

ARIZONA STATE UNIVERSITY  
COMMENCEMENT  
AND  
CONVOCATION  
PROGRAM

Spring 2022

May 9-13, 2022

**THE NATIONAL ANTHEM**  
**THE STAR-SPANGLED BANNER**

O say can you see, by the dawn's early light,  
What so proudly we hailed at the twilight's last gleaming?  
Whose broad stripes and bright stars through the perilous fight  
O'er the ramparts we watched, were so gallantly streaming?  
And the rockets' red glare, the bombs bursting in air  
Gave proof through the night that our flag was still there.  
O say does that Star-Spangled Banner yet wave  
O'er the land of the free and the home of the brave?

**ALMA MATER**  
**ARIZONA STATE UNIVERSITY**

Where the bold saguaros  
Raise their arms on high,  
Praying strength for brave tomorrows  
From the western sky;  
Where eternal mountains  
Kneel at sunset's gate,  
Here we hail thee, Alma Mater,  
Arizona State.  
*—Hopkins-Dresskell*

**MAROON AND GOLD**

Fight, Devils down the field  
Fight with your might and don't ever yield  
Long may our colors outshine all others  
Echo from the buttes, Give em' hell Devils!  
Cheer, cheer for A-S-U!  
Fight for the old Maroon  
For it's Hail! Hail! The gang's all here  
And it's onward to victory!

Students whose names appear in this program are candidates for the degrees listed,  
which will be conferred subject to completion of requirements.

University commencement and convocation ceremonies are special events for all involved.  
Please show respect for everyone who has come to share in the experience. Individuals  
who engage in inappropriate or disruptive behavior may be removed from the event.

As a courtesy to those around you and to our graduating students,  
please turn off all electronics devices and phones during the ceremony.

Only working staff, graduating students and authorized guests are allowed in the graduate and  
staff entry points, or on the floor or field near graduate seating and the stage. This restriction applies  
to Gammage Auditorium, Desert Financial Arena, Sun Devil Stadium or other ceremony venues.

# **MISSION STATEMENT**

## **UNIVERSITY COMMENCEMENT**

**University Commencement** represents the culmination of a student's academic achievement.

**It is a time of celebration and reflection  
for students, families, friends, faculty and staff.**

**It brings together a diverse community  
to share in the joy of accomplished goals.**

Arizona State University continually demonstrates its dedication to efficiency, technology and sustainability. The full University Commencement program is made available online at [graduation.asu.edu/commencement\\_programs](https://graduation.asu.edu/commencement_programs).

This change aligns with our growing institutional efforts to enhance sustainability practices, and our broader endeavors to employ technology in heightened service to our students.

To order copies of the final book with all graduates names listed, email your request to [ASUCommencement@rrd.com](mailto:ASUCommencement@rrd.com) and someone will respond with payment instructions and order details. Note that final books will not be available until late Fall 2023 as the University must verify all graduates before their names are published.

**MESSAGE FROM THE  
ARIZONA BOARD OF REGENTS**

Dear Graduate,

On behalf of the Arizona Board of Regents, congratulations on your graduation! Today is a turning point in your life – one which leads to a world of opportunity.

Your graduation from Arizona State University is a culmination of your hard work, dedication and persistence. That work has prepared you for the demands of a modern economy and of a tumultuous world. As you begin your new adventures, please consider that continual learning will provide personal fulfillment and will ensure your skills remain in demand in our ever-changing world. Keep learning and broadening your horizons, not only through new knowledge, but by listening to others and discussing topics in a civil manner. Recognizing an individual's point of view and treating differing opinions as an opportunity to learn is crucial to making progress in our society.

We commend you for your perseverance despite the COVID-19 pandemic. The pandemic has impacted your life for more than two years as the course of the virus continued to challenge both you individually and our broader university family. Every graduate deserves accolades for their resilience and sheer determination to learn in new ways, for keeping our campus as safe as possible and for taking responsibility to serve our broader communities. We appreciate your commitment to your education, your university and to your fellow students.

Our board is proud of you. As an ASU graduate you now represent our university and the ideals it stands for. Remember your alma mater – your friends, mentors, professors and all who supported you along the way. You are forever part of the Sun Devil family.

We wish you the best for a future that is full of promise and possibilities.  
Go Devils!

Sincerely,

Lyndel Manson  
Chair

John Arnold  
Executive Director

## HISTORY OF HONORARY DEGREES

Harvard was the first university to confer honorary degrees in 1692. Since then it has become a recognized function of degree granting institutions. Honorary degrees are an opportunity for universities to single out people who have made contributions to society. At ASU, honorary degree recipients are nominated by faculty members. The six-member Academic Affairs Honorary Degrees Committee reviews faculty nominations for the Honorary Degree. It then recommends candidates to the president. The committee is appointed by and responsible to the president.

## HONORARY DEGREE CITATIONS

### LONNIE G. BUNCH III

Lonnie G. Bunch III is the 14th Secretary of the Smithsonian. He assumed his position June 16, 2019. As Secretary, he oversees 21 museums, 21 libraries, the National Zoo, numerous research centers, and several education units and centers. Two new museums—the National Museum of the American Latino and the Smithsonian American Women’s History Museum—are in development.

Previously, Bunch was the director of the Smithsonian’s National Museum of African American History and Culture. When he started as director in July 2005, he had one staff member, no collections, no funding and no site for a museum. Driven by optimism, determination and a commitment to build “a place that would make America better,” Bunch transformed a vision into a bold reality. The museum has compiled a collection of 40,000 objects that are housed in the first “green building” on the National Mall. In 2019, the creation of the museum became the first Smithsonian effort to be the topic of a Harvard Business Review case study.

Occupying a prominent location next to the Washington Monument, the nearly 400,000-square-foot National Museum of African American History and Culture is the nation’s largest and most comprehensive cultural destination devoted exclusively to exploring, documenting and showcasing the African American story and its impact on American and world history.

Before his appointment as director of the museum, Bunch served as the president of the Chicago Historical Society (2001–2005). There, he led a successful capital campaign to transform the Historical Society in celebration of its 150th anniversary, managed an institutional reorganization, initiated an unprecedented outreach initiative to diverse communities and launched a much-lauded exhibition and program on teenage life titled “Teen Chicago.”

A widely published author, Bunch has written on topics ranging from the black military experience, the American presidency and African American History in California, diversity in museum management and the impact of funding and politics on American museums. His most recent book *A Fool’s Errand: Creating the National Museum of African American History and Culture in the Age of Bush, Obama, and Trump*, which chronicles the making of the museum that would become one of the most popular destinations in Washington.

Bunch has worked at the Smithsonian in the past, holding several positions at its National Museum of American History from 1989 through 2000. As the museum’s associate director for curatorial affairs for six years (1994–2000), he oversaw the curatorial and collections management staff and led the team that developed a major permanent exhibition on the American presidency. He also developed “Smithsonian’s America” for the American Festival Japan 1994; this exhibition, which was presented in Japan, explored the history, culture and diversity of the United States.

Bunch served as the curator of history and program manager for the California African American Museum in Los Angeles from 1983 to 1989. While there, he organized several award-winning exhibitions, including “The Black Olympians, 1904–1950” and “Black Angelenos: The Afro-American in Los Angeles, 1850–1950.” He also produced several historical documentaries for public television.

Born in Belleville, New Jersey, Bunch has held numerous teaching positions at universities across the country, including American University in Washington, D.C., the University of Massachusetts in Dartmouth and George Washington University in Washington, D.C.

In service to the historical and cultural community, Bunch has served on the advisory boards of the American Association of Museums and the American Association for State and Local History. In 2005, Bunch was named one of the 100 most influential museum professionals of the 20th century by the American Association of Museums.

Among his many awards, he was appointed by President George W. Bush to the Committee for the Preservation of the White House in 2002 and reappointed by President Barack Obama in 2010. In 2019, he was awarded the Freedom Medal, one of the Four Freedom Awards from the Roosevelt Institute, for his contribution to American culture as a historian and storyteller; the W.E.B. Du Bois Medal from the Hutchins Center at Harvard University; and the National Equal Justice Award from the NAACP’s Legal Defense Fund. In 2021, the Society of American Historians awarded Bunch the Tony Horwitz Prize honoring distinguished work in American history of wide appeal and enduring public significance.

In 2020, he was given the Dan David Prize from Tel Aviv University. In 2021, Bunch received France’s highest award, The Legion of Honor.

Bunch received his undergraduate and graduate degrees from the American University in Washington, D.C.

Arizona State University is honored to confer upon Lonnie G. Bunch III the degree of Doctor of Humane Letters, *honoris causa*, in recognition of his achievements in American history, education and culture and to honor his commitment to human enlightenment.

## THE HONORABLE RUTH V. MCGREGOR

Respected nationwide as a model for state high court judges, Chief Justice Ruth V. McGregor served on the Arizona Supreme Court from February 1998 until June 30, 2009. She was the Court's Chief Justice from June 2005 until her retirement. She was also a member of the Arizona Court of Appeals from 1989 to 1998, where she served as Chief Judge from 1995 to 1997. Before her appointment to the bench, McGregor practiced law as a member of the Fennemore Craig law firm in Phoenix, Arizona. Her legal practice included civil trial, administrative and appellate work and an eventual specialty in the area of employment law. She also served as law clerk to Justice Sandra Day O'Connor during O'Connor's first term on the United States Supreme Court.

McGregor grew up in rural Iowa and began her early education in a one-room schoolhouse. She earned bachelor of art (1964) and master of art (1965) degrees from the University of Iowa, where she graduated first in her class in the College of Liberal Arts and earned numerous honors. After graduation, she taught high school speech and English in Phoenix, Arizona and, later, in Selma, Alabama, during that school system's transition from a segregated to an integrated system. She then returned to Arizona and entered law school at Arizona State University, where she served on the editorial board of the Arizona State University Law Journal. She graduated first in her law school class in 1974 and was named Outstanding Law Graduate by the faculty. In 1998, the year that she was appointed to the Arizona Supreme Court, she earned a master of laws degree in the judicial process from the University of Virginia.

A product of Arizona's merit selection process of judicial selection, she was appointed by members of both political parties to the bench. She is an advocate of Arizona's version of the Missouri Plan for choosing state judges. Throughout her career McGregor has dedicated herself to improving conditions for the judiciary, promoting legal and judicial education and preserving access to justice for all people in Arizona and nationally. Among her many accomplishments are a streamlined criminal justice system, mediation programs for appellate courts, a statewide data network for the courts and reformed judicial education for limited jurisdiction judges.

McGregor has participated extensively in professional activities, particularly those involving legal education and the discipline of lawyers and judges. She has served as an officer and member of the Board of Trustees for the American Inns of Court Foundation, founding member of the Sandra Day O'Connor American Inn of Court (the first Inn formed in Arizona), as an officer and Board member for the National Association of Women Judges, as an officer and board member of Justice at Stake, as a board member of the Conference of Chief Justices, and on the Legal Council of the American Bar Association Section of Legal Education and Admission to the Bar, which is the accrediting body for American law schools. She currently serves as a member of the Board of Directors of the Center for the Future of Arizona and of Justice at Stake and Board of the Institute for the Advancement of American Legal System.

McGregor's efforts for the justice system have been recognized nationally and in Arizona. She has received the Outstanding Alumna Award from ASU's Sandra Day O'Connor College of Law and an Outstanding Alumna Award from the University of Iowa. The Arizona Women Lawyers Association established the Ruth V. McGregor Award to honor annually an individual who supports the advancement of women in the legal profession, and the first award was presented in 2015.

Arizona State University is honored to confer upon Ruth V. McGregor the degree of Doctor of Laws, *honoris causa*, in recognition of her achievements as an exemplar of the ASU charter. From her appointment as law clerk to Supreme Court of the United States Justice Sandra Day O'Connor, to serving as a high school teacher in both Phoenix and Selma, Alabama, and her distinguished service as the Arizona Supreme Court Chief Justice, she has dedicated herself to improving conditions for the judiciary, promoting legal and judicial education, and preserving access to justice for all people in Arizona and nationally.

**SANDRA DAY O'CONNOR COLLEGE OF LAW**

In 1965, President G. Homer Durham hired Willard H. Pedrick to become Arizona State University's first law school dean and tasked him with the responsibility of building, literally from the ground up, its very first law school. Located on ASU's Tempe campus, Armstrong Hall housed the law school until its move to the downtown Phoenix campus in 2016.

Over 50 years ago, 83 students graduated with their Juris Doctor from the ASU College of Law. Today, over 650 students graduate annually from ASU Law, receiving one of our five degrees: Juris Doctor (JD), Master of Laws (LLM), Master of Legal Studies (MLS), Master of Human Resources and Employment Law (MHREL), or Master of Sports Law and Business (MSLB).

The law school has accomplished many significant milestones in its 50+ years. In 2006, the law school was renamed to honor Justice Sandra Day O'Connor, the first woman appointed to the Supreme Court of the United States. It is a privilege—and a great responsibility—to be entrusted with Justice O'Connor's (ret.) name and legacy. Students continue to personify Justice O'Connor's legacy and lifetime work to advance civics education and civic engagement and discourse, by donating more than 100,000 hours of public service each year.

ASU Law has risen in national and world rankings, continues to attract highly credentialed students and offers more personalized programs than any other law school in the country.

In 2016, ASU Law moved to the Beus Center for Law and Society in the ASU downtown Phoenix campus, further enhancing the law school's service to the community and providing students access to the best legal opportunities. Students can also study beyond Phoenix at ASU campuses in Washington, D.C. and Los Angeles, as well as participate in global study abroad and externship or internship opportunities. ASU Law's world-class faculty and administrators provide students with unparalleled opportunities to gain insights and practical skills needed to address legal challenges locally, nationally, and globally. ASU Law also prides itself on its network of engaged alumni and its relationship to the broader legal community, which has fully embraced the law school and is dedicated to the success of its graduates.

ASU Law has ranked as a top 30 best law school in the nation for eight consecutive years and is the youngest law school in the top 30 as ranked by U.S. News & World Report. ASU Law also has five programs ranked in the top 30 and consistently ranks high in job placement. The law school is also No. 1 in the state for student outcomes and No. 1 in the state for bar passage, often exceeding the national average.

**The Barrett Story**

Barrett, The Honors College at Arizona State University, is a selective, residential college for academically outstanding undergraduates. Named “the gold standard” for honors colleges in the nation, Barrett is widely considered the model for honors education in the US and abroad.

Barrett stands alone in dedicated resources, size and complexity with a presence on four ASU campuses, a multi-million dollar endowment used to support honors students and their projects, and dedicated Deans, faculty and staff that include seven administrators, 45 Faculty Fellows, 64 staff within the college and more than 1,900 university faculty members who teach and mentor Barrett students who major in any field across all four campuses.

Barrett represents a powerful and unique combination of the special care and attention an honors student should expect from an excellent residential liberal arts college, with the vast program choices and research mentoring resources of a vibrant Research I University. Barrett students are members of a small community of scholars known nationally for its number of National Merit, National Hispanic, and Flinn scholars, and nationally ranked numbers of recipients of Fulbright, Truman, Goldwater, Udall, and Marshall Fellowships.

**Student Opportunities**

ASU’s size, number of majors, student organizations, and student support services is an advantage and provides important opportunities for Barrett students to engage in meaningful ways. With the largest college residential profile across all four campuses, Barrett significantly contributes to the student life of the University. Barrett students demonstrate leadership in the classroom, in research labs, in mentoring and tutoring other students, and in securing leadership roles in student government, Changemaker Central, Greek Life and over 800 student organizations. Barrett offers a full range of student-driven academic, service, wellness, arts,

cultural, social, entrepreneurial, and sustainability programming. Barrett students positively impact ASU and our local, national, and global communities through internships, service, travel, and other professional development opportunities within Barrett and across ASU. Barrett students participate in study abroad programs that enable them to travel to foreign countries, immerse themselves in small classes taught by honors faculty, and experience different cultures and societies while earning honors credits. Barrett students engage in cutting edge research with distinguished ASU faculty or through special partnerships with the Mayo Clinic, the Biodesign Institute and Intel. Students are developing iPhone applications, building robots, designing games, or developing tools to improve healthcare, meet global energy needs, and provide clean water, or secure data and information privacy. Many students also take advantage of internship opportunities developed exclusively for Barrett students with organizations like Mayo Clinic, Goldman Sachs, Microsoft, Google, The American Heart Institute and local congressional districts, the governor's office, and the United States Senate.

### **Signature Events**

Barrett hosts annual signature events, the Centennial Lecture, the Rhodes Lecture, and the Distinguished Global Leader Series. In 1985, the Flinn Foundation established an endowment to commemorate ASU's 100th year, creating the ASU Centennial Lecture. Barrett Honors College has brought some of the world's most influential intellectuals to campus: noted diplomats, scientists, playwrights, and authors. Former Centennial lecturers include Edward James Olmos, dedicated actor, and community activist in 2010; Dr. Oscar Arias, Nobel Peace Laureate and two-time president of Costa Rica in 2011; and most recently, Common, Grammy & Academy Award-Winning Artist and Activist. Common motivates audiences to nurture the dreams of the young, overcome adversity, and address the persistent hope that lives within us all. Compassionate, mindful, and driven to inspire, Common reminds audiences that we all have a voice—and we must speak out.

The Rhodes Family created the John J. Rhodes Chair in Public Policy and American Institutions at Barrett to celebrate the career in public service of one of Arizona's and the nation's most distinguished leaders. The Rhodes Chair is dedicated to deepening theoretical and practical understanding of the many voices and forces that influence public policy. The Chair honors the values of personal integrity, fiscal responsibility, respect for persons, and international farsightedness exemplified in the Hon. John J. Rhodes' career. The 2022 Rhodes Chair featured prominent educator and author of books on higher education and teaching, Dr. Arthur Levine

The Distinguished Global Leader Series was established by Barrett Honors College as a new cornerstone global engagement program in 2017. The program invited noted leaders in government and industry to spend time on campus sharing their knowledge and expertise with honors students and faculty. During the program's first years, Barrett has hosted short stay visits with Former Finnish Defense Minister Elizabeth Rehn, Former US Secretary of State Condoleezza Rice, Former Chief Secretary of Hong Kong Anson Chan, Uruguayan Ambassador to the United States

Carlos Gianelli, and former Ecuadorean Foreign Minister Guillaume Long. In addition, the Former President of the Republic of Latvia, Dr. Vaira Vike-Freiberga, was the first Leader-In-Residence and the Fall 2019 was Louise Fréchette, Former United Nations Deputy Secretary-General. During their stays at the Honors College, these distinguished leaders deliver keynote speeches, meet with small groups of students to discuss current events and participate in honors-level courses.

### **Barrett on All Four Campuses**

In fall 2009, Barrett, The Honors College at Arizona State University, opened the nation's first comprehensive four-year residential honors college within a top-tier Research I university that underscores its standing as the premier honors college in the nation. The \$140 million Barrett campus in Tempe was designed by students, faculty and staff working with nationally-renowned architects. On the Tempe campus, the nine-acre college includes residence halls for 1,700 students, several classrooms, a community center with student lounges, activity rooms, computer labs, a fitness center, a multi-room dining facility with a refectory, café, and administrative, faculty and staff offices. In fall 2014, Barrett expanded the residential college experience to another 1,600 upper division honors students living in the 18 acre Vista Del Sol Community, across the street.

The Barrett Honors College residential communities on the Downtown, Polytechnic, and West campuses feature honors student lounges, libraries, kitchens, computer labs, student activity and study rooms, faculty and administrative offices. Barrett at the Downtown Campus is home to about 750 honors students. The Barrett residential community, called "B-Town D-Town," is located at Taylor Place at the heart of the campus and offers a living environment where students have easy access to ASU's downtown colleges and programs, as well as Phoenix's increasingly vibrant lifestyle. Barrett at the Polytechnic campus gives students the feeling of studying at a small private college with the advantages of a large university. The honors residential community is unique among the ASU campuses – freshman honors students reside together on a floor of Century Hall, which opened in the summer of 2012 while upper-division honors students will enjoy a brand new residence hall to open next fall. Barrett at the West Campus provides the entire range of honors activities in a small liberal arts college setting. Barrett West students live and learn on the ASU West Campus with approximately 500 other residents. Honors students live in the Casa de Oro residence hall. The 5,000-square-foot Barrett Suite includes a computer lab, study rooms, a meeting area, a library, and staff and faculty offices.

With its outstanding programs, dedicated faculty and staff, and comprehensive facilities, Barrett is a national model for organizing resources to support the honors experience at all four campuses at ASU. This unique arrangement is a model for higher education and has often been referred to as "the best of both worlds" by students who thrive in a small college atmosphere but appreciate access to large university programs like Division I athletics and high profile lecturers.

The Moeur Award is Arizona State University's oldest, continuing honor. It was established in 1901 by Dr. Benjamin B. Moeur and Honor Anderson Moeur, and is now sponsored annually by the Arizona State University Alumni Association. The award is presented at each Commencement ceremony to those individuals who have attained the highest academic standing in any four-year curriculum during their undergraduate years at ASU. All courses of the curriculum must be completed at ASU.

## **ABOUT THE COLLEGE OF GLOBAL FUTURES**

We all share a stake in the future. The College of Global Futures is dedicated to creating a sustainable, equitable, and vibrant future for everyone.

The College of Global Futures prepares next-generation leaders with the knowledge, skills and mindsets they need to tackle complex global challenges. Home to the School for the Future of Innovation in Society, the School of Sustainability and the School of Complex Adaptive Systems, the college fosters new interactions between students, staff, faculty and partners that elevate our ability to understand complex, integrated social, environmental and technical systems, drive responsible innovation, and lead to ethical interventions that ensure a just, healthy and fulfilling future for everyone. Students learn how to develop enduring solutions that benefit all people everywhere on a thriving, healthy planet.

## **ABOUT THE SCHOOL FOR THE FUTURE OF INNOVATION IN SOCIETY**

Scientific and technological advances are deeply intertwined with societal concerns. When we innovate, are we thinking critically about social and technical systems in a way that anticipates potential concerns so that we can be confident that what we are creating is both useful and good for our global future?

The School for the Future of Innovation in Society envisions responsible innovation at scale. Our students anticipate societal challenges and work across disciplines to examine areas such as global technology and development, biomedical and health ethics, public interest technology and policies for emerging technologies. We are grounded in the belief that by considering the ways in which we translate imagination into innovation, engaging the public and exploring the social impacts of technological and scientific advancements, we collectively build more just and equitable futures for all.

## **ABOUT THE SCHOOL OF SUSTAINABILITY**

School of Sustainability students, diverse in their backgrounds and interests, work toward a common goal: leaving the world better than they found it. Students are drawn to this rapidly growing field because sustainability integrates social, economic and environmental dimensions to develop enduring and equitable solutions to global challenges.

Learning tracks within the school include energy and technology, international development, ecosystems management, urban dynamics, food systems, policy and governance, and sustainability leadership. Our curriculum is grounded in experiential learning and practical faculty-led research, equipping graduates of the School of Sustainability with the skills and tools to make positive impacts in a rapidly changing world.

---

## ABOUT THE SCHOOL OF COMPLEX ADAPTIVE SYSTEMS

Uncertainty, scalability, thresholds (tipping points), path dependence...these are among the most pressing issues facing societies across the globe. The School of Complex Adaptive Systems explores these challenges, develops solutions and suggests interventions that enhance the resilience and well-being of our planet and our shared global futures.

Our planet is the ultimate complex system with many intertwined subsystems that envelop natural, social and technological systems and transcend traditional disciplinary boundaries. This visionary school engages wide-ranging national and international collaborations to advance the exploration of these systems and disseminate fundamental transdisciplinary knowledge through a unique set of academic graduate offerings.

### **ABOUT THE COLLEGE OF HEALTH SOLUTIONS**

The College of Health Solutions translates health research and discovery into practice and prepares students to address the challenges facing people to stay healthy, improve their health and manage chronic disease.

Since its founding in 2012, the college has experienced rapid growth. Its degree programs are designed to meet the global demand for health and health care professionals who are prepared to improve health outcomes for people and communities. Programs are offered in biomedical informatics and biomedical diagnostics; health care delivery; health sciences; movement sciences; nutrition; population health; and speech and hearing science.

Students learn from renowned research and clinical faculty, engage in experiential activities and are encouraged to contribute to innovative health research. They participate in solving health challenges through internships, interdisciplinary research teams and global study abroad experiences.

Students, faculty and staff at the College of Health Solutions, along with community partners, work together toward a common goal of optimizing the health of the diverse populations we serve. Graduates of the college are uniquely prepared to make an impact in the health workforce and shift the focus of health from sickness to wellness.

**COLLEGE OF INTEGRATIVE SCIENCES AND ARTS**

The College of Integrative Sciences and Arts (CISA) is an exciting hub for applied and experiential learning. In other words, we encourage learning through doing. We offer graduate and undergraduate degree programs that prepare students to excel in a rapidly changing marketplace. Theory, creativity and applied learning are integrated as students build entrepreneurial opportunities both inside the university and in their communities. We strive to be as diverse as possible to ensure that our diverse populations throughout the state of Arizona and the Phoenix metropolitan area can find their academic home and success in CISA.

As one of three liberal arts colleges at ASU, the College of Integrative Sciences and Arts offers foundational instruction in humanities, social and natural sciences, mathematics and professional fields to provide students across ASU with the knowledge and skills to comprehend and effectively engage the changing world of the 21st century locally, nationally and globally.

The college is guided by the principles of student success, strategic partnerships within the university and the community, and interdisciplinary inquiry. Faculty members support knowledge enterprise development by advancing research, clinical and creative activities that promote discovery, innovation and human understanding. In addition, the college serves the people of Arizona by offering a variety of programs that engage people in cultural events and lifelong learning.

## THE COLLEGE OF LIBERAL ARTS AND SCIENCES

As the academic heart of Arizona State University, The College of Liberal Arts and Sciences fosters unmatched access, educational excellence, and interdisciplinary inquiry to generate solutions for the changing world. Our diversity and dynamism ignite continued growth and development in any field of study, from space exploration and chemistry to history and justice studies, to create global citizens for the 21st century.

We unite our academic disciplines — the analytical ability of natural scientists, the creativity of humanities scholars and the curiosity of social scientists — to harness the power of our interdisciplinary nature. We encourage our students to follow their dreams, pursue their passions and accomplish their goals in order to create a better future for the next generation and beyond.

Our faculty personify a broad vision of legendary academic scholarship at the forefront of global innovation. They teach our scholars how to adapt to new challenges and a changing landscape so they're capable of tackling tomorrow's challenges with ease. Any institution of higher learning can train a student for a first job, but we'd rather create master learners who are equipped with the right knowledge and skills for a lifetime of success. The liberal arts and sciences remain the best foundation for successful careers and deeply rewarding personal and professional lives.

We transform learning, accelerate discoveries and change lives.

## HONOR CORDS

Some of our undergraduate degree candidates wear maroon and/or gold honor cords. These cords designate students who have completed at least 56 resident credit hours at ASU and who have attained the following grade point averages:

Summa Cum Laude = Maroon and Gold cords, 3.80 to 4.0 GPA

Magna Cum Laude = Gold cord, 3.60 to 3.79 GPA

Cum Laude = Maroon cord, 3.40 to 3.59 GPA

## **EDSON COLLEGE OF NURSING AND HEALTH INNOVATION**

The growth of the Edson College of Nursing and Health Innovation reflects our desire to do more, serve more and sustain innovation. Our mission drives us to offer the highest quality academic, research and clinical practice programs so that we can produce the next generation of evidence-based health professionals who will excel as clinicians, teachers, health advocates and researchers.

The challenges that permeate our health care system require innovative solutions that will positively impact patients and entire systems, locally and globally. Our curriculum and clinical experiences expose students to different types of delivery systems, equipping them with the tools and knowledge that will unleash their innovative thinking from day one. Interprofessionalism guides us as we build programs and curriculum to meet the needs of future health professionals. Our graduate and undergraduate programs continue to expand with a focus on program design and delivery that prepares graduates to work collaboratively within complex and dynamic patient care and health delivery systems.

Our online programs continue to expand access to the highest quality education as we focus on adopting new and better instructional tools while ensuring the rigor and quality that characterize the reputation of our programs.

### **ABOUT THE PhD PROGRAM**

The PhD in Nursing and Healthcare Innovation is one of the few interdisciplinary programs in nursing in the country, providing an enriching academic environment that fosters scholarship, critical thinking, and interprofessional collaboration. The PhD degree creates leaders in health science, health education and policy, and health innovation through preparation in the research skills necessary to generate, apply, and disseminate scientific knowledge.

### **ABOUT THE DOCTOR OF NURSING PRACTICE PROGRAM**

The Doctor of Nursing Practice Program (DNP) is a practice-focused doctorate that prepares graduates to practice at the most advanced level of nursing. Graduates of this program apply and integrate research to practice using innovative approaches to improve health care outcomes of populations and individuals across diverse settings.

### **ABOUT THE MASTER OF SCIENCE IN NURSING PROGRAMS**

ASU remains on the cutting edge in preparing nurse leaders and nurse educators for the 21st century. The MS in Nursing and MS in Nursing, Nurse Educator (NED) concentration prepares new and experienced nurses to meet the demands of the complex and changing healthcare environment. The Masters Entry to Nursing Practice (MEPN) prepares entry-level RN students at the graduate level to meet workforce demands in complex health systems.

### **ABOUT THE MASTER OF SCIENCE, CLINICAL RESEARCH MANAGEMENT PROGRAM**

The Master of Science in Clinical Research Management (CRM) prepares graduates to lead clinical research. Courses focus on the elements of leadership, operations of clinical research, data management, ethics, and quality. The Master of Science in Clinical Research Management (Regulatory Science) concentration prepares students for careers in regulatory aspects of clinical research to address the safety and efficacy of new medical products, diagnostics and treatments.

### **ABOUT THE HEALTHCARE INNOVATION PROGRAM**

The Master of Healthcare Innovation (MHI) program is an interdisciplinary degree that prepares graduates to design, implement and lead transformation in health care. Participants in this program come from a wide variety of professions, from all over the world, all with an interest in leading innovation in health and health care. Graduates search for and implement sustainable solutions for today's health care issues with an eye to the future within an interdisciplinary environment.

**ABOUT THE BACHELOR OF SCIENCE IN NURSING PROGRAM**

The Bachelor of Science in Nursing (BSN) degree prepares professional nurses who possess the theoretical foundation and the clinical competence to function in various health care settings. Graduates of ASU's nursing degree programs are prepared to respond to the vast and changing health care needs of individuals and communities.

**ABOUT THE RN-BSN PROGRAM**

The online RN-BSN program builds on the knowledge and skills the student learned in their associate degree or diploma program, especially in the areas of evidence based practice, leadership and management, and community/public health. The interactive course assignments enhance the student's written and verbal communication skills, clinical reasoning skills, teamwork, and information technology skills. Graduates will integrate new knowledge into their nursing practice.

**ABOUT THE CONCURRENT ENROLLMENT PROGRAM**

The Concurrent Enrollment Program (CEP) is designed for qualified nursing students who are interested in earning their BSN degree from ASU while simultaneously pursuing their Associate of Applied Science (AAS) in Nursing degree through a participating community college. The CEP is a rigorous program with a plan of study that enables students to build on the knowledge and skills learned in the AAS in nursing program.

**ABOUT THE BACCALAUREATE HEALTH PROGRAMS**

The Baccalaureate Health Programs consist of the Bachelor of Science degrees in Integrative Health, Community Health, Health Care Coordination, Health Entrepreneurship & Innovation, and Health Care Compliance and Regulations. Each of these degrees prepare graduates to be integral members of the health care team. Graduates are prepared to collaborate with individuals, families and communities regarding changes to the health care system. This includes health education, health promotion, care coordination, disease management, health care navigation, health innovation, health care compliance, and advocacy services as well as assisting patients in obtaining services, understanding policies, and making health care decisions.

**ABOUT THE GRACE CENTER FOR INNOVATION  
IN NURSING EDUCATION**

The Grace Center facilitates over 90,000 student hours annually in experiential learning and community outreach across programs at Edson College. The Center's vision "Knowledge & Action Join as One" is enacted in person and through online resources. State-of-the-art technology and resources provide an effective learning environment for students to practice/master nursing skills and clinical decision making in a dynamic encounter using fully integrated informatics in a variety of healthcare settings while using learning management systems to empower reflective practice. Simulation is an evidenced-based innovation in healthcare education based on objectives guided preparation, and reflection to reinforce student self-discovery that translates to practice competencies.

**ABOUT THE HERBERGER INSTITUTE FOR DESIGN AND THE ARTS**

ASU's Herberger Institute for Design and the Arts is the largest comprehensive design and arts school in the country, built on a combination of disciplines unlike any other program nationally and located within a dynamic research university focused on transformative change.

The Herberger Institute comprises the Schools of Art; Arts, Media and Engineering; Music, Dance and Theatre; The Design School; The Sidney Poitier New American Film School; and the ASU Art Museum.

With 6,000-plus students, more than 675 faculty and faculty associations, over 200 staff members, more than 125 degrees and a tradition of top-ranked programs, the Herberger Institute is committed to redefining the 21st-century design and arts school. One of the ways we're doing that is by developing and scaling innovative ideas to help strengthen the role of designers and artists across all areas of society and culture, and to increase the capacity of artists to make a difference in their communities.

**The Institute is dedicated to the following design principles:**

**Creativity is a core 21st-century competency.** Our graduates develop the ability to be generative and enterprising, to work collaboratively within and across artistic fields and to generate non-routine solutions to complex problems. With this broad exposure to creative thinking and problem-solving, our graduates are well prepared to lead in every arena of our economy, society and culture.

**Design and the arts are critical resources for transforming our society.** Artists must be embedded in their communities and dedicate their creative energy and talent to building, reimagining and sustaining our world. Design and the arts must be socially relevant and never viewed as extras or as grace notes. The Herberger Institute is committed to placing artists and arts-trained graduates at the center of public life.

**The Herberger Institute is committed to enterprise and entrepreneurship.** For most college graduates today, the future of work is unpredictable, nonlinear and constantly evolving. A recent study found that 47 percent of current occupations will likely not exist in the next few decades. At the Herberger Institute, our faculty, students and graduates are inventing the jobs and the businesses of the future; reimagining how art and culture get made and distributed; and coming up with new platforms and technology for the exchange of culture and the enrichment of the human experience. The legendary author and expert on city life Jane Jacobs talks about the abundance of “squelchers” — parents, educators, managers and leaders who tend to say no to new ideas. At the Herberger Institute, there are no squelchers. We embrace the cardinal rule of improvisation — always say: “Yes, and...”

**Every person, regardless of social background, deserves an equal chance to help tell our nation’s and our world’s stories.** Our creative expression defines who we are, what we aspire to and how we hope to live together. At the Herberger Institute, we are committed to projecting all voices – to providing an affordable education to every student who has the talent and the desire to boldly add their creative voice to the world’s evolving story.

**Effectiveness requires excellence.** We know that our ability to solve problems, build enterprises and create compelling and socially relevant design and art requires high levels of mastery. By being the best in our chosen fields, we can stretch ourselves and our talents to make a difference in the world.

We encourage all of our alumni to continue to share their stories with us and to take an active role in the Herberger Institute Alumni Chapter. For more information on our alumni activities, please visit [herbergerinstitute.asu.edu/alumni](http://herbergerinstitute.asu.edu/alumni). Connect with fellow design and arts alumni on LinkedIn, Facebook and Twitter.

## ENGINEERING AT ARIZONA STATE UNIVERSITY

The Ira A. Fulton Schools of Engineering, ranked among the top 50 U.S. engineering schools, is home to 355 tenured/tenure-track faculty members and nearly 27,000 students. The Fulton Schools received almost \$119 million in externally funded research awards in fiscal year 2021. Today, more than 85,000 Fulton Schools alumni are advancing engineering and technology fields in Arizona and around the world.

To produce the engineers and innovations needed to address society's changing demands, we have crafted a visionary blueprint for engineering education that transcends traditional organization around degrees and disciplines and fosters a transdisciplinary approach to teaching and research. The Fulton Schools offers 25 undergraduate and 47 graduate degree programs that encourage interdisciplinary collaboration to develop solutions that will have a lasting impact locally and globally. In addition to online options for degree programs like electrical engineering and software engineering, the Fulton Schools also offers professional development trainings like Six Sigma.

**The School of Biological and Health Systems Engineering** prepares students to use biomedical and engineering principles and methods to develop instrumentation, materials, diagnostic and therapeutic devices, artificial organs and various other technologies. Our biomedical engineering degree program produces graduates with broad-based training in engineering and the life and natural sciences that focuses on improving the overall quality of global health care. These creative thinkers are excelling at the intersection of biology, engineering and computing to advance human health and quality of life.

**The School of Computing and Augmented Intelligence** is home to computer engineering, computer science, computer systems engineering, engineering management, industrial engineering, informatics, robotics and autonomous systems, and software engineering degree programs. Our faculty members and students are exploring ways to bring computing, data analytics, cybersecurity, visualization, machine learning and augmented intelligence to bear on decision making, creativity and responsible innovation. We are dedicated to creating new knowledge and technology that contribute to solving the major challenges facing modern society.

**The School of Electrical, Computer and Energy Engineering** brings together university faculty, students and companies to develop collaborative relationships and solutions. Our computer engineering, electrical engineering, and robotics and autonomous systems degree programs and research efforts are aligned with national and international priorities to address worldwide challenges in energy production and distribution, health care technology and delivery, sustainable development and economic growth, communications technology, information management and global security.

**The School for Engineering of Matter, Transport and Energy** leverages the synergy of engineering and science to create innovative solutions to society's most pressing problems in energy, human health, public safety, environmental infrastructure and sustainability. We offer degree programs in aerospace engineering, biological design, chemical engineering, materials science and engineering, mechanical engineering, robotics and autonomous systems, and solar energy engineering and commercialization. We have created a unique educational experience with our broad range of disciplines and a world-class faculty engaged in cutting-edge research.

**The School of Sustainable Engineering and the Built Environment** provides a nexus for education and research that addresses the critical infrastructure needs of our society in an environmentally sound manner. The holistic approach in our degree programs covers the engineering expertise of civil, environmental and sustainable engineering; the design and construction principles of construction engineering; and the project management and leadership skills of construction management.

**The Polytechnic School** offers a breadth of engineering and technology-related degrees. Students in The Polytechnic School can choose from a wide array of degree programs, including aeronautical engineering, environmental and resource management, graphic information technology, human systems engineering, information technology, and engineering, which includes programs in systems engineering and engineering education systems and design. The Polytechnic School is home to advanced learning laboratories led by faculty members with deep expertise and industry experience.

**The School of Manufacturing Systems and Networks** is the newest school in the Fulton Schools of Engineering. Located on the Polytechnic campus, one of ASU's central hubs for innovation and design, the School of Manufacturing Systems and Networks has been designed to address the next-generation engineering challenges that are transforming manufacturing systems. With a research portfolio that is inherently multidisciplinary, collaborative and inclusive, students in the School of Manufacturing Systems and Networks will gain critical skills necessary to impact the future of work, including those related to industry 4.0, autonomous systems and processes, and systems engineering.

### **Ira A. Fulton**

#### ***Chairman of the Board and CEO, Fulton Homes***

Ira A. Fulton, founder and CEO of Arizona-based Fulton Homes, established an endowment of \$50 million in support of ASU's College of Engineering and Applied Sciences in 2003. The college was renamed the Ira A. Fulton Schools of Engineering in his honor. The gift has enabled the Fulton Schools to provide funding for scholarships, fellowships, research programs and investments in faculty — all integral to elevating the position of the Fulton Schools as a highly ranked U.S. program into the ranks of world-class institutions.

*“With this endowment, we are building an engine of educational and economic growth that will endure for generations. It is a gift of opportunity, prosperity, social equality and hope.”* – Ira A. Fulton

**ABOUT MARY LOU FULTON TEACHERS COLLEGE****Mission**

ASU's Mary Lou Fulton Teachers College creates knowledge, mobilizes people and takes action to improve education.

MLFTC faculty create knowledge by drawing from a wide range of academic disciplines to gain insight into important questions about the process of learning, the practice of teaching and the effects of education policy.

MLFTC mobilizes people through bachelor's, master's and doctoral degree programs, through non-degree professional development programs and through socially embedded, multilateral community engagement.

MLFTC takes action by bringing people and ideas together to increase the capabilities of individual educators and the performance of education systems.

**Core Value: Principled Innovation**

Children born today will be shaped by accelerating change in technology, demography and our physical and social environments. The speed and convergence of change across so many dimensions of human experience will shape life in ways that are as profound as they are unpredictable.

For educators and education systems, these facts demand principled innovation that delivers positive social value and prepares children to thrive as individuals and as citizens at local, national and global levels.

---

Principled innovation is the core value that inspires all our activities: our academic programs; our strategic initiatives; how we teach and learn; and how we engage with one another and with the communities we serve.

### **Purpose of Principled Innovation**

Through our core value of principled innovation, we believe that education should answer to three imperatives:

#### **An Equity Imperative**

We need to deliver excellence in education to all learners.

#### **An Economic Imperative**

We need to prepare learners for the next economy and equip them for success in the workforce of the future.

#### **A Democratic Imperative**

We need to prepare learners to be caring, responsible citizens capable of balancing individual ambition and the public good.

### **Practice of Principled Innovation**

MLFTC has developed an ethical framework for innovation and decision-making that is guided by four character assets:

#### **Moral Character**

Empathy, compassion and fairness help us keep sight of the irreducible dignity of all people, especially the youngest, and of the realness of their experience.

#### **Civic Character**

The desire to serve and understand others reminds us that we are social beings and that, ultimately, we thrive not by ourselves but in community.

#### **Intellectual Character**

Critical thinking and problem-solving keep us honest with ourselves and with one another. They help us acknowledge and resist bias, pursue truth and distinguish fact from opinion.

#### **Performance Character**

Initiative, creativity, perseverance, resilience, risk-taking and collaboration help us marry the quality of our actions to the strength of our convictions. They help us navigate uncertainty and transform good intentions into good outcomes.

**MARY LOU FULTON (1933 – 2015)**

Anyone fortunate enough to have known Mary Lou Fulton — to celebrate with her and take pride in students' accomplishments — is grateful to have had that privilege. So much of what we do at our college is an expression of her commitment to education and to providing the best possible opportunities for the greatest number of people.

**MESSAGE TO THE NEW COLLEGE GRADUATES**

Congratulations on your extraordinary achievement! The faculty and staff of New College offer our sincere best wishes for your continued personal and professional success. We all look forward to seeing your work in the world; we know you will make your mark as an ASU New College graduate.

**ABOUT THE NEW COLLEGE**

The New College of Interdisciplinary Arts and Sciences offers a nationally unique environment: a small college experience with the power of ASU's major research university resources. Working one-on-one with our cutting-edge faculty—often through our New College Undergraduate Inquiry and Research Experience program (NCUIRE), our students reshape the boundaries of knowledge in their fields of study. This prepares them for a future of reshaping the world outside of ASU.

New College was founded on a “new” way of thinking about the academy. Instead of reproducing the intellectual silos that separate fields of study in other institutions, our programs have been structured on the notion that if we break down the barriers between fields, we can think in more innovative ways, do more path-breaking work, offer more effective solutions to real-world problems. From our Interdisciplinary Arts and Performance degree that teaches students many forms of artistic expression and then asks into what mode a concept should be born; to our Forensics degree that brings together fields including chemistry, psychology, and legal studies; to our Social Justice and Human Rights degree that explores sociological, historical, and contemporary cultural analyses of global issues, New College offers educational experiences that transcend more limited ways of thinking about the world.

**ABOUT THUNDERBIRD SCHOOL OF GLOBAL MANAGEMENT**

Thunderbird School of Global Management is the world's premier institution for global leadership, management, and business education for the Fourth Industrial Revolution, but we are much more than a school. Thunderbird is also a global network of leaders, managers, entrepreneurs, and intrapreneurs across the private and public sectors who advance the School's vision of inclusive and sustainable prosperity worldwide.

Thunderbird has trained global leaders and managers for over 75 years. Originally known as the American Institute for Foreign Trade, Thunderbird was chartered on April 8, 1946, at a World War II airbase in Glendale, Arizona called Thunderbird Field, where pilots from around the world came for training during wartime. General Barton Kyle Yount obtained the airfield with the express purpose of developing a school for professionals focused exclusively on international trade and global affairs. The guiding principle established at Thunderbird's founding is best summarized in a phrase coined by original faculty member Dr. William Lytle Schurz, "Borders frequented by trade seldom need soldiers."

Thunderbird became the world's first-ever higher education institution to focus exclusively on international leadership by concentrating its curriculum on global management and business skills, international political economy and regional business environments, languages and cross-cultural communications. The School has often been called a "mini-United Nations" because of its diverse and inclusive global student body. Thunderbird is now known worldwide for its vast and engaged alumni network of more than 50,000 graduates in nearly 150 nations around the globe. Thunderbird has more than 170 alumni chapters that meet regularly in 70 countries.

In 2015, Thunderbird became a unit of the Arizona State University public enterprise, combining Thunderbird's multi-decade heritage of developing global leaders with ASU's expansive resources. The School relocated to ASU's vibrant

Downtown Phoenix campus in 2018. The move brought the world's No. 1 ranked Master's in Management (WSJ/THE) under the umbrella of the nation's No. 1 ranked school for innovation (U.S. News & World Report).

Ushering in the Thunderbird 4.0 era, is a new state-of-the-art Global Headquarters building that leverages the latest cutting-edge learning technology for our students. Opening in the fall of 2021, students interact in multi-dimensional learning spaces that fully immerse them in their disciplines while allowing them to collaborate on a global scale.

Thunderbird's global footprint has also grown over the years as well, with operations now in Geneva, Moscow, Dubai, Tokyo, Seoul, Nairobi, Jakarta and nearly 15 others, Thunderbird's Center of Excellence regional offices ensure that the School is now the world's first truly "global multinational business school," committed to training the next generation of global leaders.

As the world continues innovating, and technology changes the way we live and work, Thunderbird is developing nimble, ethical, global leaders who can seize the opportunities offered by the Fourth Industrial Revolution to create sustainable prosperity worldwide. **WALTER CRONKITE SCHOOL OF  
JOURNALISM AND MASS COMMUNICATION****About the School**

The Cronkite School is widely recognized as one of the nation's premier professional journalism and mass communication programs. Rooted in the time-honored values of accuracy, responsibility, fairness and integrity that characterize its namesake, the school fosters excellence and ethics among students as they master the practical skills they need to succeed in the world of today and tomorrow.

The Cronkite School's 2,500 students, including in-person and online, consistently lead the country in national competitions. Over the past decade, Cronkite has been first in the nation in the Society of Professional Journalists' Mark of Excellence competition and the Broadcast Education Association's Festival of Media Arts awards and has finished in the top 10 in the Hearst Journalism Awards each year.

Students are guided by a faculty made up of award-winning professional journalists, strategic communications executives and world-class media scholars. Cronkite professors include five Pulitzer Prize-winning journalists, digital media thought leaders, top TV producers and correspondents, major metropolitan newspaper editors and strategic communications experts. They are master teachers, writers and scholars who often speak around the globe on the most important topics facing our industries.

The Cronkite School leads the field of mass communication education with its innovative use of the "teaching hospital" method, providing both unparalleled learning opportunities for students and important news content to the community, state, region, nation and around the world.

Students cover public affairs from news bureaus in Phoenix, Los Angeles and Washington D.C., and they report on sports from bureaus in Phoenix and Los Angeles. They conduct national investigations as part of the Howard Center for Investigative Journalism, and they produce multimedia projects on issues of national importance in the Carnegie-Knight News21 program.

Other immersion programs include Cronkite Noticias, in which bilingual students produce Spanish-language broadcast and digital stories; the Public Relations Lab, where they develop campaigns for clients; the Digital Audiences Lab, where they harness social media, SEO and analytics to grow and engage audiences; and the New Media Innovation and Entrepreneurship Lab, where they use emerging media technologies to forge the future of journalism.

---

Arizona PBS, one of the nation's largest public television stations, serves as a hub for these full-immersion programs, with students producing a nightly newscast that reaches 1.9 million households across the state.

Elsewhere at the school, the Donald W. Reynolds National Center for Business Journalism provides education and training to professional journalists, and Cronkite Global Initiatives fosters partnerships throughout the globe and brings international journalists to the school for study and training. Cronkite also is home to PBS NewsHour West and Indian Country Today, creating enhanced coverage and added student opportunities. ASU's investment in the school has generated national and international attention from educators and media professionals who place the school in the top tier of all U.S. journalism schools, calling it a pioneer in shaping how news is delivered and how people will stay informed in the future.

The Cronkite School is supported by generous individuals, corporations and foundations seeking to help train the next generation of journalists and communication professionals at a pivotal moment of industry transformation and growth. To make a gift today, visit [asufoundation.org/cronkite](http://asufoundation.org/cronkite).

### **About Walter Cronkite**

ASU's journalism program was named in honor of former CBS News anchor Walter Cronkite in 1984.

The relationship started when Tom Chauncey, longtime owner of the CBS affiliate in Phoenix and a leading supporter of journalism education at ASU, contacted his old friend in an effort to advance the program. An endowment on behalf of the program was soon established and the school was named after "the most trusted man in America."

Over the next quarter of a century, Cronkite lent much more than his name to the school. He was closely involved — advising leadership, guiding students and faculty, and traveling to Arizona each year to personally give the Walter Cronkite Award for Excellence in Journalism to one of the nation's top journalists. The most important relationship, though, was with "our students," as Cronkite would always call them. Young students, some with parents barely old enough to remember Cronkite behind the anchor desk, lit up when he walked into a classroom. They hung on his every word as he thoughtfully answered their questions about the profession he so loved. They lined up just to shake his hand, and he loved every minute of it.

In what turned out to be Cronkite's last visit to ASU in 2007 before declining health prevented him from traveling, a group of 100 students gathered with just a few minutes of notice that Cronkite was in the building. He held them spellbound as he spoke about covering World War II, Vietnam, Apollo, Watergate and presidents from Truman to Reagan — and of how important "our school" was to him. Although Cronkite died on July 17, 2009, before he was able to visit the new building, he remains an ever-present part of the school's spirit and mission.

### About Our Graduates

The Cronkite School has about 14,000 alumni throughout the Valley, across the country and around the world. Many are leaders in television, digital media, newspapers, radio, magazines, public relations and digital marketing.

In 1993, the Cronkite School inducted its first class into the Cronkite Alumni Hall of Fame. The charter inductees were Al Michaels ('66), an Emmy Award-winning sports broadcaster best known for anchoring "Monday Night Football," and Bill Redeker ('71), an ABC News correspondent who covered the Middle East and the Far East during his 30 years with the network.

Other notable Cronkite Alumni Hall of Fame inductees include Matt Barrie ('01), anchor of SportsCenter and studio host of ESPN College Football; Nicole Carroll ('91), editor-in-chief of USA Today; Becky Anderson ('94), CNN International anchor; Julie Cart ('98), Pulitzer Prize-winning Los Angeles Times reporter; Derrick Hall ('91), president and CEO of the Arizona Diamondbacks; Christine Devine ('87), news anchor at FOX 11 in Los Angeles; Mary Kim Titla ('85), founder of Native Youth Magazine; Ray Artigue ('76), president of The Artigue Agency; and Chip Dean ('77), legendary director of ESPN's "Monday Night Football."

**THE NATION’S LEADING  
COMPREHENSIVE PUBLIC SERVICE COLLEGE**

The Watts College of Public Service and Community Solutions is a unique, comprehensive public service college dedicated to fully integrating teaching, research and service to address social problems.

---

## **PREPARING PUBLIC SERVICE LEADERS FOR LIFELONG LEARNING, EQUIPPED WITH TOOLS TO AFFECT CHANGE**

Our degree programs cover the spectrum of public service, including public policy, social work, criminology and criminal justice, nonprofit leadership, emergency management, community development, parks and recreation, and more.

A particular point of pride is that the college is home to ASU's most diverse student body, with the highest percentages of under-represented, college transfer and military veteran students—and one of the largest communities of first-generation college students. Many chose public service because of their own life experiences and firsthand understanding of systems that need improvement. Of equal importance is how this commitment translates into real impact for the communities to which students return.

## **INTEGRATING TEACHING, RESEARCH AND SERVICE ROOTED IN SOLUTIONS-BASED LEARNING**

From day one of their college experience, our students are immersed in hands-on learning through a signature solutions-based pedagogy. They are paired with community partners to tackle real-world problems—both an educational, and service-based experience—delivering more than 600,000 hours of community service each year.

## **LEADING ASU SERVICE AND POLICY INITIATIVES TO CREATE A MODEL OF A SERVICE-COMMITTED UNIVERSITY**

The college serves as a model for ASU's commitment to service—leading university-wide initiatives such as spearheading the first-of-its-kind Public Service Academy, partnering with the Harvard Institute of Politics to increase civic participation through our Pastor Center for Politics and Public Service and leading AmeriCorps programs like Public Allies Arizona, Legacy Corps for Veterans, Safety Planning for Survivors of Domestic Violence and Corporation for National and Community Service Employment Outcomes.

## **SOLVING PROBLEMS THROUGH COLLABORATION WITH COMMUNITY PARTNERS ACROSS SECTORS**

The college brings collaborative ideas into action, working closely with hundreds of government, private and nonprofit partners locally and globally. Through our research and academic expertise, our research centers and offices, individual faculty members and cross-disciplinary teams all have an impact beyond dollars. They also produce training, policy guidance, best practices and direct service.

## OUR SCHOOLS AND CROSS-COLLEGE PROGRAMS

*The School of Community Resources and Development* advances the social, economic, environmental and cultural well-being of our local and global communities through instruction, research and service. We provide nationally recognized interdisciplinary research expertise and innovative academic programs in nonprofit leadership and management, parks and recreation management, therapeutic recreation and tourism development and management.

*The School of Criminology and Criminal Justice* merges theory and practice. The core of our highly-ranked program—#2 overall by U.S. News & World Report—focuses on the theories of criminality and evidence-based best practices for responding to crime through the lenses of three interrelated structures—policing, courts and corrections—that collectively comprise the criminal justice system.

*The School of Public Affairs'* mission is to understand and address society's grandest challenges in public management, policy and governance. We seek to maximize our impact through rigorous transdisciplinary research, project-based education, collaborative and inclusive community engagement, experiential learning and innovative solutions. We are ranked consistently among the top 15 public affairs schools in the country with highly rated programs in urban management, environmental policy, nonprofit management and public finance.

One of the largest and most diverse social work programs in the U.S., the *School of Social Work* is motivated by its steadfast commitment to promote social, political and economic justice with a special emphasis on populations of the Southwest. Ranked among the top 10% of social work schools nationwide by U.S. News & World Report, the school prepares professional social work practitioners and scholars who are committed to enhancing individual, family and group problem-solving capacities, maximizing human potential, and creating a more just and humane society.

*Our cross-college interdisciplinary programs* blend the expertise of our disciplines to create innovative, well-informed approaches to emerging social problems. The emergency management and homeland security program promotes healthier and more vibrant communities through the effective management of hazards and crises. The program evaluation program develops expertise in response to increasing demands for accountability in the public, private and nonprofit sectors. The public safety leadership and administration program prepares graduates for management in the public safety sector with a particular emphasis on emergency medical services, fire and police administration.

## RESEARCH AND IMPACT

The College leads the university in the production of research that has system-wide and large-scale impact on myriad social, behavioral, economic and political challenges. Through rigorous applied research, we are developing solutions with the potential to better our response to pressing issues and positively impact our communities locally, nationally and globally.

## ABOUT THE W. P. CAREY SCHOOL OF BUSINESS

The W. P. Carey School of Business at Arizona State University is one of the highest-ranked and largest business schools in the United States. The school is internationally recognized for its leadership in business education and for positively impacting the practice, science, and art of management on a national and international scale. The school works to rethink the nature of business, engage the world, and create a better future.

More than 18,000 students attend the W. P. Carey School of Business, including over 2,500 online learners and more than 100 doctoral candidates. The student body is especially diverse, including representatives from over 100 countries.

Each member of the W. P. Carey community, whether on campus or around the globe, aspires to do great things — for themselves and each other. This promise is enshrined in the Carey Code, to contribute to our legacy and live our values of excellence, integrity, impact, and community; to demonstrate that business is personal by treating others with respect and kindness; to advocate for diversity, equity, and inclusion to create stronger organizations and societies; to embrace and exhibit ethical business practices; and to champion fellow Sun Devils and volunteer when and what I can to promote their success.

The W. P. Carey School boasts an acclaimed faculty of more than 200 esteemed tenure and tenure-track faculty, including a Nobel Prize winner. Many faculty members are also on the editorial boards of academic journals and publications. Housed within the school are ten respected research centers and a research institute, which generate research, ideas, and information that support academics and business professionals and are internationally recognized for research productivity.

Both the school's graduate and undergraduate programs are ranked among the best in the nation by *U.S. News & World Report*. This year, 31 W. P. Carey programs or disciplines were ranked Top 25, with 14 ranked Top 10 in the nation.

Undergraduate Bachelor of Science degrees are offered in accountancy, business data analytics, business entrepreneurship, computer information systems, economics, finance, management, marketing, and supply chain management.

Undergraduate students also have the option of earning a Bachelor of Arts degree in business with concentrations in business administration, communication, corporate accounting, financial planning, food industry management, global agribusiness, global leadership, global logistics management, global politics, health care, human resources, information security, language and culture, law, public service and public policy, retail management, sports business, statistics, sustainability, technology, and tourism.

The school offers its renowned MBA program in five distinct platforms: Full-time, Evening, Online, Executive, and Fast-track. Master's degrees are available in accountancy and data analytics, business analytics, finance, global logistics, information systems management, innovation and venture development, management, real estate development, supply chain management, and taxation and data analytics. Doctoral degrees are offered in accountancy, agribusiness, economics, finance, information management, management, marketing, and supply chain management.

The W. P. Carey alumni network spans the globe. Our alumni represent highly regarded companies from diverse industries, including manufacturing, technology, retail, banking, accounting, entertainment, and food, as well as entrepreneurial firms and respected nonprofit organizations.

## **THE ARIZONA STATE UNIVERSITY MACE AND PRESIDENT'S CHAIN OF OFFICE**

In Medieval times, a mace was a hand-to-hand combat weapon. In about the year 1400 A.D., a mace evolved from a weapon to a ceremonial instrument used by academicians in rituals such as commencement and inaugurations. The oldest known ceremonial mace was that of the Faculty of Common Law of St. Andrew University in Scotland, used in 1438.

The Mace and Chain of Office are presented only at ceremonies in which faculty members are in full academic regalia, such as the Inauguration of the ASU President, University Commencement, Faculty Assemblies, Regents' and President's Professor Induction Ceremonies and Convocation.

The Mace is carried at the head of the procession and laid in a cradle, thus signifying the formal onset of the ceremony.

ASU's ceremonial mace and chain of office was created in observance of ASU's Centennial in 1985. Handcrafted by ASU Professor of Art, David Pimentel (1943-2004), the mace and chain was created with "austere elegance and traditional southwestern motifs." In keeping with these directions, Professor Pimentel constructed both items out of materials native to Arizona. The ASU Mace is a wood staff, approximately three and a half feet long, weighing eight pounds and made of hollowed and polished Mesquite.

The head of the ASU Mace has four sterling silver blades and is banded with copper, Morenci turquoise, and a silver ring on which the words Arizona State University are embossed. The turquoise inlay was cut and polished by Navajo jeweler Richard Charlie of Mesa. The ASU seal is embossed in silver on the heel of the mace.

The President's Chain of Office includes a silver rope woven from strands of hand-turned links, which holds a medallion six inches in diameter that reverses to reveal the ASU seal in gold on one side and the same in silver and turquoise on the other.

## COLLEGE MARSHALS SPRING 2022

College Marshals consist of selected faculty members from each college at all ASU campuses. Selection criteria is left to the individual colleges, but faculty who have recently won awards or have received special recognition are given primary consideration.

**Barrett, The Honors College** — Dr. Joseph O'Neill is an Honors Faculty Fellow and a Senior Lecturer at Barrett, The Honors College. He is the founder of the Barrett Theatre of Difference Project. The project, inspired by Theatre of War Productions, uses the study of ancient texts to help us better understanding of contemporary issues around social equity, diversity and inclusion. Honors students staged a reading of *Medea* in Spring 2021 and *Bacchae* in Spring 2022, and led a community discussion on the ways in which the text can inform our thinking on topics such as xenophobia, racism, and misogyny. For this work, Dr. O'Neill was awarded a grant from the Society for Classical Studies. His new book, *The Aeneid and the Modern World: Interdisciplinary Perspectives on Vergil's Epic*, co-edited with Dr. Adam Rigoni, was published in December 2021.

**College of Global Futures** — Professor Joshua Abbott is the newly appointed Deputy Director for Student Success in the School of Sustainability, and is leading an effort to provide a cutting-edge curriculum in sustainability competencies and career skills with hands-on learning in sustainable transformations for ASU students.

**College of Health Solutions** — Dr. Karen Gregory-Mercado is a senior lecturer in the College of Health Solutions who specializes in innovative curricula that integrate evidence-based practices in lifestyles, fitness and coaching sciences, giving students real-world context that prepares them to make a difference for individuals and communities. She is certified by the National Board for Health and Wellness Coaches and is part of the National Certification Leadership Team that designed the blueprint for the health coaching National Board Certification Exam. After earning her PhD and MPH at the University of Arizona, she worked for Cigna, the CDC, LifeScan and Johnson & Johnson.

**College of Integrative Sciences and Arts** — Jeff Kingsbury is a member of the faculty in the College of Integrative Sciences and Arts, at the Downtown Phoenix Campus. He teaches in various health professions majors, and is the director of the STEM Teaching study abroad program in Costa Rica. Dr. Kingsbury is a past recipient of the College's Teaching Innovation Award, and has authored or co-authored numerous scientific papers, chapters, and textbooks. He is a member of the Human Anatomy and Physiology Society, and the ASU Faculty Senate. He earned his bachelor's degree in biology, and his medical degree from the State University of New York.

**The College of Liberal Arts and Sciences** — As the Director of Online Engagement & Strategic Initiatives, Ara Austin focuses on efforts that increase experiential learning opportunities for online students across The College of Liberal Arts & Sciences. Prior to this role, Austin served as the Managing Director of Online Programs for the School of Molecular Sciences, successfully launching online degree programs in biochemistry and chemistry which include accelerated in-person laboratory courses that provide crucial hands-on experiences to online students pursuing STEM degrees. Austin's research interests are in analyzing the effects of socio-cognitive (motivation) and socio-cultural (stereotype threat and cultural capital) factors on student performance in chemistry courses.

**Edson College of Nursing and Health Innovation** — Dr. Kim Day is a Clinical Associate Professor in the Edson College of Nursing and Health Innovation. She teaches in the RN-BSN and Concurrent Enrollment programs, along with undergraduate and graduate nursing programs and in the Grace Center for Innovation in Nursing Education. She specializes in critical care, peri-operative services, and interprofessional education. She is certified in Healthcare Simulation. She is the president of Sigma Theta Tau International Honor Society, Beta-Upsilon chapter and on the board of the Education Subcommittee for the Arizona Nurse's Association.

**Herberger Institute for Design and the Arts** — Dr. Byron Lahey is a Clinical Assistant Professor of Physical Computing and Expressive Robotics in the School of Arts, Media and Engineering in the Herberger Institute. He earned his BFA in Sculpture from the University of Northern Iowa, MFA in Sculpture from Arizona State University, and Media Arts and Science PhD from the School of Arts, Media and Engineering at Arizona State University. His research activities, which are supported by the NSF and others, include the development and study of haptic and olfactory interfaces for mixed reality systems and the design and production of hybrid and augmented musical instruments.

**Ira A. Fulton School of Engineering** — Sam Ariaratnam is a world renowned expert in and serves as program chair for construction engineering. He was recently named Fellow of the Canadian Society of Civil Engineering, Distinguished Member of the American Society of Civil Engineers, and a member of the US Department of Transportation's Gas Pipeline Advisory Committee by Secretary Pete Buttigieg.

**Mary Lou Fulton Teachers College** — Danah Henriksen researches creativity across multiple areas of education, with a focus on creative teaching practices and skills, as well as creative thinking. Her work has examined creativity among exceptional teachers, through an in-depth qualitative study of the creative thought processes and teaching practices among nationally award-winning teachers, through the lens of transdisciplinary creativity. Her work considers the confluence between personal and professional creativity, to consider how excellent teachers translate their personal interests and avocations into creative teaching practices.

**New College of Interdisciplinary Arts and Sciences** — Jennifer Hackney Price is an Assistant Professor in the School of Mathematical and Natural Sciences within the New College of Interdisciplinary Arts and Sciences and serves as the Director for the Central Arizona Region of the Arizona Nevada Academy of Science. Together with her team of undergraduate research associates, Dr. Hackney Price studies the genetic and molecular mechanisms that alter an organism's developmental trajectory in response to changing environmental conditions. Dr. Hackney Price is also involved in several grant-funded initiatives focused on increasing opportunities and access to research experiences for underrepresented undergraduate students in STEM fields.

**Thunderbird School of Global Management** — Before coming to the Thunderbird School of Global Management at ASU, Professor G.L.A. Harris spent nearly 20 years at Portland State University. She is well known for her research on the U.S. military and those in the international community and twice served as a Fulbright distinguished chair, including as NATO Chair in Security Studies. It was Harris' seminal research on student veterans that not only became the impetus for both state and federal legislations but was the prototype for the Veterans Resource Centers on college campuses today. Harris is a former Senior Commissioned Officer and distinguished graduate of the U.S. Air Force service schools, including the Air War College.

**Watts College of Public Service and Community Solutions** — Megha Budruk is the Associate Dean of Faculty Affairs in the Watts College of Public Service and Community Solutions and an associate professor in the parks and recreation management program in the School of Community Resources and Development. Specifically, she studies human-nature relationships, visitor experience and impact management, and community development within the context of parks, protected areas and cultural monuments. She has extensive research experience with several U.S. federal, state, county and local public land management agencies such as the Bureau of Land Management, U.S. Forest Service, National Park Service, Arizona State Parks and Maricopa County Parks.

**W. P. Carey School of Business** — Professor Uday Kulkarni joined ASU in 1988, and, after 34 years of service as a distinguished faculty member in the W. P. Carey School of Business, he will retire on May 15, 2022. During his tenure, Professor Kulkarni led several curriculum development projects and directed many graduate degree programs. He was instrumental in founding two of W. P. Carey School's flagship graduate degree programs, MSISM launched in 2005, and MSBA launched in 2013. He taught a variety of courses at executive, graduate, and undergraduate levels in Data Analytics and Decision-Making, and was recognized for his excellence in teaching on numerous occasions by students and colleagues.

**Emeritus College** — Joseph Carter has had an exceptional career with the W. P. Carey School of Business for 28 years and has been recognized for his many contributions as a scholar, teacher and administrator. For his exceptional work in the W. P. Carey School of Business and at Arizona State University as a scholar, teacher and administrator Dr. Carter was inducted into the W. P. Carey Hall of Fame on April 2, 2019.

## HISTORY OF THE ACADEMIC COSTUME

The present-day academic costume seemingly originated at Oxford and Cambridge Universities in the 1300s. As the universities passed from ecclesiastical control, brighter colors distinguished the academic robe from the drab clerical gown. Colonial American universities based their academic regalia on the British system.

In the 1880s, a student movement centering in New England investigated the establishment of a "senior badge," to improve commencement week exercises and revive the traditions of university life. In 1893, an intercollegiate commission established a uniform code for caps, gowns and hoods for the various degrees.

Of the costume's three components, the hood is the most interesting. Originally it had three uses: as a head covering, as a shoulder cape, and as a bag in which alms could be collected. It is mentioned as early as 1480 in clerical literature. When large wigs were in vogue in Britain, the cape part of the hood was split in front and a narrow neckband inserted. The entire cape and hood was allowed to fall back as it is today, and it was never restored to the original style.

*Following is a list of the hood and tassel colors established by the Intercollegiate Code to represent departments of learning:*

Architecture— Blue-Violet  
 Agriculture— Maize  
 Arts, Letters, Humanities— White  
 Business Administration,  
     Commerce,  
     Accountancy— Sapphire Blue  
 Dentistry— Lilac  
 Economics— Copper  
 Education— Light Blue  
 Engineering— Orange  
 Fine Arts— Brown  
 Forestry— Russet  
 Home Economics— Maroon  
 Journalism— Crimson  
 Law— Purple  
 Library Science— Lemon  
 Medicine— Green  
 Music— Pink  
 Nursing— Apricot  
 Oratory (Speech)— Silver Gray  
 Pharmacy— Olive Green  
 Philosophy— Dark Blue  
 Physical Education— Sage Green  
 Public Administration, including  
     Foreign Service— Peacock Blue  
 Public Health— Salmon Pink  
 Science— Gold-Yellow  
 Social Science— Citron  
 Theology or Divinity— Scarlet  
 Veterinary Science— Gray

Black tassels are correct for all degrees,  
 and colored tassels are worn only by preference.  
 Gold metallic tassels may be worn by doctors or presidents of universities and colleges.
