COMMENCEMENT
AND
CONVOCATION
PROGRAM

Spring 2014

May 12 - 16, 2014

**THE NATIONAL ANTHEM
THE STAR SPANGLED BANNER**

O say can you see, by the dawn's early light,
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars through the perilous fight
O'er the ramparts we watched, were so gallantly streaming?
And the rockets' red glare, the bombs bursting in air
Gave proof through the night that our flag was still there.
O say does that Star-Spangled Banner yet wave
O'er the land of the free and the home of the brave?

**ALMA MATER
ARIZONA STATE UNIVERSITY**

Where the bold saguaros
Raise their arms on high,
Praying strength for brave tomorrows
From the western sky;
Where eternal mountains
Kneel at sunset's gate,
Here we hail thee, Alma Mater,
Arizona State.
—Hopkins-Dresskell

MAROON AND GOLD

Fight, Devils down the field
Fight with your might and don't ever yield
Long may our colors outshine all others
Echo from the buttes, Give em' hell Devils!
Cheer, cheer for A-S-U!
Fight for the old Maroon
For it's Hail! Hail! The gang's all here
And it's onward to victory!

Students whose names appear in this program are candidates for the degrees listed,
which will be conferred subject to completion of requirements.

University commencement and convocation ceremonies are special events for all
involved. Please show respect for everyone who has come to share in the experience.
Individuals who engage in inappropriate or disruptive behavior
may be removed from the event.

As a courtesy to those around you and to our graduating students,
please turn off phone and other electronic devices.

MISSION STATEMENT
UNIVERSITY COMMENCEMENT

University Commencement represents the culmination of a student's academic achievement.

It is a time of celebration and reflection for students, families, friends, faculty and staff.

It brings together a diverse community to share in the joy of accomplished goals.

Arizona State University continually demonstrates its dedication to efficiency, technology and sustainability. The full University Commencement program is being made available to graduates on a reusable external flash drive in May of 2014. This change aligns with our growing institutional efforts to enhance sustainability practices, and our broader endeavors to employ technology in heightened service to our students.

The reusable external flash drive, combined with the abridged program, will yield a 10.5 million page reduction in the amount of printed materials distributed at graduation ceremonies over the next three days. We kindly ask for your help in our sustainability efforts by returning unused or unwanted programs to the venue or recycling your printed programs after you have enjoyed them.

To order additional copies of this final printed bound book with all graduates names listed, scan this QR code with your smart phone's reader app or go to <http://ironwood.worksmartsuite.com> (User name: ASUuser Password: password)

**MESSAGE FROM THE
ARIZONA BOARD OF REGENTS**

Dear Graduates,

On behalf of the Arizona Board of Regents, we congratulate you on your graduation and are proud to celebrate this momentous achievement with you. Indeed, today is the fulfillment of great vision, tenacity and dedication, and you are to be commended for your hard work to attain your higher education degree.

Have no doubt that your graduation is not only a personal achievement, but is also a victory for our state. Arizona benefits tremendously from a highly-educated workforce – from meeting high-demand job needs, to fueling more entrepreneurialism and innovation. You have opened the door to a brighter future for yourself, and for the future of our great state.

Arizona's public universities are driving important goals for the opportunity and quality of life of the citizens of our state and our neighbors around the world. Together, we are increasing the educational attainment of our citizens to positioning Arizona as a global competitor, delivering new technologies, and pushing the boundaries of exploration and discovery.

The board is proud that you chose to pursue your degree at Arizona State University and we hope your achievement today not viewed as your arrival at a destination, but rather the gateway to lifelong learning as you travel the many paths life will offer you.

Finally, to the families and friends who are participating in this celebration – our congratulations go out to you as well. We share in your pride and we thank you for the support you provided during your graduate's educational journey.

Sincerely,

Eileen I. Klein

HISTORY OF HONORARY DEGREES

Harvard was the first university to confer honorary degrees in 1692. Since then it has become a recognized function of degree granting institutions. Honorary degrees are an opportunity for universities to single out people who have made contributions to society. At ASU, honorary degree recipients are nominated by faculty members. The six-member Academic Affairs Honorary Degrees Committee reviews faculty nominations for the Honorary Degree. It then recommends candidates to the president. The committee is appointed by and responsible to the president.

COMMENCEMENT SPEAKER**ARNE S. DUNCAN
U.S. SECRETARY OF EDUCATION**

Arne Duncan is the ninth U.S. secretary of education. He has served in this post since his confirmation by the U.S. Senate on January 20, 2009, following his nomination by President Barack Obama.

Duncan's tenure as secretary has been marked by a number of significant accomplishments on behalf of American students and teachers. He helped to secure congressional support for President Obama's investments in education, including the American Recovery and Reinvestment Act's \$100 billion to fund 325,000 teaching jobs; increases in Pell grants; reform efforts such as Race to the Top and Investing in Innovation; and interventions in low-performing schools. Additionally, he has helped secure an additional \$10 billion to avoid teacher layoffs, the elimination of student loan subsidies to banks, and a \$500 million national competition for early learning programs. Under Duncan's leadership at the Department, the Race to the Top program has the incentives, guidance, and flexibility it needs to support state reforms. The Department also has focused billions of dollars to transform struggling schools, prompting nearly 1,000 low-performing schools nationwide to recruit new staff, adopt new teaching methods, and add learning time. He has led new efforts to encourage labor and management to work together as never before, and their new collaboration is helping to drive reform, strengthen teaching, create better educational options, and improve learning. During Duncan's tenure, the Department has launched a comprehensive effort to transform the teaching profession.

In support of President Obama's goal for the United States to produce the highest percentage of college graduates by the year 2020, Duncan has helped secure increases in the Pell grant program to boost the number of young Americans attending college and receiving postsecondary degrees. He has begun new efforts to ensure that colleges and universities provide more transparency around graduation, job placement, and student loan default rates. With the income-based repayment program introduced during Duncan's tenure, student loan payments are being reduced for college graduates in low-paying jobs, and loans will be forgiven after 10 years for persons in certain public service occupations, such as teachers, police officers and firefighters.

Before becoming secretary of education, Duncan served as the chief executive officer of the Chicago Public Schools (CPS), a position he held from June 2001 through December 2008. In that time, he won praise for uniting education reformers, teachers, principals and business stakeholders behind an aggressive education reform agenda that included opening more than 100 new schools, expanding after-school and summer learning programs, closing down underperforming schools, increasing early childhood and college access, dramatically boosting the caliber of teachers, and building public-private partnerships around a variety of education initiatives. Duncan is credited with significantly raising student performance on

national and state tests, increasing graduation rates and the numbers of students taking Advanced Placement courses, and boosting the total number of scholarships secured by CPS students to more than \$150 million. Also during his leadership of CPS, the district was recognized for its efforts to bring top teaching talent into the city's classrooms, where the number of teachers applying for positions almost tripled.

THE UNIVERSITY MEDAL OF EXCELLENCE

The University Medal of Excellence honors innovative leaders who have worked to advance awareness and action on issues that affect the well-being and positive development of their communities. These leaders embody a dedication to the community, partnership in the community, and a constant desire to learn and do more to improve communities and provide models for success. Their leadership is consistent with ASU's efforts to define excellence and inclusion, and serves as a model to others for positive community impact.

JULIE A. WRIGLEY

Julie Ann Wrigley has long been interested in conservation; she has wanted to do her part to ensure that future generations would have the same quality of life that her generation has enjoyed. That was her intention when she went to law school in the early 1970's.

"I thought I would go into the corporate world and help corporations understand their responsibility for the environment," she says. "But in 1975, there was no such thing. Corporate responsibility for the environment developed years later."

Today, as a successful businesswoman and philanthropist, she has found a way to give back—or, more accurately, to invest in the future. She believes that a confluence of factors will cause her investments to pay huge dividends

In 2004, Wrigley made a \$15 million investment in Arizona State University to establish the University's Global Institute of Sustainability. From that Institute grew the world's first School of Sustainability, which opened at ASU in January 2007.

In June 2007, she made an additional \$10 million investment in ASU to recruit four of the world's leading sustainability scholar-researchers to fill four professorships focused on renewable energy systems, sustainable business practices, global environmental change and complex systems dynamics (which involves the conceptual modeling of human-environmental interactions).

"Most of the world's population growth will be in urban, arid areas," she says. "Metropolitan Phoenix is in a desert, and is one of the fastest-growing cities in the world. We have to figure out how to manage growth better—and it won't be through traditional means."

In ASU, Wrigley saw a young research university that was not locked into the silos of academic disciplines. ASU President Michael Crow, also a forward-thinking non-traditionalist and conservationist, was willing to make sustainability a University pursuit.

“Sustainability is an issue that is bigger than all of us,” Wrigley says. “Therefore, it will take all of us to solve it. Here we can think outside the envelope, which is critical to people like me who want to invent the future. We don’t want to be bound by tradition. At ASU, research is defined around the real needs of society. This is one of the rare places in the world where we can solve these problems and do it cohesively. We can create the ideas and provide the solutions on an ever-enlarging scale.”

Wrigley serves as President and Chief Executive Officer of Wrigley Investments, LLC, President of the Julie Ann Wrigley Foundation, Manager of Glen Neva Land Holdings, LLC, Glen Neva Land Holdings II, LLC and Managing Member of Wrigley Ranches, LLC. She is a past member of the Board of Directors of the E.W.Scripps Co., Associated Bank of Chicago, First Bank of Idaho, American Eagle Group, and Wyndham Foods.

Before the death of her husband, William Wrigley, the President and CEO of the Wm. Wrigley Jr. Co., the largest manufacturer of chewing gum in the world, she assisted her husband in a variety of endeavors, including managing the family trusts and traveling the world on Wrigley Co. business.

Among her philanthropic efforts, Wrigley is founder and co-chair with Rob Walton, chairman and CEO of Wal-Mart, of ASU’s Global Institute of Sustainability; a former board member and Chair Emeritus of the Peregrine Fund Inc.; a former member of the board of visitors for the Freeman Spogli Institute for International Studies at her alma mater, Stanford University; former co-chair of the capital campaign for the Barrow Neurological Institute at St. Joseph’s Hospital in Phoenix; a former member of the Nature Conservancy Board of Governors; and was also a state Trustee for the Conservancy in Idaho and Nevada. In addition, she has served on the Board of Trustees for the World Wildlife Fund (WWF) and is currently on the National Council for WWF as well as serving on the Advisory Board for the Ray C. Anderson Foundation. Early in her business career she was Vice-Chair of Keep America Beautiful.

She is a member and co-founder with her late husband, of the University of Southern California’s Wrigley Institute for Environmental Studies. She is also President and CEO of the Julie Ann Wrigley Foundation (successor to the Wrigley Family Foundation), a private philanthropic foundation committed to sustainability and the environment, health care and education. In addition, Wrigley is a member of the Burns Family Foundation, which was founded by her grandfather and which she currently manages with her five sisters.

Wrigley graduated from Stanford University with a degree in anthropology. She also earned a Juris doctorate, summa cum laude, from the University of Denver’s College of Law.

HONORARY DEGREE CITATIONS

FREEMAN A. HRABOWSKI, III

Freeman A. Hrabowski, III, has served as President of UMBC (The University of Maryland, Baltimore County) since 1992. His research and publications focus on science and math education, with special emphasis on minority participation and performance. He chaired the National Academies' committee that produced the recent report, *Expanding Underrepresented Minority Participation: America's Science and Technology Talent at the Crossroads*. He also was named recently by President Obama to chair the newly created President's Advisory Commission on Educational Excellence for African Americans.

In 2008, he was named one of *America's Best Leaders* by *U.S. News & World Report*, which ranked UMBC the nation's #1 "Up and Coming" university the past five years (2009-13). During this period, *U.S. News* also consistently ranked UMBC among the nation's leading institutions for "Best Undergraduate Teaching" in 2013. *TIME* magazine named him one of America's *10 Best College Presidents in 2009*, and one of the "*100 Most Influential People in the World*" in 2012. In 2011, he received both the *TIAA-CREF Theodore M. Hesburgh Award for Leadership Excellence* and the *Carnegie Corporation of New York's Academic Leadership Award*. Also in 2011, he was named one of seven *Top American Leaders* by *The Washington Post* and the Harvard Kennedy School's Center for Public Leadership. In 2012, he received the *Heinz Award* for his contributions to improving the "Human Condition" and was among the inaugural inductees into the *U.S. News & World Report STEM Solutions Leadership Hall of Fame*.

With philanthropist Robert Meyerhoff, he co-founded the Meyerhoff Scholars Program in 1988. This program is open to all high-achieving students committed to pursuing advanced degrees and research careers in science and engineering, advancing underrepresented minorities in these fields. The program is recognized as a national model, and based on program outcomes, Hrabowski has authored numerous articles and co-authored two books, *Beating the Odds and Overcoming the Odds* (Oxford University Press), focusing on parenting and high-achieving African American males and females in science. He and UMBC were recently featured on CBS's *60 Minutes*, attracting national attention for the campus's achievements involving innovation and inclusive excellence.

A consultant to the National Science Foundation, the National Institutes of Health, the National Academies, and universities and school systems nationally, Hrabowski also serves on the boards of the Alfred P. Sloan Foundation, France-Merrick Foundation, Marguerite Casey Foundation (Chair), T. Rowe Price Group, The Urban Institute, McCormick & Company, and the Baltimore Equitable Society. Additional honors include election to the American Academy of Arts & Sciences and the American Philosophical Society; the *McGraw Prize in Education*, the *U.S. Presidential Award for Excellence in Science, Mathematics, and Engineering Mentoring*, the Columbia University *Teachers College Medal for Distinguished*

Service, the GE *African American Forum ICON Lifetime Achievement Award*, the *American Educational Research Association's Distinguished Public Service Award*, and the *American Association for the Advancement of Science's (AAAS) William D. Carey Award*. He also holds honorary degrees from more than 20 institutions.

A child-leader in the Civil Rights Movement, Hrabowski was prominently featured in Spike Lee's 1997 documentary, *Four Little Girls*, on the racially motivated bombing in 1963 of Birmingham's Sixteenth Street Baptist Church.

Born in 1950 in Birmingham, Alabama, Hrabowski graduated at 19 from Hampton Institute with highest honors in mathematics. At the University of Illinois at Urbana-Champaign, he received his M.A. (mathematics) and four years later his Ph.D. (higher education administration/statistics) at age 24.

PAMELA A. MATSON

Pamela Matson is the Dean of the School of Earth Sciences, Goldman Professor of Environmental Science, and Senior Fellow at the Woods Institute for Environment at Stanford University. Her ambitious, interdisciplinary and solution-oriented research addresses a range of environment and sustainability issues, including sustainability of agricultural systems, vulnerability of particular people and places to climate change, and global change in the nitrogen and carbon cycles. With multi-disciplinary teams of researchers, managers, and decision makers, she has worked to develop agricultural approaches that reduce environmental impacts while improving livelihoods and human wellbeing. She contributes also to the development of institutional infrastructures that support interdisciplinary and transborder research and problem solving.

With support from a MacArthur Fellowship, Matson initiated the Yaqui Valley project in Mexico. This project became a model of interdisciplinary cooperation. Working side-by-side with international researchers in economics and agronomy, she searched for farmer-friendly ways to mitigate the environmental stresses of intensive agriculture on the Sonoran desert. To accomplish their goal, the collaborators learned how to learn from each other, integrating the procedures and perspectives of their respective fields of study and then blending the integrated approach with farmers' practices and perspectives. As the team understood the issues and effective ways to address them to everyone's advantage, they realized that decisions of lenders and policy makers prevented implementation of corrective action. This was a pivotal lesson in turning research into reality. Matson again extended her focus to include the many areas involved in use-inspired research.

In 1997, Matson became senior fellow and then co-director at the Center for Environmental Science and Policy in the Institute for International Studies. Her work has significant impact in environmentalism, awareness of climate change, movement toward sustainability and engagement of high-level decision makers. Among other activities, she was founding chair of the National Academies

Roundtable on Science and Technology for Sustainability and founding editor for the Annual Review of Environment and Resources. She is past president of the Ecological Society of America and serves on boards of such organizations as the World Wildlife Fund and the ClimateWorks Foundation. She has served also the National Parks Conservation Association; formed rapid response teams of scientists who were quickly available for hearings, media comment and legislation analysis; launched the journal *Frontiers in Ecology and the Environment* to stimulate discussion among non-ecologists on eco-issues; and encouraged development of university and funding agency infrastructures that support transdisciplinary collaborations

Matson is an elected member of the National Academy of Science and the American Academy of Arts and Sciences. She has served on numerous National Academies' committees, including the Board on Sustainable Development, the Board on Global Change, and the Committee on America's Climate Choices. She also served on the science steering committee for the International Geosphere-Biosphere Program and continues to serve on advisory boards for Colorado State University's School of Global Environmental Sustainability and Arizona State University's Global Institute of Sustainability. She directs the Leopold Leadership Program at Stanford University. Her recent publications (among around 175) include *Seeds of Sustainability: Lessons from the Birthplace of the Green Revolution* and the National Research Council volume titled *Advancing the Science of Climate Change*. Matson received her B.S. in Biology from the University of Wisconsin – Eau Claire, her M.S. in Environmental Science from Indiana University, and her Ph.D. in Forest Ecology from Oregon State University.

JOSEPH E. STIGLITZ

Joseph E. Stiglitz was born in Gary, Indiana in 1943. A graduate of Amherst College, he received his Ph.D. from the Massachusetts Institute of Technology in 1967, became a full professor at Yale in 1970, and in 1979 was awarded the John Bates Clark Award, given annually by the American Economic Association to the economist under 40 who has made the most significant contribution to the field. He has taught at Princeton, Stanford, MIT and was the Drummond Professor and a fellow of All Souls College, Oxford. Stiglitz served on President Clinton's economic team as a member and then chairman of the U.S. Council of Economic Advisors in the mid-1990s and then joined the World Bank as chief economist and senior vice president. In 2001, he was awarded the Nobel Prize for Economics for his analyses of markets with asymmetric information, and he was a lead author of the 1995 Report of the Intergovernmental Panel on Climate Change, which shared the 2007 Nobel Peace Prize. He is now University Professor at Columbia University in New York and Co-Chair of Columbia University's Committee on Global Thought. He is also the founder and Co-President of the Initiative for Policy Dialogue at Columbia. In 2011, *Time* named him one of the world's 100 most influential people. In 2012, he was awarded the French Legion of Honor, with the rank of Officer.

Stiglitz helped create a new branch of economics, The Economics of Information, exploring the consequences of information asymmetries and pioneering such pivotal concepts as adverse selection and moral hazard, which have now become standard tools not only of theorists, but of policy analysts. He has made major contributions to macroeconomics and monetary theory, to development economics and trade theory, to public and corporate finance, to the theories of industrial organization and rural organization, and to the theories of welfare economics and of income and wealth distribution. In the 1980s, he helped revive interest in the economics of R&D. His work has helped explain the circumstances in which markets do not work well and how selective government intervention can improve their performance.

In the last fifteen years, he has written a series of highly popular books that have had an enormous influence in shaping global debates. His book *Globalization and Its Discontents* (2002) has been translated into 35 languages. In that book he laid bare the way globalization had been managed, especially by the international financial institutions. In two later sequels, he presented alternatives: *Fair Trade for All* (2005, with Andrew Charlton) and *Making Globalization Work* (2006). He is the author most recently of *The Price of Inequality: How Today's Divided Society Endangers Our Future*.

Stiglitz's work has been widely recognized. Among his awards are more than 40 honorary doctorates, including honorary degrees from Cambridge and Oxford Universities. In 2010 he was awarded the prestigious Loeb Prize for his contributions to journalism. Among the prizes awarded to his books have been the European Literary Prize, the Bruno Kreisky Prize for Political Books and the Robert F. Kennedy Book Award. He is a fellow of the National Academy of Sciences, the American Academy of Arts and Sciences, the American Philosophical Society, and the Econometric Society, and a corresponding fellow of the Royal Society and the British Academy.

He has been decorated by several governments, including Colombia, Ecuador, and Korea, and most recently become a member of France's Legion of Honor (rank of Officier).

***RECESSION OF FACULTY AND CANDIDATES**

*Audience should stand for these portions of the program.

At its founding, the College of Law at Arizona State University committed itself to innovation. While retaining important aspects of traditional legal education, Dean Willard H. Pedrick and the six well-respected faculty members, whom Pedrick recruited to the desert from around the country, embraced a vision of the future of legal education, befitting a young school in a growing city.

Nearly from its inception, the College pursued clinical legal education models, through which students receive a foundation in lawyering before they become practicing attorneys, while providing indigent members of the community with valuable legal assistance. Today, the College of Law has a dozen clinics and clinical units, more per capita than almost any law school in the country. These programs offer hands-on experience in both litigation and transactional settings, across an extraordinarily wide range of topic areas. Each year, approximately 90 percent of students participate in clinics, externships, or pro bono activities.

In the four decades since its founding, the College of Law, now renamed the Sandra Day O'Connor College of Law, has grown in size and national prominence, assembling an acclaimed faculty in the traditionally core areas of legal study while continuing to offer innovative approaches to legal education. The Center for Law, Science & Innovation is the nation's first and largest academic center focused on the intersection of law and science, and through it the College offers the country's only LL.M. in Biotechnology and Genomics, as well as innovative new programs in the Governance of Emerging Technologies; Personalized Medicine, Law & Policy; Public Health Law and Policy; Law and Sustainability; and Information and Communications Technology. The Indian Legal Program is arguably the leading program on Indian law in the country. It offers a strong curriculum, including the LL.M. in Tribal Policy, Law, and Government, the Certificate in Indian Law, and the Indian Legal Clinic, and trains students to be leaders in Indian Country. The College of Law's Center for Law and Global Affairs supports and inspires research, education, and practice regarding emerging forms of transnational governance that extend beyond the traditional paradigms of international law. The College of Law continues to reach further to provide opportunities for its students and graduates with innovative endeavors such as the creation of a nonprofit law firm, an employer outreach initiative, new international licensure programs, and a faculty and staff committed to student success.

The College of Law bridges the gap between theory and practice, and our faculty and students address the pressing public policy challenges of our time. In short, the Sandra Day O'Connor College of Law remains an innovator, building new models for 21st century public legal education in a dynamic, increasingly diverse, local, national, and global environment.

The Barrett Story

Barrett, The Honors College at Arizona State University, is a selective, residential college for academically outstanding undergraduates. Named “Best Honors College” in the nation, the college often has more National Merit Scholars than Princeton, Yale or Stanford.

The college is supported by a \$10 million endowment that is used exclusively to benefit honors students and fund their projects. Barrett students major in any field offered at ASU’s campuses - Tempe, Polytechnic, Downtown or West.

Barrett students are members of a small community of scholars who have direct access to our deans and receive personalized attention from approximately 25 honors faculty fellows and 35 staff members who care about them as individuals. In addition to these full-time honors college personnel there are more than 1400 university faculty members who teach and mentor Barrett students across all four campuses.

The \$130 million Barrett campus in Tempe was designed by students, faculty and staff working with nationally renowned architects. The Barrett complex functions as its own small honors community on the ASU Tempe campus where students enjoy the amenities and resources of a large university. This unique arrangement is a model for higher education and has often been referred to as the best of both worlds by students who thrive in a small college atmosphere but appreciate access to large university programs like Division I athletics and high profile lecturers.

Student Opportunities

Barrett students take advantage of an array of opportunities that enrich the honors experience. They participate in study abroad programs that enable them to travel to foreign countries, immerse themselves in small classes taught by honors faculty, and experience different cultures and societies while earning honors credits. Barrett Summer Abroad destinations include France, Greece, Italy, Germany, Switzerland, Spain, the British Isles, South American and China. Barrett students receive national and international graduate scholarships such as Rhodes, Truman and Marshall Scholarships. They take advantage of unique undergraduate research and internship opportunities, such as those available at the Translational Genomics Research Institute, the governor's office, Congress, the White House, or on Wall Street. Barrett students attend social and cultural events, publish poetry in the honors literary publication LUX, shadow doctors at the Mayo Clinic, and work with professors in the Biodesign Institute on latest developments in nanotechnology. Many honors students seek leadership opportunities and find fulfillment in serving others, both on campus and in the larger metropolitan community. Barrett students also have opportunities to meet with individuals renowned for contributions in their fields, such as retired U.S. Supreme Court Justice Sandra Day O'Connor, former CNN anchor Aaron Brown, authors Guy Dauncey and David Kessler, and photographer Joel Meyerowitz.

Signature Events

Barrett hosts two signature events annually, the Centennial Lecture and the Rhodes Lecture. In 1985, the Flinn Foundation established an endowment to commemorate ASU's 100th year. The gift created the ASU Centennial Lecture, and in 1989 it provided the Barrett Honors College the resources to bring some of the world's most influential intellects to campus. The Centennial Lecture has become one of ASU's premier intellectual events featuring noted diplomats, scientists, playwrights, and authors. Each Centennial Lecturer has helped to strengthen the university and has provided students and community members with a memorable experience. Former Centennial lecturers include Edward James Olmos, dedicated actor, community activist and diversity proponent, in 2010; Dr. Oscar Arias, Nobel Peace Laureate and two-time president of Costa Rica, in 2011; Sylvia Nasar, author of best-selling novel, *"A Beautiful Mind"* and Knight Professor of Business Journalism, Columbia University, in Fall 2012; and most recently, Michael Pollan, author of best-selling novels, *"The Omnivore's Dilemma"* and *"The Botany of Desire."*

The Rhodes Lecture is given by the John J. Rhodes Chair in Public Policy and American Institutions at Barrett. The Chair was created to celebrate the career in public service of one of Arizona's and the nation's most distinguished leaders. The Rhodes Chair is dedicated to deepening theoretical and practical understanding of the many voices and forces that influence public policy. The Chair honors the values of personal integrity, fiscal responsibility, respect for persons, and international farsightedness exemplified in the Hon. John J. Rhodes' career. The 2013 Rhodes

Chair was Dr. Leroy Chiao, former astronaut, engineer and entrepreneur, who specializes in government and private space programs and also serves as an international advocate for STEM education. The 2014 Rhodes Lecture took place on Wednesday, February 26 and featured Jay Kopelman, Lieutenant Colonel USMC (retired). Visit www.barretthonors.asu.edu/events/ for more information about future Barrett events.

Barrett on all four campuses

In fall 2009, Barrett, The Honors College at Arizona State University, opened the nation's first comprehensive four-year residential honors college within a top-tier Research I university that underscores its standing as the premier honors college in the nation. On the Tempe campus, the nine-acre college includes resident halls for 1700 students, several classrooms, a community center with student lounges, activity rooms, computer labs, a fitness center, a multi-room dining facility with a refectory and café, and administrative, faculty and staff offices.

Multiple upgrades to the Barrett Honors College facilities on Downtown, Polytechnic and West campuses have taken place – featuring honors student lounges, libraries, kitchens, computer labs, student activity and study rooms, faculty and administrative offices, and honors residential communities.

Barrett at the Downtown Campus is home to about 400 honors students. The Barrett residential community, called B-Town D-Town, is located at Taylor Place at the heart of the campus and offers a living environment where students have easy access to ASU's downtown colleges and programs, as well as Phoenix's increasingly vibrant lifestyle.

Barrett at the Polytechnic campus gives students the feeling of studying at a small private college with the advantages of a large university. The honors residential community is unique among the ASU campuses – freshman honors student reside together on a floor of Century Hall, which opened in the summer of 2012, while upper-division honors students live in 2- and 3-bedroom houses in a special Barrett neighborhood on campus. Honors students also have access to a new dining hall and fitness facility.

Barrett at the West Campus provides the entire range of honors activities in a small liberal arts college setting. Barrett West students live and learn on the ASU West Campus with approximately 500 other residents. Honors students live in the new Casa de Oro, a residence hall that opened in fall 2012. The 5,000-square-foot Barrett Suite includes a computer lab, study rooms, a meeting area, a library, and staff and faculty offices.

With its outstanding programs, dedicated faculty and staff, and comprehensive facilities, Barrett is a national model for organizing resources to support the honors experience at all four campuses at ASU.

The Moeur Award is Arizona State University's oldest, continuing honor. It was established in 1901 by Dr. Benjamin B. Moeur and Honor Anderson Moeur, and is now sponsored annually by the Arizona State University Alumni Association. The award is presented at each Commencement ceremony to those individuals who have attained the highest academic standing in any four-year curriculum during their undergraduate years at ASU.

ABOUT THE COLLEGE OF HEALTH SOLUTIONS

Arizona State University established the College of Health Solutions (CHS) in May 2012 as part of its strategic initiative to build a new model for health education. The college has experienced rapid enrollment growth and developed a number of new degree programs to service its students' acute interests for opportunities in health education. The college is a dynamic, growing, interprofessional enterprise bringing together the social and natural sciences, and humanities in the name of health.

The multidisciplinary college includes the **School of Nutrition and Health Promotion, School for the Science of Health Care Delivery, International School of Biomedical Diagnostics, Department of Biomedical Informatics, Department of Speech and Hearing Science, and the Doctor of Behavioral Health program.** Located on the Downtown Phoenix Campus, the college collaborates with academic units across ASU's campuses including the College of Nursing & Health Innovation, the School of Biological and Health Systems Engineering, the School of Life Sciences, College of Public Programs and numerous research centers and programs, including the Center for Health Information and Research, the Health Care Delivery and Policy Program and the Healthcare Transformation Institute.

Working closely with faculty and leadership in the College of Nursing & Health Innovation (CONHI), CHS is a catalyst for partnerships across ASU's campuses, in Arizona, around the nation and around the world. Committed to improvements in health outcomes and expanding patient access to highly skilled, trained health professionals, CHS attracts dedicated students looking to make a difference in confronting the global health crisis on a variety of fronts.

Throughout each unit within CHS, students have access to top-tier faculty, research facilities, and opportunities for practical experiences working within a matrix of partner organizations to engage at-risk populations in health and behavioral change to improve the daily lives of men, women and children. As the vanguard of ASU's health and health education focus, CHS provides students with a breadth and depth of programs and connectivity with allied programs that cannot be found at other universities. More information can be found at chs.asu.edu.

ABOUT THE SCHOOL OF NUTRITION AND HEALTH PROMOTION

The School of Nutrition and Health Promotion (SNHP) offers students a range of academic programs and research opportunities spanning Nutrition, Exercise and Wellness, Kinesiology, Health Sciences, and Medical Laboratory Science. With state-of-the-art facilities – including the learning kitchen, Exercise Assessment and Movement Analysis lab, and campus garden – undergraduate and graduate students extend their learning outside of the classroom into original research impacting health outcomes on campus and in the community.

The School offers Baccalaureate degrees in Exercise and Wellness, Health Sciences, Kinesiology, Medical Laboratory Sciences, and Nutrition; Master's degrees in Exercise and Wellness, and Nutrition; and a PhD in Physical Activity, Nutrition and Wellness. More information can be found at healthpromotion.asu.edu.

ABOUT THE SCHOOL FOR THE SCIENCE OF HEALTH CARE DELIVERY

The inaugural class in the School for the Science of Health Care Delivery (SHCD) enrolled in the fall of 2013 with pioneering curriculum for their master's program of study and will graduate this spring. The nationally recognized faculty, leading this innovative Master of Science (M.S.) program, engages students in rigorous curriculum exploring fundamental aspects of systems-design, leadership, health promotion and diffusion of innovation to create the next generation of health leaders. In addition to their faculty mentors and teachers, students are engaging community health leaders from Arizona and around the nation as they work to address the complex issues of health care delivery. More information can be found at chs.asu.edu/shcd.

ABOUT THE DEPARTMENT OF BIOMEDICAL INFORMATICS

Biomedical informatics is a field recognized as increasingly essential to the advancement of the health industry. Skilled professionals in biomedical informatics are able to analyze and translate large amounts of health data, including research, into meaningful solutions that improve health care delivery and patient outcomes.

The department currently offers master's and doctorate degrees, as well as a new undergraduate degree for 2014. Focus areas include Bioinformatics, Clinical Informatics, Imaging, Knowledge Discovery, and Population Health. Partnerships with Mayo Clinic, Barrow Neurological Institute and Banner Health, among others, infuse the program with practical research mandates and clinical relevance that reinforce the department's standard of excellence and leadership. More information can be found at bmi.asu.edu.

ABOUT THE DEPARTMENT OF SPEECH AND HEARING SCIENCE

The Department of Speech and Hearing Science joined the College of Health Solutions in the fall of 2013 and continues operating on the Tempe campus where it has had a long history of teaching and service. With national rankings in audiology (#17) and speech-language pathology (#21), Speech and Hearing has led research innovation in both clinical and academic areas of health with \$25 million in research awards during the past five years. The department offers graduate and undergraduate degrees.

Through its two on-campus, non-profit clinics, members of the public and campus communities have access to high quality professional services for individuals of all ages, infants through senior citizens, with needs in communication and hearing improvement. The clinics also serve as training and research facilities for bachelor, masters, and doctoral programs in audiology and speech-language pathology. More information can be found at shs.asu.edu.

ABOUT THE DOCTOR OF BEHAVIORAL HEALTH

The Doctor of Behavioral Health program is an upgrade for master's degree professionals in preparation for opportunities in the new specialty area of integrated health care – the coordinated treatment of medical and behavioral conditions in primary care clinics and other medical settings. The program develops professionals who have a deep understanding of the increasingly complex health delivery systems and models through the nation and world. Among the foci explored by students in the program are the integrated behavioral health interventions in the primary care environment, medical literacy and business entrepreneurship in health care. Students may choose from the clinical or new management track based on their background and career path. More information can be found at chs.asu.edu/dbh.

ABOUT THE INTERNATIONAL SCHOOL OF BIOMEDICAL DIAGNOSTICS

The College of Health Solutions recently launched a new International School of Biomedical Diagnostics in the spring of 2014 in association with Dublin City University (DCU). It will focus on the technology, science, business/legal, and application of diagnostics, and will be a global center for research, teaching and service in the emerging field of biomedical diagnostics. The school will pull expertise from faculty across ASU, in collaboration with Dublin City University, Ventana Medical Systems, and other industry partners.

Biomedical Diagnostics are at the center of health care innovation today and are involved in more than 60 percent of clinical decision-making, including pharmaceutical and technology development, patient management, health care finance, and health care policy. The school will offer ASU students a Master of Science in Biomedical Diagnostics. The program will be delivered through a blended, global classroom experience, starting in fall 2014. More information can be found at chs.asu.edu/isbd.

COLLEGE OF LIBERAL ARTS AND SCIENCES

Serving as the intellectual heart of this vibrant university, the College of Liberal Arts and Sciences is engaged in redefining what is expected of the well-educated person of the 21st century. Creatively synthesizing teaching, research and scholarship that span the humanities, social sciences, natural sciences and life sciences, CLAS offers a challenging environment of learning and discovery in which students and faculty aspire to personal achievement and collaborative problem-solving.

The College of Liberal Arts and Sciences, the largest at ASU, is structured to help students identify and focus their dreams and aspirations. The college is in actuality many communities within communities where students meet peers and faculty who share their interests and passions through a rich diversity of schools, departments, majors, programs, institutes, centers, laboratories, clubs and organizations.

Faculty members in the college are committed to providing each of our students with the best education that we can, recognizing that the pace and complexity of the modern world will ask successful citizens and leaders to reinvent themselves time and again. Any institution of higher learning can train a student for a first job. Our goal is to equip our students with knowledge and skills for a lifetime of success. Although we are continually innovating and adapting as a college, the liberal arts remain the best foundation for successful careers and deeply rewarding personal and professional lives.

The College of Liberal Arts and Sciences—*Transforming learning, discovery and lives*

HONOR CORDS

Some of our undergraduate degree candidates wear maroon and/or gold honor cords. These cords designate students who have completed at least 56 resident credit hours at ASU and who have attained the following grade point averages:

Summa Cum Laude = Maroon and Gold cords, 3.80 to 4.0 GPA

Magna Cum Laude = Gold cord, 3.60 to 3.79 GPA

Cum Laude = Maroon cord, 3.40 to 3.59 GPA

ASU COLLEGE OF NURSING & HEALTH INNOVATION

Equipping Health Leaders of the Future

The growing footprint of the ASU College of Nursing & Health Innovation is about both our literal space – significantly expanded with the opening of our second building in 2009 – but also about the spaces we have created to fulfill on our mission to do more, serve more, and sustain innovation. Centrally located outside of the new building, and daily in full view of students, staff and faculty, is the challenge to everyone to “dream, discover, and deliver.” It is our mission and challenge that drives us to offer the highest quality of academic, research and clinical practice programs so we can create graduates who will be the best clinicians, teachers, advocates of good health, and researchers.

Just as our research and teaching extends far beyond our classroom walls, so does our drive to make an impact in the world and improve health outcomes. We make this real in six ways.

First, our interprofessional model guides us as we build programs and curriculum to meet the needs of future health workers. Both our graduate and undergraduate

programs continue to expand with a determined focus on the preparation of world-class health workers, ready to advance complex patient care and dynamic delivery systems. As our students' rising accomplishments on NCLEX attest, our program design and delivery is central to the start of students' careers as well as their advancement and mobility within the systems where they work.

Second, Innovation is in the name of the college and at the core of our thinking. Everyone working in a clinical context knows the challenges and complexity connected with the management of individuals' health. The challenges and opportunities that pervade the health care system require innovative solutions that improve whole systems and global patient outcomes. Our curriculum and clinical experiences are designed to give students a breadth and depth of exposure to different types of delivery systems and equip them with tools to provide innovative thinking and value from the very first day. We foster innovative thinking at ASU—being on the cutting edge and visioning solutions to the most complex healthcare problems.

Third, while our programs encourage creative processes of discovery and dreaming, we place a premium on delivery. We encourage and provide an environment where dreams are cultivated. Whether through the college's centers, where nationally recognized research leaders are impacting research agendas, or through our funded research collaborations and the community partnerships they support, our students, faculty and staff are making a difference on a broad scale.

Fourth, we continue to push innovations – technological and otherwise – to better ourselves and our work within the college. As our online programs continue to expand access to the highest quality training, they do so with an intense focus on rigor and adoption of new and better instructional tools. Our simulation center not only provides state-of-the-art education for our students, but also is a partner with the State of Arizona Nursing Board to assess and ensure competence among nursing professionals with the confidence and essential practice skills they need to transition to real-world healthcare environments. We also operate three high-quality nurse-led health centers in the greater Phoenix area that emphasize an interdisciplinary approach to care, which are among the more than 700 clinical placement sites where our students receive outstanding educational experiences in the real world.

Fifth, as we lead the future of health education, our college places a strong value on connections to and appreciation for our past, our traditions, and the students and leaders who have brought us to this moment. As our students graduate and embark on their next journey, it is important to be mindful of the mentors, friends, family and loved ones who helped each of us reach this significant milestone. We want to encourage our alumni to stay connected to the college, watch our developments and participate in our activities or programming in the future. Our conversations and time together are not complete because you still can make a great difference to those who will follow you.

Finally, as our college cultivates creativity, innovation and entrepreneurship, we are confident the tools and training our students have received will make them lifelong learners and significant contributors to our dynamic industry. We encourage our students to challenge themselves and those around them to think more critically, to listen more closely and to work more diligently – especially on behalf of those who disparately suffer from acute and chronic illness and disease – as they are remaking the world and its possibilities.

THE COLLEGE OF PUBLIC PROGRAMS

The College of Public Programs is ASU's innovative factory for production of public goods. The College brings creativity, a spirit of experimentation and systems-level thinking to the shared challenge of creating and maintaining these public goods, linking analytic depth with concern for the practical challenge of institutional design, implementation and management. At the heart of the College and its programs lie the challenges and opportunities of urban living and governance; in our teaching and research, we confront the reality that humanity is now organized around complex metropolitan regions whose dynamism is accompanied by unprecedented social, environmental and economic pressures.

The College is training a new generation of leaders committed to improving our collective destiny. Working with faculty who themselves are identifying and testing novel approaches to shared challenges, they learn to derive solutions that are not bound by sector or orthodoxy. In doing so, they will emerge as the most important solution of all.

THE SCHOOLS IN THE COLLEGE OF PUBLIC PROGRAMS

The School of Community Resources and Development students, faculty and

staff share a commitment to making communities better places to live, work and visit. The fields within our School are extremely diverse and involve the private, government and nonprofit sectors of the economy. The concept of building sustainable and healthy communities is the unifying principle encompassing our School's three established focus areas of parks and recreation management, tourism development and management, and nonprofit leadership and management.

The School of Criminology and Criminal Justice merges theory and practice. This occurs in the teaching, research and service activities of our faculty, students and alumni. The convenient downtown location makes the School accessible to working professionals and traditional students. In addition, the location of major criminal justice agencies downtown enhances the opportunities for instruction, practice and internships for all students. The School offers a bachelor's degree, two master's degrees and a doctoral degree. The degrees are designed to meet the needs of working professionals and full-time students. The curriculum is delivered both in-class and online.

The School of Public Affairs is continuing its long tradition of developing outstanding public leaders; people who are committed to making a difference in our world and who are well prepared to meet the rigorous demands and substantial challenges of the future. We offer innovative educational and professional opportunities to help build strong and more effective leaders. We are the only public administration program in the Phoenix area to be accredited by the National Association of Schools of Public Affairs and Administration (NASPAA) and are consistently ranked among the top 20 public affairs schools in the country.

The School of Social Work strives to develop and provide access to innovative social services that allow disadvantaged families and communities to prosper. We are among the largest and most diverse social work programs in the U.S., with over 1,300 students now enrolled at our Phoenix and Tucson locations, and with more than 8,000 alumni. We offer bachelor's, master's and doctoral degrees, as well as many certificate and continuing professional education programs. Our students intern at more than 800 field placement sites. Extensive online and nontraditional courses facilitate access to those with varying schedules and needs.

THE CENTERS, INSTITUTES AND PROGRAMS

Bob Ramsey Executive Education

The program offers a wide variety of quality professional development programs for public managers, executives and elected officials. It provides intensive workshops and top-notch management training.

Center for Applied Behavioral Health Policy

The Center conducts research, provides program development and evaluation services, and designs and conducts workforce development initiatives to improve policies and programs that affect people with substance use disorders or mental illness.

Center for Emergency Management and Homeland Security

The Center fuses academics, research and solution delivery capabilities to meet crisis mitigation, response and recovery needs of government and private sector stakeholders today, and train the public management professionals of tomorrow.

Center for Organization Research and Design

The Center promotes, supports and conducts fundamental research on public, nonprofit and hybrid organizations and their design. Its emphasis is on attention to new organizational forms and designs in science- and knowledge-intensive organizations and technology-intensive aspects of nontechnical organizations.

Center for Policy Informatics

The Center leverages cutting-edge technology and cross-disciplinary theory to help individuals and communities make and evaluate policy choices. It develops policy-relevant models that balance the complexity of real-world phenomenon with transparent, actionable evidence.

Center for Social Cohesion

The Center for Social Cohesion, a project of Arizona State University in partnership with the New America Foundation, is dedicated to studying the forces that shape our sense of social unity. Wholly non-partisan, pluralistic and multidisciplinary in outlook, the Center seeks to promote understanding of how diverse societies cohere.

Center for Sustainable Tourism

The Center for Sustainable Tourism is devoted to studying the role of tourism in community development in order to strengthen its contribution to viable economic, social and environmental systems, especially in megapolitan regions around the world – aptly named tourism for the public good.

Center for Urban Innovation

As the College's focal point for research on urban affairs, the Center's mission is to improve the quality of life in neighborhoods, cities, and urban regions by promoting innovation in governance, policy and management.

Center for Violence Prevention and Community Safety

The Center brings together scholars from social, behavioral and humanistic backgrounds to conduct research confronting international, regional and local problems for the purpose of conceiving and implementing policies, programs and practices grounded in evidence.

Lodestar Center for Philanthropy and Nonprofit Innovation

The Center builds the capacity of the social sector by enhancing the effectiveness of those who lead, manage and support nonprofit organizations. It promotes the understanding of the nonprofit sector and philanthropy in community life, with a particular focus on effective practices that help organizations meet their missions.

Morrison Institute for Public Policy

Morrison Institute bridges the gap between academic scholarship and public policy development through independent research and services to public and private sector clients. The Institute researches public policies that impact Greater Phoenix, the state of Arizona and the nation.

Osher Lifelong Learning Institute at ASU

The Osher Lifelong Learning Institute at ASU provides university-quality learning experiences for adults ages 50 and over through diverse short courses and lectures, campus-based learning opportunities and civic engagement initiatives.

Southwest Interdisciplinary Research Center

The Center conducts transdisciplinary minority health and health disparities research, research education training, and community outreach and engagement on drug abuse, mental health and HIV/AIDS.

COLLEGE OF TECHNOLOGY AND INNOVATION

The College of Technology and Innovation (CTI) is making a new higher education experience that focuses on learning through making and solving real-world challenges through collaboration. Today we celebrate the graduates who embody this mission.

At CTI we strive to fully exemplify the polytechnic values of engaged learning, use-inspired applied research and deep engagement with industry. We operate at the intersection of science, technology, engineering, mathematics, entrepreneurship and management; connected by a mission to make innovative contributions to society and industry.

CTI is an environment for learning and discovery that is suited to the needs of the 21st century. Society needs innovative and technically competent leaders and the world needs new solutions to address complex problems in our region, nation and around the world. Our students gain technical competence through systems-thinking and we solve problems in interdisciplinary teams. Our core values are reflected in all of our programs.

We believe students learn best when they are deeply engaged in their learning, so we focus on learning in context. *How* you learn is as important as *what* you learn. This approach contributes to deeper and more effective learning and ultimately it enables us to better foster creativity and innovation.

We believe the discoveries we make in our laboratories and studios should emerge as real products or practices. We are committed to identifying ways to bring our ideas to the marketplace and elevating our best thoughts that will ultimately create enterprise and impact society.

We know that for students and faculty to make an impact on our world, they need to engage industry at a level well beyond academic norms.

Over 3,300 students are engaged in a learning environment established and nurtured by a faculty guided by these values.

Innovation is not a subject; it is a way of being. We are centered on creativity and innovation. We focus on challenges in areas of human concern where technology is the best hope at advancement. Our students and faculty thrive in this setting as engaged discoverers, teachers, learners, and entrepreneurs.

We are a college of makers. Regardless of the degrees bestowed upon our graduates today, they have all majored in making. Graduates of CTI have a multidisciplinary foundation from which they are positioned to make the world a better place.

ABOUT THE HERBERGER INSTITUTE FOR DESIGN AND THE ARTS

The ASU Herberger Institute for Design and the Arts leads an exploration of the contemporary human condition through creative practice and research, bringing together a unique array of disciplines that allow for distinctive opportunities for collaboration. Continually striving to enable design and arts students to succeed beyond graduation, the Herberger Institute consists of the following five schools: Art; Arts, Media and Engineering; Design; Film, Dance and Theatre; and Music.

More than 5,500 students are supported by 400 faculty and faculty associates and 170 staff offering a total of 51 undergraduate and 71 graduate degree programs and concentrations. The ASU Art Museum and the Herberger Institute Research Center support research initiatives, while diverse community engagement projects enable students and faculty to interact with the public through meaningful partnerships.

We encourage all of our alumni to continue to share their stories with us and to take an active role in the Herberger Institute Alumni Chapter. For more information on our alumni activities, please visit us on the Web at herbergerinstitute.asu.edu/alumni.

Engineering at Arizona State University

The Ira. A Fulton Schools of Engineering, ranked in the top 50 U.S. engineering schools, are home to more than 235 faculty and more than 10,000 students. The Schools were awarded over \$79 million in externally funded research awards in fiscal year 2013. In 2012-2013, the Fulton Schools of Engineering granted 1,744 undergraduate and graduate degrees. Today, more than 34,000 Engineering alumni are advancing the fields of engineering and technology in Arizona and around the world.

To produce the engineers and innovations needed to address society's changing needs, we have crafted a visionary blueprint for an engineering school that transcends traditional organization around degrees and disciplines, and fosters a transdisciplinary approach to teaching and research. Through our five schools, we offer 14 undergraduate and 16 graduate degree programs that encourage innovative collaboration across disciplines, with faculty and students alike focusing their efforts on developing solutions that will have significant, lasting impact on our local and global communities. We offer online options for selected programs and professional development programs like Six Sigma.

The School of Biological and Health Systems Engineering provides a rich, interdisciplinary curriculum that prepares students to use engineering and scientific principles and methods to develop instrumentation, materials, diagnostic and therapeutic devices, artificial organs or other equipment and technologies needed in medicine and biology. The school's biomedical engineering degree program strives to produce graduates with a broad-based education in both engineering and the life and natural sciences, with a focus on improving the overall quality of global healthcare. Graduates from the biological design doctoral program are creative thinkers prepared to work at the intersection of biology, engineering and computing to advance human health and quality of life.

The School of Computing, Informatics, and Decision Systems Engineering is home to computer engineering, computer science, computer systems engineering,

engineering management, industrial engineering and informatics degree programs. From data to decisions, the school covers the spectrum for designing the modern, information-driven society, engaging in the fundamental activities of sensing, optimizing, controlling and communicating. Computing serves as the engine that drives this transformation, linking together the school's fundamental activities. The school is dedicated to creating new knowledge and technology that contributes to solving the major problems facing modern society.

The School of Electrical, Computer and Energy Engineering brings together university faculty, students and companies to develop collaborative relationships and solutions. The school's computer engineering and electrical engineering degree programs and research efforts are aligned with national and international efforts to address worldwide challenges in energy production and distribution, healthcare technology and delivery, sustainable development and economic growth, communications technology and information management and global security.

The School for Engineering of Matter, Transport and Energy leverages the synergy of engineering and science to develop new knowledge and technologies, and create innovative solutions to society's most pressing problems in energy, human health, public safety, exploration, environmental infrastructure and sustainability. Degree programs in aerospace engineering, chemical engineering, materials science and engineering, mechanical engineering, and solar energy engineering and commercialization are offered. The school gathers together a broad range of disciplines and world-class faculty members who are engaged in a cutting-edge research, all of which contributes to a unique educational experience for all of our students.

The School of Sustainable Engineering and the Built Environment provides a nexus for education and research that address the critical infrastructure needs of our society in an environmentally sound manner. The school offers a holistic approach in its degree programs, covering the engineering expertise of civil, environmental and sustainable engineering, the design and construction principles of construction engineering and the project management and leadership skills of construction management.

Ira A. Fulton

Chairman of the Board and CEO, Fulton Homes

Ira A. Fulton, founder and CEO of Arizona-based Fulton Homes, established an endowment of \$50 million in support of ASU's College of Engineering and Applied Sciences in 2003. The college was renamed the Ira A. Fulton Schools of Engineering in his honor. The gift has enabled the Ira A. Fulton Schools of Engineering to provide funding for scholarships, fellowships, research programs and investments in faculty, all integral to the school's goal to move from its position as a highly ranked U.S. program into the ranks of world-class institutions.

"With this endowment, we are building an engine of educational and economic growth that will endure for generations. It is a gift of opportunity, prosperity, social equality and hope." – Ira A. Fulton

ABOUT THE MARY LOU FULTON TEACHERS COLLEGE

Mary Lou Fulton Teachers College is setting a new standard for teaching, discovery and innovation as one of the top 20 graduate programs in education nationally, according to U.S. News & World Report. A key contributor within a research-intensive university, Teachers College offers rigorous undergraduate and graduate programs founded in scholarship and research, and led by nationally and internationally recognized professors who are leaders in their field.

**ADDRESSING THE CHALLENGES OF EDUCATION
IN A RAPIDLY CHANGING ENVIRONMENT**

With research at the heart of the Teachers College experience, students, faculty and staff actively address the challenges of education in a rapidly changing environment. College faculty and researchers demonstrate their commitment to advancing the science of teaching and learning by conducting evidence-based research, and tackling issues such as social justice, school reform, policy, language and literacy, and more.

Teachers College faculty members are accomplished scholars, researchers and leaders in their field—and most have taught in pre-K through 12th-grade classrooms. Among our esteemed faculty are a Nobel Laureate, American Educational Research Association Fellows, Fulbright American Scholars, Arizona Regent's Professors and members of the National Academy of Education. Even beyond academia, they are caring and community-minded citizens of the world who are committed to inspiring and enriching education for all children and youths.

EXCELLENT PROGRAMS PREPARE EXCEPTIONAL GRADUATES

Teachers College programs combine classroom- and community-based learning opportunities, and courses are designed to encourage diversity of thought—engaging students in the latest educational theories and research, as well as new technologies, that place them on the cutting edge of the education field. The college offers undergraduate and graduate degree programs and certificates on all four ASU campuses, at off-campus locations and online.

Students' exposure to evidence-based research and practical application means they graduate with an educational foundation rooted in experience and innovation. And that foundation pays off. Every year, more than half of Arizona's graduating teachers come from ASU. An ASU exit survey of 2012-2013 graduates found that 94 percent of Teachers College graduate students pursuing jobs—and 93 percent of Teachers College undergraduate students pursuing jobs—were employed or had at least one job offer 90 days after graduation.

Graduates of Teachers College enrich the lives of others as inspired and informed teachers, administrators and researchers working in classrooms and communities. As advocates of education, they share a commitment to enable all children to reach their potential. Many go on to win awards in their respective fields, and often contribute by giving back to the college through their time, talents and treasure.

MARY LOU FULTON TEACHERS COLLEGE NAMESAKE

Mary Lou Fulton Teachers College is named for Mary Lou Fulton, a distinguished alumna of the college who, with her husband Ira A. Fulton, generously established a transformational endowment to foster excellence in education. The Fultons are committed to supporting the well-being and education of children, and initiatives dedicated to improving public education. Their gifts have provided opportunities for quality teaching, research and service that extend far beyond the university, touching the lives of generations to come.

MESSAGE TO THE NEW COLLEGE GRADUATES

Congratulations on your extraordinary achievement! The faculty and staff of New College offer our sincere best wishes for your continued personal and professional success. We all look forward to seeing your work in the world; we know you will make your mark as an ASU New College graduate. Today, you join a prestigious body of New College and ASU alumni, who have shared in some of the same remarkable experiences. Please stay in touch with us by joining the ASU Alumni Association, so we can continue to celebrate your triumphs and share the journey of our new students with you. You can take advantage of special new graduate membership rates (\$25 annual or \$300 lifetime dues) and become an active member of the ASU Alumni Association at www.asu.edu/alumni.

ABOUT THE NEW COLLEGE

The New College of Interdisciplinary Arts and Sciences offers a nationally unique environment: a small college experience with the power of ASU's major research university resources. Working one-on-one with our cutting-edge faculty—often through our New College Undergraduate Inquiry and Research Experience program (NCUIRE), our students reshape the boundaries of knowledge in their fields of study. This prepares them for a future of reshaping the world outside of ASU.

New College was founded on a “new” way of thinking about the academy. Instead of reproducing the intellectual silos that separate fields of study in other institutions, our programs have been structured on the notion that if we break down the barriers

between fields, we can think in more innovative ways, do more path-breaking work, offer more effective solutions to real-world problems. From our Interdisciplinary Arts and Performance degree that teaches students many forms of artistic expression and then asks into what mode a concept should be born; to our Forensics degree that brings together fields like chemistry, psychology, and legal studies; to our Social Justice and Human Rights degree that explores sociological, historical, and contemporary cultural analyses of the issues, New College offers educational experiences that transcend more limited ways of thinking about the world.

The mission of New College is to prepare students to succeed in a globalized, diverse economy by providing them with solid disciplinary foundations that are coupled with an ability to think and act constructively across disciplines to discover answers to the complex problems that face society today and to create civic and economic well-being, within contexts ranging from the local to the global.

New College's programs build on the philosophy that inter-, multi-, and transdisciplinary education enhances our graduates' ability both to address the needs of business, industry, schools, and communities of this region and to meet the challenges of the twenty-first century. New College's Bachelor of Art and Bachelor of Science degrees include American Studies; Applied Computing; Applied Mathematics; Applied Science; Applied Science—Cell and Molecular Biology Research; Communication; English; Ethnicity, Race, & First Nations Studies; Forensics; History; Integrative Studies; Interdisciplinary Arts & Performance; Life Sciences; Life Sciences—Environmental Sciences Concentration; Life Sciences—Forensics Concentration; Political Science; Psychology, Psychology (Online); Religion & Applied Ethics Studies; Social & Behavioral Sciences; Sociology; Spanish; Statistics; and Women & Gender Studies. New College offers Master of Art degrees in Communication Studies, Interdisciplinary Studies and Social Justice & Human Rights and a Master of Science in Psychology.

SCHOOL OF LETTERS AND SCIENCES

The School of Letters and Sciences provides students across ASU with the knowledge and skills to comprehend and effectively engage the changing world of the 21st century at local, national and global levels.

We offer graduate and undergraduate degree programs that prepare students for a rapidly changing marketplace, as well as foundational instruction in humanities, social and natural sciences, mathematics, and professional fields. Our exploratory and major and career exploration programs empower students to find a major anywhere at ASU based on their interests, career goals and personality traits. Faculty support knowledge enterprise development by advancing research, clinical and creative activities that promote discovery, innovation and human understanding. The school is guided by the principles of student success, strategic partnerships within the university and the community, and interdisciplinary inquiry.

Theory, creativity and applied learning are integrated as students build entrepreneurial opportunities both inside the university and in their communities. In addition, the school serves the citizens of Arizona by offering a variety of outreach programs that engage people in cultural events and lifelong learning. The school is home to the Center for the Study of Race and Democracy, which serves as a leading interdisciplinary, problem-solving venture committed to engaged scholarship, and information dialogue involving the topics of race and democracy.

CLOSING REMARKS

RECESSIONAL

ABOUT THE SCHOOL OF SUSTAINABILITY

Established in 2007, the School of Sustainability educates a new generation of scholars and practitioners and creates innovative modes of scholarship by bringing together leaders and stakeholders across multiple disciplines, to develop effective solutions to the most pressing sustainability challenges.

The School offers both undergraduate and graduate programs leading to degrees in sustainability. Students can earn Bachelor of Arts, Bachelor of Science, Master of Arts, Master of Science, Master of Sustainable Solutions, Executive Master for Sustainability Leadership or Doctor of Philosophy degrees. Degree programs focus on collaborative learning, transdisciplinary approaches, and problem-oriented training to address sustainability challenges relating to areas such as energy and materials, water, ecosystems, urbanization, international development, social transformations, climate, and food systems.

The School of Sustainability works closely with the Julie Ann Wrigley Global Institute of Sustainability, which is the hub of Arizona State University's sustainability initiatives. The Institute advances research, education and business practices for an urbanizing world. Both the School and the Institute initiate and nurture work on issues of sustainability across the University and collaborate with other academic

institutions, governments, businesses and industries, and community groups locally, nationally, and globally.

WALTER CRONKITE SCHOOL OF JOURNALISM AND MASS COMMUNICATION

About the School

The Cronkite School is widely recognized as one of the nation's premier professional journalism programs. Rooted in the time-honored values that characterize its namesake — accuracy, responsibility, objectivity, integrity — the school fosters journalistic excellence and ethics among students as they master the practical professional skills they need to succeed in the digital journalism world of tomorrow.

Cronkite students consistently lead the nation in national contests. For each year of the past decade, the school has placed in the top 10 in the Hearst Journalism Awards, often called the Pulitzer Prizes of college journalism, and has the best overall record in the national Society of Professional Journalists' Mark of Excellence Awards. The school's student-produced television newscast, Cronkite NewsWatch, has been named the best student newscast in the country by both the Broadcast Education Association and the Association for Education in Journalism and Mass Communication.

The school's 1,600 students are guided by a faculty that is made up of both award-winning professional journalists and world-class media scholars. In recent years, the school has added to its faculty such leading journalists as former Washington Post Executive Editor Leonard Downie Jr., CNN anchor Aaron Brown, Minneapolis Star Tribune Editor Tim McGuire, BET Vice President Retha Hill, Sacramento Bee Executive Editor Rick Rodriguez and Pulitzer Prize-winning journalist Jacquie Petchel.

The school is distinguished by its professional programs in which students get intensive, hands-on experience in news and sports reporting, public relations and digital entrepreneurship. Students in Cronkite News Service produce public service journalism for media outlets and consumers around the state and country with news bureaus in Phoenix and Washington, D.C. Carnegie-Knight News21 student reporters conduct national investigations of issues critical to Americans, and the business journalism specialization prepares students to report in depth on business, finance and economics. Cronkite NewsWatch is a nightly newscast that reaches 1.4 million households on Arizona PBS. In the the New Media Innovation Lab, students create new digital products to forge the future of journalism. Students in the Public Insight Network bureau help professional news organizations unearth stories, locate sources and provide important context to stories. Cronkite Sports offers unparalleled experiences for students to cover professional and intercollegiate sports from bureaus in Phoenix and Southern California.

Cronkite Global Initiatives brings international journalists to ASU as part of the Hubert H. Humphrey Fellowship Program. Other programs, such as the Donald W. Reynolds National Center for Business Journalism, provide education and training to professional journalists.

All of these initiatives take place in a state-of-the-art building that is unparalleled in journalism education. ASU's investment in the school has generated national and international attention from educators and media professionals who place the school in the top tier of all U.S. journalism schools. The Times of London and The New York Times highlighted Cronkite in articles about changes taking place at journalism schools across the country. The prestigious publications called the Cronkite School a pioneer, kindling a notion of new media that will shape how news is delivered and how people will stay informed in the future.

About Walter Cronkite

ASU's journalism program was named in honor of former CBS News anchor Walter Cronkite in 1984.

The relationship started when Tom Chauncey, longtime owner of the CBS affiliate in Phoenix and a leading supporter of journalism education at ASU, contacted his old friend in an effort to advance the program. An endowment on behalf of the program was soon established and the school was named after "the most trusted man in America."

Over the next quarter of a century, Cronkite lent much more than his name to the school. He was closely involved — advising leadership, guiding students and faculty and traveling to Arizona each year to personally give the Walter Cronkite Award for Excellence in Journalism to one of the nation's top journalists. The most special relationship, though, was with "our students," as Cronkite would always call them. Young women and men, some with parents barely old enough to remember Cronkite behind the anchor desk, lit up when he walked into a classroom. They hung on his every word as he thoughtfully answered their questions about the profession he so loved. They lined up just to shake his hand, and he loved every minute of it. He would talk to many students individually, asking them about their classes, goals and dreams.

In what turned out to be Cronkite's last visit to ASU in 2007 before declining health prevented him from traveling, a group of 100 students gathered with just a few minutes of notice that Cronkite was in the building. He held them spellbound as he spoke about covering World War II, Vietnam, Apollo, Watergate and presidents from Truman to Reagan — and of how important "our school" was to him.

Although Cronkite died on July 17, 2009, before he was able to visit the new building, he remains an ever-present part of the school's heartbeat and direction. His legacy lives on in the spirit and passion with which the school teaches both the skills to do journalism in today's media environment and the time-honored ethics and news values necessary to do it in the manner that would make him proud. The Cronkite School has established a special memorial fund in Cronkite's name. For more information on the fund and to learn more about Cronkite's legacy and career, visit cronkite.asu.edu/rememberingcronkite.

About Our Graduates

The Cronkite School has more than 8,000 alumni throughout the Valley, across the country and around the world. Many are leaders in television, digital media, newspapers, radio, magazines and public relations.

In 1993, the Cronkite School inducted its first class into the Cronkite Alumni Hall of Fame. The charter inductees were Al Michaels ('66), an Emmy-winning sports broadcaster best known for anchoring "Monday Night Football," and Bill Redeker ('71), an ABC News correspondent who covered the Middle East and the Far East during his 30 years with the network.

Other notable Cronkite Alumni Hall of Fame inductees include Becky Anderson ('94), CNN International anchor; Julie Cart ('98), Pulitzer Prize-winning Los Angeles Times reporter; Derrick Hall ('91), president of the Arizona Diamondbacks; Christine Devine ('87), news anchor on FOX 11 in Los Angeles; Mary Kim Titla ('85), founder of Native Youth Magazine; Ray Artigue ('76), president of The Artigue Agency; and Chip Dean ('77), director of ESPN's "Monday Night Football."

Graduates of the school who are interested in joining the Cronkite School alumni chapter are encouraged to contact 602.496.5555 or visit asu.edu/alumni. Stay connected to fellow alumni by registering at cronkitenation.com.

ABOUT THE W. P. CAREY SCHOOL OF BUSINESS

The W. P. Carey School of Business at Arizona State University is one of the highest-ranked and largest business schools in the United States. The school is internationally recognized for its leadership in business education and for positively impacting the practice, science and art of management on a national and international scale. The school works to rethink the nature of business, engage the world, and create a better future.

More than 10,000 students attend the W. P. Carey School of Business, including about 50 National Merit Scholars and more than 100 doctoral candidates. The student body is especially diverse, including representatives from more than 90 countries.

The acclaimed faculty includes a Nobel Prize winner, members of the National Academy of Sciences, two Guggenheim Fellows, and a fellow of the American Academy of Arts and Sciences. Many faculty members are also on the editorial boards of academic journals and publications. The school boasts 10 well-known research centers and a research institute, and is ranked Top 25 in the nation among business schools for research productivity.

Both the school's graduate and undergraduate business programs are ranked Top 30 in the nation by *U.S. News & World Report*. The executive MBA program is ranked No. 13 in the world by *The Wall Street Journal*. The W. P. Carey School of Business is also known for providing excellent "return on investment" at both the graduate and undergraduate levels.

Undergraduate Bachelor of Science degrees are offered in nine areas, including accountancy, business data analytics, business entrepreneurship, computer information systems, economics, finance, management, marketing and supply chain management.

Undergraduate students also have the option of earning a Bachelor of Arts degree in business with a concentration in communication, food industry management, global agribusiness, global leadership, global logistics management, global politics, human resources, legal studies, public service and public policy, sports and media studies, statistics, sustainability, technology, tourism or urban policy.

The school's renowned MBA program is offered in five platforms: full time, evening, executive, weekend and online. Students can also earn master's degrees in accountancy, business analytics, finance, global logistics, information management, management, real estate development or taxation. The school ranks high for the quantity and quality of its doctoral graduates. Many managers and executives also come to the school for its highly desirable executive- education certificates, placing a heavy emphasis on professional development.

The school's extensive alumni network is 80,000 strong. Distinguished alumni represent highly regarded companies from diverse industries, including manufacturing, technology, retail, banking, accounting, entertainment and food, as well as smaller entrepreneurial firms and respected nonprofit organizations.

The school provides students with personalized assistance in their job searches through dedicated graduate and undergraduate career centers.

CONVOCATION FLOWERS

Today's congratulatory flowers are provided by Commencement Flowers.
Flowers will be available for purchase before and after the Convocation.

PHOTOGRAPHS

A professional photographer will take photographs of all graduates
as they receive personal congratulations from Dean Whitecotton.

CONVOCATION SPEAKER**BEN GARDIER**

*Vice President of Finance
PEM Real Estate Group*

Ben Gardier was born and raised in the Glenville community of Cleveland, OH. He has been married to his wife, Rhiannon, for 10 years, and they have two children. Ben moved to Phoenix in 2007 and currently resides in the West Valley.

Ben works as Vice President of Finance at PEM Real Estate Group (“PEM”), a real estate private equity firm with more than \$500 million in assets under management. Ben is responsible for managing the firm’s acquisitions and dispositions, which includes asset capitalization, due diligence, takeover, and exit planning and strategy. Ben is also responsible for establishing and maintaining relationships with the firm’s joint-venture partners.

Before working for PEM, Ben was the CFO of National Laser Institute (“NLI”), a middle-market trade school. NLI pioneered medical aesthetics training and is the largest provider of medical aesthetics training in the world, graduating more than 1,600 students per year. Prior to joining NLI, Ben was Partner at a boutique M&A advisory and management consulting firm, Bond & Greenleaf, where he provided buy-side advisory services to private equity funds in their acquisitions of oil and gas, chemicals, textiles, and timberlands assets.

Ben volunteers twice per month at Palm Valley Church in Goodyear, AZ, where his work helps support the church’s local community outreach initiatives and its national and international programs for people and children in need.

Ben has a BS in Accounting and has Lean Green Belt and Six Sigma Green Belt Certification. He is graduating today with a Master of Taxation degree from ASU’s WP Carey Graduate School of Accountancy.

THE ARIZONA STATE UNIVERSITY MACE AND PRESIDENT'S CHAIN OF OFFICE

In Medieval times, a mace was a hand-to-hand combat weapon. In about the year 1400 A.D., a mace evolved from a weapon to a ceremonial instrument used by academicians in rituals such as commencement and inaugurations. The oldest known ceremonial mace was that of the Faculty of Common Law of St. Andrew University in Scotland, used in 1438.

The Mace and Chain of Office are presented only at ceremonies in which faculty members are in full academic regalia, such as the Inauguration of the ASU President, University Commencement, Faculty Assemblies, Regents' and President's Professor Induction Ceremonies and Convocation.

The Mace is carried at the head of the procession and laid in a cradle, thus signifying the formal onset of the ceremony.

ASU's ceremonial mace and chain of office was created in observance of ASU's Centennial in 1985. Handcrafted by ASU Professor of Art, David Pimentel (1943-2004), the mace and chain was created with "austere elegance and traditional southwestern motifs." In keeping with these directions, Professor Pimentel constructed both items out of materials native to Arizona. The ASU Mace is a wood staff, approximately three and a half feet long, weighing eight pounds and made of hollowed and polished Mesquite.

The head of the ASU Mace has four sterling silver blades and is banded with copper, Morenci turquoise, and a silver ring on which the words Arizona State University are embossed. The turquoise inlay was cut and polished by Navajo jeweler Richard Charlie of Mesa. The ASU seal is embossed in silver on the heel of the mace.

The President's Chain of Office includes a silver rope woven from strands of hand-turned links, which holds a medallion six inches in diameter that reverses to reveal the ASU seal in gold on one side and the same in silver and turquoise on the other.

College Marshal Spring 2014 Undergraduate Commencement

College Marshals consist of selected faculty members from each college at all ASU campuses. Selection criteria is left to the individual colleges, but faculty who have recently won awards or have received special recognition are given primary consideration.

Barrett, the Honors College — Dr. Katherine O’Flaherty is an immigration historian who holds a PhD in History and C.A.S. degree in Higher Education Leadership from the University of Maine. Her research focuses on immigrant and refugee history from World War II to the present. O’Flaherty is currently finishing a project about mid-20th century Chinese immigrants in New England and will turn next to a project about extradition and deportation of Irish nationals in the 1980s and 1990s. She was selected as a Digital Humanities Award Winner in 2013. Dr. O’Flaherty taught at the Honors College and History department at the University of Maine before coming to Barrett.

College of Health Solutions — Dr. Barbara Ainsworth, PhD, MPH, FACSM, has been with ASU since 2006. She is the Associate Director of the School of Nutrition and Health Promotion at the College of Health Solutions and a Regents’ Professor. Currently serving as President of the National Academy of Kinesiology, Dr. Ainsworth also recently completed her term as President of the American College of Sports Medicine (ACSM), the premier organization representing professionals in the field of exercise science. Dr. Ainsworth is committed to the improvement of health and the prevention/risk reduction of chronic disease through the optimization of physical activity patterns

College of Liberal Arts and Sciences — Dr. Miguel Angel Astor-Aguilera, an Associate Professor of Religious Studies in the School of Historical, Philosophical & Religious Studies, is the 2013 recipient of the College of Liberal Arts & Sciences Zebulon Pearce Distinguished Teaching Award. His research combines Religious Studies, Anthropology, Latin American Studies, and Art History focused on Mesoamerica. He teaches courses that intersect with issues of race, ethnicity and indigenous populations in the Americas, and his students, it is noted, “*feel as though they are participating in a global conversation as a result of his prominence in the field and his effective teaching methods in the classroom.*”

College of Nursing and Health Innovation — Dr. Debra Hagler is a Clinical Professor in the College of Nursing and Health Innovation. As Coordinator for Teaching Excellence in Educational Support Services, she provides consultation to faculty in the College of Health Solutions and the College of Nursing and Health Innovation. She is board certified in adult and geriatric advanced nursing practice, healthcare simulation, and nursing education. Dr. Hagler has been honored for her scholarship and national service in the areas of professional credentialing and faculty development by election as a Fellow to both the American Academy of Nursing and the Academy of Nursing Education.

College of Public Programs — Carlton Yoshioka is a professor in the School of Community Resources and Development within the College of Public Programs at Arizona State University's Downtown Phoenix Campus. He has been in this School and the College in various positions (including chair and graduate coordinator) for over 25 years with prior experience at Iowa State University and the University of Oregon. Currently, he is the graduate director for the nonprofit leadership and management graduate certificate programs and the master of nonprofit studies degree program. He is also director of research and academic affairs with the ASU Lodestar Center for Philanthropy and Nonprofit Innovation since it was started over 15 years ago. His research interests currently include charitable giving and volunteering behavior of various populations such as seniors, and ethnic and racial groups. Yoshioka also does research on nonprofit organizational management and leadership, volunteer management, and nonprofit organizational mission and retention strategies.

College of Technology and Innovation — Dr. Bateman has degrees in ecology and biology from Idaho State University, Eastern Washington University, and Ph.D. from University of New Mexico. Dr. Bateman has a research focus that encompasses both her passion for conserving natural resources and enthusiasm for exploring the outdoors. As an ecologist and wildlife biologist, Dr. Bateman investigates how human land-use affects reptile and bird communities, particularly along desert wildland and urban streams. Her newest avenue of innovative research includes developing mobile tools for field data collection. Since 2008, Dr. Bateman has mentored 17 graduate and undergraduate students in research at ASU and has been awarded a CTI faculty mentor award.

Herberger Institute for Design and the Arts — Pavan Turaga is an Assistant Professor in Arts, Media and Engineering, and Electrical, Computer and Energy Engineering. He received the B.Tech. degree in Electronics and communication engineering from the Indian Institute of Technology Guwahati, India, in 2004, and the M.S. and Ph.D. degrees in electrical engineering from the University of Maryland, College Park in 2007 and 2009 respectively. His research interests are in computer vision and pattern analysis with interdisciplinary applications health, well-being, and security. He was awarded the Distinguished Dissertation Fellowship by UMD in 2009, and was selected to participate in the Emerging Leaders in Multimedia Workshop by IBM, New York, in 2008.

Ira A. Fulton School of Engineering — Aditi Chattopadhyay is a Regents' Professor, the Ira A. Fulton Chair Professor of Mechanical and Aerospace Engineering and the Director of the Adaptive, Intelligent Materials and Systems Center at ASU. She obtained her M.S. and Ph.D. degrees at Georgia Institute of Technology. Her research focuses on smart materials and adaptive structures, structural health monitoring and damage prognosis, multiscale modeling, composites and multidisciplinary design optimization. She has published over 160 archival journal papers and has 350 other publications. She is the recipient of several academic, research and best paper awards. Dr. Chattopadhyay is a Fellow of AIAA and a Fellow of ASME.

Mary Lou Fulton Teachers College — Dr. Samuel DiGangi is Associate Professor of Special Education, Division of Education Leadership and Innovation, Mary Lou Fulton Teachers College. He is a Board Certified Behavior Analyst and serves as program coordinator of the Master of Education in Curriculum and Instruction, Applied Behavior Analysis concentration. Sam’s approach integrates applied behavior analysis, functional behavior assessment, positive behavior interventions and supports, visual analysis of data, and principles of universal design for learning. Dr. DiGangi strives to foster innovation in design and implementation of instructional environments and approaches to enhance classroom-based and distance education at a local, national, and global level.

New College of Interdisciplinary Arts and Sciences — New College Associate Professor Bertha Alvarez Manninen is the 2014 recipient of the ASU Alumni Association Founders’ Day Award for Faculty Achievement in Teaching. Dr. Manninen’s area of expertise is in the field of philosophy, with a specialty in applied ethics and biomedical ethics. Her current projects include explorations of the intersection of bioethics and metaphysics in defining death and the importance of closing the divide between supporters of abortion rights and anti-abortion advocates in the American cultural political landscape. She co-authored an essay on the use of embryonic tissue in stem-cell research in the recently published anthology *Contemporary Debates in Bioethics*.

As a teacher, Dr. Manninen is known for modeling what she teaches her students: a passionate, but deeply rational, commitment to a full discussion of important ethical issues. Her goal is not to push one particular philosophy over another, one particular opinion over another, but rather to give students the tools they need to come to their own conclusions. She consistently receives strong course evaluations, with students praising her feedback, outstanding course materials, organization, and lectures.

School of Letters and Sciences — Bianca L. Bernstein is Professor of Counseling and Counseling Psychology in the School of Letters and Science. Dr. Bernstein is Principal Investigator of the *CareerWISE* research program, supported by the National Science Foundation. Her 200+ publications and presentations and over \$3.4 M in external support have focused on the application of psychological science to the career advancement of women and underrepresented minorities and the development of effective learning environments for graduate education. She has served as the Dean of ASU’s Graduate College, Director of NSF’s Division of Graduate Education, and leader of ASU’s extensive Preparing Future Faculty Program.

School of Sustainability — Dr. Carr Kelman studies policy dimensions of sustainability issues, such as how to manage the tradeoffs and foster synergies between biodiversity conservation and human development. She has studied Integrated Conservation and Development Projects in Indonesian national parks, the global trade in electronic waste, and the regulation of electric utilities in the US. Her current research involves analyzing how the solar energy industry is handling the electronic waste issue. Two major themes in Dr. Carr Kelman’s research are the complex relationship between environment and development, and the role

of governance, policy and institutions in creating more resilient socio-ecological systems.

Walter Cronkite School of Journalism and Mass Communication — An ASU and Cronkite School alumnus, Jim Jacoby joined the Cronkite School faculty after 20 years in television news. An Emmy award-winning videographer, editor and director, Jacoby teaches television production and serves as the school's production manager. Jacoby has been a member of the Board of Governors for the Rocky Mountain Southwest Chapter of the National Academy of Television Arts and Sciences. In addition to his Cronkite School duties, he works as a freelance editor and does graphics for the Arizona Cardinals, Sun Devil Football, and several local production companies.

W. P. Carey School of Business — Nancy Roberts earned her B.A. in Mathematics from the University of Texas and her M.S. and Ph.D. in Economics at ASU. Dr. Roberts has won several teaching awards and was selected for the prestigious Last Lecture Award. She is a Fulbright Scholar who has taught at various universities in Eastern Europe. Dr. Roberts has been project director on numerous U.S. State Department grants to strengthen and develop curriculum in the field of economics at universities in Macedonia and Kosovo. She is the director of the Graduate Student Teacher Mentoring Program in the Department of Economics and the faculty sponsor of the Students for Liberty organization on campus.

Emeritus College — Don L. F. Nilsen is Professor Emeritus of the English faculty, College of Liberal Arts and Sciences. He and his wife, Alleen, also a Professor Emeritus, Co-founded the International Society for Humor Studies. His areas of specialization within English Linguistics are Semantics, Pragmatics, and Discourse Theory. Professor Nilsen is especially interested in sophisticated discourse; therefore, he studies the nature of Double Entendre, Symbolism, Metaphor, irony, Parody, Paradox, Wit, Symbolism, Humor, Comedy, and tragic-comedy.

Professor Nilsen was recognized for his scholarly work, (along with Alleen) as co-recipients of the Doug Fletcher Lifetime Achievement Award by the Association for Applied and Therapeutic Humor at its annual meeting, April 3-6, in Vincennes, Indiana. The award was made in the Red Skelton Museum and Library there.

Don earned the Doctor of Philosophy Degree at the University of Michigan. He currently services on ASU's Emeritus College Council and is its Assistant Dean for Humanities. He and Alleen are Fellows of the ASU Barrett Honors College.

HISTORY OF THE ACADEMIC COSTUME

The present-day academic costume seemingly originated at Oxford and Cambridge Universities in the 1300s. As the universities passed from ecclesiastical control, brighter colors distinguished the academic robe from the drab clerical gown. Colonial American universities based their academic regalia on the British system.

In the 1880s, a student movement centering in New England investigated the establishment of a "senior badge," to improve commencement week exercises and revive the traditions of university life. In 1893, an intercollegiate commission established a uniform code for caps, gowns and hoods for the various degrees.

Of the costume's three components, the hood is the most interesting. Originally it had three uses: as a head covering, as a shoulder cape, and as a bag in which alms could be collected. It is mentioned as early as 1480 in clerical literature. When large wigs were in vogue in Britain, the cape part of the hood was split in front and a narrow neckband inserted. The entire cape and hood was allowed to fall back as it is today, and it was never restored to the original style.

Following is a list of the hood and tassel colors established by the Intercollegiate Code to represent departments of learning:

Architecture	Blue-Violet
Agriculture	Maize
Arts, Letters, Humanities	White
Business Administration, Commerce, Accountancy	Sapphire Blue
Dentistry	Lilac
Economics	Copper
Education	Light Blue
Engineering	Orange
Fine Arts	Brown
Forestry	Russet
Home Economics	Maroon
Journalism	Crimson
Law	Purple
Library Science	Lemon
Medicine	Green
Music	Pink
Nursing	Apricot
Oratory (Speech)	Silver Gray
Pharmacy	Olive Green
Philosophy	Dark Blue
Physical Education	Sage Green
Public Administration, including Foreign Service	Peacock Blue
Public Health	Salmon Pink
Science	Gold-Yellow
Social Science	Citron
Theology or Divinity	Scarlet
Veterinary Science	Gray

Black tassels are correct for all degrees,
and colored tassels are worn only by preference.

Gold metallic tassels may be worn by doctors or presidents of universities and colleges.
