consumer shopping habits. Dr. Testa's connection between industry and academia has been recognized through numerous fellowships and awards. In May 2025, Dr. Testa will be the lead professor in the launch of a new project hosted by ASU Learning Enterprise, FSF University. This project has been created by the foremost fashion-oriented education and workforce development nonprofit, the Fashion Scholarship Fund, to provide equity and access to all students seeking to enter the fashion industry.

Ira A. Fulton School of Engineering — Dr. Kiran Solanki was recently awarded the prestigious TMS Brimacombe Medal, and one of his recent research papers was featured in *Science*, the world's most widely read and highly cited scientific journal.

Mary Lou Fulton College for Teaching and Learning Innovation —

Richard “Lennon” Audrain is a research assistant professor at Arizona State University’s Mary Lou Fulton College for Teaching and Learning Innovation. He leads innovation and policy initiatives for the Next Education Workforce Initiative, which builds team-based staffing models to better serve students and support educators. A former Latin, Spanish, and English teacher, Lennon has led major federal grant work and now serves as Executive Board President of the National Association of Community College Teacher Education Programs. His research spans team-based staffing models, grow-your-own teacher pathways, teacher preparation, and cross-sector workforce comparisons in education policy and educator development.

New College of Interdisciplinary Arts and Sciences —

Charles St. Clair is an Emmy Award-winning actor and director and a three-time recipient of the Fulbright-Hays Group Project for cultural studies in Ghana, West Africa. He is the founder of the Fairmount Theatre of the Deaf, and he toured the United States and Canada as well as appearing twice at New York’s Lincoln Center Theatre Festival during his time as artistic director. He is a five-time ariZoni award-winning director, including the closing ceremonies of the Winter Special Olympics, the Orange and Sun Bowl half-time productions, with tours to Europe, China, India, and the Middle East. Mr. St. Clair is presently a professor of practice for the Interdisciplinary Arts and Performance program in the New College of Interdisciplinary Arts and Sciences.

Thunderbird School of Global Management —

Roy C. Nelson, PhD, is Senior Associate Dean of Undergraduate Programs and Associate Professor (with tenure) at Thunderbird School of Global Management. He has worked, taught, and done research in Latin America and elsewhere around the world. In addition to numerous articles in academic journals, Dr. Nelson is the author of two books: *Harnessing Globalization: The Promotion of Nontraditional Foreign Direct Investment in Latin America* (Penn State University Press), and *Industrialization and Political Affinity: Industrial Policy in Brazil* (Routledge). He has a BA (with honors) from Stanford University, an MA from Yale University, and a PhD from Cornell University.

Walter Cronkite School of Journalism and Mass Communication —

Dr. Keating’s primary research explores the design and effects of strategic messaging. Much of his current work focuses on how people process and are influenced by messaging given their existing systems of beliefs, the role and impact of message repetition, and how to optimize influence in strategic communication contexts.

Watts College of Public Service and Community Solutions — Justin Stritch is an Associate Professor in the School of Public Affairs. Dr. Stritch is being recognized for his decade of service to Arizona State University and for co-chairing the launch of Principled Innovation at the Watts College of Public Service and Community Solutions. His professional research focuses on the management and performance of public and nonprofit organizations. His research has been published in the *Journal of Public Administration Research and Theory*, *Public Administration Review*, *International Public Management Journal*, and *Public Administration*. He holds an MPA From UNC Charlotte and a doctorate from the University of Georgia.

W. P. Carey School of Business — Christopher P. Neck, PhD is a highly acclaimed Professor of Management at Arizona State University and one of the world's leading experts on self-leadership. He is the coauthor of the groundbreaking book *Self-Leadership: The Definitive Guide to Personal Excellence* (Sage, 2024), widely regarded as the seminal work in the field. With a prolific academic career, Dr. Neck has authored or coauthored 30 books and published over 150 scholarly articles, many of which have shaped the way leadership and personal development are understood and taught. Over his career, he has taught and inspired more than 80,000 college students.

HISTORY OF THE ACADEMIC COSTUME

The present-day academic costume seemingly originated at Oxford and Cambridge Universities in the 1300s. As the universities passed from ecclesiastical control, brighter colors distinguished the academic robe from the drab clerical gown. Colonial American universities based their academic regalia on the British system.

In the 1880s, a student movement centering in New England investigated the establishment of a "senior badge," to improve commencement week exercises and revive the traditions of university life. In 1893, an intercollegiate commission established a uniform code for caps, gowns and hoods for the various degrees.

Of the costume's three components, the hood is the most interesting. Originally it had three uses: as a head covering, as a shoulder cape, and as a bag in which alms could be collected. It is mentioned as early as 1480 in clerical literature. When large wigs were in vogue in Britain, the cape part of the hood was split in front and a narrow neckband inserted. The entire cape and hood was allowed to fall back as it is today, and it was never restored to the original style.

Following is a list of the hood and tassel colors established by the Intercollegiate Code to represent departments of learning:

Architecture— Blue-Violet
 Agriculture— Maize
 Arts, Letters, Humanities— White
 Business Administration,
 Commerce,
 Accountancy— Sapphire Blue
 Dentistry— Lilac
 Economics— Copper
 Education— Light Blue
 Engineering— Orange
 Fine Arts— Brown
