

ARIZONA STATE UNIVERSITY
COMMENCEMENT
AND
CONVOCATION
PROGRAM

Fall 2015

December 14-16, 2015

**THE NATIONAL ANTHEM
THE STAR SPANGLED BANNER**

O say can you see, by the dawn's early light,
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars through the perilous fight
O'er the ramparts we watched, were so gallantly streaming?
And the rockets' red glare, the bombs bursting in air
Gave proof through the night that our flag was still there.
O say does that Star-Spangled Banner yet wave
O'er the land of the free and the home of the brave?

**ALMA MATER
ARIZONA STATE UNIVERSITY**

Where the bold saguaros
Raise their arms on high,
Praying strength for brave tomorrows
From the western sky;
Where eternal mountains
Kneel at sunset's gate,
Here we hail thee, Alma Mater,
Arizona State.
—Hopkins-Dresskell

MAROON AND GOLD

Fight, Devils down the field
Fight with your might and don't ever yield
Long may our colors outshine all others
Echo from the buttes, Give em' hell Devils!
Cheer, cheer for A-S-U!
Fight for the old Maroon
For it's Hail! Hail! The gang's all here
And it's onward to victory!

Students whose names appear in this program
have completed degree requirements.

MISSION STATEMENT

UNIVERSITY COMMENCEMENT

University Commencement represents the culmination of a student's academic achievement.

It is a time of celebration and reflection for students, families, friends, faculty and staff.

It brings together a diverse community to share in the joy of accomplished goals.

Arizona State University continually demonstrates its dedication to efficiency, technology and sustainability. The full University Commencement program was made available to graduates on a reusable external flash drive in December of 2015. This change aligns with our growing institutional efforts to enhance sustainability practices, and our broader endeavors to employ technology in heightened service to our students.

The reusable external flash drive, combined with the abridged program, resulted in a 3.2 million page reduction in the amount of printed materials distributed at graduation ceremonies over three days of graduation activities.

HISTORY OF HONORARY DEGREES

Harvard was the first university to confer honorary degrees in 1692. Since then it has become a recognized function of degree granting institutions. Honorary degrees are an opportunity for universities to single out people who have made contributions to society. At ASU, honorary degree recipients are nominated by faculty members. The six-member Academic Affairs Honorary Degrees Committee reviews faculty nominations for the Honorary Degree. It then recommends candidates to the president. The committee is appointed by and responsible to the president.

CLOSING REMARKS

Dean Douglas J. Sylvester

***RECESSION OF FACULTY AND CANDIDATES**

*Audience should stand for these portions of the program.

At its founding, the College of Law at Arizona State University committed itself to innovation. While retaining important aspects of traditional legal education, Dean Willard H. Pedrick and the six well-respected faculty members whom Pedrick recruited to the desert from around the country, embraced a vision of the future of legal education, befitting a young school in a growing city.

Nearly from its inception, the College has provided extensive training in practical legal skills, offering students a firm foundation in lawyering before they become practicing attorneys. Today, the College of Law has one of the strongest legal writing programs in the country, offers a myriad of field placement opportunities, and has a variety of clinics that provide indigent members of the community with valuable legal assistance while offering hands-on experience in both litigation and transactional settings. Each year, approximately 90 percent of students participate in clinics, externships, or pro bono activities.

In the four decades since its founding, the College of Law, now renamed the Sandra Day O'Connor College of Law, has grown in size and national prominence, assembling an acclaimed faculty in the traditionally core areas of legal study while continuing to offer innovative approaches to legal education. The Center for Law, Science & Innovation is the nation's first and largest academic center focused on the intersection of law and science, and through it the College offers the country's only LL.M. in Biotechnology and Genomics, as well as innovative new programs in the Governance of Emerging Technologies; Personalized Medicine, Law & Policy; Public Health Law and Policy; Law and Sustainability; and Information and Communications Technology. The Indian Legal Program is arguably the leading program on Indian law in the country. It offers a strong curriculum, including the LL.M. in Tribal Policy, Law, and Government, the Certificate in Indian Law, and the Indian Legal Clinic, and trains students to be leaders in Indian Country. The College of Law's Center for Law and Global Affairs supports and inspires research, education, and practice regarding emerging forms of transnational governance that extend beyond the traditional paradigms of international law. The College of Law continues to reach further to provide opportunities for its students and graduates with innovative endeavors such as the creation of a nonprofit law firm, an employer outreach initiative, new international licensure programs, and a faculty and staff committed to student success.

The College of Law bridges the gap between theory and practice, and our faculty and students address the pressing public policy challenges of our time. In short, the Sandra Day O'Connor College of Law remains an innovator, building new models for 21st century public legal education in a dynamic, increasingly diverse, local, national, and global environment.

RECESSIONAL

The Barrett Story

Barrett, The Honors College at Arizona State University, is a selective, residential college for academically outstanding undergraduates. Named “the gold standard” for honors colleges in the nation, Barrett often has more nationally-recognized merit scholars than Princeton, Yale or Stanford.

The college is supported by a \$15 million endowment that is used exclusively to benefit honors students and fund their projects. Barrett students major in any field offered at ASU’s campuses - Tempe, Polytechnic, Downtown or West. Barrett students are members of a small community of scholars who have direct access to our deans and receive personalized attention from approximately 45 honors faculty fellows and 55 staff members who care about them as individuals. In addition to these full-time honors college personnel there are more than 1900 university faculty members who teach and mentor Barrett students across all four campuses each year.

The \$140 million Barrett campus in Tempe was designed by students, faculty and staff working with nationally-renowned architects. The Barrett facilities at all four ASU campuses function as their own small honors communities on the ASU campuses where students enjoy the amenities and resources of a large university. This unique arrangement is a model for higher education and has often been referred to as “the best of both worlds” by students who thrive in a small college atmosphere but appreciate access to large university programs like Division I athletics and high profile lecturers.

Student Opportunities

Barrett students take advantage of an array of opportunities that enrich the honors experience. They participate in study abroad programs that enable them to travel to foreign countries, immerse themselves in small classes taught by honors faculty, and experience different cultures and societies while earning honors credits. Barrett students receive record numbers of national and international graduate scholarships such as Rhodes, Fulbright, Truman and Marshall Scholarships. Top students from multiple majors live in a four year residential community and secure leadership positions or participate in a full range of academic, cultural, service, professional development, travel, wellness, arts, social, entrepreneurial, and sustainability programming. Barrett students engage in cutting edge research with distinguished ASU faculty or through special partnerships with the Mayo Clinic, the Biodesign Institute and Intel. Students are developing iPhone applications, building robots, designing games, or developing tools to improve healthcare, meet global energy needs, provide clean water, or secure data and information privacy. There are over six hundred internship opportunities developed exclusively for Barrett students. We have students working with Goldman Sachs, Microsoft, Google, and The American Heart Institute. Barrett students secure internships in the governor's office, local congressional districts, and the United States Senate.

Signature Events

Barrett hosts two signature events annually, the Centennial Lecture and the Rhodes Lecture. In 1985, the Flinn Foundation established an endowment to commemorate ASU's 100th year. The gift created the ASU Centennial Lecture, and in 1989 it provided the Barrett Honors College the resources to bring some of the world's most influential intellects to campus. The Centennial Lecture has become one of ASU's premier intellectual events featuring noted diplomats, scientists, playwrights, and authors. Each Centennial Lecturer has helped to strengthen the university and has provided students and community members with a memorable experience. Former Centennial lecturers include Edward James Olmos, dedicated actor, and community activist in 2010; Dr. Oscar Arias, Nobel Peace Laureate and two-time president of Costa Rica in 2011; and most recently, Sherman Alexie, a poet, short story writer, novelist, and performer who is highly regarded for his works, many stemming from his background as a Spokane/Coeur d'Alene Indian who grew up on the Spokane Indian Reservation.

The Rhodes Lecture is given by the John J. Rhodes Chair in Public Policy and American Institutions at Barrett. The Chair was created to celebrate the career in public service of one of Arizona's and the nation's most distinguished leaders. The Rhodes Chair is dedicated to deepening theoretical and practical understanding of the many voices and forces that influence public policy. The Chair honors the values of personal integrity, fiscal responsibility, respect for persons, and international farsightedness exemplified in the Hon. John J. Rhodes' career. The 2015 Rhodes

Chair was Dr. Mary Frances Berry, who served as chairperson of the U.S. Civil Rights Commission for more than four decades, and was the first woman to head a major research university, serving as chancellor at the University for Colorado at Boulder. In her inspiring lecture, Dr. Berry inspired students to continue the fight for equal rights and liberties for all Americans, and to spread the idea of peace, community and justice. Dr. Berry currently is the Geraldine R. Segal Professor of History at University of Pennsylvania in Philadelphia.

Barrett on all four campuses

In fall 2009, Barrett, The Honors College at Arizona State University, opened the nation's first comprehensive four-year residential honors college within a top-tier Research I university that underscores its standing as the premier honors college in the nation. On the Tempe campus, the nine-acre college includes resident halls for 1700 students, several classrooms, a community center with student lounges, activity rooms, computer labs, a fitness center, a multi-room dining facility with a refectory, café, and administrative, faculty and staff offices.

Multiple upgrades to the Barrett Honors College facilities on Downtown, Polytechnic and West campuses have taken place – featuring honors student lounges, libraries, kitchens, computer labs, student activity and study rooms, faculty and administrative offices, and honors residential communities.

Barrett at the Downtown Campus is home to about 600 honors students. The Barrett residential community, called “B-Town D-Town,” is located at Taylor Place at the heart of the campus and offers a living environment where students have easy access to ASU's downtown colleges and programs, as well as Phoenix's increasingly vibrant lifestyle.

Barrett at the Polytechnic campus gives students the feeling of studying at a small private college with the advantages of a large university. The honors residential community is unique among the ASU campuses – freshman honors students reside together on a floor of Century Hall, which opened in the summer of 2012 while upper-division honors students live in 2- and 3-bedroom houses in a special Barrett neighborhood on campus. Honors students also have access to a new dining hall and fitness facility.

Barrett at the West Campus provides the entire range of honors activities in a small liberal arts college setting. Barrett West students live and learn on the ASU West Campus with approximately 500 other residents. Honors students live in the new Casa de Oro, a residence hall that opened in fall 2012. The 5,000-square-foot Barrett Suite includes a computer lab, study rooms, a meeting area, a library, and staff and faculty offices.

With its outstanding programs, dedicated faculty and staff, and comprehensive facilities, Barrett is a national model for organizing resources to support the honors experience at all four campuses at ASU.

The Moeur Award is Arizona State University's oldest, continuing honor. It was established in 1901 by Dr. Benjamin B. Moeur and Honor Anderson Moeur, and is now sponsored annually by the Arizona State University Alumni Association. The award is presented at each Commencement ceremony to those individuals who have attained the highest academic standing in any four-year curriculum during their undergraduate years at ASU. All courses of the curriculum must be completed at ASU.

ABOUT THE COLLEGE OF HEALTH SOLUTIONS

Arizona State University established the College of Health Solutions (CHS) in May 2012 as part of its strategic initiative to build a new model for health education. The college has experienced rapid enrollment growth and developed a number of new degree programs to service its students' acute interests for opportunities in health education. The college is a dynamic, growing, inter-professional enterprise bringing together the social and natural sciences, and humanities in the name of health.

The multidisciplinary college includes the **School of Nutrition and Health Promotion, School for the Science of Health Care Delivery, International School of Biomedical Diagnostics, Department of Biomedical Informatics, Department of Speech and Hearing Science, Medical Studies** program, the **Doctor of Behavioral Health** program and **Executive Education**.

The college collaborates with academic units across the university as well as industry and community partners to drive change in health education, research and policy. The College of Health Solutions is developing innovative academic offerings and opportunities for team-based practical experiences to better prepare the next generation of health professionals looking to make a difference in confronting the global health crisis on a variety of fronts. Throughout each unit within the college, students have access to top-tier faculty, research facilities, and connectivity with allied programs committed to improvements in health outcomes and expanding patient access that cannot be found at other universities.

COLLEGE OF LETTERS AND SCIENCES

The College of Letters and Sciences provides students across ASU with the knowledge and skills to comprehend and effectively engage the changing world of the 21st century at local, national and global levels.

We offer graduate and undergraduate degree programs that prepare students for a rapidly changing marketplace, as well as foundational instruction in humanities, social and natural sciences, mathematics, and professional fields. Our exploratory and major and career exploration programs empower students to find a major anywhere at ASU based on their interests, career goals and personality traits. Faculty support knowledge enterprise development by advancing research, clinical and creative activities that promote discovery, innovation and human understanding. The school is guided by the principles of student success, strategic partnerships within the university and the community, and interdisciplinary inquiry.

Theory, creativity and applied learning are integrated as students build entrepreneurial opportunities both inside the university and in their communities. In addition, the school serves the citizens of Arizona by offering a variety of outreach programs that engage people in cultural events and lifelong learning. The school is home to the Center for the Study of Race and Democracy, which serves as a leading interdisciplinary, problem-solving venture committed to engaged scholarship, and information dialogue involving the topics of race and democracy.

COLLEGE OF LIBERAL ARTS AND SCIENCES

Serving as the intellectual heart of this vibrant university, the College of Liberal Arts and Sciences is engaged in redefining what is expected of the well-educated person of the 21st century. Creatively synthesizing teaching, research and scholarship that span the humanities, social sciences and natural sciences, CLAS offers a challenging environment of learning and discovery in which students and faculty aspire to personal achievement and collaborative problem-solving.

The College of Liberal Arts and Sciences, the largest at ASU, is structured to help students identify and focus their dreams and aspirations. The college is in actuality many communities within communities where students meet peers and faculty who share their interests and passions through a rich diversity of schools, departments, majors, programs, institutes, centers, laboratories, clubs and organizations.

Faculty members in the college are committed to providing each of our students with the best education that we can, recognizing that the pace and complexity of the modern world will ask successful citizens and leaders to reinvent themselves time and again. Any institution of higher learning can train a student for a first job. Our goal is to equip our students with knowledge and skills for a lifetime of success. Although we are continually innovating and adapting as a college, the liberal arts remain the best foundation for successful careers and deeply rewarding personal and professional lives.

The College of Liberal Arts and Sciences—*Transforming learning, discovery and lives*

HONOR CORDS

Some of our undergraduate degree candidates wear maroon and/or gold honor cords. These cords designate students who have completed at least 56 resident credit hours at ASU and who have attained the following grade point averages:

Summa Cum Laude = Maroon and Gold cords, 3.80 to 4.0 GPA

Magna Cum Laude = Gold cord, 3.60 to 3.79 GPA

Cum Laude = Maroon cord, 3.40 to 3.59 GPA

CLOSING REMARKS

RECESSIONAL

COLLEGE OF NURSING & HEALTH INNOVATION

The growth of ASU’s College of Nursing & Health Innovation reflects our desire to do more, serve more and sustain innovation. Our mission drives us to offer the highest quality academic, research and clinical practice programs so that we can produce the next generation of evidence-based health professionals who will excel as clinicians, teachers, health advocates and researchers.

Just as our research and teaching extend beyond our classroom walls, our vision of care and improved health outcomes reaches to local and global communities through our focus on the Triple Aim: improved quality of patient care, increased access to care, and reduced health care costs. We make this real in a number of different ways.

The challenges that permeate our health care system require innovative solutions that will positively impact patients and entire systems, locally and globally. Our curriculum and clinical experiences expose students to different types of delivery systems, equipping them with the tools and knowledge that will unleash their innovative thinking from day one. Interprofessionalism guides us as we build programs and curriculum to meet the needs of future health professionals. Our graduate and undergraduate programs continue to expand with a focus on program design and delivery that prepares graduates to work collaboratively within complex and dynamic patient care and health delivery systems.

While our programs encourage creativity and exploration, we place a premium on delivery. Whether through the college's research centers, where nationally recognized research leaders are impacting health agendas, or through our funded research collaborations and the community partnerships they support, our students, faculty and staff are making a difference on a broad scale.

Our online programs continue to expand access to the highest quality education as we focus on adopting new and better instructional tools while ensuring the rigor and quality that characterize the reputation of our programs. Through our partnership with the Arizona State Board of Nursing, our simulation center provides students with the skills needed to successfully transition to clinical environments. Our nurse-led clinic is one of more than 700 clinical sites where students gain valuable real-world experience.

As you graduate and embark on the next part of your journey, it is important to be mindful of the mentors, friends, family and loved ones who helped in reaching this significant milestone. We want to encourage our alumni to stay connected to the college, watch our developments, and participate in our activities and new programs. You -- our graduates -- can make a difference in the lives of students who follow in your path.

ABOUT THE PhD PROGRAM

Program Director: **Bronwynne Evans, PhD, RN, FNGNA, ANEF, FAAN**

The PhD Program in Nursing and Health Innovation, one of only four interdisciplinary programs in nursing in the country, provides an academic environment that fosters scholarship, critical thinking, and creativity. Scholars who wish to develop advanced leadership skills in innovation, research, education, health care delivery, and policy issues can learn to generate and apply knowledge across practice settings.

ABOUT THE DOCTOR OF NURSING PRACTICE PROGRAM

Program Director: **Donna Velasquez, PhD, RN, FNP-BC, FAANP**

The Doctor of Nursing Practice (DNP) degree was established at Arizona State University in 2008. The Doctor of Nursing Practice degree is a practice-focused degree that prepares graduates to practice at the most advanced level of nursing. This program prepares nurse practitioners and nurse leaders to positively impact health outcomes at the individual and organizational level.

ABOUT THE MASTER OF SCIENCE – NURSE EDUCATOR PROGRAM

Program Director: **Pauline Komnenich, PhD, RN**

ASU remains on the cutting edge in preparing nurse educators for 21st century nursing education through its innovative program. The MS, Nurse Educator (NED) concentration at the College of Nursing and Health Innovation is a pathway designed to prepare the new and experienced nurse to meet demands of the changing health care environment.

ABOUT THE MASTER OF SCIENCE, CLINICAL RESEARCH MANAGEMENT PROGRAM

Program Director: **Cris Wells, EdD, MBA, CCRP**

The Master of Science in Clinical Research Management (CRM) degree program prepares students to take the next step in their clinical research career by focusing their studies in the elements of leadership within the research industry. The CRM program is focused on management and leadership development in the pharmaceutical, medical device, research site, research institute, academic medical center, hospital, medical office, or other clinical research or drug development industry.

ABOUT THE HEALTHCARE INNOVATION PROGRAM

Program Director: **Cathy Lalley, PhD, MHI, RN**

The Master of Healthcare Innovation degree program (MHI) is an interdisciplinary degree designed to prepare students to design, implement and lead transformation in health care. Students in this fully online program come from a wide variety of professions including health sciences, architecture, nutrition, exercise, engineering, business administration, journalism, the humanities, all with an interest in leading innovation in health and health care. Students search for and implement sustainable solutions for today's health care issues with an eye to the future within an interdisciplinary environment.

ABOUT THE BACHELOR OF SCIENCE IN NURSING PROGRAM

Program Director: **Kimberly Vana, DNP, RN, FNP-BC, FNP-C**

The Bachelor of Science in Nursing (BSN) degree prepares beginning professional nurses who possess the theoretical foundation and the clinical competence to function in various health care settings. Graduates of ASU's nursing degree programs are prepared to respond to the vast and changing health care needs of individuals and communities. The Traditional and Year-Round Pre-licensure Nursing Programs are 8-semester programs, in which students advance to the upper-division clinical nursing program for their final four semesters. The Post-Baccalaureate Clinical Nursing Program (PBCNP) is available to students who have earned a Bachelor's degree in another discipline but desire to have a BSN degree.

ABOUT THE RN-BSN PROGRAM

Program Director: **Diann Muzyka, PhD, RN**

The online RN-BSN program builds on the knowledge and skills the student learned in their associate degree or diploma program, especially in the areas of evidence based practice, leadership and management, and community/public health. The interactive course assignments enhance the student's written and verbal communication skills, clinical reasoning skills, teamwork, and information technology skills. Students will integrate new knowledge into their nursing practice.

ABOUT THE CONCURRENT ENROLLMENT PROGRAM

Program Director: **Diann Muzyka, PhD, RN**

The Concurrent Enrollment Program (CEP) is designed for qualified nursing students who are interested in earning their BSN degree from ASU while simultaneously pursuing their Associate of Applied Science (AAS) in Nursing degree through a participating community college. The CEP is a rigorous program with a plan of study that enables students to build on the knowledge and skills learned in the AAS in nursing program.

ABOUT THE AMERICAN INDIAN STUDENTS UNITED FOR NURSING (ASUN) PROJECT

Program Manager: **Stephen Livingston, BES**

The ASUN Project is a grant funded through the Indian Health Service to recruit and retain undergraduate American Indian/Alaskan Native nursing students at Arizona State University. The ASUN Project started its 25th year the fall of 2014, and is a competitive national grant that ASU has been awarded since the grant's inception in 1990. The ASU College of Nursing and Health Innovation is currently one of only four schools nationally to be awarded this grant.

COLLEGE OF PUBLIC SERVICE & COMMUNITY SOLUTIONS

The College of Public Service & Community Solutions is made up of four schools and multiple research centers—all with a shared goal of advancing research and discovery of public value, and furthering the economic, social, cultural and overall health of the communities that we serve.

Our degree programs cover the spectrum of public service, including public policy, social work, criminology and criminal justice, nonprofit leadership, emergency management, community development and more. We are preparing a workforce to take on complex issues. At the same time, our students are making a difference today. Through service-based learning, they put ideas into action.

Our research addresses challenges that affect us both locally and globally. We are developing solutions to issues ranging from child welfare to neighborhood safety, city management to human trafficking, water scarcity to tourism development. Together, we bring creativity, systems-level thinking and entrepreneurial spirit to our mission of creating, sustaining and promoting dynamic, prosperous communities.

THE SCHOOLS IN THE COLLEGE OF PUBLIC SERVICE & COMMUNITY SOLUTIONS

The School of Community Resources & Development advances the social, economic, environmental and cultural well-being of our local and global communities through instruction, discovery and service. We provide nationally recognized interdisciplinary research expertise and innovative academic programs with community development as our foundation. Our focus areas include community sports management, nonprofit leadership and management, parks and recreation management, and tourism development and management. Together, we make communities better places to live, work, play and visit.

The School of Criminology & Criminal Justice is one of the most respected in the field. Our program is rooted in the study of the causes of crime and systemic response to it. The core of the program focuses on the theories of criminality and evidence-based practices for responding to crime through the lenses of the three inter-related structures—policing, courts and corrections—that collectively comprise the criminal justice system. We prepare graduates for leadership and policy positions at the local, state and federal level.

The School of Public Affairs develops outstanding public leaders; people who are committed to making a difference in our world and who are well prepared to meet the rigorous demands and substantial challenges of the future. We maximize our impact through transdisciplinary research, project-based education, collaborative community engagement and innovative solutions. The only public administration program in the Phoenix area to be accredited by the National Association of Schools of Public Affairs and Administration (NASPAA), we are consistently ranked among the top 20 public affairs schools in the country.

The School of Social Work is one of the largest and most diverse social work programs in the world. We are committed to promoting social, political and economic justice with special emphasis on populations of the Southwest. We prepare social work practitioners and scholars who are committed to enhancing individual, family and group problem-solving capacities, maximizing human potential, and creating a more just and humane society.

ABOUT THE HERBERGER INSTITUTE FOR DESIGN AND THE ARTS

The ASU Herberger Institute for Design and the Arts leads an exploration of the contemporary human condition through creative practice and research, bringing together a unique array of disciplines that allow for distinctive opportunities for collaboration. Continually striving to enable design and arts students to succeed beyond graduation, the Herberger Institute consists of the following five schools: Art; Arts, Media + Engineering; Design; Film, Dance and Theatre; and Music. More than 4,700 students are supported by over 675 faculty and faculty associates and 155 staff offering a total of 135 degree programs and concentrations. The ASU Art Museum supports research initiatives while diverse community engagement projects enable students and faculty to interact with the public through meaningful partnerships.

We encourage all of our alumni to continue to share their stories with us and to take an active role in the Herberger Institute Alumni Chapter. For more information on our alumni activities, please visit us on the Web at herbergerinstitute.asu.edu/alumni.

ENGINEERING AT ARIZONA STATE UNIVERSITY

The Ira. A Fulton Schools of Engineering, ranked in the top 50 U.S. engineering schools, are home to more than 300 faculty and more than 19,000 students. The Fulton Schools were awarded over \$89 million in externally funded research awards in fiscal year 2015.

In 2014-2015, the Fulton Schools of Engineering granted 3,076 undergraduate and graduate degrees. Today, nearly 49,000 alumni of the Fulton Schools are advancing the fields of engineering and technology in Arizona and around the world.

To produce the engineers and innovations needed to address society's changing needs, we have crafted a visionary blueprint for an engineering school that transcends traditional organization around degrees and disciplines, and fosters a transdisciplinary approach to teaching and research. Through our six schools, we offer 24 undergraduate and 32 graduate degree programs that encourage innovative collaboration across disciplines, with faculty and students alike focusing their efforts on developing solutions that will have significant, lasting impact on our local and global communities. In addition to online options for degree programs including electrical engineering, software engineering and more, we offer professional development programs like Six Sigma.

The School of Biological and Health Systems Engineering provides a rich, interdisciplinary curriculum that prepares students to use engineering and scientific principles and methods to develop instrumentation, materials, diagnostic and therapeutic devices, artificial organs or other equipment and technologies needed in medicine and biology. The school's biomedical engineering degree program strives to produce graduates with a broad-based education in both engineering and

the life and natural sciences, with a focus on improving the overall quality of global healthcare. Graduates from the biological design doctoral program are creative thinkers prepared to work at the intersection of biology, engineering and computing to advance human health and quality of life.

The School of Computing, Informatics, and Decision Systems Engineering is home to computer engineering, computer science, computer systems engineering, engineering management, industrial engineering, informatics and software engineering degree programs. From data to decisions, the school covers the spectrum for designing the modern, information-driven society, engaging in the fundamental activities of sensing, optimizing, controlling and communicating. Computing serves as the engine that drives this transformation, linking together the school's fundamental activities. The school is dedicated to creating new knowledge and technology that contributes to solving the major problems facing modern society.

The School of Electrical, Computer and Energy Engineering brings together university faculty, students and companies to develop collaborative relationships and solutions. The school's computer engineering and electrical engineering degree programs and research efforts are aligned with national and international efforts to address worldwide challenges in energy production and distribution, healthcare technology and delivery, sustainable development and economic growth, communications technology and information management and global security.

The School for Engineering of Matter, Transport and Energy leverages the synergy of engineering and science to develop new knowledge and technologies, and create innovative solutions to society's most pressing problems in energy, human health, public safety, exploration, environmental infrastructure and sustainability. Degree programs in aerospace engineering, chemical engineering, materials science and engineering, mechanical engineering, and solar energy engineering and commercialization are offered. The school gathers together a broad range of disciplines and world-class faculty members who are engaged in a cutting-edge research, all of which contributes to a unique educational experience for all of our students.

The School of Sustainable Engineering and the Built Environment provides a nexus for education and research that address the critical infrastructure needs of our society in an environmentally sound manner. The school offers a holistic approach in its degree programs, covering the engineering expertise of civil, environmental and sustainable engineering, the design and construction principles of construction engineering and the project management and leadership skills of construction management.

The Polytechnic School is organized into seven academic programs that offer a breadth of engineering and technology-related degrees. The programs thrive under the guidance of more than 100 faculty members with deep expertise and industry experience in the important technological challenges that society faces. The school is located in the dynamic, growing Gateway region on the southeast edge of the Greater Phoenix metropolitan area, and is home to some of the most advanced learning laboratories available to students on any university campus.

Ira A. Fulton

Chairman of the Board and CEO, Fulton Homes

Ira A. Fulton, founder and CEO of Arizona-based Fulton Homes, established an endowment of \$50 million in support of ASU's College of Engineering and Applied Sciences in 2003. The college was renamed the Ira A. Fulton Schools of Engineering in his honor. The gift has enabled the Ira A. Fulton Schools of Engineering to provide funding for scholarships, fellowships, research programs and investments in faculty, all integral to the school's goal to move from its position as a highly ranked U.S. program into the ranks of world-class institutions.

"With this endowment, we are building an engine of educational and economic growth that will endure for generations. It is a gift of opportunity, prosperity, social equality and hope." – Ira A. Fulton

ABOUT MARY LOU FULTON TEACHERS COLLEGE

WHY WE EXIST

ASU’s Mary Lou Fulton Teachers College creates knowledge, mobilizes people and takes action to improve education.

WHAT WE DO

Our faculty create knowledge by drawing from a wide range of academic disciplines such as cognitive science, sociology and psychology to gain insight into important questions about student experience and outcomes. How do children learn? How do different pedagogical approaches function with students of different learning styles and in varying socio-cultural contexts? How do specific educational policies affect student outcomes and teacher performance? What do we know about effective teaching and how can we apply that knowledge at scale in K-12 education?

Through our bachelor’s, master’s and doctoral programs we prepare and mobilize people to improve student experience and outcomes. In addition to preparing teachers who will thrive and remain in the teaching profession, our academic

programs prepare and support leaders, including school principals, policymakers and executive decision makers. Our PhD graduates join the faculties of elite research institutions, where their work adds to the global knowledge base about education. We also mobilize people globally by innovating new ways to exchange knowledge and best practices with an international community of scholars, educators, administrators and policymakers.

We take action by integrating use-inspired research and experiential learning, and by engaging faculty and students in effective programs that combine clinical training of educators with data gathering from the field. Our teacher and leadership preparation programs combine rigor with robust field experience and, crucially, maintain a large ecosystem of institutional relationships that provides meaningful environments for us to test, refine and scale best practices for improving education.

HOW WE DO IT

Consistent with the charter and goals of ASU, and in line with the design principles of the New American University, we hold to four core values in pursuit of our mission. We:

- Pursue excellence at scale to achieve impact
- Exercise leadership through innovation
- Champion diversity of people and ideas
- Share responsibility for the strength of communities

MARY LOU FULTON (1933 - 2015)

Anyone fortunate enough to know Mary Lou Fulton—to celebrate with her and take pride in students' accomplishments—is grateful to have had that privilege. So much of what we do at our college is an expression of her commitment to education and to providing the best possible opportunities for the greatest number of people.

We will miss her exemplary virtues of quiet persistence and enduring commitment, along with her contagious laugh, and ever-present smile. Her husband, Ira Fulton, rarely missed an opportunity to express his love for Mary Lou. It's a message he repeated often, most recently this past September when he spoke to our incoming first-year undergraduates at our "Camp Teach" orientation session in Prescott, Arizona.

She was a woman who loved her family, her children, grandchildren and great-grandchildren. She also loved other people's children and all her fellow human beings with a gigantic heart. Entrusted to manage an institution that bears the name

of Mary Lou Fulton, all of us at the college strive to be worthy of her legacy. She will always be the “first lady” of the Teachers College and our inspiration to be the best that we can be.

MESSAGE TO THE NEW COLLEGE GRADUATES

Congratulations on your extraordinary achievement! The faculty and staff of New College offer our sincere best wishes for your continued personal and professional success. We all look forward to seeing your work in the world; we know you will make your mark as an ASU New College graduate. Today, you join a prestigious body of New College and ASU alumni, who have shared in some of the same remarkable experiences. Please stay in touch with us by joining the ASU Alumni Association, so we can continue to celebrate your triumphs and share the journey of our new students with you. You can take advantage of special new graduate membership rates (\$25 annual or \$300 lifetime dues) and become an active member of the ASU Alumni Association at www.asu.edu/alumni.

ABOUT THE NEW COLLEGE

The New College of Interdisciplinary Arts and Sciences offers a nationally unique environment: a small college experience with the power of ASU's major research university resources. Working one-on-one with our cutting-edge faculty—often through our New College Undergraduate Inquiry and Research Experience program (NCUIRE), our students reshape the boundaries of knowledge in their fields of study. This prepares them for a future of reshaping the world outside of ASU.

New College was founded on a “new” way of thinking about the academy. Instead of reproducing the intellectual silos that separate fields of study in other institutions, our programs have been structured on the notion that if we break down the barriers between fields, we can think in more innovative ways, do more path-breaking work,

offer more effective solutions to real-world problems. From our Interdisciplinary Arts and Performance degree that teaches students many forms of artistic expression and then asks into what mode a concept should be born; to our Forensics degree that brings together fields like chemistry, psychology, and legal studies; to our Social Justice and Human Rights degree that explores sociological, historical, and contemporary cultural analyses of the issues, New College offers educational experiences that transcend more limited ways of thinking about the world.

The mission of New College is to prepare students to succeed in a globalized, diverse economy by providing them with solid disciplinary foundations that are coupled with an ability to think and act constructively across disciplines to discover answers to the complex problems that face society today and to create civic and economic well-being, within contexts ranging from the local to the global.

New College's programs build on the philosophy that inter-, multi-, and transdisciplinary education enhances our graduates' ability both to address the needs of business, industry, schools, and communities of this region and to meet the challenges of the twenty-first century. New College's Bachelor of Art and Bachelor of Science degrees include: American Studies; Applied Computing; Applied Mathematics; Applied Science; Applied Science—Cell and Molecular Biology Research; Biology; Communication; English; English—Secondary Education; Ethnicity, Race, & First Nations Studies; Forensics; History; History—Secondary Education; Integrative Studies; Interdisciplinary Arts & Performance; Interdisciplinary Arts & Sciences Life Sciences; Latin American Studies; Life Sciences—Environmental Sciences Concentration; Life Sciences—Forensics Concentration; Philosophy, Religion & Society; Political Science; Psychology, Psychology (Online); Religion & Applied Ethics Studies; Social & Behavioral Sciences; Social & Cultural Analysis; Sociology; Spanish; Statistics; and Women & Gender Studies. New College offers Master of Art degrees in Communication Studies, English, Interdisciplinary Studies, Social Justice & Human Rights, and Social Technologies and a Master of Science in Psychology.

ABOUT THE SCHOOL FOR THE FUTURE OF INNOVATION IN SOCIETY

Established in 2015, the School for the Future of Innovation in Society educates new generations of students to make innovation the object of systematic study. With our interdisciplinary faculty, students study the promises and challenges of new technologies and the big ideas that change our lives each day, and they explore how decisions we make today about innovations will transform the world around us.

We see our efforts and those of our students as part of a larger social fabric – local, regional, national, global – that informs our wants and needs about innovation. We are planning now for the kinds of futures that we want to inhabit. More information can be found at sfis.asu.edu.

ABOUT THE SCHOOL OF SUSTAINABILITY

Established in 2006, the School of Sustainability educates a new generation of scholars and practitioners and creates innovative modes of scholarship by bringing together leaders, stakeholders and people from multiple disciplines to develop practical solutions to the most pressing sustainability challenges.

The school offers graduate programs leading to Master of Science, Master of Arts, Master of Sustainable Solutions, Executive Master for Sustainability Leadership and Doctor of Philosophy degrees in sustainability, as well as undergraduate programs leading to Bachelor of Science and Bachelor of Arts degrees in sustainability. Degree programs focus on collaborative learning, transdisciplinary approaches and solution-oriented training to address sustainability challenges relating to areas such as energy and materials, water, ecosystems, urbanization, international development, social transformations, climate and food systems.

The School of Sustainability works closely with the Julie Ann Wrigley Global Institute of Sustainability, which is the hub of Arizona State University's sustainability initiatives. The institute advances solutions, engagement, education and research for a sustainable and prosperous future. Both the school and the institute initiate and nurture work on issues of sustainability across the university and collaborate with other academic institutions, governments, businesses and industries, and community groups locally, nationally and globally. WALTER CRONKITE SCHOOL OF JOURNALISM AND MASS COMMUNICATION

About the School

The Cronkite School is widely recognized as one of the nation's premier professional journalism programs. Rooted in the time-honored values — accuracy, responsibility, objectivity, integrity — that characterize its namesake, the school fosters journalistic excellence and ethics among students as they master the practical professional skills they need to succeed in the digital journalism world of today and tomorrow.

The Cronkite School's 1,700 students consistently lead the country in national competitions. Over the past decade, Cronkite has been No. 1 in the nation in the Society of Professional Journalists' Mark of Excellence competition and the Broadcast Education Association's Festival of Media Arts awards and has finished in the top 10 in the Hearst Journalism Awards each year.

Students are guided by a faculty that is made up of both award-winning professional journalists and world-class media scholars. In recent years, the school has added to its faculty such leading journalists as former Washington Post Executive Editor Leonard Downie Jr., BET Vice President Retha Hill, Minneapolis Star Tribune Editor Tim McGuire, Sacramento Bee Executive Editor Rick Rodriguez, Pulitzer Prize-winning journalist Jacquée Petchel, Denver Post News Director Kevin Dale and Knight Foundation journalism innovator Eric Newton.

The Cronkite School continues to lead the field of journalism education with its innovative use of the "teaching hospital" method, providing both unparalleled learning opportunities for students and important news content to the community, state, region and nation. Arizona PBS, one of the nation's largest public television stations, is now part of Cronkite, making it the largest media outlet operated by a journalism school in the world. Arizona PBS serves as a hub for the Cronkite School's full-immersion professional programs and a testing ground for new approaches in journalism.

Cronkite students participate in a dozen professional immersion programs, guided by award-winning journalists and communications professional, applying what they have learned in the classroom in real-world learning environments. Students cover the most important issues of the day from public affairs news bureaus in Phoenix and Washington. For Arizona PBS, they produce a nightly newscast that reaches 1.9 million households as well as a robust multimedia news website featuring in-depth regional stories. Students also report on sports from bureaus in Los Angeles and Phoenix.

Students in the Public Relations Lab develop campaigns for client companies, while Carnegie-Knight News21 multimedia journalists conduct national data-driven investigations into issues critical to Americans. In the Public Insight Network Bureau, students work with professional news organizations to deepen their connections to audiences, and in the New Media Innovation and Entrepreneurship Lab, they use digital technologies to forge the future of journalism.

This past year, more than 70 students in many of these professional immersion programs collaborated to create a statewide TV special on the deadly problem of heroin use that reached over 1 million viewers in January. “Hooked: Tracking Heroin’s Hold on Arizona,” produced by the Cronkite School in partnership with the Arizona Broadcasters Association, recently received the region’s highest TV honor, the Governors’ Award from the Rocky Mountain Southwest Chapter of the National Academy of Television Arts & Sciences.

Elsewhere at the school, the Donald W. Reynolds National Center for Business Journalism provides education and training to professional journalists and Cronkite Global Initiatives brings international journalists to the school for study and training.

All of these initiatives take place in a state-of-the-art building that is unparalleled in journalism education. ASU’s investment in the school has generated national and international attention from educators and media professionals who place the school in the top tier of all U.S. journalism schools. The Times of London, The New York Times and USA Today have pointed to the Cronkite School as a leading example of changes taking place at journalism schools across the country. These prestigious publications called the Cronkite School a pioneer, kindling a notion of new media that will shape how news is delivered and how people will stay informed in the future.

About Walter Cronkite

ASU’s journalism program was named in honor of former CBS News anchor Walter Cronkite in 1984.

The relationship started when Tom Chauncey, longtime owner of the CBS affiliate in Phoenix and a leading supporter of journalism education at ASU, contacted his old friend in an effort to advance the program. An endowment on behalf of the program was soon established and the school was named after “the most trusted man in America.”

Over the next quarter of a century, Cronkite lent much more than his name to the school. He was closely involved — advising leadership, guiding students and faculty and traveling to Arizona each year to personally give the Walter Cronkite Award for Excellence in Journalism to one of the nation’s top journalists. The most special relationship, though, was with “our students,” as Cronkite would always call them. Young women and men, some with parents barely old enough to remember Cronkite behind the anchor desk, lit up when he walked into a classroom. They hung on his every word as he thoughtfully answered their questions about the profession he so loved. They lined up just to shake his hand, and he loved every minute of it.

In what turned out to be Cronkite's last visit to ASU in 2007 before declining health prevented him from traveling, a group of 100 students gathered with just a few minutes of notice that Cronkite was in the building. He held them spellbound as he spoke about covering World War II, Vietnam, Apollo, Watergate and presidents from Truman to Reagan — and of how important “our school” was to him.

Although Cronkite died on July 17, 2009, before he was able to visit the new building, he remains an ever-present part of the school's heartbeat and direction. His legacy lives on in the spirit and passion with which the school teaches both the skills to do journalism in today's media environment and the time-honored ethics and news values necessary to do it in the manner that would make him proud. The Cronkite School has established a special memorial fund in Cronkite's name. For more information on the fund and to learn more about Cronkite's legacy and career, visit cronkite.asu.edu/rememberingcronkite.

About Our Graduates

The Cronkite School has more than 8,000 alumni throughout the Valley, across the country and around the world. Many are leaders in television, digital media, newspapers, radio, magazines and public relations.

In 1993, the Cronkite School inducted its first class into the Cronkite Alumni Hall of Fame. The charter inductees were Al Michaels ('66), an Emmy Award-winning sports broadcaster best known for anchoring “Monday Night Football,” and Bill Redeker ('71), an ABC News correspondent who covered the Middle East and the Far East during his 30 years with the network.

Other notable Cronkite Alumni Hall of Fame inductees include Becky Anderson ('94), CNN International anchor; Julie Cart ('98), Pulitzer Prize-winning Los Angeles Times reporter; Derrick Hall ('91), president of the Arizona Diamondbacks; Christine Devine ('87), news anchor at FOX 11 in Los Angeles; Mary Kim Titla ('85), founder of Native Youth Magazine; Ray Artigue ('76), president of The Artigue Agency; and Chip Dean ('77), director of ESPN's “Monday Night Football.”

Graduates of the school who are interested in joining the Cronkite School alumni chapter are encouraged to call 602.496.5555 or visit asu.edu/alumni. Stay connected to fellow alumni by registering at cronkitenation.com.

ABOUT THE W. P. CAREY SCHOOL OF BUSINESS

The W. P. Carey School of Business at Arizona State University is one of the highest-ranked and largest business schools in the United States. The school

is internationally recognized for its leadership in business education and for positively impacting the practice, science and art of management on a national and international scale. The school works to rethink the nature of business, engage the world, and create a better future.

More than 13,000 students attend the W. P. Carey School of Business, including about 50 National Merit Scholars and more than 100 doctoral candidates. The student body is especially diverse, including representatives from more than 90 countries.

The W. P. Carey School boasts an acclaimed faculty that includes four Academy of Management Fellows, two Fellows of the Society for Industrial and Organizational Psychology, an Association for Consumer Research Fellow, and a Nobel Prize winner in economics. Many faculty members are also on the editorial boards of academic journals and publications. The school boasts 11 well-known research centers and a research institute, and is internationally recognized for research productivity.

Both the school's graduate and undergraduate business programs are ranked Top 30 in the nation by *U.S. News & World Report*. The executive MBA program is ranked No. 13 in the world by *The Wall Street Journal*. The W. P. Carey School of Business is also known for providing excellent "return on investment" at both the graduate and undergraduate levels.

Undergraduate Bachelor of Science degrees are offered in nine areas, including accountancy, business data analytics, business entrepreneurship, computer information systems, economics, finance, management, marketing and supply chain management.

Undergraduate students also have the option of earning a Bachelor of Arts degree in business with a concentration in Chinese language and culture, communication, food industry management, global agribusiness, global leadership, global logistics management, global politics, human resources, law, public service and public policy, retail management, Spanish language and culture, sports and media studies, statistics, sustainability, technology, tourism management or urban policy.

The school's renowned MBA program is offered in four platforms: full time, evening, executive and online. Master's degrees are also available in accountancy, business analytics, finance, global logistics, information management, management, real estate development and taxation. The school ranks high for the quantity and quality of its doctoral graduates. The doctoral degrees include accountancy, agribusiness, economics, finance, information management, management, marketing, and supply chain management. Many managers and executives also come to the school for its highly desirable executive education certificates, placing a heavy emphasis on professional development.

The W. P. Carey alumni network spans the globe. Our 90,000 alumni represent highly regarded companies from diverse industries, including manufacturing, technology, retail, banking, accounting, entertainment, and food, as well as entrepreneurial firms and respected nonprofit organizations.

DOCTOR OF PHILOSOPHY

Jeffrey Westervelt Ackley *Biology*

Dissertation: Rich Lizards: How Affluence, Land Cover, and the Urban Heat Island Effect Influence Desert Reptiles Persisting in an Urban Landscape
Co-Chairs: Brian Keith Sullivan, Math and Natural Sciences Division; Jianguo Wu, School of Life Sciences

Ilaksh Adlakha *Mechanical Engineering*

Dissertation: Role of Defect Interactions with Embrittlement Species in Iron: a Multiscale Perspective
Chair: Kiran N. Solanki, School for Engineering of Matter, Transport and Energy

Claire Louise Antaya *Civil, Environmental and Sustainable Engineering*

Dissertation: Integrating Sustainability Grand Challenges and Active, Experiential Learning into Undergraduate Engineering Education
Co-Chairs: Amy Elaine Landis, School of Sustainable Engineering and the Built Environment; Kristen Parrish, School of Sustainable Engineering and the Built Environment

Elizabeth Atencia-Oliden *Spanish (Literature)*

Dissertation: Pedidos y quejas en la literatura peruana decimonónica: El caso de Mercedes Cabello de Carbonera
Chair: Carmen Urioste-Azcorra, School of International Letters and Cultures

Amanda Neeche Baraldi *Psychology (Quantitative Research Methods)*

Dissertation: Planned Missing Data in Mediation Analysis
Co-Chairs: Craig Kyle Enders, Department of Psychology; David Peter Mackinnon, Department of Psychology

Kaitlin E. Bountress *Psychology*

Dissertation: Parent and Peer Influences on Emerging Adult Substance Use Disorder: A Genetically Informed Study
Chair: Laurie Chassin, Department of Psychology

Stephen James Boyd *Psychology*

Dissertation: Individual Differences in Subjective Response to Alcohol: Pharmacokinetic and Pharmacodynamic Factors
Chair: William Robert Corbin, Department of Psychology

Ryan Joseph Brackney *Neuroscience*

Dissertation: The Temporal Organization of Operant Behavior: A Response Bout Analysis
Co-Chairs: Brian Smith, School of Life Sciences; Federico Sanabria, Department of Psychology

Gregory B. Broberg *Justice Studies*

Dissertation: Seeing is Achieving: Assessment Practice and Student Capital
Co-Chairs: Gray Cavender, School of Social Transformation; Nancy C. Jurik, School of Social Transformation; Vera A. Lopez, School of Social Transformation

Adrian Chavez *Physical Activity, Nutrition and Wellness*

Dissertation: Parent Outcomes from a Family-Based Behavioral Nutrition and Physical Activity Program: The Athletes for Life Study
Chair: Sonia Vega-Lopez, School of Nutrition and Health Promotion

Daniel C. Che *Civil, Environmental and Sustainable Engineering*

Dissertation: Optimization/Simulation Model for Determining Real-Time Optimal Operation of River-Reservoirs Systems during Flooding Conditions
Chair: Larry W. Mays, School of Sustainable Engineering and the Built Environment

Srivatsan Chellappa *Electrical Engineering*

Dissertation: Radiation Hardened Clock Design
Chair: Lawrence T. Clark, School of Electrical, Computer and Energy Engineering

Hailong Chen *Mechanical Engineering*

Dissertation: A Novel Nonlocal Lattice Particle Framework for Modeling of Solids
Chair: Yongming Liu, School for Engineering of Matter, Transport and Energy

Shiqin Stephanie Chong *Counseling Psychology*

Dissertation: Help Seeking Models for Asian International and American Students
Chair: Terence John Tracey, Counseling and Counseling Psychology

- Chia-Yuan Chuang** *Simulation, Modeling, and Applied Cognitive Science*
Dissertation: Improving Proctoring by Using Non-Verbal Cues During Remotely Administrated Exams
Co-Chairs: John C. Femiani, Ira A. Fulton Schools of Engineering; Scotty Dale Craig, Ira A. Fulton Schools of Engineering
- Chun-Jen Chung** *Computer Science (Information Assurance)*
Dissertation: SDN-based Proactive Defense Mechanism in a Cloud System
Chair: Dijiang Huang, School of Computing, Informatics, and Decision Systems Engineering
- Jesus Cisneros** *Educational Policy and Evaluation*
Dissertation: Undocuqueer: Interacting and Working within the Intersection of Sexuality and Immigration Status
Co-Chairs: Gustavo Enrique Fischman, Division of Educational Leadership and Innovation; Molly C. Ott, Division of Educational Leadership and Innovation
- Chase Lee Clow** *Communication*
Dissertation: Living the Experience of Whistleblowing: An Analysis of Organizational Whistleblowing through Creative Nonfiction
Chair: Sarah Amira De La Garza, Hugh Downs School of Communication
- Shayna Skelley Coburn** *Psychology*
Dissertation: A Multi-Method Examination of Mother-Infant Synchrony as a Predictor of Social and Emotional Problems
Chair: Keith Alan Crnic, Department of Psychology
- Wesley Alan Collins** *Construction Management*
Dissertation: Development of the Project Definition Rating Index (PDRI) for Small Industrial Projects
Chair: Kristen Parrish, School of Sustainable Engineering and the Built Environment
- Sayantan Das** *Chemistry*
Dissertation: Interfacial and Electrode Modifications in P3HT:PC61BM based Organic Solar Cells: Devices, Processing and Characterization
Co-Chairs: Terry Lynn Alford, School for Engineering of Matter, Transport and Energy; William T. Petuskey, College of Liberal Arts and Sciences
- Sumanta Das** *Civil, Environmental and Sustainable Engineering*
Dissertation: Synthesis, Characterization and Mechanical Behavior of a Novel Sustainable Structural Binder utilizing Chemistry of Iron Carbonation
Chair: Narayanan Neithalath, School of Sustainable Engineering and the Built Environment
- Robin Sue DeWeese** *Physical Activity, Nutrition and Wellness*
Dissertation: Designing a Short-Form Survey Instrument to Evaluate the Healthfulness of Corner Stores
Chair: Punam Ohri-Vachaspati, School of Nutrition and Health Promotion
- Sriloy Dey** *Chemistry*
Dissertation: Synthesis and Evaluation of Multifunctional Radical Quenchers for the Protection of Mitochondrial Function
Chair: Sidney Michael Hecht, Biodesign Institute
- Mahmoud Dinar** *Mechanical Engineering*
Dissertation: Problem Map: A Framework for Investigating the Role of Problem Formulation in Creative Design
Chair: Jami J. Shah, School for Engineering of Matter, Transport and Energy

THE ARIZONA STATE UNIVERSITY MACE AND PRESIDENT'S CHAIN OF OFFICE

In Medieval times, a mace was a hand-to-hand combat weapon. In about the year 1400 A.D., a mace evolved from a weapon to a ceremonial instrument used by academicians in rituals such as commencement and inaugurations. The oldest known ceremonial mace was that of the Faculty of Common Law of St. Andrew University in Scotland, used in 1438.

The Mace and Chain of Office are presented only at ceremonies in which faculty members are in full academic regalia, such as the Inauguration of the ASU President, University Commencement, Faculty Assemblies, Regents' and President's Professor Induction Ceremonies and Convocation.

The Mace is carried at the head of the procession and laid in a cradle, thus signifying the formal onset of the ceremony.

ASU's ceremonial mace and chain of office was created in observance of ASU's Centennial in 1985. Handcrafted by ASU Professor of Art, David Pimentel (1943-2004), the mace and chain was created with "austere elegance and traditional southwestern motifs." In keeping with these directions, Professor Pimentel constructed both items out of materials native to Arizona. The ASU Mace is a wood staff, approximately three and a half feet long, weighing eight pounds and made of hollowed and polished Mesquite.

The head of the ASU Mace has four sterling silver blades and is banded with copper, Morenci turquoise, and a silver ring on which the words Arizona State University are embossed. The turquoise inlay was cut and polished by Navajo jeweler Richard Charlie of Mesa. The ASU seal is embossed in silver on the heel of the mace.

The President's Chain of Office includes a silver rope woven from strands of hand-turned links, which holds a medallion six inches in diameter that reverses to reveal the ASU seal in gold on one side and the same in silver and turquoise on the other.

College Marshals Fall 2015

College Marshals consist of selected faculty members from each college at all ASU campuses. Selection criteria is left to the individual colleges, but faculty who have recently won awards or have received special recognition are given primary consideration.

Barrett, the Honors College — Dr. Laurie Stoff is Senior Honors Faculty Fellow at Barrett, the Honors College. Her research focuses on the intersections of gender and war, specifically, Russian women and the Great War. She is the author of a number of works on this subject. Her second book, focusing on nurses in Russia during the First World War and entitled *Russia's Sisters of Mercy and the Great War: More than Binding Men's Wounds*, has just been published by University Press of Kansas. Her first book, *They Fought for the Motherland: Russia's Women Soldiers in World War I and the Revolution* (UPK, 2006), examines the women who served as combatants during the First World War in Russia.

College of Health Solutions — Dr. Mac McCullough is an assistant professor in the School for the Science of Health Care Delivery. The school is focused on the development of patient-centered, safe and cost-effective health care systems. Dr. McCullough earned his Ph.D. in Health Sciences from the University of California, Los Angeles. His research focuses on the adoption and use of evidence-based approaches to population health and health care delivery. He is currently on the investigative team creating the National Safety Net Payment and Service Delivery Reform Center to help implement health care payments and service delivery reform.

College of Letters and Sciences — Ashley K. Randall, assistant professor, teaches in ASU's highly regarded graduate programs in counseling and counseling psychology. Randall is researching how romantic couples regulate stress in their relationship, leading to recommendations for clinical mental health treatment and outcomes. Her outstanding contributions to psychology in Arizona were recognized with the Arizona Psychological Association Faculty of the Year award in 2015. Randall serves on the editorial board of the *Journal of Couple and Relationship Therapy*, and *The Counseling Psychologist*. She earned a doctorate in family studies and human development at the University of Arizona and has been a Fulbright Fellow at the Institute for Family Research and Counseling in Switzerland.

College of Liberal Arts and Sciences — Dr. Bimonte-Nelson studies the impact of female hormones on the brain and behavior, with the goal to optimize brain and cognitive aging in women. Emerging findings from her laboratory indicate that hormone exposures across the lifespan modulate the brain and its functions. Her laboratory at ASU was initiated in 2005. She has received over two dozen grant awards to fund her research, including multiple grants from the National Institutes of Health. Dr. Bimonte-Nelson has over 65 medical journal publications and 12 book chapters, and she published her first book in 2015. She is a member of the Scientific Advisory Board for the Arizona Alzheimer's Consortium, is a scientific advisor for several companies specializing in women's health, and has received

numerous awards including the Arizona Alzheimer's Consortium Outstanding Young Investigator Award and the Outstanding Teacher Award from the City of Phoenix for mentoring high school students in the laboratory. One of Dr. Bimonte-Nelson's favorite community activities is encouraging young children to learn about science and college, teaching that "knowledge is power." She initiated the "ASU Brain Fair for Children," which through the years has brought over 1000 young children to ASU to learn about the brain and college, and has included hundreds of volunteers from ASU and its clinical partners throughout the valley. In 2009, she received tenure with promotion to Associate Professor with Exemplar honors, in 2010 she became the Division Chair for Behavioral Neuroscience in the Psychology Department, and in 2015 she was promoted to Full Professor. Dr. Bimonte-Nelson's greatest joy is inspiring the next generation of scientists and mentoring, and in the 10 years she has been at ASU she has been the proud primary laboratory mentor to ten high school student researchers, over a dozen Barrett honors thesis students, 50 undergraduate researchers, seven doctoral students, and several postdoctoral fellows.

College of Nursing and Health Innovation — Dr. Susan Thompson is a Clinical Assistant Professor in the College of Nursing and Health Innovation and teaches in the RN-BSN program. Her teaching focuses on nursing research, leadership and innovation. Her research interests include disease management in vulnerable populations and she also works as a Nurse Practitioner in the correctional environment. She was the 2015 recipient of the Mary Opal Wolanin Outstanding Dissertation Award for Excellence in Nursing with Vulnerable Populations. Dr. Thompson serves on the Faculty Evaluation Committee and as an Arizona Nurse Foundation Scholarship Reviewer. She is also active in community animal rescue and serves as a foster mom to animals awaiting adoption.

College of Public Service & Community Solutions — Edwin Gonzalez-Santin has dedicated over 40 years of his professional life to teaching, practice, and evaluating child welfare and behavioral health programs. As director of the Office of American Indian Projects (OAIP) in the School of Social Work, part of the College of Public Service and Community Solutions, Gonzalez-Santin works with a wide variety of American Indian rural and urban communities. His funded research projects have addressed the intersection of child welfare and behavioral health issues that impact American Indian families. He has also led efforts to recruit, retain and mentor American Indian undergraduate and graduate students in social work.

Herberger Institute for Design and the Arts — Professor Hood's studio practice focuses on concepts of Silence, Time and Space, Identity and experience and has been exhibited throughout the world including the International Print Center New York, NYC, Denver Art Museum, CO, Blue Star Art Complex, TX, LaGrange Art Museum, GA, Loyola University Chicago, IL, Kasene Kulturcenter, Denmark, Estonia National Library, Estonia, Contemporary Art Projects, Bulgaria, VACA Cultural Association, Italy, Polytechnic Institute of Technology, New Zealand, Pont Aven School for Contemporary Art, France, Alexandria Bibliotheca, Egypt, International Print Triennial in Krakow, Poland, and the Guanlan Print Biennial in Shenzhen, China. She teaches intaglio and digital processes for printmaking.

Ira A. Fulton Schools of Engineering — Edward Kavazanjian Jr., Ph.D., P.E., NAE, CBBG Center Director

Professor Kavazanjian was elected to the National Academy of Engineering in 2013. He has been honored by the American Society of Civil Engineers with the Karl Terzaghi Award (2011), the Thomas A. Middlebrooks Award (2010), and Ralph B. Peck Award (2009). He was the recipient of a Community Service Award from the Arizona Pavements and Materials Conference committee in 2012 and was selected as the 2009 Greater Phoenix Area eWeek Engineering Educator of the year. He is lead-author of the Federal Highway Administration guidance document on LRFD Seismic Analysis and Design for Transportation Geotechnical Features and Structural Foundations. He is a Past President of the Geo-Institute of ASCE and sits on the Transportation Research Board Committees on Seismic Design and Performance of Bridges and on Foundations for Bridges and Other Structures. He recently lead the effort to land the National Science Foundation Engineering Research Center entitled Center for Bio-mediated and Bio-inspired Geotechnics (CBBG) at ASU, which has an initial award for \$18.5 million over the next five years. He currently serves on the Board of Directors of the US University Council for Geotechnical Education and Research (USUCGER).

Mary Lou Fulton Teachers College — Dr. Margarita Jimenez-Silva is an associate professor at the Mary Lou Fulton Teachers College at Arizona State University. Her research focuses on preparing teachers to work with English learners, especially as it relates to teacher education pedagogy and curriculum. Her other research strands include Latino parent engagement and narrative studies. Her research has been published by journals such as *Harvard Educational Review*, *Childhood Education*, and the *Journal of Research on Childhood Education*. Dr. Jimenez-Silva has traveled to and coordinated curriculum and programs addressing the needs of English language learners in the U.S., as well as in Mexico, Panama, and Hungary. She is active in her community serving on various school boards and speaking on behalf of English learners and their families. Prior to entering higher education, Dr. Jimenez-Silva worked with Newcomer students as a middle-school teacher in Oakland, California. She began her work with pre-service teachers at Concordia University in Irvine, CA where she became an associate professor prior to her move to in She is herself a former ELL from the San Fernando Valley in Southern California.

New College of Interdisciplinary Arts and Sciences — Dr. Connie M. Borrer is a Professor in the Division of Mathematical and Natural Sciences in the New College. She earned her Ph.D. in Industrial Engineering from ASU in 1998. Her research interests include experimental design, measurement systems analysis, response surface methods, and statistical process control and monitoring, and has co-authored two books and over 60 journal articles. She is a Fellow of the American Statistical Association and the American Society for Quality, and is currently the editor of *Quality Engineering*. She is a championship canasta player and enjoys base jumping in her free time.

School of Sustainability — Dr. Carr Kelman studies policy dimensions of sustainability issues, such as how to manage the tradeoffs and foster synergies between biodiversity conservation and human development. She has studied Integrated Conservation and Development Projects in Indonesian national parks, the global trade in electronic waste, and the history of biodiversity conservation and international development. Her current research is on collaborative conservation projects here in Arizona. Two major themes in Dr. Carr Kelman’s research are the complex relationship between environment and development, and the role of governance, policy and institutions in creating more resilient socio-ecological systems.

Walter Cronkite School of Journalism and Mass Communication — Kevin Dale, is a professor of practice and executive editor of Cronkite News at Arizona PBS, a multiplatform daily news operation and innovation hub operated by the Walter Cronkite School of Journalism and Mass Communication. Dale has more than 20 years of senior-level leadership experience. As the second-ranking newsroom executive at The Denver Post, he directed coverage of the Aurora theater shootings, which won the 2013 Pulitzer Prize for Breaking News. He also supervised two other reporting projects that were Pulitzer finalists – an investigation into the use of a marijuana derivative in the treatment of children with seizures and coverage of a devastating 2012 Colorado wildfire. Under his leadership, the Post became one of the nation’s most digitally forward newspapers, with a robust presence on the Web, mobile devices and social media.

W. P. Carey School of Business — Edward Schlee has a BA in Social Science from the University of North Texas and a PhD in Economics from the University of Illinois. Emeritus College — Richard (Dick) Jacob was born in Salt Lake City, Utah, and received his BS and PhD degrees in Physics from the University of Utah. He joined the faculty at Arizona State in 1963 and retired as Professor Emeritus in 2001. During his tenure, he served a five-year term as Chair of the Department of Physics and Astronomy. He was also Director of the College of Liberal Arts and Sciences Honors Program, 1976 – 1978. He served a term as president of the independent Faculty Association and chaired the Steering Committee which founded the University Club. He also served as the first president of the University Club Board of Directors. In 2004, he became Founding Dean of the Emeritus College at ASU.

HISTORY OF THE ACADEMIC COSTUME

The present-day academic costume seemingly originated at Oxford and Cambridge Universities in the 1300s. As the universities passed from ecclesiastical control, brighter colors distinguished the academic robe from the drab clerical gown. Colonial American universities based their academic regalia on the British system.

In the 1880s, a student movement centering in New England investigated the establishment of a “senior badge,” to improve commencement week exercises and revive the traditions of university life. In 1893, an intercollegiate commission established a uniform code for caps, gowns and hoods for the various degrees.

Of the costume’s three components, the hood is the most interesting. Originally it had three uses: as a head covering, as a shoulder cape, and as a bag in which alms could be collected. It is mentioned as early as 1480 in clerical literature. When large wigs were in vogue in Britain, the cape part of the hood was split in front and a narrow neckband inserted. The entire cape and hood was allowed to fall back as it is today, and it was never restored to the original style.

Following is a list of the hood and tassel colors established by the Intercollegiate Code to represent departments of learning:

Architecture	Blue-Violet
Agriculture	Maize
Arts, Letters, Humanities	White
Business Administration, Commerce, Accountancy	Sapphire Blue
Dentistry	Lilac
Economics	Copper
Education	Light Blue
Engineering	Orange
Fine Arts	Brown
Forestry	Russet
Home Economics	Maroon
Journalism	Crimson
Law	Purple
Library Science	Lemon
Medicine	Green
Music	Pink
Nursing	Apricot
Oratory (Speech)	Silver Gray
Pharmacy	Olive Green
Philosophy	Dark Blue
Physical Education	Sage Green
Public Administration, including Foreign Service	Peacock Blue
Public Health	Salmon Pink
Science	Gold-Yellow
Social Science	Citron
Theology or Divinity	Scarlet
Veterinary Science	Gray

Black tassels are correct for all degrees,
and colored tassels are worn only by preference.
Gold metallic tassels may be worn by doctors or presidents of universities and colleges.
