THE NATIONAL ANTHEM
THE STAR-SPANGLED BANNER

O say can you see, by the dawn's early light,
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars through the perilous fight
O'er the ramparts we watched, were so gallantly streaming?
And the rockets' red glare, the bombs bursting in air
Gave proof through the night that our flag was still there.
O say does that Star-Spangled Banner yet wave
O'er the land of the free and the home of the brave?

ALMA MATER
ARIZONA STATE UNIVERSITY

Where the bold saguaros
Raise their arms on high,
Praying strength for brave tomorrows
From the western sky;
Where eternal mountains
Kneel at sunset's gate,
Here we hail thee, Alma Mater,
Arizona State.
—Hopkins-Dresskell

MAROON AND GOLD

Fight, Devils down the field
Fight with your might and don't ever yield
Long may our colors outshine all others
Echo from the buttes, Give em' hell Devils!
Cheer, cheer for A-S-U!
Fight for the old Maroon
For it's Hail! Hail! The gang's all here
And it's onward to victory!

MISSION STATEMENT

UNIVERSITY COMMENCEMENT

University Commencement represents the **culmination of a student's academic achievement.**

**It is a time of celebration and reflection
for students, families, friends, faculty and staff.**

**It brings together a diverse community
to share in the joy of accomplished goals.**

Students whose names appear in this program are candidates for the degrees listed,
which will be conferred subject to completion of requirements.

University commencement, convocations and celebrations are special events for all involved.
Please show respect for everyone who has come to share in the experience. Individuals who
engage in inappropriate or disruptive behavior will be removed from the event.

As a courtesy to those around you and to our graduating students,
please turn off all electronics devices and phones during the ceremony.

Only working staff, graduating students and authorized guests are allowed in the graduate and
staff entry points, or on the floor or field near graduate seating and the stage. This restriction applies
to Gammage Auditorium, Desert Financial Arena, Sun Devil Stadium or other ceremony venues.

**MESSAGE FROM THE
ARIZONA BOARD OF REGENTS**

Dear Graduate,

Congratulations on your graduation from Arizona State University. Today marks a significant milestone in your life, one which unlocks a world of opportunities.

You've put in the hard work, stayed focused and earned your degree. Now you are poised to make your mark. Your ASU education has given you the skills, knowledge and innovative mindset to thrive in a world that is always changing.

Earning your degree will open doors to exciting opportunities. With those opportunities comes the chance to make a positive impact on those around you. As an ASU graduate, you carry forward the pride and tradition of a university that has helped shape countless success stories.

As you go out into the world, please remember your alma mater — friends, mentors, professors and everyone who supported you through your college years. Stay connected to the university and remember you are forever part of the Sun Devil community. We wish you the best for a future that is full of promise. Go Devils!

Sincerely,

Doug Goodyear
Chair,
Arizona Board of Regents

HISTORY OF HONORARY DEGREES

Harvard was the first university to confer honorary degrees in 1692. Since then it has become a recognized function of degree granting institutions. Honorary degrees are an opportunity for universities to single out people who have made contributions to society. At ASU, honorary degree recipients are nominated by faculty members. The six-member Academic Affairs Honorary Degrees Committee reviews faculty nominations for the Honorary Degree. It then recommends candidates to the president. The committee is appointed by and responsible to the president.

ABOUT THE SANDRA DAY O’CONNOR COLLEGE OF LAW

In 1965, Arizona State University’s visionary President G. Homer Durham hired Willard H. Pedrick to serve as the first dean of ASU’s law school. Tasked with building the school from the ground up, Dean Pedrick set the foundation for what has become one of the nation’s most innovative legal education institutions. Originally housed in Armstrong Hall on ASU’s Tempe campus, the Sandra Day O’Connor College of Law moved to the Beus Center for Law and Society in downtown Phoenix in 2016, anchoring itself in the heart of Arizona’s legal community.

Throughout its history, ASU Law has achieved milestones that speak to its excellence. In 2006, it was renamed to honor Justice Sandra Day O’Connor, a trailblazer and the first woman appointed to the U.S. Supreme Court. The privilege of carrying her name inspires the college to uphold her legacy of integrity, justice and public service.

ASU Law has come a long way since its first graduating class of 83 students. Today, more than 650 graduates annually earn degrees that prepare them for impactful careers. Offering five degree programs — Juris Doctor (JD), Master of Laws (LLM), Master of Legal Studies (MLS), Master of Human Resources and Employment Law (MHREL) and Master of Sports Law and Business (MSLB) — ASU Law equips its students with the knowledge and skills to lead in the evolving legal landscape. In addition, ASU Law now offers the nation’s first mission-driven, part-time and fully online modality to its JD program, designed to expand access to legal education to address critical legal deserts in underserved and rural communities and advance legal careers in public service.

The college is also proud to be recognized as the nation’s leader in producing the highest number of graduates from master’s-level legal programs, empowering professionals across industries with legal knowledge and skills to advance their careers and create meaningful change.

Beyond Phoenix, ASU Law offers students opportunities to study at its Los Angeles and Washington, D.C., locations and participate in global externships and internships. With a renowned faculty, extensive alumni network and partnerships within the legal community, ASU Law remains committed to shaping leaders who can address challenges at every level, from local communities to the global stage.

ABOUT OUR GRADUATES

Graduates of the Sandra Day O'Connor College of Law represent the future of justice and innovation. With more than 11,000 alumni, our graduates exemplify the core values of excellence, leadership and service. They advance the law and contribute to society as attorneys, judges, business leaders, policymakers and change-makers.

Their achievements span industries and continents, shaping the legal landscape, driving innovation and advocating for positive change in their communities. From courtrooms to boardrooms, ASU Law alumni are united by a shared commitment to creating a more just world.

Stay connected and continue the journey of excellence with the ASU Law Alumni LinkedIn group and at law.asu.edu/alumni.

THE BARRETT STORY

The Gold Standard in Honors

Established in 1988, Barrett, The Honors College at Arizona State University, is a highly regarded residential college providing an exceptional undergraduate experience for academically outstanding students from Arizona, the United States, and around the world. Backed by the vast resources of the nation's largest Research 1 (R1) public university, ranked No. 1 in innovation by *U.S. News & World Report*, Barrett offers a highly personalized honors education that values not only academic excellence but also leadership, initiative, and a commitment to making an impact. Our students are scholars, leaders, and changemakers actively shaping their communities through their passions, interests, and experiences.

With a presence on four ASU campuses and Barrett Online, the college serves 7,500 students and is supported by nearly 50 full-time honors faculty members, more than 80 full-time staff members, and a dedicated leadership team. Named the Gold Standard for honors colleges, Barrett is widely regarded as a model for honors education.

Opportunities That Inspire

Barrett creates a transformative educational experience that fosters leadership, independent scholarship, civic engagement, and global exploration. Students enrich their academic journey through faculty mentorship, research fellowships, community internships, and immersive domestic and international travel programs.

While completing their ASU degree, Barrett students earn honors credits through specialized courses, internships, research, and global study. All Barrett students complete an honors thesis, an in-depth, faculty-mentored project in their field of study. More than 1,900 ASU faculty members teach and mentor Barrett students across all disciplines.

Honors Beyond the Classroom

As the largest residential honors college in the United States, Barrett enhances student life at ASU with vibrant academic and social communities at each campus. Barrett students assume leadership roles in student government, Greek life, and various organizations across ASU. Barrett Online students also engage in virtual honors programming and events.

From Campus to Career

With an emphasis on career preparation, Barrett offers Life Prep programming covering essential topics such as medical and law school navigation, financial literacy, and homeownership. Exclusive internships with organizations such as Mayo Clinic, Goldman Sachs, Microsoft, and the U.S. Senate provide real-world experience. Students conduct cutting-edge research with ASU faculty in areas such as health care innovation, global energy solutions, and data security.

The Lorraine W. Frank Office of National Scholarship Advisement, housed within the Barrett Complex at ASU Tempe, supports students applying for competitive national and international fellowships. ASU is a top producer of Fulbright U.S. Student Award winners, ranking second among public universities over the past decade. Barrett students regularly earn prestigious awards such as the Rhodes, Marshall, and Truman scholarships, as well as the Goldwater and Gates Cambridge scholarships.

A Global Perspective

Barrett students earn honors credit while engaging with diverse cultures through more than 300 study abroad programs in more than 65 countries. Globally focused initiatives take place both on campus and around the world. The Distinguished Global Leader Series invites world leaders to ASU for lectures and discussions, while GlobalResolve connects students with hands-on service-learning projects in countries such as Trinidad and Mexico. Global Honors Flex allows first-year Barrett students to earn 15 honors credits while studying in a community in an international city.

Honoring Thought Leaders

Barrett hosts prestigious annual events, including the Centennial Lecture, Rhodes Lecture, and Distinguished Global Leader Series. Established through a Flinn Foundation endowment, the Centennial Lecture has brought renowned speakers to ASU, including Nobel Laureate Dr. Oscar Arias and actor-activist Edward James Olmos. In 2025, Barrett hosted ASU alum, NCAA wrestling champion, three-time All American, and National Wrestling Hall of Fame inductee, Anthony Robles.

Conversations That Matter

The Rhodes Lecture, created to honor John J. Rhodes' distinguished career in public service, fosters discussion on public policy and leadership. Rhodes speakers include former U.S. Secretary of Defense James Mattis, former U.S. Senator Jeff Flake, actress and author Diane Guerrero, Bill Nye the Science Guy and Vincent Stanley, director of Patagonia philosophy.

Through academic excellence, leadership development, and global engagement, Barrett empowers students to stand out as scholars and professionals, preparing them for success at ASU and beyond.

The Moeur Award is Arizona State University's oldest, continuing honor. It was established in 1901 by Dr. Benjamin B. Moeur and Honor Anderson Moeur, and is now sponsored annually by the Arizona State University Alumni Association. The award is presented at each Commencement ceremony to those individuals who have attained the highest academic standing in any four-year curriculum during their undergraduate years at ASU. All courses of the curriculum must be completed at ASU.

ABOUT THE COLLEGE OF HEALTH SOLUTIONS

The College of Health Solutions translates health research and discovery into practice and prepares students to address the challenges facing people to stay healthy, improve their health and manage chronic disease.

Since its founding in 2012, the college has experienced rapid growth. Its degree programs are designed to meet the global demand for health and health care professionals who are prepared to improve health outcomes for people and communities. Programs are offered in biomedical informatics and biomedical diagnostics; health care systems; health sciences and medical studies; movement sciences; nutrition; population health; and speech and hearing science.

Students learn from renowned research and clinical faculty, engage in experiential activities and are encouraged to contribute to innovative health research. They participate in solving health challenges through internships, interdisciplinary research teams and global study abroad experiences.

Students, faculty and staff at the College of Health Solutions, along with community partners, work together toward a common goal of optimizing the health of the diverse populations we serve. Graduates of the college are uniquely prepared to make an impact in the health workforce and shift the focus of health from sickness to wellness.

RECESSIONAL**COLLEGE OF INTEGRATIVE SCIENCES AND ARTS**

The College of Integrative Sciences and Arts (CISA) is a leader in integrative, applied and career-connected learning. Our deep commitment to student success, inclusive excellence and the ASU Charter creates an environment that prepares all of our graduates for careers across the sciences, humanities, social sciences and veteran initiatives.

Providing opportunities for students to integrate learning and doing through applied curriculum helps them discover their passion, leads to employment success and helps graduates develop transferable skills they can draw from throughout their lives.

Three schools comprise the College of Integrative Sciences and Arts:

CISA's School of Applied Professional Studies prepares students to be socially and environmentally mindful in high-demand, tech-forward careers in project management, user experience, organizational leadership and technical communication through industry-facing and career-connected learning methods, including research opportunities for every learner, virtual reality curriculum through Dreamscape Learn, industry networking and more. Aligning with ASU's top-ranked sustainability practices, the project management degrees are some of the few in the nation to be infused with sustainability curriculum via a partnership with Green Project Management.

CISA's School of Applied Sciences and Arts advances experiential and integrative learning, with a focus on applied sciences and mathematics, interdisciplinary humanities and social sciences. Degrees include applied biological sciences with pre-veterinary medicine and pre-dental concentrations — offered at just a handful of universities across the country — as well as a sustainable horticulture concentration. Other degrees include integrative social science, interdisciplinary studies, and science, technology and society, among others; and certificates in wildlife management and indoor farming. Boasting renowned faculty, the school offers an expansive and dynamic curriculum guided by a commitment to student success and career-connected outcomes.

CISA's School of Counseling and Counseling Psychology is nationally recognized for its research-based counseling psychology doctoral program and it is home to the first and largest bachelor's degree in counseling and applied psychological science in the country. The school prepares students to support diverse clients across a range of mental health settings, offering specialized concentrations in sport and performance counseling, substance use and addiction, and counseling for military members and veterans. It's one of the few schools in the nation to offer students the ability to study in the counseling field from the undergraduate level to an accredited PhD program. The on-campus Master of Counseling degree is accredited by the Masters in Psychology and Counseling Accreditation Council (MPCAC) — the only program in Arizona to hold this distinction.

The college is also home to ASU's **Office for Veteran and Military Academic Engagement**, a national leader in the emerging field of veteran studies. The Office for Veteran and Military Academic Engagement fosters a supportive and inclusive community for veterans and military-affiliated students through academics, research, events, networking opportunities and collaboration with academic, military and civilian communities. The office also joins forces with other like-minded agencies across ASU and in the greater community to address veteran issues such as physical and mental health, social connectedness, employment, education and homelessness.

RECESSIONAL

THE COLLEGE OF LIBERAL ARTS AND SCIENCES

As the academic heart of Arizona State University, The College of Liberal Arts and Sciences fosters unmatched access, educational excellence, and interdisciplinary inquiry to generate solutions for the changing world. Our diversity and dynamism ignite continued growth and development in any field of study, from space exploration and chemistry to history and justice studies, to create global citizens for the 21st century.

We unite our academic disciplines — the analytical ability of natural scientists, the creativity of humanities scholars and the curiosity of social scientists — to harness the power of our interdisciplinary nature. We encourage our students to follow their dreams, pursue their passions and accomplish their goals in order to create a better future for the next generation and beyond.

Our faculty personify a broad vision of legendary academic scholarship at the forefront of global innovation. They teach our scholars how to adapt to new challenges and a changing landscape so they're capable of tackling tomorrow's challenges with ease. Any institution of higher learning can train a student for a first job, but we'd rather create master learners who are equipped with the right knowledge and skills for a lifetime of success. The liberal arts and sciences remain the best foundation for successful careers and deeply rewarding personal and professional lives.

We transform learning, accelerate discoveries and change lives.

HONOR CORDS

Some of our undergraduate degree candidates wear maroon and/or gold honor cords. These cords designate students who have completed at least 56 resident credit hours at ASU and who have attained the following grade point averages:

Summa Cum Laude = Maroon and Gold cords, 3.80 to 4.0 GPA

Magna Cum Laude = Gold cord, 3.60 to 3.79 GPA

Cum Laude = Maroon cord, 3.40 to 3.59 GPA

EDSON COLLEGE OF NURSING AND HEALTH INNOVATION

The growth of the Edson College of Nursing and Health Innovation reflects our desire to do more, serve more and sustain innovation. Our mission drives us to offer the highest quality academic, research and clinical practice programs so that we prepare the next generation of evidence-based health professionals who will excel as clinicians, teachers, health advocates and researchers.

The challenges that permeate our health care system require innovative solutions that will positively impact patients and entire systems, locally and globally. Our curriculum and clinical experiences expose students to health delivery and research settings, equipping them with the tools and knowledge that unleashes their innovative thinking from day one. Interprofessionalism guides us as we build programs and curricula to meet the needs of future health professionals. Our graduate and undergraduate programs continue to expand with a focus on program design and delivery that prepares graduates to work collaboratively within complex and dynamic patient care and health delivery systems.

Our online programs continue to expand access to the highest quality education to deliver degree programs that ensure the rigor and quality that characterize the reputation of our programs.

ABOUT THE PhD PROGRAM

The PhD in Nursing and Healthcare Innovation is one of the few interdisciplinary programs in nursing and healthcare in the country, providing an enriching academic environment that fosters scholarship, critical thinking, and interprofessional collaboration. The PhD degree creates leaders in health science, health education and policy, and health innovation through preparation in the research skills necessary to generate, apply, and disseminate scientific knowledge.

ABOUT THE DOCTOR OF NURSING PRACTICE PROGRAM

The Doctor of Nursing Practice Program (DNP) is a practice-focused doctorate that prepares graduates to practice at the most advanced level of nursing. Graduates of this program apply and integrate research into practice and leadership using innovative approaches to improve health outcomes of populations, individuals, and organizations across various health care settings.

ABOUT THE DOCTOR OF PROFESSIONAL PRACTICE REGULATORY AND CLINICAL RESEARCH MANAGEMENT

The DPP in Regulatory and Clinical Research Management is the first-ever doctoral program that combines regulatory science with clinical research management. Graduates from this program have the knowledge and skills to navigate the complex global framework of pharmaceuticals and regulated medical devices to facilitate the discovery, development, evaluation, and approval of medical products to improve public health outcomes.

ABOUT THE MASTER OF SCIENCE IN NURSING PROGRAMS

ASU remains on the cutting edge in preparing nurse leaders and nurse educators for the 21st century. The MS in Nursing and MS in Nursing, Nurse Educator (NED) concentration prepares new and experienced nurses to meet the demands of the complex and changing healthcare environment. The Masters Entry to Nursing Practice (MEPN) prepares entry-level RN students at the graduate level to meet workforce demands in complex health systems.

ABOUT THE MASTER OF SCIENCE IN AGING

Graduates of this program have an advanced understanding of aging and specialized skills to improve outcomes. Graduates are prepared to advocate for older adults, educate others on age-inclusive practices, and drive change in how society supports aging populations through direct care and systems-level solutions.

ABOUT THE MASTER OF SCIENCE IN HEALTH CARE SIMULATION

Graduates of the MS Health Care Simulation are leaders in providing a simulated learning environment for health care providers. Through high-fidelity simulation with practice on manikins and standardized patient experiences, future providers

learn through real-life interactions. They possess the skills to design, develop, and conduct evidence-based health care simulation experiences that enhance the physical, procedural, and communication aspects of safe and quality patient care delivery that future nurses, physicians, and health care providers will experience in practice.

**ABOUT THE MASTER OF SCIENCE,
CLINICAL RESEARCH MANAGEMENT AND
THE MASTER OF SCIENCE, REGULATORY SCIENCE PROGRAMS**

The Master of Science in Clinical Research Management (CRM) prepares graduates to lead clinical research. Courses focus on the elements of leadership, operations of clinical research, data management, ethics, and quality. The Master of Science in Clinical Research Management (Regulatory Science) concentration and the Master of Science Regulatory Science prepares graduates for careers in regulatory aspects of development, approval and marketing of medical products and pharmaceuticals to ensure the safety and efficacy of new medical products, diagnostics and treatments.

ABOUT THE HEALTHCARE INNOVATION PROGRAM

The Master of Healthcare Innovation (MHI) program, the first in the country, is an interdisciplinary degree that prepares graduates to design, implement and lead transformation in health care. Participants in this program come from a wide variety of professions, from all over the world, all with an interest in leading innovation in health and health care. Graduates search for and implement sustainable solutions for today's health care issues with an eye to the future within an interdisciplinary environment.

ABOUT THE BACHELOR OF SCIENCE IN NURSING PROGRAM

The Bachelor of Science in Nursing (BSN) degree prepares professional nurses who possess the theoretical foundation and the clinical competence to provide nursing care across all health care settings. Graduates of ASU's nursing degree programs are prepared to respond to the vast and changing health care needs of individuals and communities.

ABOUT THE RN-BSN PROGRAM

The online RN-BSN program builds on the knowledge and skills the student attained in their associate degree or diploma program, especially in the areas of evidence based practice, leadership and management, and community/public health. The interactive course assignments enhance the student's written and verbal communication skills, clinical reasoning skills, teamwork, and information technology skills. Graduates will integrate new knowledge into their nursing practice.

ABOUT THE CONCURRENT ENROLLMENT PROGRAM

The Concurrent Enrollment Program (CEP) is designed for qualified nursing students who are interested in earning their BSN degree from ASU while simultaneously pursuing their Associate of Applied Science (AAS) in Nursing degree through a participating community college. The CEP is a rigorous program with a plan of study that enables students to build on the knowledge and skills learned in the AAS in nursing program.

ABOUT THE BACCALAUREATE HEALTH PROGRAMS

The Baccalaureate Health Programs consist of the Bachelor of Science degrees in Integrative Health, Community Health, Health Care Coordination, Health Entrepreneurship & Innovation, and Health Care Compliance and Regulations. Each of these degrees prepare graduates to be integral members of the health care team. Graduates are prepared to collaborate with individuals, families and communities regarding changes to the health care system. This includes health education, health promotion, care coordination, disease management, health care navigation, health innovation, health care compliance, and advocacy services as well as assisting patients in obtaining services, understanding policies, and making health care decisions.

**ABOUT THE GRACE CENTER FOR INNOVATION
IN NURSING EDUCATION**

The Grace Center facilitates over 150,000 student hours annually in experiential learning and community outreach across programs at Edson College. The Center's vision "Knowledge & Action Join as One" is enacted in person and through online resources. State-of-the-art technology and resources provide an effective learning environment for students to practice/master nursing skills and clinical decision making in a dynamic encounter using fully integrated informatics in a variety of healthcare settings while using learning management systems to empower reflective practice. Simulation is an evidenced-based innovation in healthcare education based on objectives guided preparation, and reflection to reinforce student self-discovery that translates to practice competencies.

ABOUT THE HERBERGER INSTITUTE FOR DESIGN AND THE ARTS

ASU’s Herberger Institute for Design and the Arts is one of the most comprehensive design and arts colleges in the country, built on a combination of disciplines unlike any other program nationally and located within a dynamic research university focused on transformative change. The Institute includes ASU FIDM and ASU FIDM Museum; the School of Art; The Design School; The Sidney Poitier New American Film School; The GAME School; the School of Music, Dance and Theatre; and the ASU Art Museum.

With more than 9,000 students, more than 600 faculty members, around 250 staff members, more than 135 program options and a tradition of top-ranked programs, we are committed to redefining the 21st-century design and arts school. The Institute develops and scales innovative ideas to help strengthen the role of designers and artists across all areas of society and culture and to increase the capacity of designers and artists to make a difference in their communities and in the world.

At the Herberger Institute, we believe:

- Design and the arts are not luxuries—they are essential forces with the transformative power of creativity to solve real-world challenges and transform society.
- In the age of AI, we are called to be more profoundly human—bringing empathy, imagination, and contextual thinking to the forefront.
- Creativity belongs to everyone—from every place and every background, at every age.

We are all of us being shaped and influenced today by some of the most powerful technologies of human expression. At the Herberger Institute, we are committed to ensuring that those technologies are directed toward human thriving and planetary resilience. We believe in creativity at social scale, meaning creativity that is accessible to all, connected to public purposes, and powered by ethical and life-centered technology.

The Institute operates online and across four cities—Tempe, Phoenix, Mesa and Los Angeles—with some of the best facilities for advancing in critical areas of the rapidly evolving creative economy. These areas include design, fashion, film, gaming, popular music, and, more broadly, AI and “extended reality,” which includes the study and creation of emerging media and immersive experiences.

We encourage all our alumni to continue to share their stories with us and to take an active role in the Herberger Institute Alumni Chapter. For more information on our alumni activities, please visit herbergerinstitute.asu.edu/alumni.

CLOSING

ENGINEERING AT ARIZONA STATE UNIVERSITY

The Ira A. Fulton Schools of Engineering is home to more than 400 tenured/tenure-track faculty members and nearly 33,000 students, making it the largest engineering school in the country. Today, more than 85,000 Fulton Schools alumni are advancing engineering and technology fields in Arizona and around the world.

At the Fulton Schools, we crafted a visionary blueprint for engineering education that fosters a transdisciplinary approach to teaching and research. The Fulton Schools offers 28 undergraduate and more than 50 graduate degree programs. In addition to online options for degree programs, the Fulton Schools also offers professional development trainings like Six Sigma.

The School of Biological and Health Systems Engineering prepares students to use biomedical and engineering principles to develop instrumentation, materials, diagnostic and therapeutic devices, artificial organs, and various other technologies. Our program produces graduates who excel at the intersection of biology, engineering and computing to advance human health and improve the overall quality of global health care.

The School of Computing and Augmented Intelligence is home to a broad range of computer- and data-related degree programs that offer a distinct perspective on the vast engineering and technology domains. We are exploring how computing, data analytics, cybersecurity, visualization, machine learning and augmented intelligence impact decision-making, creativity and responsible innovation in a modern, information-driven society.

The School of Electrical, Computer and Energy Engineering fosters collaboration among faculty, students and industry to address global challenges. Our research strengths and degree programs in artificial intelligence engineering computer engineering; data science, analytics and engineering; electrical engineering; and robotics and autonomous systems align with national and international priorities. We are also growing our expertise and collaborations to become a global hub for microelectronics engineering expertise.

The School for Engineering of Matter, Transport and Energy leverages the synergy of engineering and science to create innovative solutions to society's most pressing problems in energy, human health, environmental infrastructure and sustainability. Through our unique, interdisciplinary degree programs taught by world-class faculty, we have created a one-of-a-kind educational experience that prepares our graduates for myriad careers across a range of disciplines.

The School of Integrated Engineering is the newest school in the Fulton Schools and represents the first engineering presence on the ASU West Valley campus. Students will explore combinations of engineering, technology and science with other in-demand disciplines to create tailored degree pathways in business and microelectronics. Graduates will be able to conceptualize, build and deploy solutions by integrating diverse perspectives.

The School of Manufacturing Systems and Networks is at the leading edge of researching and developing solutions for next-generation manufacturing systems. With a research portfolio that is inherently transdisciplinary, collaborative and inclusive, students in the school are gaining knowledge and experience in manufacturing processes, computing technologies, data analytics and the management of distributed, digitally networked manufacturing resources.

The School of Sustainable Engineering and the Built Environment provides a nexus for education and research that addresses the critical infrastructure needs of our society in an environmentally sound manner. Our holistic approach covers the engineering expertise of civil, environmental and sustainable engineering; the design and construction principles of construction engineering; and the project management and leadership skills of construction management.

The Polytechnic School offers a wide range of engineering and technology-related degrees. It is home to advanced learning laboratories led by faculty members with deep expertise and industry experience. With an emphasis on hands-on, project-based learning, our programs are designed to equip students with the skills and experience they need to succeed in the workforce and respond to evolving technological advancements, industry needs and societal trends.

Ira A. Fulton

Chairman of the Board and CEO, Fulton Homes

In 2003, Ira A. Fulton, founder and CEO of Fulton Homes, established an endowment of \$50 million, resulting in the school being renamed in his honor. Dr. Fulton's gift has supported scholarships, fellowships, research programs and investments in faculty that have driven our mission and contributed to our success.

"With this endowment, we are building an engine of educational and economic growth that will endure for generations. It is a gift of opportunity, prosperity, social equality and hope." — Ira A. Fulton

**ABOUT MARY LOU FULTON COLLEGE
FOR TEACHING AND LEARNING INNOVATION**
Mission

ASU's Mary Lou Fulton College for Teaching and Learning Innovation creates knowledge, mobilizes people and takes action to improve education.

MLFC faculty create knowledge by drawing from a wide range of academic disciplines to gain insight into important questions about the process of learning, the practice of teaching and the effects of education policy.

MLFC mobilizes people through bachelor's, master's and doctoral degree programs, through non-degree professional learning programs and through socially embedded, multilateral community engagement.

MLFC takes action by bringing people and ideas together to increase the capabilities of individual educators and improve the performance of education systems.

MARY LOU FULTON (1933 – 2015)

Anyone fortunate enough to have known Mary Lou Fulton — to celebrate with her and take pride in students' accomplishments — is grateful to have had that privilege. So much of what we do at our college is an expression of her commitment to education and to providing the best possible opportunities for the greatest number of people.

RECESSIONAL**MESSAGE TO THE NEW COLLEGE GRADUATES**

Congratulations on your extraordinary achievement! The faculty and staff of New College offer our sincere best wishes for your continued personal and professional success. We all look forward to seeing your work in the world; we know you will make your mark as an ASU New College graduate.

ABOUT THE NEW COLLEGE

The New College of Interdisciplinary Arts and Sciences offers a nationally unique environment: a small college experience with the power of ASU’s major research university resources. Working one-on-one with our cutting-edge faculty—often through our New College Undergraduate Inquiry and Research Experience program (NCUIRE), our students reshape the boundaries of knowledge in their fields of study. This prepares them for a future of reshaping the world outside of ASU.

New College was founded on a “new” way of thinking about the academy. Instead of reproducing the intellectual silos that separate fields of study in other institutions, our programs have been structured on the notion that if we break down the barriers between fields, we can think in more innovative ways, do more path-breaking work, offer more effective solutions to real-world problems. From our Interdisciplinary Arts and Performance degree that teaches students many forms of artistic expression and then asks into what mode a concept should be born; to our Forensics degree that brings together fields including chemistry, psychology, and legal studies; to our Social Justice and Human Rights degree that explores sociological, historical, and contemporary cultural analyses of global issues, New College offers educational experiences that transcend more limited ways of thinking about the world.

ABOUT THE ROB WALTON COLLEGE OF GLOBAL FUTURES

Through hands-on, immersive learning experiences, the Rob Walton College of Global Futures equips students with the knowledge, skills and agency they need to tackle complex global challenges, preparing them for careers that drive meaningful impact.

The Rob Walton College of Global Futures advances solutions focused on planetary health through five schools: the Rob Walton School of Conservation Futures, the School for the Future of Innovation in Society, the School of Complex Adaptive Systems, the School of Ocean Futures and the School of Sustainability.

The Rob Walton College of Global Futures is part of the Julie Ann Wrigley Global Futures Laboratory®, the world's first comprehensive, university-based approach to ensuring a future where well-being is attainable for all of earth's inhabitants.

ABOUT THE ROB WALTON SCHOOL OF CONSERVATION FUTURES

The Rob Walton School of Conservation Futures aims to reshape conservation to achieve a world in which humans and nature are interconnected, fostering a regenerative environment where the diversity of life can thrive. The school transforms learning by applying multiple knowledge systems and building a global conservation community. The Rob Walton School of Conservation Futures will directly engage learners as doers — supporting real conservation projects and learning alongside local leaders.

With its transdisciplinary community of learners, employers, teachers, scholars and practitioners, the Rob Walton School of Conservation Futures will generate mindsets of optimism and agency, inclusivity and a renewed, reciprocal connection to nature.

ABOUT THE SCHOOL FOR THE FUTURE OF INNOVATION IN SOCIETY

When we innovate, are we thinking critically about social and technical systems in a way that anticipates potential concerns so that we can be confident that what we are creating is both useful and good for our global future?

The School for the Future of Innovation in Society envisions responsible innovation at scale. Our students anticipate societal challenges and work across disciplines to examine areas such as global technology and development, biomedical and health ethics, public interest technology and policies for emerging technologies. We are grounded in the belief that by considering the ways in which we translate imagination into innovation, engaging the public and exploring the social impacts of technological and scientific advancements, we collectively build more just and equitable futures for all.

ABOUT THE SCHOOL OF SUSTAINABILITY

School of Sustainability students, diverse in their backgrounds and interests, work with faculty and researchers toward a common goal: to foster innovative research, impactful education and engaged communities to achieve environmental integrity, social equity and well-being. Sustainability integrates social, economic and environmental dimensions to develop enduring and equitable solutions to global challenges.

Learning tracks within the school include energy and technology, international development, ecosystems management, urban dynamics, food systems, policy and governance, and sustainability leadership. Our curriculum is grounded in experiential learning and practical faculty-led research, equipping graduates of the School of Sustainability with the skills and tools to make positive impacts in a rapidly changing world.

ABOUT THE SCHOOL OF COMPLEX ADAPTIVE SYSTEMS

Uncertainty, scalability, thresholds, tipping points, path dependence...these are conditions that influence the most pressing issues facing societies across the globe. The School of Complex Adaptive Systems explores these challenges, develops solutions and suggests interventions that enhance the resilience and well-being of our planet and our shared global futures.

Our planet is the ultimate complex system with many intertwined subsystems that envelop natural, social and technological systems and transcend traditional disciplinary boundaries. This visionary school engages wide-ranging national and international collaborations to advance the exploration of these systems and disseminate fundamental transdisciplinary knowledge through a unique set of academic graduate offerings.

ABOUT THE SCHOOL OF OCEAN FUTURES

The School of Ocean Futures addresses the current and future states of the planet's largest biome – our oceans – by exploring and investigating the challenges they experience due to increasing pressure from human activities. The School of Ocean Futures links research and teaching facilities in the Pacific and Atlantic oceans with the cutting-edge research facilities on ASU's Tempe campus to provide students with a wide array of experiential learning opportunities that will prepare them to conduct work of significant impact.

ABOUT THUNDERBIRD SCHOOL OF GLOBAL MANAGEMENT

Thunderbird School of Global Management at Arizona State University cultivates visionary leaders who harness innovation and a global digital mindset to shape the organizations of the future. Committed to transforming leadership and management education, Thunderbird empowers professionals to drive sustainable prosperity in an increasingly interconnected world. As the premier institution for global leadership and management education, Thunderbird is more than just a school—it is a dynamic global network of leaders, managers, entrepreneurs, and intrapreneurs spanning both the private and public sectors.

For nearly 80 years, Thunderbird has been at the forefront of developing global leaders. Founded as the American Institute for Foreign Trade, Thunderbird was chartered on April 8, 1946, on the historic Thunderbird Field, a World War II airbase in Glendale, Arizona, where pilots from around the world once trained. General Barton Kyle Yount, recognizing the need for a school dedicated to international trade and global affairs, secured the airfield to fulfill this vision. Since its inception, Thunderbird has upheld a powerful guiding principle, best captured in the words of founding faculty member Dr. William Lytle Schurz: “Borders frequented by trade seldom need soldiers.”

As the world’s first higher education institution dedicated exclusively to international leadership, Thunderbird pioneered a curriculum integrating global management, international political economy, regional business environments, languages, and cross-cultural communication. Often described as a “mini-United Nations,” the school fosters a diverse and inclusive student body. Today, Thunderbird’s vast and influential alumni network includes nearly 50,000 graduates across 150 countries, with over 170 active alumni chapters in 70 nations.

In December 2014, Thunderbird became a part of the Arizona State University enterprise, blending its decades-long legacy of cultivating global leaders with ASU’s vast resources and commitment to innovation. In 2018, Thunderbird relocated to ASU’s vibrant Downtown Phoenix campus, uniting the world’s No. 1 ranked Master’s in Management (WSJ/THE) with the No. 1 university for innovation (U.S. News & World Report).

For the fourth consecutive year, Thunderbird has been recognized as the world’s top institution for international trade by Quacquarelli Symonds (QS), the global authority on higher education rankings. In its 2026 International Trade Rankings, Thunderbird secured the No. 1 spot ahead of esteemed institutions such as Columbia University, the University of Michigan–Ann Arbor (Ross), the University of North Carolina at Chapel Hill (Kenan-Flagler), the University of Oxford (UK), the University of Cambridge (UK), and the National University of Singapore. This prestigious recognition underscores Thunderbird’s unparalleled leadership in shaping the future of global commerce and diplomacy.

At the heart of Thunderbird’s transformation is the F. Francis & Dionne Najafi Thunderbird Global Headquarters, an ultramodern 110,000-square-foot facility on ASU’s Downtown Phoenix campus. Designed to integrate cutting-edge technology with immersive global learning, this state-of-the-art building serves as a launchpad for the next generation of global leaders.

Further extending its global reach, Thunderbird’s network of regional centers embodies its mission to advance global leadership and education. With over 15 dedicated regional representatives, Thunderbird maintains a strong presence through physical hubs in Phoenix, AZ (Global Headquarters); Geneva, Switzerland; Dubai, UAE; Seoul, South Korea; and Jakarta, Indonesia. Complementing these locations are virtual centers in Tokyo, Japan; Shanghai, China; Mumbai, India; Nairobi, Kenya; Amsterdam, Netherlands; London, United Kingdom; Mexico City, Mexico; Taipei, Taiwan; and Cairo, Egypt.

Additionally, Thunderbird’s partnership with Arizona State University extends its influence to the ASU California Center in Los Angeles and the Barrett & O’Connor Washington Center in Washington, D.C., reinforcing its commitment to shaping the future of global business leadership.

**WALTER CRONKITE SCHOOL OF
JOURNALISM AND MASS COMMUNICATION**

About the School

The Cronkite School is widely recognized as one of the nation's premier professional journalism and mass communication programs. Rooted in the time-honored values of accuracy, responsibility, fairness and integrity that characterize its namesake, the school fosters excellence and ethics among students as they master the practical skills they need to succeed in the world of today and tomorrow.

The Cronkite School's more than 2,500 students, consistently lead the country in national competitions. Over the past decade, Cronkite has been first in the nation in the Society of Professional Journalists' Mark of Excellence competition and the Broadcast Education Association's Festival of Media Arts awards, and has finished in the top 10 in the Hearst Journalism Awards each year.

Students are guided by a faculty made up of award-winning professional journalists, strategic communications executives and world-class media scholars. Cronkite professors include five Pulitzer Prize-winning journalists, digital media thought leaders, top TV producers and correspondents, major metropolitan newspaper editors and strategic communications experts. They are master teachers, writers and scholars at the forefront of society's most pressing communications challenges.

The Cronkite School leads mass communication education with its "teaching hospital" learning method, in which students prepare for meaningful careers in media through hands-on learning immersive experiences. Students cover public affairs and sports from news bureaus in Phoenix, Los Angeles and Washington, D.C., producing impactful digital coverage and a nightly newscast on Arizona PBS that reaches 1.9 million households across the state. They conduct national investigations in the Howard Center for Investigative Journalism, and produce multimedia projects on issues of national importance in the Carnegie-Knight News21 program. They create multilingual digital marketing and public relations campaigns in the Cronkite Agency; grow media brands in the Los Angeles Content Studio; create video content and motion graphics in the Video Production Lab; and use emerging media technologies to forge the future of journalism in the New Media Innovation and Entrepreneurship Lab. Each year, Cronkite students complete hundreds of internships across the media fields, engage in dozens of student media organizations and clubs, and travel the world to connect with communities and tell their stories.

Elsewhere at the school, the News Co/Lab advances media literacy through journalism, education and technology; the Donald W. Reynolds National Center for Business Journalism provides resources and training to professional journalists; and the National Center on Disability and Journalism provides support and guidance for journalists as they cover people with disabilities. And connecting communicators around the world is Cronkite Global Initiatives, which fosters international partnerships, travel, training and sharing among students, scholars and professionals.

ASU's investment in the school has garnered national and international attention from educators and media professionals who place the school in the top tier of all U.S. journalism schools, calling it a pioneer in shaping how news is delivered and how people will stay informed in the future.

The Cronkite School is supported by generous individuals, corporations and foundations seeking to help train the next generation of journalists and communication professionals at a pivotal moment of industry transformation and growth. To make a gift today, visit asufoundation.org/cronkite.

About Walter Cronkite

ASU's journalism program was named in honor of former CBS News anchor Walter Cronkite in 1984.

The relationship started when Tom Chauncey, longtime owner of the CBS affiliate in Phoenix and a leading supporter of journalism education at ASU, contacted his old friend in an effort to advance the program. An endowment on behalf of the program was soon established and the school was named after "the most trusted man in America."

Over the next quarter of a century, Cronkite lent much more than his name to the school. He was closely involved — advising leadership, guiding students and faculty, and traveling to Arizona each year to personally give the Walter Cronkite Award for Excellence in Journalism to one of the nation's top journalists. The most important relationship, though, was with "our students," as Cronkite would always call them. Young students, some with parents barely old enough to remember Cronkite behind the anchor desk, lit up when he walked into a classroom. They hung on his every word as he thoughtfully answered their questions about the profession he so loved. They lined up just to shake his hand, and he loved every minute of it.

In what turned out to be Cronkite's last visit to ASU in 2007 before declining health prevented him from traveling, a group of 100 students gathered with just a few minutes of notice that Cronkite was in the building. He held them spellbound as he spoke about covering World War II, Vietnam, Apollo, Watergate and presidents from Truman to Reagan — and of how important "our school" was to him. Although Cronkite died on July 17, 2009, before he was able to visit the new building, he remains an ever-present part of the school's spirit and mission.

About Our Graduates

The Cronkite School has about 16,000 alumni throughout the Valley, across the country and around the world. Many are leaders in television, digital media, newspapers, radio, magazines, public relations and digital marketing.

In 1993, the Cronkite School inducted its first class into the Cronkite Alumni Hall of Fame. The charter inductees were Al Michaels ('66), an Emmy Award-winning sports broadcaster best known for anchoring "Monday Night Football," and Bill Redeker ('71), an ABC News correspondent who covered the Middle East and the Far East during his 30 years with the network.

Other notable Cronkite Alumni Hall of Fame inductees include Matt Barrie ('01), anchor of SportsCenter and studio host of ESPN College Football; Nicole Carroll ('91), editor-in-chief of USA Today; Becky Anderson ('94), CNN International anchor; Julie Cart ('98), Pulitzer Prize-winning Los Angeles Times reporter; Derrick Hall ('91), president and CEO of the Arizona Diamondbacks; Christine Devine ('87), news anchor at FOX 11 in Los Angeles; Mary Kim Titla ('85), founder of Native Youth Magazine; Ray Artigue ('76), president of The Artigue Agency; and Chip Dean ('77), legendary director of ESPN's "Monday Night Football."

Stay connected to fellow #CronkiteNation alumni on LinkedIn, Facebook, Instagram and X (formerly Twitter).

RECESSIONAL**THE NATION’S LEADING
COMPREHENSIVE PUBLIC SERVICE COLLEGE**

The Watts College of Public Service and Community Solutions is a unique, comprehensive public service college dedicated to fully integrating teaching, research and service to address social problems.

**PREPARING PUBLIC SERVICE LEADERS FOR LIFELONG LEARNING,
EQUIPPED WITH TOOLS TO AFFECT CHANGE**

Our degree programs cover the spectrum of public service, including public policy, social work, criminology and criminal justice, nonprofit leadership, emergency management, community development, parks and recreation, and more.

A particular point of pride is that the Watts College student body is among the most inclusive at ASU, with high percentages of under-represented, college transfer and military veteran students—and one of the largest communities of first-generation college students. Many chose public service because of their own life experiences and firsthand understanding of systems that need improvement. Of equal importance is how this commitment translates into real impact for the communities to which students return.

**INTEGRATING TEACHING, RESEARCH AND SERVICE ROOTED IN
SOLUTIONS-BASED LEARNING**

From day one of their college experience, our students are immersed in hands-on learning through a signature solutions-based pedagogy. They are paired with community partners to tackle real-world problems—both an educational, and service-based experience—delivering more than 600,000 hours of community service each year.

**LEADING ASU SERVICE AND POLICY INITIATIVES TO CREATE
A MODEL OF A SERVICE-COMMITTED UNIVERSITY**

The college serves as a model for ASU’s commitment to service—leading university-wide initiatives such as spearheading the first-of-its-kind Public Service Academy, partnering with the Harvard Institute of Politics to increase civic participation through our Pastor Center for Politics and Public Service and leading AmeriCorps programs like Public Allies Arizona, Legacy Corps for Veterans, Safety Planning for Survivors of Domestic Violence and Corporation for National and Community Service Employment Outcomes.

**SOLVING PROBLEMS THROUGH COLLABORATION WITH
COMMUNITY PARTNERS ACROSS SECTORS**

The college brings collaborative ideas into action, working closely with hundreds of government, private and nonprofit partners locally and globally. Through our research and academic expertise, our research centers and offices, individual faculty members and cross-disciplinary teams all have an impact beyond dollars. They also produce training, policy guidance, best practices and direct service.

OUR SCHOOLS

The School of Community Resources and Development advances the social, economic, environmental and cultural well-being of our local and global communities through instruction, research and service. We provide nationally recognized interdisciplinary research expertise and innovative academic programs in nonprofit leadership and management, parks and recreation management, therapeutic recreation and tourism development and management.

The School of Criminology and Criminal Justice merges theory and practice. The core of our highly-ranked program—#2 overall by U.S. News & World Report—focuses on research, instruction and interdisciplinary approaches to major social issues that maximize community well-being and public safety.

The School of Public Affairs aims to understand society's grandest challenges in public management, policy and governance. We live the ASU Charter by preparing students and professionals for ethical, inclusive and effective public service; conducting cutting-edge research of public value; and engaging locally, nationally and internationally with the communities we serve. We are ranked consistently among the top 15 public affairs schools in the country with highly rated programs in local government management, emergency management and homeland security, nonprofit management, and public management and leadership.

The School of Social Work is one of the largest and most diverse social work programs in the U.S. We provide broad access to high-quality social work education, promote an inclusive learning community, conduct community-engaged and action-oriented research, and serve communities to advance social justice. Ranked among the top 20 social work schools nationwide by U.S. News & World Report, the school prepares social work practitioners, researchers and advocates to lead positive change in the Southwest, nationally and globally.

RESEARCH AND IMPACT

The College leads the university in the production of research that has system-wide and large-scale impact on myriad social, behavioral, economic and political challenges. Through rigorous applied research, we are developing solutions with the potential to better our response to pressing issues and positively impact our communities locally, nationally and globally.

RECESSIONAL

ABOUT THE W. P. CAREY SCHOOL OF BUSINESS

The W. P. Carey School of Business at Arizona State University is one of the highest-ranked and largest business schools in the United States. Recognized for excellence in business education, the school drives innovation and positively impacts management globally. Through access, excellence, and innovation in business knowledge, W. P. Carey is committed to transforming the world.

More than 25,000 students from over 120 countries attend the W. P. Carey School of Business, including around 8,000 online learners and 100+ doctoral candidates.

At W. P. Carey, every member of the community — on campus or worldwide — aspires to do great things for themselves and others. This promise is enshrined in the Carey Code, which encourages community members to contribute to our legacy and live our values of excellence, integrity, impact, and community; to demonstrate that business is personal by treating others with respect and kindness; to advocate for access and equal opportunity to create stronger organizations and inclusive societies; to embrace and exhibit ethical business practices; and to champion fellow Sun Devils and volunteer when and what we can to promote their success.

The W. P. Carey School boasts an acclaimed faculty of more than 300 esteemed tenure and tenure-track professors. Many faculty members are also on the editorial boards of academic journals and publications. The school is home to more than 25 research centers and labs, and a research institute, producing impactful research that supports academia and industry worldwide.

Both graduate and undergraduate programs are consistently ranked among the nation's best by *U.S. News & World Report*, with several in the Top 10.

Undergraduate students can pursue a Bachelor of Science degree in high-demand fields such as artificial intelligence in business, corporate accounting, entrepreneurial leadership, financial technology, and supply chain management. Additionally, Bachelor of Arts degrees are available in applied business and technology solutions, and entrepreneurial leadership, among many other areas of study.

At the graduate level, the school offers its renowned MBA in full-time, evening, online, and executive formats. Specialized master's programs include the first-in-the-nation Master of Science in Artificial Intelligence in Business (MS-AIB), as well as the school's innovative Master of Real Estate Development (MRED) and Master of Science in Supply Chain Management (MS-SCM) programs.

Doctoral degrees are also available across multiple disciplines, including a Doctor of Business Administration (DBA).

The W. P. Carey alumni network spans the globe. Our alums represent highly regarded companies from a wide range of industries, including manufacturing, technology, retail, banking, accounting, real estate, entertainment, and food, as well as entrepreneurial firms and respected nonprofit organizations.

DOCTOR OF PHILOSOPHY

- Khadiza Akhter Biochemistry**
Dissertation: Identification and Biogenesis of Fungal Telomerase RNA in the Basidiomycota Phylum
Chair: Julian J-L Chen, School of Molecular Sciences
- Saleh Ibrahim Alothman Civil, Environmental and Sustainable Engineering**
Dissertation: Enzyme-Induced Carbonate Precipitation (EICP) for Erosion Control in Sandy Soils with Fines: A Multi-Scale Experimental and LiDAR-Based Quantification Study
Co-Chairs: Claudia E. Zapata, School of Sustainable Engineering and the Built Environment; Edward Kavazanjian, School of Sustainable Engineering and the Built Environment
- Sulaiman Tareq Al Sultan Civil, Environmental and Sustainable Engineering**
Dissertation: Exploring the U.S. Construction Workforce: The Future of the Frontline Supervisor Role and Digital Marketing to Increase Undergraduate Enrollment
Chair: Kristen Parrish, School of Sustainable Engineering and the Built Environment
- Afua Adutwumwaa Ameley-Quaye Design, Environment and the Arts (Design)**
Dissertation: The Power of Place: Optimizing Early Childhood Learning Environments Through Pedagogical and Spatial Alignment
Chair: Renata Hejduk, The Design School
- Dilraba Anayatova Educational Policy and Evaluation**
Dissertation: Rural Kazakhstan as a Place of Learning with More-than-Human Worlds
Chair: Iveta Silova McGurty, Mary Lou Fulton Teachers College
- Mario Andres Apata Mamani Evolutionary Biology**
Dissertation: Ancient Genomics and the Molecular Mechanisms of the Human Arsenic Tolerance in Northern Chile
Co-Chairs: Anne C. Stone, School of Life Sciences; Melissa Wilson, School of Life Sciences
- Shiva Arabi Construction Management**
Dissertation: Leveraging Remote Sensing Technology and Advanced Computing Techniques to Support Operation and Maintenance of Infrastructure Systems
Chair: David Grau Torrent, School of Sustainable Engineering and the Built Environment
- Ciera Renee Arnett Psychology**
Dissertation: The Legal Intersection of Psychosis and Substance Use: A Mixed-Methods Investigation of Settled Insanity
Chair: William Robert Corbin, Psychology
- Siril Arockiam Biological Design**
Dissertation: Point of Care Diagnostics for Early Detection of HPV Driven Cervical and Oropharyngeal Cancer
Co-Chairs: Jennifer Mary Blain Christen, School of Electrical, Computer and Energy Engineering; Karen S. Anderson, Biodesign Institute
- Niyazi Ömer Arslan Speech and Hearing Science (Auditory and Language Neuroscience)**
Dissertation: Exploring the Influence of Neural Health on the Efficacy of Electrical Field Shaping Techniques in Cochlear Implant Recipients
Chair: Xin Luo, College of Health Solutions
- Dharanidharan Arumugam Civil, Environmental and Sustainable Engineering**
Dissertation: Interpretable and Efficient Data-Driven Models for Microstructural Characterization and Metal Fracture
Chair: Ravi Kiran Yellavajjala, School of Sustainable Engineering and the Built Environment
- Usama Awais Electrical Engineering**
Dissertation: Power Delivery and Voltage Regulation for Neuromorphic Computing Architectures Including in Memory Compute RRAMs
Co-Chairs: Bertan Bakaloglu, School of Electrical, Computer and Energy Engineering; Jae-Sun Seo, School of Electrical, Computer and Energy Engineering
- Rohan Antonio Bando, Jr. Microbiology**
Dissertation: Analysis of Diverse DNA Viruses in Honeybees and Opportunistically Sampled Insects
Chair: Arvind Devshi Varsani, Biodesign Institute
- Izak Josef Baranowski Electrical Engineering**
Dissertation: Hot Carrier Solar Cells: Simulating Effect of Hot Phonons on Carrier Thermalization
Co-Chairs: Dragica Vasileska, School of Electrical, Computer and Energy Engineering; Stephen Marshall Goodnick, School of Electrical, Computer and Energy Engineering
- Kasturi Barkataki Mathematics**
Dissertation: Novel Measures of Entanglement of Collections of Open Curves in 3-Space and Their Applications
Chair: Eleni Panagiotou, School of Mathematical and Statistical Sciences
- Samantha Rae Bean Law and Psychology**
Dissertation: No Numbers, No Problem? How Mock Jurors Award Noneconomic Damages With and Without Numeric
Co-Chairs: Jessica Salerno, New College of Interdisciplinary Arts and Sciences; Nicholas Duran, School of Social and Behavioral Sciences
- Robert Jacob Bischoff Anthropology**
Dissertation: Evaluating the Relationship Between Material Culture and Social Networks in Archaeology
Chair: Matthew Allen Peebles, School of Human Evolution and Social Change
- Austin Joy Blake Psychology**
Dissertation: Estimating the Impact of Out-of-Home Placement on Health Risk Behavior in Adolescents Exposed to Maltreatment: An Advanced Causal Inference Approach
Chair: Laurie Chassin, Psychology
- Tanya L. Burgess Social Work**
Dissertation: A Study in Generativity: Exploring Care Values in Aging Black Women
Chair: Elizabeth Lightfoot, School of Social Work
- Logan Bussey Law and Psychology**
Dissertation: The Effects of Fault Recommendations on Juror Verdict Decisions in a Civil Trial
Co-Chairs: Laura Ashley Heidrick, School of Interdisciplinary Forensic; Nicholas Schweitzer, Psychology
- Fulin Cai Computer Engineering (Computer Systems)**
Dissertation: Advanced Deep Learning Approaches for Enhanced Disease Monitoring and Diagnosis Using Biomedical Signal Data
Chair: Teresa Wu, School of Computing and Augmented Intelligence
- Si Arnegard Cave Molecular and Cellular Biology**
Dissertation: Asperous Governs the Timing of Tissue Repatterning During Regeneration by Modulating Damage-induced WNT Signaling
Chair: Robin Eastwood Harris, School of Life Sciences
- Ana Silvia Cervantes Figueroa Spanish Literature and Culture**
Dissertation: Brujas Modernas: Reivindicación Feminista de la Bruja en la Literatura Contemporánea Escrita por Mujeres en Argentina, México y Estados Unidos
Chair: Emil Volek, School of International Letters and Cultures
- Saraching Chao Speech and Hearing Science (Auditory and Language Neuroscience)**
Dissertation: Neural Signatures of Auditory Error Detection and Evaluation
Chair: Ayoub Daliri, College of Health Solutions
- Yitao Chen Computer Engineering (Electrical Engineering)**
Dissertation: Optimizing Edge Machine Learning for Real-world Resource and Data Constraints
Chair: Ming Zhao, School of Computing and Augmented Intelligence
- Sindhu Chennupati Speech and Hearing Science**
Dissertation: South Asian Parent-Child Shared Reading Intervention
Co-Chairs: Maria Adelaida Restrepo, College of Health Solutions; Neelima Wagley, College of Health Solutions
- Summer Lynne Nicole Cliff Geography**
Dissertation: Mapping Flood Resilience: Spatial Data Science, Policy Attention, and the Exposure of Businesses to Flooding in the United States
Co-Chairs: Dylan Shane Connor, School of Geographical Sciences and Urban Planning; Sara Anne Meerow, School of Geographical Sciences and Urban Planning
- Sudipta Das Mathematics**
Dissertation: Asymptotic Colength for Families of Ideals and Summation Formula for Rational Powers
Chair: Jonathan de Jesus Montano Martinez, School of Mathematical and Statistical Sciences
- Saikat Dey Systems Engineering**
Dissertation: Modeling, Switching Modulation Optimization, and Control of Multi-Active Bridge Converters
Chair: Ayan Mallik, Ira A. Fulton Schools of Engineering
- Shammi Akter Doly Electrical Engineering**
Dissertation: Adaptive Waveform Co-design for Integrated Sensing and Communication (ISAC)
Chair: Daniel Wesley Bliss, School of Electrical, Computer and Energy Engineering
- Xiaomeng Duan Materials Science and Engineering**
Dissertation: Group V Diffusion Doping in CdSeTe Thin Film Solar Cells
Chair: Feng Yan, School for Engineering of Matter, Transport and Energy
- Gerald Parker Eastwood Criminology and Criminal Justice**
Dissertation: How do Practitioners Determine if a Youth Knows the Difference Between Right and Wrong? An Analysis of California's Penal Code 26
Chair: Henry Fradella, School of Criminology and Criminal Justice
- Katherine E. Elder Astrophysics**
Dissertation: Investigating and Modeling Instrumental Systematics in Radio Telescopes
Chair: Daniel C. Jacobs, School of Earth and Space Exploration

 Dissertation: *Oscillations in a Computational Subcircuit Model of the Rodent Olfactory Bulb*
 Chair: *Sharon Crook, School of Mathematical and Statistical Sciences*

Stephanie Ann Sparks *Geological Sciences*
 Dissertation: *From Assumption to Exhumation: Evaluating Sensitivity in Thermal-Kinematic Models Using Statistical Design of Experiments*
 Chair: *Kip Vernon Hodges, School of Earth and Space Exploration*

Amitesh Sridharan *Computer Engineering (Electrical Engineering)*
 Dissertation: *Compute-in-Memory Circuits and Architectures for Efficient Acceleration of AI and Data Centric Workloads*
 Chair: *Deliang Fan, School of Electrical, Computer and Energy Engineering*

David Aaron Stinson *Human Systems Engineering*
 Dissertation: *Do Interruption Types Matter: Investigating Performance Gains With Trust Advantages Within Teams*
 Chair: *Erin Kai-Ling Chiou, Ira A. Fulton Schools of Engineering*

Keith Alan Swisher *Philosophy*
 Dissertation: *The Rise of Legal Machines and the Transcendence of Human Ethics*
 Chair: *Nestor Angel Pinillos, School of Historical, Philosophical and Religious Studies*

Neelakshi Rajeev Tewari *Educational Policy and Evaluation*
 Dissertation: *Home and The World: Navigating Internationalization in Indian Higher Education*
 Co-Chairs: *Maria Teresa Tatto, Mary Lou Fulton Teachers College; Sherman J. Dorn, Mary Lou Fulton Teachers College*

Sunil Tiwari *Molecular and Cellular Biology*
 Dissertation: *Phycocyanin Production, Thermostability, Regulation, and Adaptive Laboratory Evolution in Cyanobacteria*
 Chair: *Willem F.J. Vermaas, School of Life Sciences*

Kelsey Tom *Criminology and Criminal Justice*
 Dissertation: *Thriving, Not Surviving: Refocusing Juvenile Justice Assessments and Strategies*
 Chair: *Adam DuPree Fine, School of Criminology and Criminal Justice*

Bogoljub Trickovic *Evolutionary Biology*
 Dissertation: *The Costs of Organismal Coverings Across the Tree of Life*
 Chair: *Michael Lynch, Biodesign Institute*

Rana Natasha Goble Uhlman *Psychology*
 Dissertation: *Effects of the Family Bereavement Program on Intrusive Grief Six Years Later: Understanding Individual and Environmental Processes of Change*
 Chair: *Sharlene Wolchik, Psychology*

Pilar Carmela Vergeli *Geological Sciences*
 Dissertation: *Planetary Ecology: Quantitative Insights on Element Constraints Across Scales for Life Detection*
 Co-Chairs: *Ariel David Anbar, School of Earth and Space Exploration; Sara Walker, School of Earth and Space Exploration*

Akshatha K. Vydula *Astrophysics*
 Dissertation: *Exploring the Fundamental Physics of the Universe Across Dynamic Scales*
 Chair: *Judd David Bowman, School of Earth and Space Exploration*

Sara Diana Walton *Neuroscience*
 Dissertation: *The Effect of Parkinson's Disease Co-pathologies and Glucocerebrosidase Mutation in Non-Human Primate and Murine Models of Parkinson's*
 Chair: *Jeffrey Harlan Kordower, School of Life Sciences*

Chao Wang *Molecular and Cellular Biology*
 Dissertation: *Development of a Novel Antibody Drug Conjugate for Cancer Treatment*
 Chair: *Douglas Fletcher Lake, School of Life Sciences*

Thomas E. Ware III *Business Administration (Computer Information Systems)*
 Dissertation: *Convergent Adaptation: Human-Machine Interactions as Structurally-Embedded Sociotechnical Processes*
 Chair: *Raghu Santanam, W. P. Carey School of Business*

Katelyn Marie Weeks *Biochemistry*
 Dissertation: *The Form That Feeds: Chemical Speciation-Informed Energy Supplies and Micronutrient Availability in Hydrothermal Ecosystems*
 Co-Chairs: *Elizabeth Trembath-Reichert, School of Earth and Space Exploration; Everett Shock, School of Earth and Space Exploration*

- Monica Michelle Welfert *Computer Engineering (Electrical Engineering)*
 Dissertation: *Adversarial Approaches for Generating Synthetic Data and Evaluating Fairness and Inference Risks*
 Chair: Lalitha Sankar, School of Electrical, Computer and Energy Engineering
- Julianne Windham *Political Science*
 Dissertation: *Restrictions on Civil Society: A Closer Look at Strategy and Decisions to Repress*
 Chair: Thorin Wright, School of Politics and Global Studies
- Stevie Renee Winingear *Anthropology*
 Dissertation: *Interdisciplinary Genomics Research in Life and Social Sciences*
 Chair: Anne C. Stone, School of Life Sciences
- Lauren Joy Winn *Counseling Psychology*
 Dissertation: *Impacts of Social Disruptions Amongst the AfroLatinx Population in the U.S. During COVID-19*
 Chair: Cristalis Capielo, School of Counseling and Counseling Psychology
- Gde Bimananda Mahardika Wisna *Physics*
 Dissertation: *Interactions and Dynamics of Synthetic DNA Systems under Complex Tension*
 Chair: Rizal Fajar Hariadi, Physics Department
- Wei Wu *East Asian Languages and Civilizations (Chinese)*
 Dissertation: *The Visible and the Invisible: Li Deyu (787-849) as Scholar-Official and Daoist Priest*
 Chair: Stephen R. Bokenkamp, School of International Letters and Cultures
- Xueting Wu *Design, Environment and the Arts (Design)*
 Dissertation: *Training Non-Professional Designers to Design: Competency, Practice, and Mindset*
 Chair: German Mauricio Mejia Ramirez, The Design School
- Wenjun Xiang *Materials Science and Engineering*
 Dissertation: *Stability Improvement of Perovskite Solar Cells Via Device Engineering*
 Chair: Feng Yan, School for Engineering of Matter, Transport and Energy
- Haozhen Xu *Statistics*
 Dissertation: *Power Analysis in Quadratic Growth Curve Mixed Models with Three-Level Data*
 Chair: Mark R. Reiser, School of Mathematical and Statistical Sciences
- Guangting Yu *Applied Mathematics*
 Dissertation: *Machine Learning Methods for Mathematical Models Neural Network and Gaussian Process Based PDE Solvers Forward and Inverse Problems in Numerical Solutions to PDEs*
 Co-Chairs: Kookjin Lee, School of Computing and Augmented Intelligence; Shiwei Lan, School of Mathematical and Statistical Sciences

- Yilei Yu *Geographic Information Science*
 Dissertation: *Spatial Data Science for Natural Hazards and the Built Environment*
 Chair: Dylan Shane Connor, School of Geographical Sciences and Urban Planning
- Mehrnoosh Zaeifi *Computer Science*
 Dissertation: *Cybersecurity and Semantic Interoperability: Advancing Ontology Alignment in Cybersecurity Ecosystems*
 Chair: Srividya Kona Bansal, School of Computing and Augmented Intelligence
- Mikhail B. Zaikovskii *Linguistics and Applied Linguistics*
 Dissertation: *Prejudice, Transformative Learning, and Attitudinal Change: A Corpus-Assisted Discourse Analytic Study*
 Co-Chairs: Karen Lee Adams, English; Matthew T. Prior, English
- Shasha Zhang *Human Systems Engineering*
 Dissertation: *The Effects of Self-Regulated Learning Guidance in an e-Textbook*
 Chair: Scotty Dale Craig, Ira A. Fulton Schools of Engineering
- Yifan Zhao *Exploration Systems Design (Instrumentation)*
 Dissertation: *Novel Astronomical Instrumentation and Calibration Techniques for Studies of the Epoch of Reionization and of Trojan Asteroids*
 Chair: Daniel C. Jacobs, School of Earth and Space Exploration
- Wenqi Zheng *Design, Environment and the Arts (Design)*
 Dissertation: *Design Facilitation of Co-Design in the Industry*
 Chair: German Mauricio Mejia Ramirez, The Design School
- Yanqu Zheng *Community Resources and Development*
 Dissertation: *Guanxi as an Agent of Community Participation, Tourism Governance and Sustainability: A Case Study of the Gateway Ethnic Community Adjacent to Hainan Tropical Rainforest National Park*
 Chair: Kelly Bricker, School of Community Resources and Development
- Junmin Zhong *Electrical Engineering*
 Dissertation: *Reinforcement Learning Control: Real World Challenges and Solutions*
 Chair: Jennie Si, School of Electrical, Computer and Energy Engineering
- Siqiong Zhou *Industrial Engineering*
 Dissertation: *Efficient and Interpretable Decision-Making in Uncertain Environments via Intelligent Sampling*
 Chair: Ashif Iqbal, School of Computing and Augmented Intelligence

DOCTOR OF EDUCATION

- Trovana Amanda Azeez *Leadership and Innovation*
 Dissertation: *Navigating Leadership Critical Experiences of Established and Emerging Female Administrative Leaders at the University of Roraima*
 Chair: Sherman J. Dorn, Mary Lou Fulton Teachers College
- Chonsej Pierre Pogue *Leadership and Innovation*
 Dissertation: *Shifting TPACK in Preservice Teachers at Arizona State University (ASU)*
 Chair: Punyashloke Mishra, Mary Lou Fulton Teachers College
- Christine Cecelia Chowargir *Leadership and Innovation*
 Dissertation: *Building Organizational Capacity: Graduates' Performance in the Workplace a Pilot Graduate Tracer Study of the University of Guyana*
 Chair: Sherman J. Dorn, Mary Lou Fulton Teachers College

DOCTOR OF MUSICAL ARTS

- Wesley Glenn Skinner *Music (Performance)*
 Dissertation: *Dressed Down, not Dumbed Down: Attracting New Audiences to Classical Music*
 Chair: Thomas Landschoot, School of Music, Dance and Theatre

DOCTOR OF NURSING PRACTICE

- Michelle Thuy Van—*Advanced Nursing Practice (Family Nurse Practitioner)*

The Moeur Award is Arizona State University's oldest, continuing honor. It was established in 1901 by Dr. Benjamin B. Moeur and Honor Anderson Moeur, and is now sponsored annually by the Arizona State University Alumni Association. The award is presented at each Commencement ceremony to those individuals who have attained the highest academic standing in any four-year curriculum during their undergraduate years at ASU. All courses of the curriculum must be completed at ASU.

**THE ARIZONA STATE UNIVERSITY
MACE AND PRESIDENT’S CHAIN OF OFFICE**

In Medieval times, a mace was a hand-to-hand combat weapon. In about the year 1400 A.D., a mace evolved from a weapon to a ceremonial instrument used by academicians in rituals such as commencement and inaugurations. The oldest known ceremonial mace was that of the Faculty of Common Law of St. Andrew University in Scotland, used in 1438.

The Mace and Chain of Office are presented only at ceremonies in which faculty members are in full academic regalia, such as the Inauguration of the ASU President, University Commencement, Faculty Assemblies, Regents’ and President’s Professor Induction Ceremonies and Convocation.

The Mace is carried at the head of the procession and laid in a cradle, thus signifying the formal onset of the ceremony.

ASU’s ceremonial mace and chain of office was created in observance of ASU’s Centennial in 1985. Handcrafted by ASU Professor of Art, David Pimentel (1943-2004), the mace and chain was created with “austere elegance and traditional southwestern motifs.” In keeping with these directions, Professor Pimentel constructed both items out of materials native to Arizona. The ASU Mace is a wood staff, approximately three and a half feet long, weighing eight pounds and made of hollowed and polished Mesquite.

The head of the ASU Mace has four sterling silver blades and is banded with copper, Morenci turquoise, and a silver ring on which the words Arizona State University are embossed. The turquoise inlay was cut and polished by Navajo jeweler Richard Charlie of Mesa. The ASU seal is embossed in silver on the heel of the mace.

The President’s Chain of Office includes a silver rope woven from strands of hand-turned links, which holds a medallion six inches in diameter that reverses to reveal the ASU seal in gold on one side and the same in silver and turquoise on the other.

COLLEGE MARSHALS FALL 2025

College Marshals consist of selected faculty members from each college at all ASU campuses. Selection criteria is left to the individual colleges, but faculty who have recently won awards or have received special recognition are given primary consideration.

Barrett, The Honors College — Dr. Lisa Meloy is a valuable member of the Barrett Honors community. Dr. Meloy is deeply engaged within and beyond the classroom, by designing and leading a Global Intensive Experience in Ireland, teaching in the Barrett Summer Scholars program, and advising the award-winning student publication *Normal Noise*. Her mentoring efforts are impactful for our students and her service work contributes to making our college more accessible, inclusive and innovative.

College of Health Solutions — Kristin Hoffner, College of Health Solution’s Assistant Dean of faculty success and professor of kinesiology, was recognized for her exceptional dedication to student-centered learning and experiential education as the 2025 recipient of ASU’s Founders’ Day Faculty Teaching Achievement Award. Her innovative teaching practices foster curiosity, connection, and purpose, inspiring students to engage deeply with their studies and communities. Through mentorship and creativity, she empowers learners to become compassionate, solutions oriented leaders who embody the ASU Charter in action.

College of Integrative Sciences and Arts — Kelsey Lyberger is an Assistant Professor in the College of Integrative Sciences and Arts. She received her PhD in Population Biology from the University of California, Davis. Her research examines how rapid evolution and species interactions shape adaptation and persistence in response to climate change. Using field studies, laboratory experiments, and mathematical modeling, she investigates how ecological and evolutionary processes influence species’ responses to disturbance and the transmission dynamics of vector-borne and neglected tropical diseases.

The College of Liberal Arts and Sciences — Brendan H. O’Connor is a professor in the School of Transborder Studies. A linguistic anthropologist of education, he is the author of *Multilingual Baseball* and co-author of *Everyday Futures*. He received the 2025 Zebulon Pearce Distinguished Teaching Award in Social Sciences from The College of Liberal Arts and Sciences.

Edson College of Nursing and Health Innovation — Alyssa Robillard, PhD, MCHES is an Associate Professor at the Edson College of Nursing and Health Innovation. Her research and teaching focuses on novel strategies to promote community health. Her work is grounded in community engagement, as evidenced by her work to build community-academic partnerships as a founding member of the HIV Equity Research Core (HIVE) based in Edson College. Her research

examines story-based interventions to prevent HIV and address quality of life for those affected by HIV. As a teacher and mentor, she encourages students to think critically, ask questions, and believe in their ability to make a meaningful impact on the world. Dr. Robillard holds a BS (Biology) from Xavier University of Louisiana, and an MSPH (Health Behavior) and PhD (Health Education and Health Promotion) from the University of Alabama at Birmingham School of Public Health.

Herberger Institute for Design and the Arts — Elina Ollila is a seasoned expert in user experience design, game development, and launching and scaling entertainment products to reach millions of consumers. Over her career, she has held leadership roles at global companies such as Nokia, Daybreak Games, and Live Current Media, driving advancements in UX, game design, and games user research. Her contributions have shaped iconic games like H1Z1, a pioneer in defining the Battle Royale genre, and Candy Crush Saga, which she helped launch on mobile before it became a global phenomenon. As an early trailblazer in mobile gaming, she worked with renowned companies like Rovio, Digital Legends, and Sulake to elevate industry standards and align mobile game development with best practices in the broader video game industry. Over the last year, she has developed the ASU Games Community of Practice, which convenes interested faculty, staff and students at ASU, with industry professionals, and alumni who are exploring, researching, or creating games. This has led to increased collaboration opportunities, interest in research projects, access to game studio internships, connections to student clubs, and further development of upcoming academic programs in Game Design and more.

Ira A. Fulton School of Engineering — Barbara Smith, an associate professor of biomedical engineering in the Ira A. Fulton Schools of Engineering at ASU, received the Presidential Early Career Award for Scientists and Engineers, or PECASE, the highest honor bestowed by the U.S. government to outstanding early-career researchers in science and engineering. Smith is developing optical technology to monitor neural activity at the cellular level. The integrated optical systems can identify cellular subtypes at depths beyond the optical limit of diffusion. Smith's work also delves into understanding ALS, by analyzing biomarkers through a systems biology approach to identify markers of neurological diseases better.

Mary Lou Fulton Teachers College — Steve Zuiker is an associate professor of learning sciences in the Division for Advancing Education Policy, Practice, and Leadership. His research explores how learning environments—such as school gardens and video games—can connect classrooms, communities, and educational research. Through design-based research in K–12 science education, he develops systems and tools that help students engage meaningfully with science using digital technologies. Dr. Zuiker also examines how educational research itself functions as a system of learning and teaching, focusing on how digital tools can strengthen collaboration and shared understanding among educators, researchers, and students.

New College of Interdisciplinary Arts and Sciences — Dr. Katelyn Bolhofner is an Assistant Professor of Forensic Anthropology in ASU's School of Interdisciplinary Forensics and Director of the Forensic Anthropology and Bioarchaeology Laboratory, ASU. A Diplomate of the American Board of Forensic Anthropology, her work explores how skeletal biology reflects social identity, health, and human interactions in both historical and archaeological contexts. She is the PI of an NIJ-funded, multi-agency interdisciplinary project advancing skeletal trauma analysis to improve diagnostics addressing rising rates of elder abuse. Dr. Bolhofner's research appears in leading journals, is internationally presented, and is supported by major grants from NIJ, NSF, and the Wenner-Gren Foundation.

Rob Walton College of Global Futures — Dr. Laura Hosman is Associate Professor at Arizona State University, holding a joint appointment in the College of Global Futures (School for the Future of Innovation in Society) and the Ira A. Fulton Schools of Engineering. She is also co-founder and co-director of SolarSPELL, an offline solar-powered digital library and information literacy initiative designed for low-resource locations globally that may lack access to books, libraries, and internet connectivity. After winning “Best in Show” at the South by Southwest (SXSW) Innovation Awards earlier this year, SolarSPELL was recently named to TIME's 2025 Best Inventions list.

Thunderbird School of Global Management — Euvin Naidoo serves as Distinguished Professor of Global Accounting, Risk and Agility at the Thunderbird School of Global Management and Faculty Chair of the Curriculum and Learning Committee. In 2024 he received the Case Centre's Outstanding Case Teacher award, aimed at honoring the world's most innovative graduate-level management educators. In December 2025 he was named to Poets&Quants' annual “50 Best Undergraduate Business School Professors” list. Beyond accounting, he leads programs at the frontier of management, including “AI, Chip Strategy and the Future of Work,” focused on preparing leaders to tackle change and transformation in the intelligent age.

Walter Cronkite School of Journalism and Mass Communication — Erin Coyle is an associate professor of media law and the First Amendment in the Walter Cronkite School of Journalism and Mass Communication. Coyle's experience as a journalist inspired her interests in researching and teaching about journalism, mass communication law, and media history. Her research focuses on First Amendment rights, privacy rights, fair trial rights, and journalists' rights to access to government information and officials. Her scholarship is published in top peer-reviewed journals. She recently received a New York Public Library 2025-2026 Short-Term Research Fellowship. In 2023, she received the American Journalism Historians Association National Award for Excellence in Teaching.

Watts College of Public Service and Community Solutions — Roni Fraser is an Assistant Professor in the School of Public Affairs and a faculty affiliate of the Center for Emergency Management and Homeland Security. Her research as a disaster sociologist examines emergency management policy, maternal-infant health in crises, disaster volunteerism, and mental well-being post-hazard events. She collaborates with U.S. emergency management agencies at various levels. She was among 40 emergency managers from the U.S. and around the world selected for the International Association of Emergency Managers' 40 Under 40 awards. Dr. Fraser holds a PhD Sociology from the University of Delaware.

W. P. Carey School of Business — Dr. Scott Webster, Bob Herberger Arizona Heritage Chair and Professor of Supply Chain Management at W. P. Carey School of Business, is recognized for his research on pricing, inventory, and supply chain challenges in agriculture and nonprofit sectors. His work has advanced the understanding of risk management and sustainable supply strategies. A dedicated educator, Dr. Webster teaches graduate courses and has earned accolades for both research excellence and teaching impact. Most recently, he received the 2024 Transportation Science & Logistics Society Award for his research on delivery optimization and was inducted as a Fellow into the Production and Operations Management Society.

HISTORY OF THE ACADEMIC COSTUME

The present-day academic costume seemingly originated at Oxford and Cambridge Universities in the 1300s. As the universities passed from ecclesiastical control, brighter colors distinguished the academic robe from the drab clerical gown. Colonial American universities based their academic regalia on the British system.

In the 1880s, a student movement centering in New England investigated the establishment of a “senior badge,” to improve commencement week exercises and revive the traditions of university life. In 1893, an intercollegiate commission established a uniform code for caps, gowns and hoods for the various degrees.

Of the costume's three components, the hood is the most interesting. Originally it had three uses: as a head covering, as a shoulder cape, and as a bag in which alms could be collected. It is mentioned as early as 1480 in clerical literature. When large wigs were in vogue in Britain, the cape part of the hood was split in front and a narrow neckband inserted. The entire cape and hood was allowed to fall back as it is today, and it was never restored to the original style.

Following is a list of the hood and tassel colors established by the Intercollegiate Code to represent departments of learning:

Architecture	Blue-Violet
Agriculture	Maize
Arts, Letters, Humanities	White
Business Administration, Commerce, Accountancy	Sapphire Blue
Dentistry	Lilac
Economics	Copper
Education	Light Blue
Engineering	Orange
Fine Arts	Brown
Forestry	Russet
Home Economics	Maroon
Journalism	Crimson
Law	Purple
Library Science	Lemon
Medicine	Green
Music	Pink
Nursing	Apricot
Oratory (Speech)	Silver Gray
Pharmacy	Olive Green
Philosophy	Dark Blue
Physical Education	Sage Green
Public Administration, including Foreign Service	Peacock Blue
Public Health	Salmon Pink
Science	Gold-Yellow
Social Science	Citron
Theology or Divinity	Scarlet
Veterinary Science	Gray

Black tassels are correct for all degrees,
and colored tassels are worn only by preference.
Gold metallic tassels may be worn by doctors or presidents of universities and colleges.
