PROGRAM

Spring 2015

THE NATIONAL ANTHEM
THE STAR SPANGLED BANNER

O say can you see, by the dawn's early light,
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars through the perilous fight
O'er the ramparts we watched, were so gallantly streaming?
And the rockets' red glare, the bombs bursting in air
Gave proof through the night that our flag was still there.
O say does that Star-Spangled Banner yet wave
O'er the land of the free and the home of the brave?

ALMA MATER
ARIZONA STATE UNIVERSITY

Where the bold saguaros
Raise their arms on high,
Praying strength for brave tomorrows
From the western sky;
Where eternal mountains
Kneel at sunset's gate,
Here we hail thee, Alma Mater,
Arizona State.
—Hopkins-Dresskell

MAROON AND GOLD

Fight, Devils down the field
Fight with your might and don't ever yield
Long may our colors outshine all others
Echo from the buttes, Give em' hell Devils!
Cheer, cheer for A-S-U!
Fight for the old Maroon
For it's Hail! Hail! The gang's all here
And it's onward to victory!

Students whose names appear in this program are candidates for the degrees listed,
which will be conferred subject to completion of requirements.

University commencement and convocation ceremonies are special events for all
involved. Please show respect for everyone who has come to share in the experience.
Individuals who engage in inappropriate or disruptive behavior
may be removed from the event.

As a courtesy to those around you and to our graduating students,
please turn off all electronics devices and phones during the ceremony.

MISSION STATEMENT

UNIVERSITY COMMENCEMENT

University Commencement represents the culmination of a student's academic achievement.

It is a time of celebration and reflection for students, families, friends, faculty and staff.

It brings together a diverse community to share in the joy of accomplished goals.

Arizona State University continually demonstrates its dedication to efficiency, technology and sustainability. The full University Commencement program is available to graduates on a reusable external flash drive in May of 2015. This change aligns with our growing institutional efforts to enhance sustainability practices, and our broader endeavors to employ technology in heightened service to our students.

The reusable external flash drive, combined with the abridged program distributed at spring ceremonies, resulted in a 16.2 million page reduction in the amount of printed materials distributed at ceremonies over the week of graduation activities.

**MESSAGE FROM THE
ARIZONA BOARD OF REGENTS**

Dear Graduates,

On behalf of the Arizona Board of Regents, we congratulate you on a remarkable achievement: your college graduation. Your graduation means you have fulfilled a great vision through tenacity and dedication. Those twin assets will serve you well as you embark on your next journey.

With today's honor, you are laying a foundation for a better life. Many others will benefit from this—your family, future employers and those you meet as you pursue your goals. Your graduation is also a victory for our state. Arizona reaps boundless benefits from a highly-educated workforce – from meeting high-demand job needs to fueling innovation. You have opened the door to a brighter future for our great state.

The board is proud that you chose to pursue your degree at Arizona State University. We hope that your journey was rewarding and that you have the tools and knowledge you need to achieve your future goals. You carry with you an awesome gift to offer society and we hope that you will commit to the pursuit of knowledge and truth beyond today. Please keep your love for your Alma Mater alive as you pursue your career. We have a lifelong bond and you are forever woven into the Arizona State University legacy. We will always take great pride in your achievements—today's and beyond.

Finally, to the families and friends who are participating in this celebration: Congratulations to you as well! We share in your pride and we thank you for the support you provided during your graduate's educational journey.

Sincerely,

Eileen I. Klein

HISTORY OF HONORARY DEGREES

Harvard was the first university to confer honorary degrees in 1692. Since then it has become a recognized function of degree granting institutions. Honorary degrees are an opportunity for universities to single out people who have made contributions to society. At ASU, honorary degree recipients are nominated by faculty members. The six-member Academic Affairs Honorary Degrees Committee reviews faculty nominations for the Honorary Degree. It then recommends candidates to the president. The committee is appointed by and responsible to the president.

HONORARY DEGREE CITATIONS

CAROLYN PORCO

Planetary scientist, humanist and science spokesperson Carolyn Porco is respected widely for her dual commitment to excellence in exploration and imaging of the solar system and to sharing with the public the poetry, beauty and adventure inherent in her work. As a young member of the Voyager project's imaging team, she was among the first scientists to work on images of the rings of Saturn, Uranus and Neptune, making a host of acclaimed discoveries that opened the door for a lifetime of scientific work that she understands to be also an exploration, Homeric in scope, of humanity's place in the cosmos.

Porco is now 25 years into leading the imaging science team on NASA's international Cassini mission to the Saturn system. To accomplish this mission, the two-part Cassini-Huygens probe/lander spacecraft was launched in 1997 and reached Saturn on July 1, 2004, after an interplanetary voyage that included flybys of Earth, Venus and Jupiter. On December 25, 2004, the Huygens lander separated from the orbiting Cassini and traveled to Saturn's moon, Titan, where it landed successfully on January 14, 2005. This was the first landing ever accomplished in the outer Solar System. In addition to her role on the Cassini mission, Porco is director of the Cassini Imaging Central Laboratory for OperationS (CYCLOPS) and CEO of Diamond Sky Productions, a small company committed to the artful presentation of science to the public.

Among the many discoveries from Porco's imaging experiments at Saturn are: the first sightings of Titan's lakes of liquid methane; the discovery of geysers on the south polar region of the small moon Enceladus and the first implication of this finding for subsurface liquid water; the equatorial ridge of the yin-yang moon Iapetus; the cosmic coral nature of Saturn's moon, Hyperion; the azure blue of Saturn's winter hemisphere and detailed views and evolution of the biggest and longest lasting storm on the planet; a subtle but extensive corrugation rippling across the inner rings resulting from a 1980s-era impact onto the rings; and new moon and rings too small or faint to be seen from the Earth. In addition, she personally was responsible for the discovery of one of the Neptune ring arcs; elucidating the behavior of the non-axisymmetric rings and ring edges in the rings of Saturn, Uranus and Neptune; and for predicting in 1993 with Mark Marley that acoustic oscillations within the body of Saturn could produce specific wave features in Saturn's rings. This prediction was verified 20 years later using Cassini observation and demonstrated that planetary rings could serve as a seismograph, giving a window into the interior structure of the planet. Currently, Porco's research focuses increasingly on the study of Enceladus and its more than 100 tall geysers of icy particles that suggest a sub-surface, salty, organics-rich sea beneath the south polar terrain. This Saturnian moon may be home to the most accessible extraterrestrial habitable zone in the solar system. Porco is now a member of a team of scientists proposing to NASA to return to Enceladus to determine whether life has begun on this small icy moon.

A strong advocate for taking images and movies that touch the heart and soul of the public and offering a more understandable connection to taxpayers, Porco has worked with extra diligence to create some of Cassini's finest products and enduring moments. Among these is the mosaic image entitled "The Day the Earth Smiled," a day when, at Porco's command and planning, Cassini turned to image the Earth alongside Saturn's rings as the people of the world smiled back in celebration of the uniqueness of Earth and of life on a pale blue dot. Her acceptance into the International Association of Astronomical Artists space art guild recognized her talent for composition and use of scientific findings to capture images at just the right moment for unusual perspective and color. Porco is committed to and active in public speaking on behalf of science, planetary exploration and the Cassini mission.

Porco's long list of awards and recognition reflect her contributions as a scientist, humanist and artist. They include inclusion in Time magazine's 2012 Top 25 Most Influential People in Space; Carl Sagan Medal of Excellence in the Communication of Science to the Public (2010), New Statesman magazine 2009 Top 50 People Who Matter Today; Lennart Nilsson Award for excellence in scientific photography (2009); Isaac Asimov Science Award, American Humanist Association (2008); the London Sunday Times listing of 18 scientific leaders, The Brains Behind the 21st Century (1999); and the naming of an asteroid in her honor, asteroid 7231 Porco.

Arizona State University is honored to confer upon Dr. Carolyn Porco the degree of Doctor of Science, *honoris causa*, in recognition of her pioneering work in planetary science, artistic success and the inclusion of a broad public in the adventure of science.

JOHN SEELEY BROWN

Described frequently as part scientist, part artist and part strategist, John Seely Brown is an author and researcher who specializes in organizational studies, especially those that investigate organizational implications of computer-supported activities. A master integrator and instigator of productive friction, Brown explores the whitespace between disciplines and builds bridges between disparate organizations and ideas. He is currently a visiting scholar and advisor to the provost at the University of Southern California where he facilitates collaboration between the Schools for Communication and Media and the Institute for Creative Technologies. Brown serves also as the independent co-chair for Deloitte's Center for the Edge. In this position, he focuses on the boundary, or edge, of the global business environment where strategic opportunity is the highest. He pursues research on institutional innovation and a reimagined work environment that is built on digital culture, ubiquitous computing and the need for constant learning and adaptability. His personal research interests include digital youth culture, digital media, and the application of technology to fundamentally rethink the nature of work and institutional architectures in order to enable deep learning across organizational boundaries – in brief, to design for emergence in a constantly changing world. Brown is considered one of the leading contemporary thinkers about ways in which technology impacts modern life, and he is appreciated for his

engaging conversational style and exhausting intellectual range.

Previously chief scientist of Xerox Corporation (1992 to 2002) and director of the Xerox Palo Alto Research Center (1985 to 2000), he guided transformation of the center into multidisciplinary research at the creative edge of applied technology and design, integrating social sciences and arts into the traditional physics and computer science research. Further, he led the expansion of corporate research to include topics such as management of radical innovation, organizational learning, complex adaptive systems and nano-technologies. In 1986, Brown co-founded with James G. Greeno, a professor of education at Stanford University, and with support from the Xerox Foundation, the Institute for Research on Learning, a nonprofit research organization that investigated learning in widely varied settings using collaborative multidisciplinary teams. The institute has been influential in education and knowledge management and in the United States and internationally through development of the concept of a community of practice. Brown is known more generally for his work on ubiquitous computing, service oriented architectures, global innovation networks, social technologies and learning ecologies.

Brown was fascinated by computers even as a teenager in the 1950's. He became proficient on an IBM 650 (one of the first units built for commercial use) while still in high school and participated in a summer business training program at Colgate University before entering Brown University, where he completed undergraduate work in mathematics and physics in 1962. He spent the remainder of the decade at the University of Michigan where he graduated in 1970 with a Ph.D. in computer and communication sciences. He joined the professorate at the University of California-Irvine in 1969 and served as senior scientist with Bolt Baranek and Newman before joining the Xerox Corporation. In 2003, he was the Batten fellow at the University of Virginia Darden Graduate School of Business Administration.

Brown is a member of the National Academy of Education, a fellow in both the American Academy of Arts and Sciences and the American Association for Artificial Intelligence, and a trustee of Brown University and the MacArthur Foundation. He serves on numerous public boards (including Amazon, Corning and Varian Medical Systems), private boards of directors and international advisory boards. Brown is senior fellow on the Design Futures Council and has published more than 100 papers in scientific journals and delivered numerous invited lectures. With Paul Duguid, he co-authored the acclaimed book *The Social Life of Information* that has been translated into nine languages and is now in its second edition. His other books include *The Only Sustainable Edge* (with John Hagel), *The Power of Pull* (with John Hagel) and the *New Culture of Learning* (with Doug Thomas). Brown is a frequent contributor to *BusinessWeek*.

In 1998, Brown was awarded the Industrial Research Institute Medal for outstanding accomplishments in technological innovation and he was inducted in the Industry Hall of Fame in 2004. He holds honorary degrees from Brown University, the London Business School, Claremont Graduate University, the University of

Michigan and North Carolina State University, the Illinois Institute of Technology and Singapore Management University.

Arizona State University is honored to confer upon Dr. John Seely Brown the degree of Doctor of Humane Letters *honoris causa*, in recognition of his broad view of the human contexts in which technologies operate and his leadership in design for emergence in a constantly changing world.

CLOSING REMARKS

Dean Douglas J. Sylvester

***RECESSION OF FACULTY AND CANDIDATES**

*Audience should stand for these portions of the program.

At its founding, the College of Law at Arizona State University committed itself to innovation. While retaining important aspects of traditional legal education, Dean Willard H. Pedrick and the six well-respected faculty members whom Pedrick recruited to the desert from around the country, embraced a vision of the future of legal education, befitting a young school in a growing city.

Nearly from its inception, the College has provided extensive training in practical legal skills, offering students a firm foundation in lawyering before they become practicing attorneys. Today, the College of Law has one of the strongest legal writing programs in the country, offers a myriad of field placement opportunities, and has a variety of clinics that provide indigent members of the community with valuable legal assistance while offering hands-on experience in both litigation and transactional settings. Each year, approximately 90 percent of students participate in clinics, externships, or pro bono activities.

In the four decades since its founding, the College of Law, now renamed the Sandra Day O'Connor College of Law, has grown in size and national prominence, assembling an acclaimed faculty in the traditionally core areas of legal study while continuing to offer innovative approaches to legal education. The Center for Law, Science & Innovation is the nation's first and largest academic center focused on the intersection of law and science, and through it the College offers the country's only LL.M. in Biotechnology and Genomics, as well as innovative new programs in the Governance of Emerging Technologies; Personalized Medicine, Law & Policy; Public Health Law and Policy; Law and Sustainability; and Information and Communications Technology. The Indian Legal Program is arguably the leading program on Indian law in the country. It offers a strong curriculum, including the LL.M. in Tribal Policy, Law, and Government, the Certificate in Indian Law, and the Indian Legal Clinic, and trains students to be leaders in Indian Country. The College of Law's Center for Law and Global Affairs supports and inspires research, education, and practice regarding emerging forms of transnational governance that extend beyond the traditional paradigms of international law. The College of Law continues to reach further to provide opportunities for its students and graduates with innovative endeavors such as the creation of a nonprofit law firm, an employer outreach initiative, new international licensure programs, and a faculty and staff committed to student success.

The College of Law bridges the gap between theory and practice, and our faculty and students address the pressing public policy challenges of our time. In short, the Sandra Day O'Connor College of Law remains an innovator, building new models for 21st century public legal education in a dynamic, increasingly diverse, local, national, and global environment.

The Barrett Story

Barrett, The Honors College at Arizona State University, is a selective, residential college for academically outstanding undergraduates. Named “Best Honors College” in the nation, the college often has more National Merit Scholars than Princeton, Yale or Stanford.

The college is supported by a \$10 million endowment that is used exclusively to benefit honors students and fund their projects. Barrett students major in any field offered at ASU’s campuses - Tempe, Polytechnic, Downtown or West.

Barrett students are members of a small community of scholars who have direct access to our deans and receive personalized attention from approximately 35 honors faculty fellows and 45 staff members who care about them as individuals. In addition to these full-time honors college personnel there are more than 1800 university faculty members who teach and mentor Barrett students across all four campuses.

The \$140 million Barrett campus in Tempe was designed by students, faculty and staff working with nationally-renowned architects. The Barrett complex functions as its own small honors community on the ASU Tempe campus where students enjoy the amenities and resources of a large university. This unique arrangement is a model for higher education and has often been referred to as the best of both worlds by students who thrive in a small college atmosphere but appreciate access to large university programs like Division I athletics and high profile lecturers.

Student Opportunities

Barrett students take advantage of an array of opportunities that enrich the honors experience. They participate in study abroad programs that enable them to travel to foreign countries, immerse themselves in small classes taught by honors faculty, and experience different cultures and societies while earning honors credits. Barrett Summer Abroad destinations include France, Greece, Italy, Germany, Spain, the British Isles, South America and China. Barrett students receive national and international graduate scholarships such as at Rhodes, Truman and Marshall Scholarships. They take advantage of unique undergraduate research and internship opportunities, such as those available at the Translational Genomics Research

Institute, the governor's office, Congress, the White House, or on Wall Street. Barrett students attend social and cultural events, publish poetry in the honors literary publication *LUX*, shadow doctors at the Mayo Clinic, and work with professors in the Biodesign Institute on the latest developments in nanotechnology. Many honors students seek leadership opportunities and find fulfillment in serving others, both on campus and in the larger metropolitan community. Barrett students also have opportunities to meet with individuals renowned for contributions in their fields, such as retired U.S. Supreme Court Justice Sandra Day O'Connor, former CNN anchor Aaron Brown, authors Guy Dauncey and David Kessler, and photographer Joel Meyerowitz.

Signature Events

Barrett hosts two signature events annually, the Centennial Lecture and the Rhodes Lecture. In 1985, the Flinn Foundation established an endowment to commemorate ASU's 100th year. The gift created the ASU Centennial Lecture, and in 1989 it provided the Barrett Honors College the resources to bring some of the world's most influential intellects to campus. The Centennial Lecture has become one of ASU's premier intellectual events featuring noted diplomats, scientists, playwrights, and authors. Each Centennial Lecturer has helped to strengthen the university and has provided students and community members with a memorable experience. Former Centennial lecturers include Edward James Olmos, dedicated actor, and community activist in 2010; Dr. Oscar Arias, Nobel Peace Laureate and two-time president of Costa Rica in 2011; and most recently, Sandra Postel, Director of the Global Water Policy Project, and co-creator of Change the Course, the national freshwater conservation and restoration campaign, and author of several acclaimed books, including the award-winning *Last Oasis*.

The Rhodes Lecture is given by the John J. Rhodes Chair in Public Policy and American Institutions at Barrett. The Chair was created to celebrate the career in public service of one of Arizona's and the nation's most distinguished leaders. The Rhodes Chair is dedicated to deepening theoretical and practical understanding of the many voices and forces that influence public policy. The Chair honors the values of personal integrity, fiscal responsibility, respect for persons, and international farsightedness exemplified in the Hon. John J. Rhodes' career. The 2015 Rhodes Chair was Dr. Mary Frances Berry, who served as chairperson of the U.S. Civil Rights Commission for more than four decades, and was the first woman to head a major research university, serving as chancellor at the University for Colorado at Boulder. In her inspiring lecture, Dr. Berry inspired students to continue the fight for equal rights and liberties for all Americans, and to spread the idea of peace, community and justice. Dr. Berry currently is the Geraldine R. Segal Professor of History at University of Pennsylvania in Philadelphia.

Barrett on all four campuses

In fall 2009, Barrett, The Honors College at Arizona State University, opened the nation's first comprehensive four-year residential honors college within a top-tier Research I university that underscores its standing as the premier honors college in the nation. On the Tempe campus, the nine-acre college includes resident halls for 1700 students, several classrooms, a community center with student lounges, activity rooms, computer labs, a fitness center, a multi-room dining facility with a refectory, café, and administrative, faculty and staff offices.

Multiple upgrades to the Barrett Honors College facilities on Downtown, Polytechnic and West campuses have taken place – featuring honors student lounges, libraries, kitchens, computer labs, student activity and study rooms, faculty and administrative offices, and honors residential communities.

Barrett at the Downtown Campus is home to about 500 honors students. The Barrett residential community, called “B-Town D-Town,” is located at Taylor Place at the heart of the campus and offers a living environment where students have easy access to ASU's downtown colleges and programs, as well as Phoenix's increasingly vibrant lifestyle.

Barrett at the Polytechnic campus gives students the feeling of studying at a small private college with the advantages of a large university. The honors residential community is unique among the ASU campuses – freshman honors students reside together on a floor of Century Hall, which opened in the summer of 2012 while upper-division honors students live in 2- and 3-bedroom houses in a special Barrett neighborhood on campus. Honors students also have access to a new dining hall and fitness facility.

Barrett at the West Campus provides the entire range of honors activities in a small liberal arts college setting. Barrett West students live and learn on the ASU West Campus with approximately 500 other residents. Honors students live in the new Casa de Oro, a residence hall that opened in fall 2012. The 5,000-square-foot Barrett Suite includes a computer lab, study rooms, a meeting area, a library, and staff and faculty offices.

With its outstanding programs, dedicated faculty and staff, and comprehensive facilities, Barrett is a national model for organizing resources to support the honors experience at all four campuses at ASU.

The Moeur Award is Arizona State University's oldest, continuing honor. It was established in 1901 by Dr. Benjamin B. Moeur and Honor Anderson Moeur, and is now sponsored annually by the Arizona State University Alumni Association. The award is presented at each Commencement ceremony to those individuals who have attained the highest academic standing in any four-year curriculum during their undergraduate years at ASU.

ABOUT THE COLLEGE OF HEALTH SOLUTIONS

Arizona State University established the College of Health Solutions (CHS) in May 2012 as part of its strategic initiative to build a new model for health education. The college has experienced rapid enrollment growth and developed a number of new degree programs to service its students' acute interests for opportunities in health education. The college is a dynamic, growing, interprofessional enterprise bringing together the social and natural sciences, and humanities in the name of health.

The multidisciplinary college includes the **School of Nutrition and Health Promotion, School for the Science of Health Care Delivery, International School of Biomedical Diagnostics, Department of Biomedical Informatics, Department of Speech and Hearing Science, Medical Studies** program and the **Doctor of Behavioral Health** program. The college collaborates with academic units across ASU's campuses including the College of Nursing & Health Innovation, the School of Biological and Health Systems Engineering, the School of Life Sciences, College of Public Service & Community Solutions and numerous research centers and programs, including the Center for Health Information and Research, the Health Care Delivery and Policy Program and the Healthcare Transformation Institute.

Working closely with faculty and leadership in the College of Nursing & Health Innovation (CONHI), CHS is a catalyst for partnerships across ASU's campuses, in Arizona, around the nation and around the world. Committed to improvements in health outcomes and expanding patient access to highly skilled, trained health professionals, CHS attracts dedicated students looking to make a difference in confronting the global health crisis on a variety of fronts.

Throughout each unit within CHS, students have access to top-tier faculty, research facilities, and opportunities for practical experiences working within a matrix of partner organizations to engage at-risk populations in health and behavioral change to improve the daily lives of men, women and children. As the vanguard of ASU's health and health education focus, CHS provides students with a breadth and depth of programs and connectivity with allied programs that cannot be found at other universities. More information can be found at chs.asu.edu.

ABOUT THE SCHOOL OF NUTRITION AND HEALTH PROMOTION

The School of Nutrition and Health Promotion (SNHP) offers students a range of academic programs and research opportunities spanning Nutrition, Exercise Science & Health Promotion, Kinesiology, Health Sciences, and Medical Laboratory Science. With state-of-the-art facilities – including the learning kitchen, Exercise Assessment and Movement Analysis lab, and campus garden – undergraduate and graduate students extend their learning outside of the classroom into original research impacting health outcomes on campus and in the community.

The school offers Baccalaureate degrees in Exercise Science & Health Promotion, Health Sciences, Kinesiology, Medical Laboratory Sciences, Health Education & Health Promotion, and Nutrition; Master's degrees in Exercise Science & Health Promotion, Clinical Exercise Physiology, Obesity Prevention & Management, and Nutrition; and PhDs in Physical Activity, Nutrition and Wellness and Kinesiology. More information can be found at snhp.asu.edu.

ABOUT THE SCHOOL FOR THE SCIENCE OF HEALTH CARE DELIVERY

The inaugural class in the School for the Science of Health Care Delivery (SHCD) enrolled in the fall of 2013 with pioneering curriculum for their master's program of study. The nationally recognized faculty, leading this innovative Master of Science (MS) program, engages students in rigorous curriculum exploring fundamental aspects of systems-design, leadership, health promotion, and diffusion of innovation to create the next generation of health leaders. In addition to their faculty mentor and teachers, students are engaging community health leaders from Arizona and around the nation as they work to address the complex issues of health care delivery. This past fall, additional degrees were launched in the School including baccalaureate degrees in the Science of Health Care Delivery and in Public Health. In addition, ASU now hosts two Master of Public Health programs offered by the University of Minnesota. More information can be found at chs.asu.edu/shcd.

ABOUT THE DEPARTMENT OF BIOMEDICAL INFORMATICS

The Department of Biomedical Informatics (BMI) fosters collaboration among academic researchers, clinical practitioners and regional health care providers to apply new developments in informatics theory to clinical practice.

BMI currently offers Master of Science (MS) and Doctor of Philosophy (PhD) degrees, with concentrations that include Bioinformatics, Clinical Informatics, Imaging, Knowledge Discovery, and Population Health. Partnerships with Mayo Clinic, Barrow Neurological Institute and Banner Health, among others, infuse the program with practical research mandates and clinical relevance that reinforce BMI's standard of excellence and leadership. In the past five years, BMI faculty have received more than \$13 million in research awards. In fall 2014, BMI began to offer a Baccalaureate degree. More information can be found at bmi.asu.edu.

ABOUT THE INTERNATIONAL SCHOOL OF BIOMEDICAL DIAGNOSTICS

The transatlantic International School of Biomedical Diagnostics launched in fall 2014 in collaboration with Dublin City University in Dublin, Ireland. The Master of Science in Biomedical Diagnostics is a one year, 30-credit degree program with shared curriculum and courses offered by both ASU and Dublin City University (DCU) in Dublin, Ireland. The program is delivered through a blended, global

classroom experience, focusing on the technology, science, business/legal, and application of diagnostics.

The program culminates in an applied project which students complete with industry and academic partners. Diagnostics influences every facet of health care including pharmaceutical and technology development, patient management, health care finance, and health care policy. Graduates from this program will be better prepared to transform health care.

ABOUT THE DEPARTMENT OF SPEECH AND HEARING SCIENCE

The Department of Speech and Hearing Science (SHS) joined the College of Health Solutions in the fall of 2013. The department continues to operate from the Tempe campus where it has had a long history of teaching and service. With national rankings in audiology (#17) and speech-language pathology (#21), SHS has led research innovation in both clinical and academic areas of health with \$25 million in research awards during the past five years. The department offers graduate and undergraduate degrees – BS, MS, AuD, and PhD.

Through its two on campus, non-profit clinics, members of the public and campus communities have access to high quality professional services for individuals of all ages, infants through senior citizens, with needs in communication and hearing improvement. The clinics also serve as training and research facilities for bachelor's, master's, and doctoral programs in audiology and speech-language pathology. More information can be found at shs.asu.edu.

ABOUT THE MEDICAL STUDIES PROGRAM

The Bachelor of Science in Medical Studies program provides students interested in health care and medicine with a well-rounded foundation in social sciences, humanities, interprofessionalism, and leadership, in addition to the basic health/medical science prerequisites necessary for graduate programs in health care and medicine. The curriculum for this program has been designed to meet new MCAT requirements. Students that choose to major in Medical Studies will take advantage of: research or clinical internship, dedicated pre-health advising and a curriculum that emphasizes critical thinking skills and an analytical approach to problem solving and effective communication. More information can be found at <https://chs.asu.edu/chs/bachelor-science-medical-studies>.

ABOUT THE DOCTOR OF BEHAVIORAL HEALTH

The Doctor of Behavioral Health Program launched in 2009 as an applied, clinical doctorate with a focus on integrated primary behavioral health care. The vision

of the program has been to develop a workforce of leaders in the practice and management of integrated behavioral health care. Graduates understand how to deliver and/or implement evidence-based and efficient behavioral interventions designed to improve both clinical and cost outcomes. A key requirement for admission into the program is prior completion of a master's degree and a license to practice in health care.

Since 2009, the program continues to grow in size and recognition. Demand for admission from non-licensed clinicians led to the development of the Doctor of Behavioral Health (DBH) Management Track. Prospective students can now choose between the DBH Clinical or Management Track based on their background and interests. The DBH degree program prepares students with the medical literacy, evidence-based intervention, and business entrepreneurial skills to accomplish the triple aim of improving patient health care experiences, expanding reach to address population health issues, and reducing service delivery costs. Students in the program are trained to become health care leaders in primary care settings where they effectively address the changes occurring in an evolving health care marketplace through new integrated care models. The internship is designed to provide students with the experience of working on a multidisciplinary, integrated primary care team using central medical records, collaborating with other providers in treatment planning and interventions, and sharing the responsibility of improving outcomes. More information can be found at chs.asu.edu/dbh.

COLLEGE OF LETTERS AND SCIENCES

The College of Letters and Sciences provides students across ASU with the knowledge and skills to comprehend and effectively engage the changing world of the 21st century at local, national and global levels.

We offer graduate and undergraduate degree programs that prepare students for a rapidly changing marketplace, as well as foundational instruction in humanities, social and natural sciences, mathematics, and professional fields. Our exploratory and major and career exploration programs empower students to find a major anywhere at ASU based on their interests, career goals and personality traits. Faculty support knowledge enterprise development by advancing research, clinical and creative activities that promote discovery, innovation and human understanding. The school is guided by the principles of student success, strategic partnerships within the university and the community, and interdisciplinary inquiry.

Theory, creativity and applied learning are integrated as students build entrepreneurial opportunities both inside the university and in their communities. In addition, the school serves the citizens of Arizona by offering a variety of outreach programs that engage people in cultural events and lifelong learning. The school is home to the Center for the Study of Race and Democracy, which serves as a leading interdisciplinary, problem-solving venture committed to engaged scholarship, and information dialogue involving the topics of race and democracy.

RECESSIONAL

COLLEGE OF LIBERAL ARTS AND SCIENCES

Serving as the intellectual heart of this vibrant university, the College of Liberal Arts and Sciences is engaged in redefining what is expected of the well-educated person of the 21st century. Creatively synthesizing teaching, research and scholarship that span the humanities, social sciences, natural sciences and life sciences, CLAS offers a challenging environment of learning and discovery in which students and faculty aspire to personal achievement and collaborative problem-solving.

The College of Liberal Arts and Sciences, the largest at ASU, is structured to help students identify and focus their dreams and aspirations. The college is in actuality many communities within communities where students meet peers and faculty who share their interests and passions through a rich diversity of schools, departments, majors, programs, institutes, centers, laboratories, clubs and organizations.

Faculty members in the college are committed to providing each of our students with the best education that we can, recognizing that the pace and complexity of the modern world will ask successful citizens and leaders to reinvent themselves time and again. Any institution of higher learning can train a student for a first job. Our goal is to equip our students with knowledge and skills for a lifetime of success. Although we are continually innovating and adapting as a college, the liberal arts remain the best foundation for successful careers and deeply rewarding personal and professional lives.

The College of Liberal Arts and Sciences—*Transforming learning, discovery and lives*

HONOR CORDS

Some of our undergraduate degree candidates wear maroon and/or gold honor cords. These cords designate students who have completed at least 56 resident credit hours at ASU and who have attained the following grade point averages:

Summa Cum Laude = Maroon and Gold cords, 3.80 to 4.0 GPA

Magna Cum Laude = Gold cord, 3.60 to 3.79 GPA

Cum Laude = Maroon cord, 3.40 to 3.59 GPA

CLOSING REMARKS

RECESSIONAL

COLLEGE OF NURSING & HEALTH INNOVATION

The growing footprint of the ASU College of Nursing & Health Innovation is about both our literal space and about the spaces we have created to fulfill on our mission to do more, serve more, and sustain innovation. Centrally located outside of our main building, and daily in full view of students, staff and faculty, is the challenge to everyone to “dream, discover, and deliver.” It is our mission and challenge that drives us to offer the highest quality of academic, research and clinical practice programs so we can create graduates who will be the best clinicians, teachers, advocates of good health, and researchers.

Just as our research and teaching extends far beyond our classroom walls, so does our drive to make an impact in the world and improve health outcomes. We make this real in six ways.

First, our interprofessional model guides us as we build programs and curriculum to meet the needs of future health workers. Both our graduate and undergraduate

programs continue to expand with a determined focus on the preparation of world-class health workers, ready to advance complex patient care and dynamic delivery systems. Our program design and delivery is central to the start of students' careers as well as their advancement and mobility within the systems where they work.

Second, Innovation is in the name of the college and at the core of our thinking. Those working in a clinical context know the challenges and complexity associated with the promotion of our nation's health. The challenges and opportunities that pervade the health care system require innovative solutions that improve whole system and global patient outcomes. Our curriculum and clinical experiences are designed to give students a breadth and depth of exposure to different types of delivery systems and equip them with tools to provide innovative thinking and value from the very first day. We foster innovative thinking at ASU—being on the cutting edge and visioning solutions to the most complex healthcare problems.

Third, while our programs encourage creative processes of discovery and dreaming, we place a premium on delivery. We encourage and provide an environment where dreams are cultivated. Whether through the college's centers, where nationally recognized research leaders are impacting research agendas, or through our funded research collaborations and the community partnerships they support, our students, faculty and staff are making a difference on a broad scale.

Fourth, we continue to push innovations – technological and otherwise – to better ourselves and our work within the college. As our online programs continue to expand access to the highest quality training, they do so with an intense focus on rigor and adoption of new and better instructional tools. Our simulation center not only provides state-of-the-art education for our students, but also is a partner with the State of Arizona Nursing Board to assess and ensure competence among nursing professionals with the confidence and essential practice skills they need to transition to real-world healthcare environments. We also operate a high quality nurse-led health center in the greater Phoenix area that emphasize an interdisciplinary approach to care, which are among the more than 700 clinical placement sites where our students receive outstanding educational experiences in the real world.

Fifth, as we lead the future of health education, our college places a strong value on connections to and appreciation for our past, our traditions, and the students and leaders who have brought us to this moment. As our students graduate and embark on their next journey, it is important to be mindful of the mentors, friends, family and loved ones who helped each of us reach this significant milestone. We want to encourage our alumni to stay connected to the college, watch our developments and participate in our activities or programming in the future. Our conversations and time together are not complete because you still can make a great difference to those who follow you.

Finally, as our college cultivates creativity, innovation and entrepreneurship, we are confident the tools and training our students have received will make them lifelong

learners and significant contributors to our dynamic industry. We encourage our students to challenge themselves and those around them to think more critically, to listen more closely and to work more diligently – especially on behalf of those who disparately suffer from acute and chronic illness and disease – as they are remaking the world and its possibilities.

ABOUT THE PhD PROGRAM

Program Director: **Bronwynne Evans, PhD, RN, FNGNA, ANEF, FAAN**

The PhD Program in Nursing and Healthcare Innovation, one of only four interdisciplinary programs in nursing in the country, provides an academic environment that fosters scholarship, critical thinking, and creativity. Scholars who wish to develop advanced leadership skills in innovation, research, education, health care delivery, and policy issues can learn to generate and apply knowledge across practice settings. Student achievement is supported through rigorous coursework and personal, guided mentorship in research, a hallmark of the program. Coursework is offered in both traditional on-site delivery format and synchronous online delivery, each designed to maintain the commitment to a highly mentored, interactive learning experience. Student research is supported by interdisciplinary faculty in various programs and Centers for Research Excellence, including health disparities, healthcare innovation leadership, healthy aging, healthy families, nursing education, and world health promotion and disease prevention.

ABOUT THE DOCTOR OF NURSING PRACTICE PROGRAM

Program Director: **Donna Velasquez, PhD, RN, FNP-BC, FAANP**

The Doctor of Nursing Practice (DNP) degree was established at Arizona State University in 2008. The Doctor of Nursing Practice degree is a practice-focused degree that prepares graduates to practice at the most advanced level of nursing. This program prepares nurse practitioners and nurse leaders to positively impact health outcomes at the individual and organizational level. Students in the program complete practicum hours working directly with a network of health professionals within collaborative, interprofessional settings. Graduates of the DNP program are prepared to apply research to clinical practice utilizing innovative approaches across multiple settings to improve health outcomes of individuals and health care systems.

ABOUT THE MASTER OF SCIENCE – NURSE EDUCATOR PROGRAM

Program Director: **Pauline Komnenich, PhD, RN**

ASU remains on the cutting edge in preparing nurse educators for 21st century nursing education through its innovative program. Responsive to the National Accreditation Essentials of the American Association of Colleges of Nursing as well as National League for Nursing competencies, the program incorporates state

of the art teaching/learning strategies with graduate level clinical courses essential to master's and doctoral education. The MS, Nurse Educator (NED) concentration at the College of Nursing and Health Innovation is a pathway designed to prepare the new and experienced nurse to meet demands of the changing health care environment. The program is learner-centered, clinically focused, population specific, and designed for those who initially choose a career as a nurse educator, as well as for nurses in practice who want to make a change. The program also offers a pathway to the PhD in Nursing & Healthcare Innovation and the Doctor of Nursing Practice. To meet today's demanding schedules the curriculum has a hybrid format with online and classroom components. The college also offers a graduate certificate to enhance current knowledge, motivation to re-enter the workforce, or work toward a doctoral degree.

ABOUT THE MASTER OF SCIENCE, CLINICAL RESEARCH MANAGEMENT PROGRAM

Program Director: **Cris Wells, EdD, MBA, CCRP**

The Master of Science in Clinical Research Management (CRM) degree program prepares students to take the next step in their clinical research career by focusing their studies in the elements of leadership within the research industry. Clinical research is the undercurrent of care, medical products, and human innovation, providing the evidence used to build new medical drugs and devices, as well as techniques used for best practices in human subject research. The CRM program is focused on management and leadership development in the pharmaceutical, medical device, research site, research institute, academic medical center, hospital, medical office, or other clinical research or drug development industry.

ABOUT THE MASTER OF HEALTHCARE INNOVATION PROGRAM

Program Director: **Eve Krahe, PhD**

The Master of Healthcare Innovation degree program (MHI) is an interdisciplinary degree designed to prepare students to design, implement and lead transformation in health care. Students in this online program come from a wide variety of professions including health sciences, architecture, nutrition, exercise, engineering, business administration, journalism, the humanities, all with an interest in leading innovation in health and health care. Students are exposed to opportunities for self-reflection to understand who they are as leaders and how they collaborate most effectively, while learning about the specific lenses through which to view innovation in a healthcare context. The program's uniqueness is highlighted through leadership practice, innovation theory, systems science, healthcare policy, evidence based practice, and a culminating Capstone experience. Students search for and implement sustainable solutions for today's health care issues with an eye to the future within an interdisciplinary environment comprised of both interprofessional faculty and students.

ABOUT THE BACHELOR OF SCIENCE IN NURSING PROGRAM

Program Director: **Judy Sayles, DNP, CNE**

The Bachelor of Science in Nursing (BSN) degree prepares beginning professional nurses who possess the theoretical foundation and the clinical competence to function in various health care settings. Graduates of ASU's nursing degree programs are prepared to respond to the vast and changing health care needs of individuals and communities. The BSN degree also prepares graduates for entrance into graduate level studies, which is essential for teaching, administration, clinical specialization and nursing research. The Traditional Pre-licensure Clinical Nursing Program (TPCNP) is an eight semester program, where students take prerequisite course work in the first four semesters and then advance to the upper-division clinical nursing program for the final four semesters. The Post-Baccalaureate Clinical Nursing Program (PBCNP), also known as the Post-Baccalaureate BSN, is available to students who have earned a bachelor's degree in another discipline but desire to have a bachelor's degree in nursing. Students must meet nursing prerequisite requirements prior to advancement to the 12-month upper division clinical nursing program.

ABOUT THE RN-BSN PROGRAM

Program Director: **Diann Muzyka, PhD, RN**

The online RN-BSN program builds on the knowledge and skills the student learned in their associate degree or diploma program, especially in the areas of evidence based practice, leadership and management, and community/public health. The interactive course assignments enhance the student's written and verbal communication skills, clinical reasoning skills, teamwork, and information technology skills. Students will integrate new knowledge into their nursing practice. Faculty strive to prepare graduates who will be engaged, professional, innovative leaders who use evidence-based practice to facilitate positive change in the work environment and community. Graduates will demonstrate holistic, population-based perspectives and be solution identifiers, client advocates and effective communicators.

ABOUT THE CONCURRENT ENROLLMENT PROGRAM

Program Director: **Diann Muzyka, PhD, RN**

The Concurrent Enrollment Program (CEP) is designed for qualified nursing students who are interested in earning their BSN degree from ASU while simultaneously pursuing their Associate of Applied Science (AAS) in Nursing degree through a participating community college. The CEP is a rigorous program with a plan of study that enables students to build on the knowledge and skills learned in the AAS in nursing program. Evidence based practice, leadership and management, community/public health, written and verbal communication skills, clinical

reasoning skills, teamwork, and information technology skills are enhanced. The BSN degree is earned in one to two semesters after graduating with their AAS in Nursing degree. Graduates of the program have the theoretical foundation and the clinical competence to be novice practitioners in a variety of health care settings.

ABOUT THE AMERICAN INDIAN STUDENTS UNITED FOR NURSING (ASUN) PROJECT

Program Manager: **Stephen Livingston, BES**

The ASUN Project is a grant funded through the Indian Health Service to recruit and retain undergraduate American Indian/Alaskan Native nursing students at Arizona State University. The ASUN Project started its 25th year the fall of 2014, and is a competitive national grant that ASU has been awarded since the grant's inception in 1990. The ASU College of Nursing and Health Innovation is currently one of only four schools nationally to be awarded this grant. The ASUN Project is not a separate nursing program, but rather it is an undergraduate scholarship program. If a recipient is awarded the ASUN scholarship, the scholarship pays tuition & fees, required textbooks, reimbursable nursing tools and a monthly Living Stipend of \$1,500 per month. In return, the recipient must work for Indian Health Service, a tribal or an Urban (ITU) health care facility for a minimum of two years within 90 days after degree is conferred and licensure is obtained.

COLLEGE OF PUBLIC SERVICE AND COMMUNITY SOLUTIONS

The College of Public Service & Community Solutions is made up of four schools and 17 research centers—all with a shared goal of advancing research and discovery of public value, and furthering the economic, social, cultural and overall health of the communities that we serve.

Our degree programs cover the spectrum of public service, including public policy, social work, criminology and criminal justice, nonprofit leadership, emergency management, community development and more. We are preparing a workforce to take on complex issues. At the same time, our students are making a difference today. Through service-based learning, they put ideas into action.

Our research addresses challenges that affect us both locally and globally. We are developing solutions to issues ranging from child welfare to neighborhood safety, city management to human trafficking, water scarcity to tourism development. Together, we bring creativity, systems-level thinking and entrepreneurial spirit to our mission of creating, sustaining and promoting dynamic, prosperous communities.

THE SCHOOLS IN THE COLLEGE OF PUBLIC SERVICE AND COMMUNITY SOLUTIONS

The School of Community Resources and Development students, faculty and staff share a commitment to making communities better places to live, work and visit. The fields within our School are extremely diverse and involve the private, government and nonprofit sectors of the economy. The concept of building sustainable and healthy communities is the unifying principle encompassing our School's focus areas of community sports management, parks and recreation management, tourism development and management, and nonprofit leadership and management.

The School of Criminology and Criminal Justice merges theory and practice. This occurs in the teaching, research and service activities of our faculty, students and alumni. The convenient downtown Phoenix location makes the School accessible to working professionals and traditional students. In addition, the location of major criminal justice agencies downtown enhances the opportunities for instruction, practice and internships for all students. The School offers bachelor's, master's and doctoral degree programs as well as certificates. The curriculum is delivered both in-class and online.

The School of Public Affairs is continuing its long tradition of developing outstanding public leaders; people who are committed to making a difference in our world and who are well prepared to meet the rigorous demands and substantial challenges of the future. We offer innovative educational and professional opportunities to help build strong and more effective leaders. We are the only public administration program in the Phoenix area to be accredited by the National Association of Schools of Public Affairs and Administration (NASPAA) and are consistently ranked among the top 20 public affairs schools in the country.

The School of Social Work strives to develop and provide access to innovative social services that allow disadvantaged families and communities to prosper. We are among the largest and most diverse social work programs in the U.S., with over 1,400 students now enrolled at our Phoenix and Tucson locations, and with more than 10,000 alumni. We offer bachelor's, master's and doctoral degrees, as well as many certificate and continuing professional education programs. Our students intern at more than 800 field placement sites. Extensive online and nontraditional courses facilitate access to those with varying schedules and needs.

THE CENTERS, INSTITUTES AND PROGRAMS

Bob Ramsey Executive Education

Bob Ramsey Executive Education is dedicated to improving the effectiveness of the people and organizations that serve communities. Through the center's programs and seminars, public service professionals can enhance their management and leadership competencies and can earn the Certified Public Manager®, Certified Municipal

Clerk, or Master Municipal Clerk credential. The center also assists state, local, and tribal governments with the implementation of their staff development initiatives.

Center for Applied Behavioral Health Policy

The Center conducts research, provides program development and evaluation services, and designs and conducts workforce development initiatives to improve policies and programs that affect people with substance use disorders or mental illness.

The Center for Emergency Management and Homeland Security

The Center fuses academics, research and solution delivery capabilities to meet crisis mitigation, response and recovery needs of government and private sector stakeholders today, and train the public management professionals of tomorrow.

The Center for Organization Research and Design

The Center promotes, supports and conducts fundamental research on public, nonprofit and hybrid organizations and their design. Its emphasis is on attention to new organizational forms and designs in science- and knowledge-intensive organizations and technology-intensive aspects of nontechnical organizations.

Center for Policy Informatics

The Center leverages cutting-edge technology and cross-disciplinary theory to help individuals and communities make and evaluate policy choices. It develops policy-relevant models that balance the complexity of real-world phenomenon with transparent, actionable evidence.

Center for Social Cohesion

The Center for Social Cohesion, a project of Arizona State University in partnership with the New America Foundation, is dedicated to studying the forces that shape our sense of social unity. Wholly non-partisan, pluralistic and multidisciplinary in outlook, the Center seeks to promote understanding of how diverse societies cohere.

Center for Science, Technology and Environmental Policy Studies

C-STEPS promotes collaborative research among faculty, postdoc graduate students, scientists and practitioners on interdisciplinary problems related to science, technology, information and the environment.

Center for Sustainable Tourism

The Center for Sustainable Tourism is devoted to studying the role of tourism in community development in order to strengthen its contribution to viable economic, social and environmental systems, especially in megapolitan regions around the world – aptly named tourism for the public good.

Center for Urban Innovation

A focal point for research on urban affairs, the Center for Urban Innovation is working to improve the quality of life in neighborhoods, cities and urban regions by promoting innovation in governance, policy and management. The Center also

leads ASU's partnership in the Alliance for Innovation, an international network of progressive governments and partners committed to transforming local government by accelerating the development and dissemination of innovations.

Center for Violence Prevention and Community Safety

The Center brings together scholars from social, behavioral and humanistic backgrounds to conduct research confronting international, regional and local problems for the purpose of conceiving and implementing policies, programs and practices grounded in evidence.

Lodestar Center for Philanthropy and Nonprofit Innovation

The ASU Lodestar Center builds the capacity of the social sector by enhancing the effectiveness of those who lead, manage and support nonprofit organizations. It promotes the understanding of the nonprofit sector and philanthropy in community life, with a particular focus on effective practices that help organizations meet their missions.

Morrison Institute for Public Policy

Morrison Institute bridges the gap between academic scholarship and public policy development through independent research and services to public and private sector clients. The Institute researches public policies that impact Greater Phoenix, the state of Arizona and the nation.

Office of Sex Trafficking Intervention Research

The Office of Sex Trafficking Intervention Research is a central source for data collection, dissemination, and solutions on domestic sex trafficking to help inform the decisions made by those who contact victims and perpetrators of sex trafficking including law enforcement and prosecutors, educators, and those in medical and social services.

Osher Lifelong Learning Institute at ASU

The Osher Lifelong Learning Institute at ASU provides university-quality learning experiences for adults ages 50 and over through diverse short courses and lectures, campus-based learning opportunities and civic engagement initiatives.

Partnership for Community Development

The Partnership works to build collaborative relationships among public and private community organizations to address critical community needs.

Policy Analytics Lab

Policy Analytics Lab (PAL) is a computing environment modeled using the Decision Theater framework where students, researchers, and community members can collaborate to tackle complex problems and design innovative solutions to some of the most pressing local and global governance challenges.

Southwest Interdisciplinary Research Center

The Center conducts transdisciplinary minority health and health disparities research, research education training, and community outreach and engagement on drug abuse, mental health and HIV/AIDS.

RECESSIONAL

ABOUT THE HERBERGER INSTITUTE FOR DESIGN AND THE ARTS

The ASU Herberger Institute for Design and the Arts leads an exploration of the contemporary human condition through creative practice and research, bringing together a unique array of disciplines that allow for distinctive opportunities for collaboration. Continually striving to enable design and arts students to succeed beyond graduation, the Herberger Institute consists of the following five schools: Art; Arts, Media + Engineering; Design; Film, Dance and Theatre; and Music. More than 4,700 students are supported by over 675 faculty and faculty associates and 155 staff offering a total of 135 degree programs and concentrations. The ASU Art Museum supports research initiatives while diverse community engagement

projects enable students and faculty to interact with the public through meaningful partnerships.

We encourage all of our alumni to continue to share their stories with us and to take an active role in the Herberger Institute Alumni Chapter. For more information on our alumni activities, please visit us on the Web at herbergerinstitute.asu.edu/alumni.

ENGINEERING AT ARIZONA STATE UNIVERSITY

The Ira. A Fulton Schools of Engineering, ranked in the top 50 U.S. engineering schools, are home to 300 faculty and nearly 17,000 students. The Schools were awarded over \$85 million in externally funded research awards in fiscal year 2014. In 2013-2014, the Fulton Schools of Engineering granted 2,560 undergraduate and graduate degrees. Today, nearly 49,000 alumni of the Fulton Schools are advancing the fields of engineering and technology in Arizona and around the world.

To produce the engineers and innovations needed to address society's changing needs, we have crafted a visionary blueprint for an engineering school that transcends traditional organization around degrees and disciplines, and fosters a transdisciplinary approach to teaching and research. Through our six schools, we offer 24 undergraduate and 28 graduate degree programs that encourage innovative collaboration across disciplines, with faculty and students alike focusing their efforts on developing solutions that will have significant, lasting impact on our local and global communities. We offer online options for selected programs and professional development programs like Six Sigma.

The School of Biological and Health Systems Engineering provides a rich, interdisciplinary curriculum that prepares students to use engineering and scientific principles and methods to develop instrumentation, materials, diagnostic and therapeutic devices, artificial organs or other equipment and technologies needed in medicine and biology. The school's biomedical engineering degree program strives to produce graduates with a broad-based education in both engineering and the life and natural sciences, with a focus on improving the overall quality of global healthcare. Graduates from the biological design doctoral program are creative thinkers prepared to work at the intersection of biology, engineering and computing to advance human health and quality of life.

The School of Computing, Informatics, and Decision Systems Engineering is home to computer engineering, computer science, computer systems engineering, engineering management, industrial engineering, informatics and software engineering degree programs. From data to decisions, the school covers the spectrum for designing the modern, information-driven society, engaging in the fundamental activities of sensing, optimizing, controlling and communicating. Computing serves as the engine that drives this transformation, linking together the school's fundamental activities. The school is dedicated to creating new knowledge and technology that contributes to solving the major problems facing modern society.

The School of Electrical, Computer and Energy Engineering brings together university faculty, students and companies to develop collaborative relationships and solutions. The school's computer engineering and electrical engineering degree programs and research efforts are aligned with national and international efforts to address worldwide challenges in energy production and distribution, healthcare technology and delivery, sustainable development and economic growth, communications technology and information management and global security.

The School for Engineering of Matter, Transport and Energy leverages the synergy of engineering and science to develop new knowledge and technologies, and create innovative solutions to society's most pressing problems in energy, human health, public safety, exploration, environmental infrastructure and sustainability. Degree programs in aerospace engineering, chemical engineering, materials science and engineering, mechanical engineering, and solar energy engineering and commercialization are offered. The school gathers together a broad range of disciplines and world-class faculty members who are engaged in a cutting-edge research, all of which contributes to a unique educational experience for all of our students.

The School of Sustainable Engineering and the Built Environment provides a nexus for education and research that address the critical infrastructure needs of our society in an environmentally sound manner. The school offers a holistic approach in its degree programs, covering the engineering expertise of civil, environmental and sustainable engineering, the design and construction principles of construction engineering and the project management and leadership skills of construction management.

The Polytechnic School is organized into seven academic programs that offer a breadth of engineering and technology-related degrees. The programs thrive under the guidance of more than 100 faculty members with deep expertise and industry experience in the important technological challenges that society faces. The school is located in the dynamic, growing Gateway region on the southeast edge of the Greater Phoenix metropolitan area, and is home to some of the most advanced learning laboratories available to students on any university campus.

Ira A. Fulton

Chairman of the Board and CEO, Fulton Homes

Ira A. Fulton, founder and CEO of Arizona-based Fulton Homes, established an endowment of \$50 million in support of ASU’s College of Engineering and Applied Sciences in 2003. The college was renamed the Ira A. Fulton Schools of Engineering in his honor. The gift has enabled the Ira A. Fulton Schools of Engineering to provide funding for scholarships, fellowships, research programs and investments in faculty, all integral to the school’s goal to move from its position as a highly ranked U.S. program into the ranks of world-class institutions.

“With this endowment, we are building an engine of educational and economic growth that will endure for generations. It is a gift of opportunity, prosperity, social equality and hope.” – Ira A. Fulton

ABOUT MARY LOU FULTON TEACHERS COLLEGE

Mary Lou Fulton Teachers College is setting a new standard for teaching, discovery and innovation as the 17th ranked graduate program in education nationally according to *U.S. News & World Report*. A key contributor within a research-intensive university, Teachers College offers rigorous undergraduate and graduate programs founded in scholarship and research, and led by nationally and internationally recognized professors who are leaders in their field.

**ADDRESSING THE CHALLENGES OF EDUCATION
IN A RAPIDLY CHANGING ENVIRONMENT**

With research at the heart of the Teachers College experience, students, faculty and staff actively address the challenges of education in a rapidly changing environment. College faculty and researchers demonstrate their commitment to advancing the science of teaching and learning by conducting evidence-based research, and tackling issues such as social justice, school reform, policy, language and literacy, and more.

Teachers College faculty members are accomplished scholars, researchers and leaders in their field — and most have taught in pre-K through 12th-grade classrooms. Among the college's esteemed faculty are a Nobel Laureate, American Educational Research Association Fellows, Fulbright American Scholars, Arizona Regents' Professors and members of the National Academy of Education. Even beyond academia, they are caring and community-minded citizens of the world who are committed to inspiring and enriching education for all children and youths.

EXCELLENT PROGRAMS PREPARE EXCEPTIONAL GRADUATES

Teachers College programs combine classroom- and community-based learning opportunities, and courses are designed to encourage diversity of thought — engaging students in the latest educational theories and research, as well as new technologies, that place them on the cutting edge of the education field. The college offers undergraduate and graduate degree programs and certificates on all four ASU campuses, at off-campus locations and online.

Students' exposure to evidence-based research and practical application means they graduate with an educational foundation rooted in experience and innovation. And that foundation pays off. An ASU exit survey of 2012-2013 graduates found that 94 percent of Teachers College graduate students pursuing jobs — and 93 percent of Teachers College undergraduate students pursuing jobs — were employed or had at least one job offer 90 days after graduation.

Graduates of Teachers College enrich the lives of others as inspired and informed teachers, administrators and researchers working in classrooms and communities. As advocates of education, they share a commitment to enable all children to reach their potential. Many go on to win awards in their respective fields, and often contribute by giving back to the college through their time, talents and treasure.

MARY LOU FULTON TEACHERS COLLEGE NAMESAKE

Mary Lou Fulton Teachers College is named for Dr. Mary Lou Fulton, a distinguished alumna of the college who, with her husband Dr. Ira A. Fulton, generously established a transformational endowment to foster excellence in education. The Fultons are committed to supporting the well-being and education of children, and initiatives dedicated to improving public education. Their gifts have provided opportunities for quality teaching, research and service that extend far beyond the university, touching the lives of generations to come.

MESSAGE TO THE NEW COLLEGE GRADUATES

Congratulations on your extraordinary achievement! The faculty and staff of New College offer our sincere best wishes for your continued personal and professional success. We all look forward to seeing your work in the world; we know you will make your mark as an ASU New College graduate. Today, you join a prestigious body of New College and ASU alumni, who have shared in some of the same remarkable experiences. Please stay in touch with us by joining the ASU Alumni Association, so we can continue to celebrate your triumphs and share the journey of our new students with you. You can take advantage of special new graduate membership rates (\$25 annual or \$300 lifetime dues) and become an active member of the ASU Alumni Association at www.asu.edu/alumni.

ABOUT THE NEW COLLEGE

The New College of Interdisciplinary Arts and Sciences offers a nationally unique environment: a small college experience with the power of ASU's major research university resources. Working one-on-one with our cutting-edge faculty—often through our New College Undergraduate Inquiry and Research Experience program (NCUIRE), our students reshape the boundaries of knowledge in their fields of study. This prepares them for a future of reshaping the world outside of ASU.

New College was founded on a “new” way of thinking about the academy. Instead of reproducing the intellectual silos that separate fields of study in other institutions, our programs have been structured on the notion that if we break down the barriers between fields, we can think in more innovative ways, do more path-breaking work, offer more effective solutions to real-world problems. From our Interdisciplinary Arts and Performance degree that teaches students many forms of artistic expression and then asks into what mode a concept should be born; to our Forensics degree that brings together fields like chemistry, psychology, and legal studies; to our Social Justice and Human Rights degree that explores sociological, historical,

and contemporary cultural analyses of the issues, New College offers educational experiences that transcend more limited ways of thinking about the world.

The mission of New College is to prepare students to succeed in a globalized, diverse economy by providing them with solid disciplinary foundations that are coupled with an ability to think and act constructively across disciplines to discover answers to the complex problems that face society today and to create civic and economic well-being, within contexts ranging from the local to the global.

New College’s programs build on the philosophy that inter-, multi-, and transdisciplinary education enhances our graduates’ ability both to address the needs of business, industry, schools, and communities of this region and to meet the challenges of the twenty-first century. New College’s Bachelor of Art and Bachelor of Science degrees include American Studies; Applied Computing; Applied Mathematics; Applied Science; Applied Science—Cell and Molecular Biology Research; Communication; English; English—Secondary Education; Ethnicity, Race, & First Nations Studies; Forensics; History; History—Secondary Education; Integrative Studies; Interdisciplinary Arts & Performance; Life Sciences; Life Sciences—Environmental Sciences Concentration; Life Sciences—Forensics Concentration; Political Science; Psychology, Psychology (Online); Religion & Applied Ethics Studies; Social & Behavioral Sciences; Sociology; Spanish; Statistics; and Women & Gender Studies. New College offers Master of Art degrees in Communication Studies, Interdisciplinary Studies and Social Justice & Human Rights and a Master of Science in Psychology.

ABOUT THE SCHOOL OF SUSTAINABILITY

Established in 2006, the School of Sustainability educates a new generation of scholars and practitioners and creates innovative modes of scholarship by bringing together leaders, stakeholders, and people from multiple disciplines to develop practical solutions to the most pressing sustainability challenges.

The School offers graduate programs leading to Master of Science, Master of Arts, Master of Sustainable Solutions, Executive Master for Sustainability Leadership and Doctor of Philosophy degrees in Sustainability and undergraduate programs leading to Bachelor of Science and Bachelor of Arts degrees in Sustainability. Degree programs focus on collaborative learning, transdisciplinary approaches, and solution-oriented training to address sustainability challenges relating to areas such as energy and materials, water, ecosystems, urbanization, international development, social transformations, climate, and food systems.

The School of Sustainability works closely with the Julie Ann Wrigley Global Institute of Sustainability, which is the hub of Arizona State University's sustainability initiatives. The Institute advances research, education, and business solutions to address fundamental sustainability challenges. Both the School and the Institute initiate and nurture work on issues of sustainability across the University and collaborate with other academic institutions, governments, businesses and industries, and community groups locally, nationally, and globally. WALTER CRONKITE SCHOOL OF JOURNALISM AND MASS COMMUNICATION

About the School

The Cronkite School is widely recognized as one of the nation's premier professional journalism programs. Rooted in the time-honored values — accuracy, responsibility, objectivity, integrity — that characterize its namesake, the school fosters journalistic excellence and ethics among students as they master the practical professional skills they need to succeed in the digital journalism world of today and tomorrow.

The Cronkite School's 1,800 students consistently lead the country in national competitions. The school has the best record in the Hearst Journalism Awards, often called the Pulitzer Prizes of college journalism, over the past nine years. Cronkite also has the country's best overall record in the national Society of Professional Journalists' Mark of Excellence competition over the same period and has taken first place in its region for 14 consecutive years and students have won three international Robert F. Kennedy Journalism Awards for reporting on social justice issues in recent years.

Students are guided by a faculty that is made up of both award-winning professional journalists and world-class media scholars. In recent years, the school has added to its faculty such leading journalists as former Washington Post Executive Editor Leonard Downie Jr., Minneapolis Star Tribune Editor Tim McGuire, BET Vice President Retha Hill, Sacramento Bee Executive Editor Rick Rodriguez, Forbes Magazine Publisher Jeff Cunningham, New York Times Senior Business Correspondent Micheline Maynard and Pulitzer Prize-winning journalist Jacques Petchel.

The Cronkite School continues to lead the field of journalism education with its innovative use of the teaching hospital model for which it has received national acclaim. Recently, Arizona PBS, one of the nation's largest public television stations, became part of the school, serving as a hub for full-immersion professional programs and a testing ground for new approaches in journalism.

Cronkite students choose among a dozen different professional programs in which they work under experienced journalists and communications professionals to apply what they have learned in the classroom. They report on sports from multimedia bureaus in Los Angeles and Phoenix; they do public affairs reporting from news bureaus in Phoenix and Washington, D.C.; and they produce a nightly newscast that reaches 4.8 million viewers on Arizona PBS.

In the Public Insight Network Bureau, students work with professional news organizations to deepen their connections to audiences, and in the New Media Innovation and Entrepreneurship Lab, they use digital technologies to forge the future of journalism. Students in the school's Public Relations Lab develop campaigns for client companies, while Carnegie-Knight News21 student reporters

conduct national data-driven investigations into issues critical to Americans. New bureaus at the school include a Business Reporting Bureau in which students report on business, finance and economics and a Digital Production Bureau, which serves as a multimedia development and production hub for the school.

Elsewhere at the school, the Donald W. Reynolds National Center for Business Journalism provides education and training to professional journalists and Cronkite Global Initiatives brings international journalists to the school for study and training.

All of these initiatives take place in a state-of-the-art building that is unparalleled in journalism education. ASU's investment in the school has generated national and international attention from educators and media professionals who place the school in the top tier of all U.S. journalism schools. The Times of London and The New York Times have pointed to the Cronkite School as a leading example of changes taking place at journalism schools across the country. The prestigious publications called the Cronkite School a pioneer, kindling a notion of new media that will shape how news is delivered and how people will stay informed in the future.

About Walter Cronkite

ASU's journalism program was named in honor of former CBS News anchor Walter Cronkite in 1984.

The relationship started when Tom Chauncey, longtime owner of the CBS affiliate in Phoenix and a leading supporter of journalism education at ASU, contacted his old friend in an effort to advance the program. An endowment on behalf of the program was soon established and the school was named after "the most trusted man in America."

Over the next quarter of a century, Cronkite lent much more than his name to the school. He was closely involved — advising leadership, guiding students and faculty and traveling to Arizona each year to personally give the Walter Cronkite Award for Excellence in Journalism to one of the nation's top journalists. The most special relationship, though, was with "our students," as Cronkite would always call them. Young women and men, some with parents barely old enough to remember Cronkite behind the anchor desk, lit up when he walked into a classroom. They hung on his every word as he thoughtfully answered their questions about the profession he so loved. They lined up just to shake his hand, and he loved every minute of it.

In what turned out to be Cronkite's last visit to ASU in 2007 before declining health prevented him from traveling, a group of 100 students gathered with just a few minutes of notice that Cronkite was in the building. He held them spellbound as he spoke about covering World War II, Vietnam, Apollo, Watergate and presidents from Truman to Reagan — and of how important "our school" was to him.

Although Cronkite died on July 17, 2009, before he was able to visit the new building, he remains an ever-present part of the school's heartbeat and direction. His legacy lives on in the spirit and passion with which the school teaches both the skills to do journalism in today's media environment and the time-honored ethics and news values necessary to do it in the manner that would make him proud. The Cronkite School has established a special memorial fund in Cronkite's name. For more information on the fund and to learn more about Cronkite's legacy and career, visit cronkite.asu.edu/rememberingcronkite.

About Our Graduates

The Cronkite School has more than 8,000 alumni throughout the Valley, across the country and around the world. Many are leaders in television, digital media, newspapers, radio, magazines and public relations.

In 1993, the Cronkite School inducted its first class into the Cronkite Alumni Hall of Fame. The charter inductees were Al Michaels ('66), an Emmy Award-winning sports broadcaster best known for anchoring "Monday Night Football," and Bill Redeker ('71), an ABC News correspondent who covered the Middle East and the Far East during his 30 years with the network.

Other notable Cronkite Alumni Hall of Fame inductees include Becky Anderson ('94), CNN International anchor; Julie Cart ('98), Pulitzer Prize-winning Los Angeles Times reporter; Derrick Hall ('91), president of the Arizona Diamondbacks; Christine Devine ('87), news anchor at FOX 11 in Los Angeles; Mary Kim Titla ('85), founder of Native Youth Magazine; Ray Artigue ('76), president of The Artigue Agency; and Chip Dean ('77), director of ESPN's "Monday Night Football."

Graduates of the school who are interested in joining the Cronkite School alumni chapter are encouraged to call 602.496.5555 or visit asu.edu/alumni. Stay connected to fellow alumni by registering at cronkitenation.com.

ABOUT THE W. P. CAREY SCHOOL OF BUSINESS

The W. P. Carey School of Business at Arizona State University is one of the highest-ranked and largest business schools in the United States. The school is internationally recognized for its leadership in business education and for positively impacting the practice, science and art of management on a national and international scale. The school works to rethink the nature of business, engage the world, and create a better future.

More than 10,000 students attend the W. P. Carey School of Business, including about 50 National Merit Scholars and more than 100 doctoral candidates. The student body is especially diverse, including representatives from more than 90 countries.

The acclaimed faculty includes a Nobel Prize winner, members of the National Academy of Sciences, a Guggenheim Fellow, and a fellow of the American Academy of Arts and Sciences. Many faculty members are also on the editorial boards of academic journals and publications. The school boasts 11 well-known research centers and a research institute, and is ranked Top 25 worldwide among business schools for research productivity.

Both the school's graduate and undergraduate business programs are ranked Top 30 in the nation by *U.S. News & World Report*. The executive MBA program is ranked No. 13 in the world by *The Wall Street Journal*. The W. P. Carey School of Business is also known for providing excellent "return on investment" at both the graduate and undergraduate levels.

Undergraduate Bachelor of Science degrees are offered in nine areas, including accountancy, business data analytics, business entrepreneurship, computer information systems, economics, finance, management, marketing and supply chain management.

Undergraduate students also have the option of earning a Bachelor of Arts degree in business with a concentration in Chinese language and culture, communication, food industry management, global agribusiness, global leadership, global logistics management, global politics, human resources, law, public service and public policy, retail management, Spanish language and culture, sports and media studies, statistics, sustainability, technology, tourism management or urban policy.

The school's renowned MBA program is offered in five platforms: full time, evening, executive, weekend and online. Students can also earn master's degrees in accountancy, business analytics, finance, global logistics, information management, management, real estate development or taxation. The school ranks high for the quantity and quality of its doctoral graduates. Many managers and executives also come to the school for its highly desirable executive- education certificates, placing a heavy emphasis on professional development.

The school's extensive alumni network is 90,000 strong. Distinguished alumni represent highly regarded companies from diverse industries, including manufacturing, technology, retail, banking, accounting, entertainment and food, as well as smaller entrepreneurial firms and respected nonprofit organizations.

The school provides students with personalized assistance in their job searches through dedicated graduate and undergraduate career centers.

**THE ARIZONA STATE UNIVERSITY
MACE AND PRESIDENT’S CHAIN OF OFFICE**

In Medieval times, a mace was a hand-to-hand combat weapon. In about the year 1400 A.D., a mace evolved from a weapon to a ceremonial instrument used by academicians in rituals such as commencement and inaugurations. The oldest known ceremonial mace was that of the Faculty of Common Law of St. Andrew University in Scotland, used in 1438.

The Mace and Chain of Office are presented only at ceremonies in which faculty members are in full academic regalia, such as the Inauguration of the ASU President, University Commencement, Faculty Assemblies, Regents’ and President’s Professor Induction Ceremonies and Convocation.

The Mace is carried at the head of the procession and laid in a cradle, thus signifying the formal onset of the ceremony.

ASU’s ceremonial mace and chain of office was created in observance of ASU’s Centennial in 1985. Handcrafted by ASU Professor of Art, David Pimentel (1943-2004), the mace and chain was created with “austere elegance and traditional southwestern motifs.” In keeping with these directions, Professor Pimentel constructed both items out of materials native to Arizona. The ASU Mace is a wood staff, approximately three and a half feet long, weighing eight pounds and made of hollowed and polished Mesquite.

The head of the ASU Mace has four sterling silver blades and is banded with copper, Morenci turquoise, and a silver ring on which the words Arizona State University are embossed. The turquoise inlay was cut and polished by Navajo jeweler Richard Charlie of Mesa. The ASU seal is embossed in silver on the heel of the mace.

The President’s Chain of Office includes a silver rope woven from strands of hand-turned links, which holds a medallion six inches in diameter that reverses to reveal the ASU seal in gold on one side and the same in silver and turquoise on the other.

College Marshal Spring 2015 Undergraduate Commencement

College Marshals consist of selected faculty members from each college at all ASU campuses. Selection criteria is left to the individual colleges, but faculty who have recently won awards or have received special recognition are given primary consideration.

Barrett, the Honors College — Joseph P. Foy earned his Bachelor's degree in physics at the University of Alabama in Huntsville, where he conducted research at NASA's Marshall Space Flight Center. He earned his PhD in physics and astronomy at Arizona State University studying and modeling the dynamics of the Crab Nebula supernova remnant.

Among his current projects, Dr. Foy is co-author of the undergraduate physics textbook *Introduction to Classical Electrodynamics*, soon to be published by Yale University Press.

Dr. Foy joined the faculty at Barrett, the Honors College in the fall of 2008 after completing a visiting professorship at Hampden-Sydney College in Virginia.

College of Health Solutions — Juliet Weinhold, a Clinical Associate Professor in the College of Health Solutions' department of Speech & Hearing Science, has been an integral part of the department's undergraduate program since 2006. Dr. Weinhold works tirelessly to enrich students' academic experiences in the classroom and in the field, strives to connect undergraduates to the latest technologies in speech and hearing science, and serves as a mentor to multiple graduate students. Her passion for excellence in the classroom and research, coupled with her expansive knowledge and experience, make her an exemplar in the College and ideal to serve as Marshal for the 2015 spring Commencement ceremony.

College of Letters and Sciences — Dr. Heather Bateman is an Associate Professor of Wildlife Biology in the Applied Biological Sciences degree program of the College of Letters and Sciences. Dr. Bateman teaches courses in Applied Herpetology, Ornithology, and Ecological Adaptations of Vertebrates at the Polytechnic campus. Dr. Bateman is a field ecologist and conservation biologist interested in how human land-use affects vertebrate populations and habitats, especially in riparian ecosystems. This spring, Dr. Bateman's outstanding dedication to leadership and the professional development of ASU students was recognized with the 2015 Award for Professional Service by The Wildlife Society, the national professional organization for wildlife biology and conservation.

College of Liberal Arts and Sciences — Natalie D. Wilkens is an Assistant Professor in the T. Denny Sanford School of Social and Family Dynamics. She received her Ph.D. in Developmental Psychology from ASU in 2009. She researches children's social competence, as well as socio-emotional and school-related adjustment, in the US and internationally. She teaches undergraduate- and graduate-

level statistics courses. Dr. Wilkens received the 2014 College of Liberal Arts and Sciences *Zebulon Pearce Distinguished Teaching Award in Social Sciences*, which is the highest recognition of excellence of teaching in the College.

College of Nursing and Health Innovation — Therese Speer is a Clinical Associate Professor in the College of Nursing and Health Innovation and the Associate Director for the Pre-licensure Nursing Program. She teaches in the undergraduate program where her specialty is Pediatric Nursing. She is a board member of the Sigma Theta Tau International Nursing Honor Society, Beta Upsilon chapter. Therese serves as the Faculty Advisor to the nursing freshmen, both residential and commuter students. She assisted in the implementation of the Peer Mentor Program for freshman commuter students and her research interest is in freshman engagement and retention.

College of Public Service & Community Solutions — Wendy Hultsman is an associate professor in the School of Community Resources and Development, part of the College of Public Service and Community Solutions. Hultsman, who has served at ASU for 25 years, has been very involved in the development of the parks and recreation management curriculum and was instrumental in the creation of special event management education. Hultsman describes herself as someone who goes beyond the walls of the classroom—engaging students in the production of major special events for the cities of Glendale and Phoenix and demonstrating how events positively impact quality of life.

Herberger Institute for Design and the Arts — Oboist Martin Schuring held orchestral positions with the Hong Kong Philharmonic, The Florida Orchestra, and the Phoenix Symphony before joining the Arizona State University faculty in 1992 where he is Evelyn Smith Professor of Music. Martin studied at the Curtis Institute of Music with John de Lancie. His comprehensive book of oboe technique, *Oboe Art and Method*, was published by Oxford University Press in 2009. He co-hosted the 1998 and 2011 Conferences of the International Double Reed Society at Arizona State University.

Ira A. Fulton School of Engineering — Dr. Thomas Sugar joined ASU in 1999 as a faculty member in the Mechanical and Aerospace Engineering Department. In 2005, he transferred to the ASU Polytechnic campus developing an Engineering Program in The Polytechnic School, part of the Ira. A. Fulton Schools of Engineering. He teaches design and project courses in the areas of mechanical design and robotics. He has an active research program in the areas of wearable robotics and gait assistance. As part of his research effort, he has developed robotic orthoses and prostheses for stroke rehabilitation and enhanced mobility. His research projects include SPARKy, Spring Ankle with Regenerative Kinetics, and PAFO, a powered ankle foot orthosis for stroke rehabilitation. His current research focuses on building lightweight exoskeletons to enhance running. He has built an AirLegs robot that flexes and extends the hip and a jetpack to enhance running that has received much attention.

Mary Lou Fulton Teachers College — Dr. Josephine Marsh, is an Associate Professor of Literacy in the Mary Lou Fulton Teachers College. In addition to her role as associate professor of literacy education, Josephine is the professor in residence at ASU Preparatory Academy (ASU Prep). Since 2011, she has worked with ASU Prep administrators and teachers to integrate scholarship with teaching, creating academically rigorous and supportive teaching and learning environments for K-12 students from a wide range of backgrounds. She is at one or both of the ASU Prep campuses every day, providing “just-in-time” professional development, and using ethnographic and action research methods to build knowledge about instructional methods and the school transformation process.

New College of Interdisciplinary Arts and Sciences — Stephen Wirkus completed his Ph.D. at Cornell University in 1999 and came to Arizona State University in 2007 as a tenured Associate Professor. He has guided over 80 undergraduate students in research and has served as Chair for 4 M.S. students, and 2 Ph.D. students. He has over 30 publications and technical reports with over 40 students and has a popular 2nd edition textbook on Ordinary Differential Equations. He was named the 2011 NSF AGEP Mentor of the Year, was a Visiting MLK Professor at MIT in 2013-2014, and was named the 2013 Professor of the Year at ASU.

School of Sustainability — Dr. Carr Kelman studies policy dimensions of sustainability issues, such as how to manage the tradeoffs and foster synergies between biodiversity conservation and human development. She has studied Integrated Conservation and Development Projects in Indonesian national parks, the global trade in electronic waste, and the regulation of electric utilities in the US. Her current research involves analyzing how the solar energy industry is handling the electronic waste issue. Two major themes in Dr. Carr Kelman's research are the complex relationship between environment and development, and the role of governance, policy and institutions in creating more resilient socio-ecological systems.

Walter Cronkite School of Journalism and Mass Communication — Melanie Alvarez, is the executive producer of the Walter Cronkite School of Journalism and Mass Communication's student-produced live newscast, Cronkite News. Prior to joining the Cronkite School, Alvarez worked as a newscast producer at KKTV in Colorado Springs, Colo.; WTSP in Tampa/St. Petersburg, Fla.; and KPHO in Phoenix, where she also served as an executive producer for the morning newscast and special projects unit. She has been nominated for several regional Emmy Award and is the recipient of "Best Newscast" and "Best Producer" awards from the Arizona Associated Press. At the Cronkite School, Alvarez also has been the executive producer for "Cronkite: Legend & Legacy" a one-hour documentary tribute to commemorate Walter Cronkite and his enduring impact on the students, faculty, alumni and the future of the Cronkite School. Alvarez received her undergraduate degree from the University of Southern California's Annenberg School for Communication & Journalism and a Master of Liberal Studies degree from ASU.

W. P. Carey School of Business — Robert D. St. Louis is a Professor of Information Systems at Arizona State University. He began teaching at ASU in 1969, but spent the period from 1976 through 1981 working full time as a researcher for state and federal agencies. Dr. St. Louis currently is teaching classes on information management, and conducting research in the areas of document search, evidence based decision making, and enterprise performance management systems. He has published articles in a variety of journals, including the Journal of the Association for Information Systems, the Academy of Management Journal, Decision Support Systems, Decision Sciences, and the Journal of Econometrics.

Emeritus College — Elmer Gooding is Interim Dean of the Emeritus College. He began his career at ASU in August 1967 as Assistant Professor of Economics. He earned his Ph.D. and M.A. in Economics from the University of Kansas and his B.S. from McPherson College. He retired from ASU as Emeritus Professor of Economics in 2004. At ASU he held numerous academic and administrative positions including the following: Associate Dean of the College of Business and Director of Graduate Programs, Assistant Provost, Acting Vice President for Academic Affairs, Loaned Executive to the Arizona Board of Regents, Vice Provost, Interim Provost and Vice President for Academic Affairs, Acting President (for two months in the spring of 1991). His teaching fields were international economics and macroeconomics. After retirement he served as president of the ASU Retirees Association and has served as associate dean and interim dean of the Emeritus College.

HISTORY OF THE ACADEMIC COSTUME

The present-day academic costume seemingly originated at Oxford and Cambridge Universities in the 1300s. As the universities passed from ecclesiastical control, brighter colors distinguished the academic robe from the drab clerical gown. Colonial American universities based their academic regalia on the British system.

In the 1880s, a student movement centering in New England investigated the establishment of a "senior badge," to improve commencement week exercises and revive the traditions of university life. In 1893, an intercollegiate commission established a uniform code for caps, gowns and hoods for the various degrees.

Of the costume's three components, the hood is the most interesting. Originally it had three uses: as a head covering, as a shoulder cape, and as a bag in which alms could be collected. It is mentioned as early as 1480 in clerical literature. When large wigs were in vogue in Britain, the cape part of the hood was split in front and a narrow neckband inserted. The entire cape and hood was allowed to fall back as it is today, and it was never restored to the original style.

Following is a list of the hood and tassel colors established by the Intercollegiate Code to represent departments of learning:

Architecture	Blue-Violet
Agriculture	Maize
Arts, Letters, Humanities	White
Business Administration, Commerce, Accountancy	Sapphire Blue
Dentistry	Lilac
Economics	Copper
Education	Light Blue
Engineering	Orange
Fine Arts	Brown
Forestry	Russet
Home Economics	Maroon
Journalism	Crimson
Law	Purple
Library Science	Lemon
Medicine	Green
Music	Pink
Nursing	Apricot
Oratory (Speech)	Silver Gray
Pharmacy	Olive Green
Philosophy	Dark Blue
Physical Education	Sage Green
Public Administration, including Foreign Service	Peacock Blue
Public Health	Salmon Pink
Science	Gold-Yellow
Social Science	Citron
Theology or Divinity	Scarlet
Veterinary Science	Gray

Black tassels are correct for all degrees,
and colored tassels are worn only by preference.

Gold metallic tassels may be worn by doctors or presidents of universities and colleges.
